LAUNCHING OF THE GIANT LINER "QUEEN MARY"

Clydebank, Glasgow, Scotland — The Queen christened the giant new Cunard White Star liner 534 the "Queen Mary" as the great ship started down the ways to the water

The Queen Mary, which it is believed will be the new queen of the seas, slid down successfully in a perfect launching

The choice of the name of a living queen for a christening was most unusual Night up until the moment of the actual christening, no one had announced what the great ship's name was to be and the suggestion "Britannia" rulled a favorite

The launching followed a short speech by King George The Prince of Wales was present besides a multitude of other notables.

After the welcoming speeches to the king and queen His Majesty replied

"I thank you for the loyal address of welcome to us. As a sailor, I have deep pleasure in coming here to watch the launching by the queen of this great new mercantile ship

"The sea with her treasures will not readily be bridled She is stronger than we, however, and the science that has done much to make the struggle with her more equal

"It is well that more than 100 years since Samuel Cunard founded a service of small wooden paddle steamers for carrying mails across the Atlantic to America Those first Cunard ships were of 1,150 tons A few people now alive must have in their childhood heard grand those ships spoken of with wonder as evidence of man's mastery over nature

"Today we come to the happy task of sending on her way the stateliest ship now in being. I thank all those here and elsewhere whose efforts honorary and commercial or humble have helped to build her."

His Majesty remarked that for three years his uncompleted hull had lain on the stocks, until a government grant enabled resumption of the work

"We know full well what misery a silent dockyard may spread among a seaport, and with what courage that misery has been endured," the king said. "During those years when work upon her was suspended, we grieved to see that suspension meant to thousands of our people

"We rejoice that with the help of my government it has been possible to lift that cloud, and to complete this ship.

"Now," with hope of better trade on both sides of the Atlantic, let us look forward to her playing a great part in the revival of international commerce.

Aftermath Of Yacht Race

Will Not Enter Another Challenge, Says Sopwith

Newport, R.I — Endeavour the Iron sloop which completed an unsuccessful but impressive bid against Rainbow for the America's cup is dead for sale

Her owner T O M Sopwith said emphatically I am not selling Endeavour, when he was advised of reports that a syndicate was afoot in Nova Scotia for a group of Canadian yachting enthusiasts to purchase the blue-bill yacht and challenge the United States for the America's cup Sopwith said there was no reason why he should sell the craft

She is going back to England, side of a fortnight for a visit and going to race her next season in England

While Sopwith has finally and he will never challenge again there were many here who held to the opinion that Endeavour would be forthcoming next season

The 1934 races most notable for the hostility of the spectators, it is by the chief topic of conversation among yachting circles and there was an amazing agreement of opinion This year Mildred points out which there were no serious incidents, and that Endeavour was a faster boat than Shamrock and showed superior seamanship was the factor that enabled the United States boat to overtake and pass the English challenger

Those who argued Britain would again challenge for the cup held that the failure of Endeavour to show the fine showing of the Sopwith boats

It was believed the Polish "Barsnawa" (Warsaw) crossed by E Burzynski and J Zakrzewski, which landed near Ramat Russia was the winner having covered approximately 750 miles

The "Kosciuszko," piloted by Captain Franciszewski Wysok, which landed near Voronezh, Russia was believed to have taken second place

The third Polish balloon, the "Polonja" burst and fell into a lake some 300 miles north of Leningrad. Finland Its chances for third place were believed good

All the four back flight have been reported safe

Sigsa Amnesty Decree

King Victor Emmanuel Releases Many Short Term Prisoners

Rome. King Victor Emmanuel celebrated the birth of his grandaughter, Maria Pia, by signing a decree of amnesty liberating all prisoners sentenced to two years or less in jail

Although the amnesty does not apply to political offences and certain heinous crimes, it includes many military offences and will result in the release of many thousands of prisoners.

Not only that, the amnesty cuts two years off sentences of more than two years' duration.

28th Battalion Reunion

Association Celebrates 20th Anniversary Of Mobilization This Year

"First call" has sounded to members of the 28th North West Battalion Association for the annual reunion

This year the battalion celebrates the 20th anniversary of its mobilization for overseas.

Arrangements are now being made for the annual reunion to be held at the Kitchener hotel, Regina, on Saturday, November 2.

Announcement was made of appointments of committees in charge of arrangements under the chairmanship of Colonel J. A. Clark. The committee is composed of: Colonel A. C. Styles; Major G. Fraser Stewart, Colonel James McArs, Major Walter McInnis, Captain P. O. Harrodence, K. C. Hill, L. G. Gerrard, P. Hood, H. Bicknell, F. Cretney, P. Tappin, R. Kramer, R. C. Wallace and A. Banks.

Brigadier-General J. F. L. Embury, commander of the unit of mobilization and in France and Flanders, is associating himself with the reunion.

Sub-committees have been appointed as follows: Finance, Col. A. G. Styles, A. Banks, C. Webster; dinner, H. C. Hill, Major G. Fraser Stewart, P. Tappin, P. Hood, R. Kramer; programme, Major Walter McInnis, K. D. Walker, J. V. Douglas, P. Harrodence, H. C. Hill; ticket and attendance, H. C. Hill, L. G. Gerrard, H. Bicknell, R. Kramer; publicity, Colonel James McArs, F. Cretney; church parade, Brigadier-General Embury, Captain P. Harrodence.

Members of the battalion are requested to communicate without delay any intention to be present. Such intention should be forwarded to F. Cretney, secretary of the reunion committee, 2004 Dewdney avenue, Regina, or J. V. Douglas, secretary of the Battalion Association, 3330 Eighteenth avenue.

Trapper Found Dead

Skeleton Flag On Island Failed To Attract Attention

Vancouver.— A white distress flag hanging from the front door of an ornate cabin at the south end of Cortes island, failed to attract aid for George Ramanna, aged 55, Whom Warden Roy E. Allen, of Powell River, B.C., visited Ramanna's cabin September 21, he saw the signal on the door and found the owner lying face down on the floor. He had been dead more than a month from natural causes.

Kidnapping Menace

HON. HERBERT W. WHITE.

Following an epidemic of kidnapping in the United States, Bishop White, who recently resigned as Bishop of Honolulu, is the General Synod of the Church of England in Canada has granted extended a request for a leave of absence to enable him to take part in the Far East.

Win Balloon Race

Hedwig Poland Has Swept Honors In Competition

Warsaw. Poland's entry beat to the 22nd annual Gordon Bennett balloon race apparently has a sweep on that competition

Official results will be delayed several days, it was announced pending the arrival of the Russian air landing boards

It was believed the Polish "Barsnawa" (Warsaw) crossed by E Burzynski and J Zakrzewski, which landed near Ramat Russia was the winner having covered approximately 750 miles

The "Kosciuszko," piloted by Captain Franciszewski Wysok, which landed near Voronezh, Russia was believed to have taken second place

The third Polish balloon, the "Polonja" burst and fell into a lake some 300 miles north of Leningrad. Finland Its chances for third place were believed good

All the four back flight have been reported safe

Making World Tour

Montreal The freighter City of Ranaville, which sails from Montreal October 6, will be the first vessel out of this port to make a complete round-the-world circuit. The ship will go through the Panama Canal to the east and will return by way of the Suez Canal and across the Atlantic.

May Reduce Exams

Toronto — Ontario department of education plans to reduce the number of student annual examinations it was announced by Duncan McArthur, deputy minister of education The object is to lower costs and may students a certain amount of work

Kidnapping Menace

HON. HERBERT W. WHITE.

Hon. Arthur Roebuck Addresses Conference In New York

New York Hon Arthur Roebuck, attorney-general for Canada had before law enforcement and crime prevention authorities of the United States, a plan designed to eradicate the growing menace of kidnapping [illegible]

The law's reply to challenges from kidnappers, he declared, should be certainty of apprehension and make the imminent unprofitable This would be accomplished by making it illegal to pay a ransom and by welding all police authorities into a mobile unit which could be stretched out in any direction at sudden note.

Mr Roebuck speaking at the New York Herald Tribune conference on current problems of 1934 emphasized his opposition to what he called centralization of police authority "and the reorganization of our civil officials on the basis of a standing army." But what he thought was required was gen raising, and generalization of the modern unified control.

There was no need for centralized manage ment of all our forces, he said, but only centralized command and [illegible] the basis of a unified criminal investigation department.

He told of his plans to submit at the next sess on of the Ontario legislature measures designed to widen authority of this branch of the Ontario Provincial Police

He also told of his preparations to submit to the legislature a proposal which would "entrust the executive with power to supervise the bank accounts and other resources of relatives friends and other persons while they are subject to the pressure of such illegal demands and by so doing thus forcibly prevent payment of ransom"

Mr Roebuck agre d such measures might prove hardship to relatives of a kidnapped victim but he expressed the conviction that if plotters knew in advance a ransom could not be paid and such payment would be prevented by law authorities, the relative would not have been kidnapped It is not new that the state should ask individuals to bear hardship for the common good".

Returns To England

Premier Ramsay MacDonald Much Improved After Long Holiday

St John's, Nfld In this old Newfoundland capital, Premier Ramsay MacDonald of Great Britain delivered his farewell address to the new province British Columbia is willing to discuss the matter of wages for the whole of Canada lower than it feels are right, stated the minister.

Handle Poultry And Eggs

Marketing Plan To Regulate Sale May Be Considered

Ottawa. — Submitted by Western livestock and poultry boards, the Dominion marketing board had under consideration a marketing scheme to regulate the sale of poultry and eggs from Manitoba, Saskatchewan and Alberta. A possibility exists the scheme for poultry may be adopted in time to handle the fall marketing

Another scheme emanating from the west also is before the board

Both schemes are presented by F. P. Robin, president of the Saskatchewan Livestock Producers' Co-operative Association; G. H. Hess, Regina lawyer, and W. J. Landreth, Winnipeg, of the Canadian Poultry Pool

Will Represent Canada

Ottawa.— Rt. Hon. Arthur Meighen, government leader in the senate and member of the cabinet without portfolio, will attend the centennial celebrations at Melbourne, Australia, next month, as representative of the Empire Parliamentary Association and of the Dominion government Hewill sail from Vancouver on October 30.

Has Long Distance Phone Habit

London. Over a world-wide network telephone network the Sydney, Johannesburg, Bombay, New York and London branches of a well known British engineering firm were linked up last week for purposes of a conference The voices came over distinctly and the conference was voted a success.

REQUEST OF RUSSIA CAUSES STIR IN LEAGUE

Geneva — Russia's surprise move to get the council of the League of Nations to strike a balance on disarmament apparently had stirred up a [illegible]

Because of the "dynamite" contained in Foreign Commissar Maxim Litvinoff's request that the council obtain a report on whether the disarmament conference can be successfully resumed, efforts were made to induce him to withdraw it

Statements as some quarters were known to be supplemental but a report from Arthur Henderson, president of the disarmament conference might blame failure of the conference on Germany's withdrawal

The Russian request inevitably would raise the question of the alleged re-arming of Germany in violation of the treaty of Versailles

a question some countries are desirous of avoiding

Litvinoff's proposal would thrust the whole question of disarmament back into the lap of the league council, which then would be responsible for choosing the path leading to disarmament The proposal was contained in a letter to Richard Sander president of the league assembly

Wants To Keep Control

British Columbia Reluctant To Surrender Power Over Labor

Victoria - With what he considers higher wage standards and labor conditions in effect in British Columbia than in other parts of Canada, the province would be reluctant to surrender control over its minimum wage and labor regulations to the Dominion authority Hon. G H Pearson, minister of labor, stated

According to the estimate of Premier T. D Pattullo, provincial British Columbia have been increased $500,000 monthly by minimum wage scales put into effect in the province during the present year.

Mr Pearson was speaking of the report that the Dominion might propose taking over control of wage scales at the coming Dominion-provincial conference. The minister is in agreement with the idea of having wage legislation adopted throughout Canada but is opposed to the Dominion setting authority as the province British Columbia is willing to discuss the matter of wages for the whole of Canada lower than it feels are right, stated the minister.

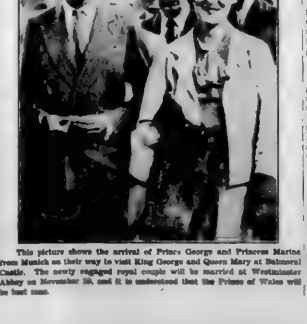
THE ROYAL COUPLE TO WED IN NOVEMBER



This picture shows the arrival of Prince George and Princess Marina from Munich on their way to visit King George and Queen Mary at Balmoral Castle. The newly engaged royal couple will be married at Westminster Abbey on November 26, and it is understood that the Prince of Wales will be best man.

Plans For Producing Valuable By-Products From Wheat Surplus Are Being Considered

Plans for producing valuable by-products from Canada's wheat surplus are being earnestly considered by a committee of the Canadian Pulp and Paper Association, headed by Mr. Gill (Montreal).

Dr W Boyd Campbell, consulting engineer, attached to the board presented a memorandum to the committee, and that in Chief by an engineer worked out in detail and recommended to producing a valuable substance known as nanocellulose (pentosan) from wheat and added the claim that the establishment of converting wheat into more costly products had only been scratched.

"If the Dominion," he said, "were to spend a small fraction of the money it has spent on providing transportation and handling facilities for the Canadian wheat crop on research for new markets and new uses of wheat, I believe the wheat surplus would no longer become a Republican bogey. I would suggest the Dominion government include in the budget, as a start in the right direction for the year, $500,000 to be used in this research over a period of five years."

The nanocose photograph being made in China, of which Chinese have sold between $1,000,000 and $1,000,000 worth annually, was said to exactly a rare chemical. It is used in China and Japan much the same as sugar and salt are used here.

Canadian wheat, with its comparatively high content of protein is the best wheat for manufacture of this substance, the scientist said.

Wheat worth two cents a pound was thus transformed into a substance worth from $2 to $3 per pound.

Lobsters Will Occupy Historic Old College

Show Of Asiatic Relics Bought By Henry Ford

The only home Anne Boleyn ever owned a cottage near Chelmsford, England has been bought by Henry Ford.

He is spending $1,200 on having it rebuilt as it was 400 years ago, when King Henry came down from London to see the wench-cat who changed the course of English history.

Then it will be divided into town cottages, to be occupied by laborers on Mr Ford's farm. One of Mr. Ford's farm workers lives there now.

Ford's lodge - Anne's successor was often spotted Rolls- stands back in a field behind a tangle of country lanes.

It was here, then one day's march, now an hour's ride, from London, that the Crusaders of the middle ages picked their first camp on their way to the Holy Land.

And it was here that M. Livermore, a south country shepherd, brought his flocks to graze six years ago. Down below - in the cellar, he found an underground passage leading to the castle across the fields. It was along this dark passage that Henry came to visit pretty Anne Boleyn. To-day the castle is a girls' school. Mr Livermore gave up his flocks to work for Mr Ford.

Electric Eye Lights City

Turns Illuminations On Each Night At Proper Time

Experiments in connection with long-distance control of street lighting systems have been completed by the Stockholm Electric Light and Power Company of Stockholm, Sweden, and satisfactory results obtained. A photo-cell, which is affected by light, announces the time for switching the street lighting system on and off. The "electric eye" gives the alarm irrespective of the time of day or night when the switch should be thrown in or out.

The only plausible reason for the proprietor's house is that the trade grow in customs like plant branches of grapes.

Annual world production of silver is about 200,000 ounces, the bulk of which is used by the chemical industry.

Holding Hens Unsightly

Outlawed Henhouses Are A Blot On Any Street

Alderman Allan Tame, of London, may have been joking when he brought the matter up, but we quite agree with him when he points out that measures should be made to tear down or cover up the henhouses after the chaos is over. The same thing should be done in the case of political candidates and others who make use of this medium of vaunting the public. We can't think of anything more unsightly than tattered billboards telling of an event that is "dead and buried." Border Cities Star

By Ruth Gayre

500

NEW AND LOVELY FALL MODES, THAT SUITORS YOU'RESULLY SHORT DOWN THE RACK

You know that Paris is using pearls and pearls of expression that have the appearance of crushes, for fall dresses.

And here's a delightfully smart example, and extremely easy to make it quickly.

It is a watermelon (an off-red) woolly rayon with printed white frocks. The deep yoke and belt are of plain dull bengaline silk in the same watermelon shade. The buttons are black linen.

It's so unusual, and high pressed looking, you'll just love it.

Black crepe marocain would also be attractive for it with the belt of self-fabric. Make the yoke of the dull black satin. Have the buttons covered with the satin. Instead of in black satin, it's also fashionable in black.

Style No. 500 is designed for sizes 14, 16, 18 years, 36, 38 and 40 bust. Size 16 requires 3¼ yards 39-inch material with ¼ yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Livestock Production In Canada

Increase In Exports To United Kingdom Is Satisfactory

The fact that every province in Canada is well adapted to the production of livestock gives that industry a very basic person the Dominion. Climatic conditions are generous meat eaters, consuming in 1928 an average per person of 74 pounds of pork, 56 pounds of beef, 10 pounds of poultry and 4 pounds of mutton and lamb. Each Canadian, on the average, supplies himself annually with 6 pounds of butter, about 2.2 pounds of cheese, and more than 21 dozen eggs. The country has been marked in therefore a large order for the Canadian livestock, dairy and poultry industries, and considerable contributions are also made to foreign trade.

During 1928 there was an increase in exports of live cattle to the United Kingdom, the total for the year being 58,317 head compared with 16,566 the previous year. About 10,000 head of cattle were exported to other countries. Exports of beef in 1928 amounted to over 10 million pounds compared with about 4½ million for the previous year, and exports of pork jumped from 16 million to 79 million pounds.

The estimated number of meat and dairy animals in Canada as at June, 1928, were: Milch cows, 2,927,000; other cattle, 3,162,000; sheep 2,360,000; swine, 3,260,700. All classes of poultry numbered over 30,000,000. The gross agricultural wealth of Canada in 1923 was estimated at $5,290,964,000 of which $603,125,000 was represented by livestock and $33,616,000 by poultry on farms.

It is estimated that at least 3,000 hands weekly are required to supply the retail butcher trade at Montreal. The supply is short of the demand.

More than 1,000 Japanese shops have been equipped with radio telegraph apparatus.

Outbreak Of Pale Western Cutworms Of Unusual Severity Forecast After Annual Survey

Should Have Abundant

British Henhouse Registered Pullet-Body Campaign For Chief Product

In this age when so much depends on Canadian agriculture, the sudden decline in the use of chewing gum can financially embarrass everybody and throw out of kilter the conveyances of a "tiny nation."

For a number of years the people of British Honduras have been subsisting mainly upon the proceeds of the sale of chicle, the raw material out of which chewing gum is made. When the depression started people began cutting down on things that weren't absolutely necessary. Chewing gum came under that category. Consequently the exports of chicle dropped and that colony is reported to be facing a financial crisis due to the loss of trade.

Now the citizens of British Honduras must do something else to buy the "stuff" from the other. They have decided to develop their banana, citrus fruit, and hardwood exports in order to avoid bankruptcy.

Apparently the British Honduranas are not commercial enough. Some one noticed that the exports of chicle were on the down grade, they should have staged publicity stunts to boost their business. For example contests to see who can stretch it the farthest and who can blow the biggest wad would no doubt increase the sale of gum and help the colony's trade. Perhaps it is not yet too late to try these suggested stunts.—Hamilton Herald and Times.

A man may not be too old to learn but too old to realize it

Two pictures, of the same subject and setting; one made with the lens wide open and the other with the lens stopped down. Note that there is no detail at all in the background of the snap made with wide lens opening, while the background is very sharp in the one made with the lens stopped down. If it's detail you want, cut down the lens opening!

PRACTICALLY all cameras, with the exception of a few extremely simple models, have some means of varying the amount of light passing through the lens. Why?

Well, why do you need to squint in bright sunlight? Simply because there is so much light in the sun that, unless you squint, your eyes cannot distinguish details; in the dark, your eyes dilate in order to take advantage of every available ray of light.

Cameras and eyes are much alike. Unless you control the amount of light entering your camera lens, you will almost certainly overexpose, which means in bright daylight and underexpose in the dark, with the loss of detail in either case.

Get out your camera and look at the lens. If you have a fixed focus camera, you will find that the lens opening, or diaphragm, has two possible positions, one small and one large. Be sure for use when the light is very limited, in dull days, or other unfavorable conditions and the smaller diaphragm opening for use in bright sunshine. If your camera has from 3 to 6, giving you more opportunities to control the amount of light passing through the lens.

The f.stop system of diaphragm control is the "f" system, and is used by most cameras. In this system "f" represents the ratio between the lens opening and the focal length of the lens in use. The f.stop rules are sure that the lens is f.stop rules are sure that the lens is stopped down to the same degree as the f.stop rules are sure that the lens is f.stop rules are sure that the lens is f.stop rules are sure that the lens is

PROPOSES FORMING CANADIAN WHEAT INSTITUTE

Proposals for forming the Canadian Wheat Institute as a national body to conduct work in the interests of Canadian wheat were endorsed by the annual convention of the Canadian Chamber of Commerce, which met in Winnipeg on September 11th, 12th, and 13th. The followed an address by Mr. R. S. Law, president of United Grain Growers Ltd., in the course of which he dealt with the need for putting a new force behind the sale of Canadian wheat and showed how through the proposed Institute, advertising, commercial research, scientific research and other efforts might be brought to bear towards the enlargement of outlets for Canadian Wheat.

The resolution which was subsequently passed by the convention of the Canadian Chamber of Commerce read as follows:

"Realizing the importance of Canadian Wheat production to the prosperity of Canada, the chamber has been gratified to learn that those directly interested in the production and marketing of Canadian wheat have under consideration the organization of a Canadian Wheat Institute as a national body to stimulate the marketing and use of wheat in the markets of the world. The chamber extends its closest co-operation in this endeavor."

WALKER NOT TO RUN IN VICTORIA

The rumor that he intends to run at the next provincial general election on the Liberal ticket for the Victoria riding, was spiked Monday morning by Frank A. Walker, formerly of Fort Saskatchewan, who represented this riding for 16 years prior to 1921.

Mr. Walker stated Monday that he did not choose to run, although he admitted that considerable pressure had been brought to bear to have him consider taking a nomination in the riding.

The total amount of branded beef sold in Canada during the month of June was 3,607,747 pounds.

FORT SASKATCHEWAN RECORD

VOL. 18 No. 27 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, OCT 10th, 1934 $1.50 PER YEAR IN ADVANCE

J. A. McDougall, President Lamont Insp. Schools

J. A. McDougall, Brudenheim, Heads Lamont Inspectorate

J. A. McDougall of Brudenheim, was elected president of the Teachers's association for the Lamont inspectorate at the closing session of the annual convention in Edmonton last Friday.

Miss Ada Dickson was elected to the executive committee from this district.

Mr. Stan Hambly and Mr. C. Seely of Brudenheim were elected on the festival executive committee from this district for the coming year.

Dawson was made to hold a district school festival at Waskatenau in May of next year. The practice of giving each prize-winning individual or group a diploma stating the quality of work at the festival will be continued. There will be no trophy awards.

KNOWLES FAMILY HOLDS FIRST MEET IN 34 YEARS

Mr. and Mrs. J. Clancy, of 11334 126 street, had as their guests over the week-end Mr. and Mrs. George Churchill and Stanley Churchill of Morris, Manitoba; Mrs. James Kyle of Cadillac, Saskatchewan, and Mr. Alfred Knowles of Neche, N.D. The party motored up from Neche, N.D., and Morris, Manitoba, visiting at Hot Mound, Manitoba, and Swift Current and Cadillac in Saskatchewan. Mrs. Kyle joined the party at Cadillac and proceeded with them to Dayaland, Alberta, where they visited at the home of Mr. and Mrs. Thomas Churchill, the parents of Mrs. Clancy and Miss Lora Churchill of Edmonton.

This is the first time in thirty-four years that the Knowles family have been together, and the first time Mrs. Kyle and Mrs. Thomas Churchill have met in that time. Incidentally, it is the first time in fourteen years that Mr. George Churchill has met his brother, Mr. Thomas Churchill.

Mrs. Kyle is 70 years of age and is thoroughly enjoying the motor trip in spite of inclement weather.

Before returning east the party, accompanied by Mr. and Mrs. Clancy and Miss Cora Churchill, are visiting Mr. and Mrs. D. Cranston of Fort Saskatchewan district.

Mr. and Mrs. Thos. Churchill resided in the Partridge Hill district a few years ago.

REMEMBRANCE DAY FALLS ON SUNDAY. NO HOLIDAY MONDAY

Although Remembrance Day, Sunday, November 11th, is a statutory holiday, the following day will just be an ordinary Monday. It has been the custom, when a dominion holiday falls on Sunday to celebrate Monday as the holiday, but this year, apparently Remembrance Day will be observed on Sunday.

While no plans have been made, by the Fort Branch of the Canadian Legion, it is understood that a memorial service will be held.

The United Church W. M. S. will hold its regular monthly meeting at the home of Mrs. H. Dennis on Tuesday afternoon, October 16th, at 3 o'clock.

"Please endorse the cheque, madam," said the teller.

"Why, but my husband just gave it to me," she replied.

"Yes, madam, but sign your name on the back as your husband will know we paid you."

A few moments later she handed the teller the cheque endorsed: "Your loving wife, Ethel. XXX."

Maid: "I'm sorry, but she said I was to tell you that she is not at home."

Caller: "Oh, that's all right. Just tell her that I'm glad I didn't call."

Highly Respected Old-Timer Passes Away

The funeral service of Benjamin Pollard of Fort Saskatchewan, who passed away at Fort Saskatchewan on October 6th, aged 80 years, was held on Tuesday afternoon at 2:30 o'clock at the Fort Saskatchewan Anglican Church. Rev. W. Leversedge officiated and interment took place in the Fort Saskatchewan cemetery.

The pallbearers were: Messrs S. O. Jones, E. A. Wisnewich, James Ritchie, E. Reichert, W. E. Boehert, and Maxwell Hackett.

He is survived by his wife, five daughters, Mrs. Alec Hackett of Lamont, Mrs. C. Baptist of Tofield Mrs. R. Reichert of Edmonton, Mrs. D. Guild of Lethbridge and Mrs. J. Scilly of Los Angeles, and two sons, W. C. Pollard of Uxbridge, Ont., and Post of Fort Saskatchewan.

The late Mr. Pollard left Ontario in 1894, with the second colony of Parry Sounders, and settled in the Fort district, where he farmed, until around 1916, then moved into town and established a retail coal business. Mr. Pollard retired from active business about ten years ago.

GOOD HOPE NEWS

The good weather of the past few days has got the threshing machines going in full swing, in this district. Most of the wheat is averaging around thirty to forty bushels per acre.

oooooo

Miss Janet Webber attended the Teachers' convention in Edmonton last week. After spending Thanksgiving at her home, she returned to her school last Tuesday.

oooooo

Mr. and Mrs. Harry Bowston were visitors in Edmonton last Friday.

oooooo

Steve O'Gorman has returned to school again, after having the misfortune of breaking his arm, some time ago.

Fire Prevention Week October 7th to 13th

From October 7th to 13th, has been proclaimed as Fire Prevention Week. During this week, lectures on fire prevention subjects should be given in every public school and the owners and occupants of property everywhere throughout Canada should be counselled to give special attention to the removal of fire hazards from the premises.

Fire Waste is one of the serious economic problems confronting Canada at the present time. The public in general is vitally affected by the tremendous losses annually incurred by fire and the enormous expenditures rendered necessary to adequately protect life and property from its ravages.

St. George's W.A. Holds Enjoyable Dance

The St. George's W. A. held a very enjoyable dance in the Recreation Hall last Monday evening. A small crowd was in attendance due no doubt that a great many were threshing and it being a holiday a large number indulged in other activities during day. However this did not dampen the enthusiasm of those who attended and all said to have had a very pleasant evening.

At midnight, refreshments were served, after which dancing was again resumed until 2 a.m.

The local young people's orchestra with the following players; Miss Rita Sherman, Mel Stackhouse, W. Lamoureux, Fred Berg, Pudge Smith, and Orvell Kellerborn supplied the music for dancing.

How does your label read.

Gibbons News

The rain and snow of the past three weeks has lowered the grade of the already partly frozen crop in this district. Some No. 2 Garnet is coming in, while a lot is No. 3 and 4. The average being about No. 4.

oooooo

Mr. Wm. Irwin the new buyer on the Federal elevator in fact becoming acquainted with the local farmers. Bill was formerly Supt. for his Company on this line.

oooooo

We send months ago to watch our baseball boys, when they got going they went right through the last part of the schedule winning nine games straight in the league, as well as three outside games. York Hotel defeated Gibbons 6 to 5 on Sept. 28, on Oct. 7th Gibbons defeated York Hotel 6-4. Final game next Sunday at Boyle Street.

oooooo

Mr. J. B. McEwen took in Garnet wheat this week weighing 64 lbs to the bushel. Pretty good for any year.

oooooo

Knott Bros. have rebuilt their office building, putting it on a concrete foundation, new floors and additions on the rear. It will be more comfortable for the bridge fans.

oooooo

Mrs. Jos. Hayes is visiting her sister-in-law, Mrs. C. Horner of Edmonton.

oooooo

Miss Kay Dudes of Edmonton is visiting her cousin, Roberta over the holidays.

SPECIAL SUNDAY SERVICES

Harvest Thanksgiving services will be held at Beaver Hills, and Partridge Hill next Sunday, October 14th, at the usual hours. Rev. Clyo Jackson D.D., of Edmonton will preach.

DROUGHT AREA CATTLE NOW ARRIVING

First shipments of surplus cattle from the drought areas of the province, purchased by the provincial department of agriculture under the recently announced policy, reached Edmonton stock-yards the past week, and are being disposed of. Representatives of the department are now in the areas concerned, handling the purchase and shipment of the cattle.

CONVERSION LOAN TO BE OVER SUBSCRIBED

Of the $170,000,000 in Victory Bonds that were eligible for conversion in 1933, more than $146,000,000 were converted during the first week of the campaign. It is expected that an even greater percentage of the holders of the $22,000,000 of bonds maturing this year will convert. The amount of the Loan is strictly limited to $200,000,000, so the new money required is comparatively small.

The 1919 Victory Bonds now being refunded are probably the most widely held of all original War Loans. Nearly 900,000 people subscribed for them. There are still more than 42,000 registered bondholders; and it has been estimated that at least another 100,000 of the original investors hold bearer bonds.

All previous Dominion of Canada Refunding Loans are now selling at a substantial premium over their issue price. Department of Finance officials who have been in touch with bankers, bond dealers, investment and trust company officials and others whose business it is to sense the pulse of the investing public, say that, in financial circles, there is every confidence that the Loan will be heavily over-subscribed.

Beef, especially steaks, should be chosen by taste of clastic red meat and firm, white fat.

He: What part of the car causes the most accidents?"

She: "The nut that holds the wheel."

Taken from the Files
19 Years Ago Today
Thursday, October 7th, 1915

Matthieson and Matthieson are installing machinery in the mill for the manufacture of rye flour.

G. J. Dawson had a nasty fall from a hay rack Saturday, badly bruising his shoulder.

Laurie Diamond, who has been on the Conservator staff for the past two years, is now with Mason & Mahon, general merchants.

Two automobiles, loaded not for beer, but for ducks, left for Andrew early this week. A good time and lots of game was result. In the party were F. A. Walker, Alf. Chard, Geo. Mohr, J. Caron, A. Underwhile, R. H Farnese and P. D. Gordon.

ST. LOUIS DEFEATS DETROIT TO WIN BASEBALL TITLE

The St. Louis Cardinals took the 1934 baseball championship of the world, when they swamped the Detroit Tigers 10 to 0, in the seventh game of the series. No less than six Detroit pitchers faced the St. Louis sluggers but failed to stop their slugging match.

Three times Detroit has had a worlds' title in the bag, to lose the final game each as was witnessed on Tuesday.

The Observer

Discussing the quite remarkable evidence given by the defence in a recent trial, which the jury seemed to accept, or, as it was said, "swallowed holus bolus", brings to mind the origin of that very curious expression. It also provides an instance of the persistence of forms of expression in the common speech of the country long after the origins of these forms have faded from the memory even of historians. In this particular instance, the origin of the phrase is in one of the most ancient as well as one of the most curious of all ancient modes of trial. It was not so much a trial as a means provided whereby an accused person might prove his innocence, and might be accounted perhaps the oddest if not the most pleasant of all extraordinary modes prevailing in very olden times. It was styled the judgement of bread and cheese, or which a quantity was provided, and if, after the priest had blessed it, the accused person was able to swallow it, he was acquitted; but if he choked he was adjudged guilty. Hence also perhaps the expression, "I wish it may choke me if it is not true, etc." The "holus bolus" commonly heard is merely, I think, a sort of dog-latin signifying the whole thing.

The Forty-Ninth Parallel

An interesting and thought-provoking editorial article appeared recently in a popular magazine which circulates extensively throughout Canada and the United States. The subject was the forty-ninth parallel across the world. The people of the North American continent regard it as an imaginary line which marks the boundary between the United States and Canada, but, says this magazine's editor, the true cause of the earth regard it as something more than a hair line on the earth's globe. It is, he says, the world's line of destiny.

Blackwriting his theme he first directs attention to the fact that in America this invisible international boundary line is a line of peace. No frowning fortifications dot its length; no jealousies are pent up along its borders; no rivalry hatreds batter its boundaries. For more than one hundred years it has been a line of peace, a magnificent contradiction of the Old World's barbaric philosophy that two neighboring countries cannot long exist without strife.

But turning the course of the forty-ninth parallel around the globe, he finds that the symbol of peace in North America becomes the blood-drenched line of strife throughout Europe and Asia, weaving through the very heart of the world's worst trouble zones. He continues:

"The 'line of peace', upon spanning the Pacific, marks the frontier of Attu' powder magazine the northern boundary of Manchukuo. On one side the armies of the Soviet maintain their war-ready vigil. On the other Japan bides her time in the puppet state that typifies her first triumphant toe-hold on the mainland of Asia.

"Travel with the 'line of peace' across the face and change of the new Red Russia and note its sinister significance as it pierces the inner core of European turmoil. It traverses the Polish Corridor, constant source of shadow's uneasy slumber. Beside Austria's troubled boundaries; hounds it re-armed Germany; skirts the fringe of Prague at the very heart point of national pride, historic Alsace-Lorraine; tops the rims of armored steel that mark Belgium's sullen frontiers; then wraps the Atlantic for its more gentle mission on this continent."

And he asks why should this 'line of peace' assume such a devilish perversity in its travel round the globe, and finds the answer in the character of the nationals it touches rather than in the nature of the line itself.

All of which is true. In North America the two adjoining nations are peopled by those who speak a common language and who, although there has come a great intermingling of money round, still have their wealth depend to a large extent and have proved their ability to, in large measure, assimilate those newcomers of many races and all have largely forgotten, or dropped, the old animosities, suspicions, jealousies and hatreds of by-gone centuries which are nourished and kept alive in the countries of the Old World.

America is fortunate in this, and stands as an object lesson to all other lands. This being so, have we been as good neighbors as we ought to have been; have we taken full advantage of and reaped all the benefits that should have been ours as a result of our preferred position? True, we have kept the peace in a physical sense in that we have refrained from war, but the insensate folly of building up huge armaments one against the other on the false conception that only through such so-called "preparedness" can peace be maintained.

But the forty-ninth parallel across North America is not quite the imaginary line it might well have been to the advancement and benefit of people living on both sides of it. There are no forts, but there are still too many legislative barriers imposed along its entire length by both countries, barriers on the one side being duplicated by similar barriers on the other side.

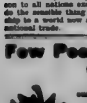
We build our roads on both sides to meet each other at the international line; we construct our railways to the same gauge in order that trains may move without pause from one country to the other, without trans-shipment of passengers or goods; the ether waves flow uninterruptedly across the line carrying radio messages to and fro, and the same is true of the telegraph and telephone; our banks and newspapers and magazine, our automobiles, cows and re-cross; our mails move without restraint or loss of time; our trades unions are international in their character; so, too, are our fraternal societies and service clubs; our sporting organizations vie with each other on common fields.

Being favored, and having done so much to promote our common interests in so many ways, and having developed an international friendliness unknown elsewhere, and having utilized all that science and invention has bestowed in order to promote this fine and mutually advantageous intercourse, why have we proceeded to erect artificial barriers to check and stop the flow of trade which all these other agencies have been perfected to encourage and develop? The people of both countries are civilized, are highly intelligent; they are not inmates of lunatic asylums. Then why have they acted so absurdly as to hamper and cripple that which they have spent ——— of money and energy to encourage?

There is only one answer, and that answer is to be found in the cupidity of men individually and collectively, on both sides of the "line of peace", who imagined that the northern half of this great continent would be the complement of and to the southern half. The Maritime Provinces with their resources are the natural complement of the Atlantic seaboard States; Quebec and Ontario are the complement of the Central States; the Prairie Provinces are the complement of the middle western States right down to the gulf; British Columbia is the complement of the Pacific coast States. Yet puny man tries to defy Nature and, as a result, has made a sorry mess of things throughout the whole realm of trade and commerce, finance and economics.

The forty-ninth parallel across North America is a splendid object lesson to all nations except in this one respect. Let these two great peoples do the sensible thing and set another object lesson for and provide leadership to a world now suffering because of the wholesale destruction of international trade.

Few People Escape Attacks Of Summer Complaint



Summer Complaint may be slight, or it may be severe, but you can't tell when it comes you how it may end. Allow the profuse diarrhoea, the vomiting and purging to continue, for a day or two, and you may have a weak and prostrated.

Just as soon as you feel any tenesmus of the bowels or cave in your stomach and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unnatural action before the weakening influence can get started.

Don't experiment. Get "Dr. Fowler's". It has been on the market for 80 years.

Richest Street in World

Wings Of Cards Decorate In Dutch, Indian, Cambodian Many Treasures

What is the richest street in the world? Without taking into account the environs of the Stock Exchange and Wall Street, where unseen fortunes change hands, the little-known Chemical Church in Delft has substantial claims. It has often been referred to as the richest street in Asia, and, unlike our own commercial thoroughfares, the greater part of its wealth is there for all to see. But many are the treasures which are hidden away in secret recesses of the shops of curio dealers and jewellers in that picturesque street. One of the dealers the walls of whose establishment are covered with letters of appointment from Highnesses and Excellencies of all descriptions, has manufactured countless wonderful golden and jewelled embroideries for crowned heads and ruling princes. He was responsible for the historic carpet, costing no less than one thousand pounds, which the late Lady Curzon wore at the Durbar Ball, attended by four thousand guests in the Delhi Fort in 1903. Here also are all the richest of the embroidery merchants, whose cloths and cloaks, scintillating with costly ornaments, are not only intended for human wear, but for Hindu elephants. Here, too, are the carvers of ivory, and the traveller can see them exhibiting their skill in evolving delicate figures and animals from solid blocks of ivory, saws from elephants' tusks.

WAS CONSTIPATED FOR 30 YEARS

Woman's Long Search For a Remedy

The trouble with most remedies for constipation, as this woman found, is that they give only temporary relief. Having at last found a permanent remedy, she writes to tell all about it.—

"For upwards of 30 years I was a victim of acute constipation. I tried practically everything that it was possible to try. I admit I was a chronic case, and every new remedy I tried helped for a day or two- after that I was just as bad as ever. Three years ago I took my first bottle of Kruschen Salts, and every morning since, and every morning so long as I live, my first duty upon rising is my Kruschen. I honestly feel a different woman. My bowels act to the clock, and my friends remark upon the immense folly of building up huge armaments one against the other on the false conception that only through such so-called "preparedness" can peace be maintained.

Nature Seeks For Them

Phantom plane was sought at Hove, Kmcet, by hundreds of people who spent an all-night vigil looking for a mysterious 'plane that was supposed to have fallen into the sea to dusk. The "plane" was proved to have been a flight of ducks diving for fish.

MATURITY—MATERNITY MIDDLE AGE

As these three critical periods a woman needs a medicine she can depend upon. That's why so many take Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me!" Let it help you, too.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

The Cross-Word Puzzle

The cross-word puzzle, which began before the jig-saw puzzle, seems destined to have a future life. It is remarkable that it finds a place in such grave publications as the London Times, the Manchester Guardian, the New Statesman and Nation, the Spectator and the Observer.

A perfect bone needle, 25,000 years old, was discovered by Jean Combarelles in excavating at Cantiez, in the south of France.

A BATTERY RADIO with Electric Set PERFORMANCE

Here is the great invention every unwired home has waited for! Real electric set performance—tone quality, distance, ease of operation—and no more recharging of batteries!

The Air-Cell Radio will do everything that the finest electric set will do. It has been brought about by the invention of a marvelous new source of power—the EVEREADY Air-Cell "A" Battery. This battery brushes air and re-energizes itself for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household.

Do not confuse the new Air-Cell Radio with the old type battery sets—Air-Cell Radio is new from the ground up—now being built by every leading radio manufacturer specially for Air-Cell performance.

Ask your dealer to demonstrate. Your interest will be well repaid.

EVEREADY Radio Batteries

Night Outshone Sun

Scientists Tell Of Heat Contained In Are Light Carbon

The brightest known thing on earth we are told, is the burning carbon of an arc light. It is so hot that vol canic dust forms in the incandescent crater, a fog of pure carbon vapor.

Formerly this fog was thought to be liquid carbon, but a recent report to the American Chemical Society concludes that carbon does not pass through a liquid stage in turning from solid to gas, at least that it does not at atmospheric pressure.

This may be a reason why diamonds have been so impossible for man to make, says the report for diamonds apparently are the products of a liquid form of carbon.

But, if diamonds cannot be produced from carbon more heat and light can, it is hoped. Three Cleveland scientists who have been measuring the heat of the carbon are doubtful that "under the right conditions, and with a little further chemical aid" arcs can be made to burn with an intense brilliancy slightly greater than that of the sun.

This would be a novel achievement, indeed, the creation of an artificial sun brighter than the sun! It sounds almost presumptuous.—Detroit Free Press.

Took Chance in Dark

Four Aviators Left Plane When Trouble Developed

"I just came down by parachute—where am I?" was the query a startled motorist put on the highway near Guildford, England, when he was stopped by an aviator waving a flashlight.

The airman was one of three officers who had bailed out of a bombing plane at a height of 2,000 feet in the darkness. He got into the car and they went to look for the others.

A hundred yards farther on the car was stopped by another flashlight. Then a third light was seen across a field. It was that of the pilot, who had bailed out from the machine, which apparently experienced engine trouble, was only 500 feet up.

None of the four was hurt.

FALSE TEETH

By ANDREW BOWDEN

Hold the world over—Dr. Wernet's Powder—justly called "the perfect tooth-aid"—holds false plates firmer for hours longer. Leaves no sickening pasty taste—both 35 cts. simply yet comfortably they feel like natural ones. Purchased by world's leading dentists—just sprinkle on. Inexpensive—any druggists.

Although Africa contains the widest variety of wild animals in the world, no tigers have been found on the continent.

• STOMACH COMPLAINT •

Mrs. W. Boston of 627 Selkirk Ave., Penetanguishene, says: "Some years ago I used Dr. Pierce's Golden Medical Discovery for stomach trouble and found relief. I have also used Dr. Pierce's Pleasant Pellets for constipation and found them very good."

Write to Dr. Pierce's Clinic, Buffalo, N.Y., for free medical advice.

Germany contains more than 2,300 youth hostels. These hostels are provided as an overnight stopping place for young hikers.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

—No Calomel needed

When you feel blue, depressed, sour on the world, constipated and your bile isn't pouring into your bowels, don't gulp a nasty calomel purge. Just get 15 cents worth of Dr. Edwards' Olive Tablets from your druggist and take as directed. Then see how much better you feel and look. Dr. Edwards' Olive Tablets are purely vegetable, mild and gentle. Know them by their olive color. 15c, 30c, 60c.

A census of dead animals on roads of England has showed that dogs are the great "jay walkers".

CORN SYRUP

A pure, wholesome, and economical table Syrup. Children love its delicious flavor.

COVERING THE FOLLOWING DISTRICTS WITH THIS WEEKS' ISSUE:—LAMOUREUX; CORONADO; ARDROSSAN and PORT SASKATCHEWAN.

Here and There

What a practical newspaperman finds interesting on a cruise around the world is the Canadian Pacific liner Empress of Britain on her maiden voyage from Vancouver to Southampton via Panama Canal and Bermuda. Last winter Alan Maurice Irvin, a Montreal writer, made the cruise. He saw interesting places, outstanding people and strange customs. So he sat down and wrote a book which is illustrated by photographs he took with his own camera, filled with amusing sidelights upon human nature. Now, under the comprehensive title "—and ships—and sealing wax," the book is on Macmillan's fall list.

What Ralston Russel Underwood capital would flow into Canada in an even greater volume in the prediction of John R. Macnie, of the Mutual Life of New York office in Chicago, speaking before the Life Underwriters Association of Toronto, at the Royal York Hotel recently.

The cream of American basketball players is scheduled to sail from Vancouver October 26, aboard the Canadian Pacific liner Empress of Japan, for an all-star tour of Japan, China and the Philippines. Judge and Mrs. Kenesaw Mountain Landis may also be in the party.

Photographs in a group for the first time since they were "shot" on their arrival in Canada a few years ago, his Excellency the Governor-General, Her Excellency and their elder son and daughter were snapped on board the Empress of Britain just before Lady Bessborough and her son and daughter sailed for Europe recently.

Appropriation of one dollar was made recently by the Vancouver City Council as the nominal price for the purchase from the Canadian Pacific Railway of 1¼ acres of right-of-way property at Kitsilano Beach, near the British Columbia city.

The first McIntosh apples of the season for distribution throughout the Dominion from Victoria to Halifax west out recently over Canadian Pacific lines in a train of 40 cars. The fruit is reported to be in wonderful condition and this season's product will maintain the great reputation that British Columbia has won for its apples.

Under the Canadian Pacific five years' free exhibitorship award in McGill University, Ramsie McCallum, of Montreal; David R. W. Reid, of Winnipeg, and Albert Grant Asplin, of Lethbridge, all sons of company employees, are announced as this year's winners. The scholarships are renewable every year up to five years if the holders are entitled to full standing in the next higher year.

"There is very clear evidence of a return to prosperity in Canada due to a greater feeling of confidence," was a recent declaration of Lord Iliffe, owner of more British trade papers than any other publisher in the United Kingdom, interviewed aboard the Empress of Britain.

From every state of the Union and every province of the Dominion, delegates to the 119th communication of the Sovereign Grand Lodge of the Independent Order of Oddfellows assembled in convention at the Royal York Hotel, Toronto, recently. They were greeted by the Lieutenant-Governor of Ontario and the Mayor of Toronto.

GUARANTEE IS BEING MET

Announcement has just been made that the Alberta Wheat Pool for the third successive year has met its maturing obligations in full together with interest due to the Provincial Government in connection with the 1929 Wheat Pool overpayment.

At the time the government guarantee was agreed upon there was considerable misgiving as to the ability of the pool to make repayment in view of conditions in the wheat market. The record of repayment to date is reassuring. The pool has been doing a fair share of the grain business of the province.

It will be a most desirable outcome if the pool can pay off the government guarantee and thereby re-establish the equities of thousands of farmers in the big line elevators.

—Calgary Herald

A gala event of the season will be the Women's Institute dance in the Badminton Hall, Friday, October 19. A fine dance program has been arranged to suit both young and old.

Frank Keith's orchestra will supply the music for dancing, and at midnight refreshments will be served.

Don't forget, Friday, October 19th, come and bring your friends.

CHINA WANTS ALBERTA HORSES

Whether or not the Orient is preparing for war, the fact remains that China is making a demand on Canada for cavalry and artillery horses, and echoes of this demand of war. "Married versus Single," and have reached Alberta via Ottawa. This province should be able to provide 500 head or so of such war animals, it is believed by those who should know, and a canvass of the situation is now being made to supply the quotas from Ottawa.

A sale of latest novels at 39 cents now on sale at Smith's Drug Store.

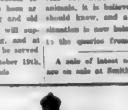
LOOKED MISERABLE

A good joke is spontaneous and will make the most stolid smile. It entertains as no other machine-made jests could do. A passenger on an Atlantic liner was getting up a war-horses, and echoes of this demand of war. "Married versus Single," and got many more "Single" than "Married." Anxious to complete the teams, he copied a melancholy individual standing apart by the rail of the ship and hastened up to him.

"Are you married?" he asked.

"No—only seasick!" was the rejoinder.

SUPPORT THE ADVERTISERS



WHERE CAN YOU FIND better use for your money?

The Dominion of Canada 1934 Refunding Loan Bonds are now on sale for a limited period only. They are obtainable in two ways: first, in exchange for Victory Bonds maturing this year; second, by cash subscription.

To Owners of Maturing Bonds

You can exchange your Victory Bonds maturing November 1st for Bonds of the new Refunding Loan, and receive an extra cash allowance—*provided you convert now.*

The absolute safety, the regularity of income and the ready marketability you have enjoyed over the past 15 years are thus again made available to you.

This loan is an essential part of the refunding programme by which Canada is adjusting her war-time debt to present-day conditions. It is a further and necessary step toward the continuance of Canada's business recovery.

To New Investors

Investment funds are accumulating in the world today. Good investments are eagerly sought. As the Refunding Loan is open to cash subscribers as well as in exchange for maturing bonds, this is your opportunity to invest your savings so as to combine the soundest possible investment with vitally important service to your country.

Respond at once, as the subscription list will be open for a limited time only, and all cash applications will be subject to allotment.

Convert or Subscribe Now

Whether you are exchanging your Victory Bonds or buying for cash, you will find in the new bonds the best investment a Canadian can make today. They will give you:

1. *Investment in Canada's strongest security*, with principal and interest backed by the entire resources and integrity of the Dominion.
2. *Maximum regular income;* you cannot better the yield anywhere today with comparable safety.
3. *The desirable feature of marketability;* no other bond will be more readily convertible into cash or more acceptable as collateral.

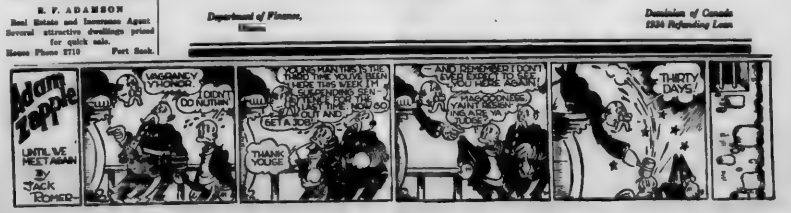
Dominion of Canada 1934 Refunding Loan



WORLD HAPPENINGS BRIEFLY TOLD

Dunstan T. Robichaud, Ottawa, has been appointed superintendent of the Dominion government's bureau of translation. His salary will range from $4,800 to $5,400.

British producers are rapidly outbidding American goods from the Canadian market, said Howard G. Ferguson, Canadian high commissioner to Great Britain.

Tourists will be worth $30,000,000 to $50,000,000 more to Canada this year than last, as a result of efforts to increase that traffic," according to R. Lee Dubin, director of the newly-formed federal tourist bureau.

One of the wealthiest men in Poland, Count Jacob Potocki, died recently, leaving his entire fortune, amounting at about $20,000,000, to a medical institute for the treatment of cancer and intercession to be founded at his name.

Aside from becoming a prominent grain port, Churchill boasted another distinction—it has become the jumping-off place for supplies to the northern mammals. The season more than 100 tons of mission supplies were shipped out of Churchill.

Giving impetus to fattening of market cattle in central and northern Alberta, a portion fund of $75,000 for the three prairie provinces to assist farmers in buying stock has been made available by the Dominion Agricultural Credit Company, Ltd.

All lands owned by the University of Manitoba are exempt from taxation in Winnipeg, Chief Justice D A Macdonald ruled, granting an application of the university for an injunction restraining the city from assessing or levying taxes, or selling university lands.

Is Receiving Bumper Yield

Many persons seem to think that the spending possibilities of the Government are limitless, but they lose sight of the fact that every dollar appropriated for public purposes has to come from the taxpayer. What they also forget is that there is a danger line in taxation which is reached when the levies become so oppressive that they cannot be collected Philadelphia Inquirer

Recently the following testimonial was received by a patent medicine concern: "For nine years I was totally deaf and after using your catalyo for only ten days I heard from my brother in Nebraska."

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child on Unknown Remedy to Take

Every day, unthinking, mothers take the advice of unqualified persons — instead of their doctors' — on remedies for their children.

If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS'" Milk of Magnesia — the safe remedy for your child."

Remember this — And Always Say "Phillips'" When You Buy. Your child deserves it; for your own peace of mind, see that you get it — Genuine Phillips' Milk of Magnesia.

Also in Tablet Form

Phillips' Milk of Magnesia Tablets are now on sale at all druggists every where. Each one the equivalent of a teaspoonful of Liquid Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia.

Radio Instruction

The Saskatchewan Government Correspondence School — Radio Broadcasting This Year

The programme of Radio instruction given by the Saskatchewan Government Correspondence School during the past three years will be continued for the present school year, from Monday, October 14th, to Friday, December 14th, 1934 and from January 14th, to April 26th, 1935, a broadcast will be given daily, except Saturdays and Sundays, from fourthirty to five P.M. Mountain Standard Time. The radio broadcasts will originate at CJRM Regina, and the network will include the following stations: CFQC Saskatoon, CHAB Moose Jaw, CJCX Yorkton, CHWC Regina, CKER Prince Albert.

The instructors will deal with the difficulties of pupils and will answer not only questions in the assignments but also questions that are daily reaching the School from teachers and pupils. In order to have a fuller appreciation of the addresses pupils are requested to have their Correspondence Lessons before them.

The following is the programme to be followed:

Oct.	French	English	Latin	Science	History	German	Science

Little Journeys in Science

DIAMONDS

(By Gordon H. Guest, M.A.)

Diamonds are the purest form of carbon, an element which occurs in almost every living substance. Found in the sand and gravel of river beds, or near them, the stones are separated out by a washing process which carries away the outer coatings, leaving the diamonds behind. These are found to have a crystalline form, but sometimes the stones are cut by jewellers to further minimize their natural flaws. Diamonds have the greatest value, although there are rare occurrences of delicately colored stones which are much prized. Black diamonds are more plentiful than the clear stones and are used for cutting and drilling. Diamonds are also used by engravers in making etchings.

It has been the dream of many scientists to make synthetic diamonds, and this has been accomplished occasionally, although it is found that the process does not produce sufficient stones to make it worth while.

Moissen, a French chemist, in 1893 was successful in producing a small quantity of the gems by heating charcoal with iron to a very high temperature in an electric furnace. The mixture was then cooled very quickly. A coating of iron was rapidly formed on the outside, but at the centre the cooling was slower, and a few very small clear and black diamonds were found. Rubies and other gems have also been made synthetically, but not with great success.

Diamonds are measured by metals, a unit of weight which is equivalent to three grains troy weight. The largest diamond ever found was the "Cullinan" which was mined in South Africa. The stone originally weighed 3,025½ carats, but it was later cut into smaller stones.

Even Bell Mad

Drug stores sell almost everything but, down in Florida, a man has gone beyond the variety of the stores up the way. A United States cruiser stopped at St. Petersburg and needed 15,000 pounds of fresh meat. The purchase was made at a St. Petersburg drug store.

SUNDAY SCHOOL LESSON

OCTOBER 14

THE CHRISTIAN AND HIS BIBLE

Golden text:

Psalm 119:97. How I love thy law!
It is my meditation all the day.

Lesson: [illegible]. Psalm 119 97.

Devotional Reading. Psalm 119 41-48

Explanations And Comments

How to Study the Bible. When a man installs that every statement in the Bible is to be taken as literally true, he outrages our sense of fact That is not so. On the other hand when some man refers to the Bible as "a list of myths, legends, old wives' tales," a coast-off collection of literary odds and ends, he outrages both our sense of reverence and our sense of fact. That is not so. The most thoughtful people of the world have been using this book for centuries as a book of final values for all who would live nobly.

The only basis for an enduring faith in the Bible is sound, accurate, thorough knowledge. Let men study to show themselves approved unto God, workmen that need not be ashamed, rightly dividing the word of truth. Let them learn to discriminate between that which is merely local, temporary, incidental in this literature and that which is universal, enduring, vital. Let them learn that we have there a record of the progressive revelation which God made of himself through the religious experiences of a people chosen for their spiritual insight. It is a record of long, patient procession of mental and spiritual unfolding, stretching through a period of more than a thousand years. We have this heavenly treasure in the earthen vessel of a Hebrew civilization, and it taken shape, color, and odor from the vessel which contains it. The more thorough and intimate our knowledge of the Bible, the better it will be for those writings which are able to make men wise unto salvation and prepare them thoroughly for all good work.

But coupled with that fearless, painstaking scholarship, which walks through the pages of Holy Writ with eyes wide open to the truth, let there be also a genuine reverence for this book as a message from the heart of God to the soul of man. "Let knowledge grow from more to more; but more of reverence in us dwell." We have found this book a lamp unto our feet and a light unto their path. "Thy word have I hid in my heart that I might not sin against thee." Discriminating study carried on in the right spirit leads to the revival of the inner life. There is no necessary antagonism between knowledge and reverence, between scholarship and devotion—they are the right and left hands of a common, competent approach to the Scriptures. We say "Our Father," and we say also "Hallowed be thy name". In like manner, let there be the blending of intimate knowledge with a wholesome reverence for the Bible and we shall find that "all Scripture given by inspiration of God is profitable for instruction in righteousness."—Charles Reynolds Brown, in The Gospel for Main Street.

Voice Warm Beloved

If you are driving in St. Louis, Missouri, and you suddenly hear, coming as if from nowhere, a stentorian admonition about the way you are handling your car—don't be alarmed. It's merely something new in public police work. For the "traffic school cop," equipped with loudspeaker and manned by vigilant officers, has made its appearance on St. Louis streets.

Acquires Television Device

United States Buys American Rights From Austrian Inventor

Gustav Boehm, Austrian inventor, who claims to have perfected a cheap television set, has sold the American rights to his patent.

The patent, it is claimed, can be adjusted to the ordinary radio receiving set

The new apparatus is a short wave receiving set capable of clear television within a radius of 50 miles and receiving pictures 4½ by six feet in size.

Herr Hoehn, who has been working in Vienna for ten years on his invention, left for New York to supervise the manufacture of his television set. Details of its construction are kept secret until the apparatus has been placed on the market

EVIDENCE SHOWS TRADE IN BRITAIN HAS IMPROVED

London Chancellor of the Exchequer Neville Chamberlain laid before a gathering of London bankers evidence that Great Britain's trade has improved and assured them the independence of sterling would be maintained.

"I will say for the sixteenth time," he said at the annual dinner of the bankers of the city of London, "that the exchange equalization account was founded for the purpose of insuring our excessive fluctuations in the value of our currencies."

The chancellor said he had frequently declared the policy of His Majesty's government in this connection "without, I am afraid, succeeding always in convincing the people across the seas."

Montagu Norman, governor of the Bank of England, who also addressed the bankers, spoke in favor of central banks, especially the Bank for International Settlements of which he said he was "from the beginning and am to-day a faithful supporter and in which I continue to be a good believer."

In his address Mr. Norman said he considered the establishment of central banks in the dominions one of the most great steps forward in these difficult times.

The Bank for International Settlements, he said, "is a product of wisdom and you will see if you bear patiently with the difficulties which it suffered from the moment it started, that the vision will come true.

"Its concern is to bring about the co-operation of central banks and so to assist the development of new fields and so the interests of all of you who are in other businesses than that international object."

The chancellor also referred appreciatively to steps taken during recent years to establish central banks within the British Empire. This tendency to promote common imperial objects and a united monetary policy," he said.

Despite the general optimistic outlook mentioned, the fact that British exports have jumped approximately $100,000,000 during the first eight months of this year, Chamberlain said difficulties in the way of international trade seem to be increasing.

"Undoubtedly it is impossible for any one government to reopen the channels of international trade or its own volume or the west trade policies of other countries which are subjected to their own internal exigencies," he said.

Ontario Schools Plan To Teach Agriculture

Minister Announces Subject Will Be Put On Study Course

Toronto — Duncan Marshall, Ontario minister of agriculture, announced plans were being made by the departments of agriculture and education to place agriculture on the public school curriculum. He told the Young Men's Canadian Club in an address that he had reached an understanding with Hon. Dr. L. J. Simpson, minister of education, regarding the introduction of scientific agriculture in all public schools.

"If I live for the next two or three years it will be a reality," the minister said. Provision will be made with in a scientific way in every public school in Ontario. Some knowledge of "Our Father," and we say plants, and they will be made to understand the basic importance of agriculture and what it has to offer those who go to live on the land."

He maintained agriculture had been treated too haphazardly in Ontario schools. When personal plans were put into effect agriculture would rank in importance with any subject taught, he said.

Cattle Marketed

Winnipeg — Abeut 2,000 head of under-fed cattle from the drouth areas of Manitoba and Saskatchewan have been marketed through Winnipeg abattoirs since the first loads arrived September 21, according to a checkup at local packing plants.

War And Peace

Labor Party In Britain Examines Their Ruling

Southport England — In the event of war involving Britain or enunciation thereof of war, the Labor party will call a special convention to determine Labor's attitude.

The annual conference of the party reached this conclusion after rejecting a proposal advanced by ten days that Labor should be bound to call a general strike if war threatened.

Earlier the moderates convincingly showed their supremacy over the extremists within the party when a series of amendments to the draft platform, which would have called for immediate drastic new social steps by any future Labor government were rejected on a card vote of 2,166 to 1,000.

On the war and peace resolutions Arthur Henderson, general secretary of the party and president of the world disarmament conference explained that "never will Labor agree that Britain herself should resort to war to help any other nation commit that crime

"If any government should ever send a bomber plane to bomb a city," he added, "it would be opposed by the whole Labor government."

Labor also approved a resolution expressing deep satisfaction at the entry of Russia to the League of Nations, Mr. Henderson declaring the country was motivated by a desire to maintain peace

Remembrance Day

Will Be Observed This Year On Sunday, Nov. 11th

Ottawa — Remembrance Day falling this year on Sunday (Nov. 11) the following day will be a holiday as far as the department of secretary of state is concerned. In the case of statutory holidays falling on Sunday the provision is made that the following Monday will be observed for business purposes. Remembrance Day is the only holiday that enjoys this privilege.

Any departure from the provisions in order to provide a business holiday on the following Monday will be a matter for local ruling.

Window Washer Fights Hawk

Wins Battle With Huge Bird High In Air

Chicago.—A man and a hawk fought a brief, bitter battle 624 feet above the world's fair, and the man was the victor

As William Weber plied his trade as window washer on the west tower of the fair's skyride, a large chicken hawk attacked him with beak, talons and powerful wings. Only his safety belt prevented Weber from going to his sudden death. Weber fought back with all his tools and swinging first on one end and then another of the marauder soaring away.

Accepts New Appointment

McGill Professor Joins Staff Of University Of London

Montreal Prof. F. Clarke, for the past five years professor of education at McGill University, has accepted an appointment to the staff of the Institute of education in the University of London, it was confirmed here. He will be professor in charge of scientific agriculture and will leave for his new post toward the end of January. Dr. H. Beckham, formerly of the British Columbia normal school in Vancouver, has been appointed assistant professor of education at McGill

Hearing Claim Case

Ottawa — The hearing into Alberta's claim for compensation in regard to the province's natural resources during their administration by the Dominion government, has begun. The royal commission appointed to adjudicate on the claim comprises Justice A. K. Dysart, Calgary; H. M. Forster, of Calgary, and C. C. MacDonald, of Montreal.

Prefabs Indoctrinate Them

Berlin.—An official restriction forbidding the manufacture of balloon type tires in order to economize the rapidly diminishing rubber supplies of the country has been put into operation. Balloon tires require twice as much rubber as the ordinary tires, which are very popular on this side of the ocean.

HEADS NEW BOARD

Dr. G. H. Barton, Chairman of the newly appointed Dominion Meat Board who is a member of the faculty of the Dominion experiment of Agriculture. The Board will be [illegible] which Canada [illegible] applies [illegible] may be increased

Plane Crash Kills Seven

Machine Bound For Paris Falls Into English Channel

Folkestone — An aeroplane with seven occupants crashed into the English Channel [illegible] miles off Folkestone [illegible] Le Bourget airfield Paris, killing all of them. Two of the passengers were women.

The cause of the crash probably will remain a mystery since no one witness it, although the captain of the German cargo steamer Lauenfels heard the roar of the aeroplane engines, followed shortly by the crash and the plane plunged into the sea.

The cross-channel steamer Barrits was near the scene at the time It picked up five bodies and brought them to Folkestone There was a heavy rain at the time of the crash.

It was learned a plane, without giving the identity of other particulars, flashed an S.O.S. to Croydon airdrome some time before the wreck was found. The machine belonged to a British flying company known as Hillsmann's Airways, and had left an airdrome near Romford in Essex, northeast of London, for Paris.

May Get Nobel Prize

Sir Norman Angell Likely To Receive Prize Award

New York — An Oslo cable to the New York Times quoted President M. Oiden, of the Norwegian Peace Society, as declaring the 1934 Nobel peace prize probably will go to Sir Norman Angell

Sir Norman Angell economist author and former member of the British parliament, has written several books on international topics many of them dealing directly with questions of peace and war

Asks Definite Announcement

Australia Wants To Know Britain's Objectives Regarding Agriculture

Bradford, England — The suggestion that the British government should definitely announce its objectives in regard to British agriculture and the part that imports from the Dominions is to finally take was made by Stanley Bruce, Australia's high commissioner in London.

Mr Bruce was making his annual address to members of the Bradford Textile Society.

He suggested that in the interests of the mother country here if some guiding principles should be laid down making it possible to formulate a concrete policy of inter-imperial cooperation for the promotion of reciprocal trade

The British government's campaign to stimulate domestic agriculture has already had important repercussions on exports from the Dominions he added, while a similar agreement for pigs is under discussion

May Lower Interest

Farmers May Profit By Reduction To Flatte Limit Hoard

Ottawa — First mortgage money may be available to Canadian farm loan board borrowers at as low as 5½ per cent as a result of an order-in-council passed by the [illegible] Le Bourget airfield Paris, killing [illegible] Monday, it was announced public. Under the order the federal treasury is empowered to lend money to the board at four per cent. interest where a rate of five per cent formerly was charged

The order-in-council will permit the minister of finance to purchase four per cent bonds of the Canadian [illegible] running up to a maximum of $10,000,000, in instalments of $100,000

Relief Lists Lower

Bright Report On Unemployment Reduction From May

Victoria Dropping steadily since March, British Columbia relief registrations included 29,000 persons recently, the lowest of any total in the last two years. E. W Griffiths, provincial relief administrator, said consolidation of old and new relief lists was about complete with 10,000 listed in provincial areas and 19,000 in municipalities, exclusive of dependents

This is a reduction of 31,000 unemployed registered for relief in March last a total that declined steadily to 31 600 in July, and now to 29 000

Suggests National Government

Chatham Ont.—A national government for Canada was urged here by Rev. Charles W Gordon Wesley author and former member of the name of Ralph Connor. One group could not solve the country's problems he told a service club in an address

BICYCLE CHAMPIONS BAIL FOR CANADA

This picture was taken when Syd Cozens and Jack Torry left London for Canada to compete in Six-Day Bicycle Races. These two cyclists were among the best amateurs in the British Isles before they turned professional to compete with such men as Torchy Peden in the marathon cycle races

Lower Taxation And Interest Rates Expected

Ottawa — Forecasts of taxation reductions and lower interest rates for the fiscal year 1935 were made by addresses to the people of Canada by Prime Minister R B Bennett, speaking in London and Minister of Finance E. N Rhodes speaking in Ottawa, in connection with the $250-000-000 refunding loan

The steady progress that Canada has made in business recovery during the last 18 months—reflected as it already is in expanding revenues—should eventually result in these reductions in taxes which everyone so desires and which your government is striving to achieve by every means within its power," said Mr. Bennett.

The success of the great conversion loan of 1933 when the British government exchanged nearly $10 000,000,000 with an interest saving of millions of pounds annually, coincided with the beginning of the economic recovery which the mother country enjoyed during the last two years, Mr. Bennett remarked.

The lower interest rates to be paid upon the present issue of bonds was not arbitrarily fixed, Mr. Rhodes stated, but fairly reflected the current rate paid for money in Dominion security markets.

"Money is accumulating," Mr Rhodes said, "and good investments are eagerly sought. Interest rates have therefore declined materially and the tendency is downwards. This downward trend is clearly apparent in the rates paid on bank deposits as well as high grade securities, and will tend to permeate over the whole financial system with resultant stimulus to expanding economic activity

The difference between the 5½ per cent paid on the maturing bonds and the 3.61 per cent on the new 15-year bonds measures the progress made in restoring confidence to more normal levels from the abnormal heights caused by the exigencies of the Great War."

National revenues for the first six months of the current fiscal year exceeded those for the same period last year by over $26 000 000, Mr Rhodes said and the prospects were excellent for a surplus in ordinary account in the next Dominion budget. The Canadian National Railways had also shown an improvement in the first eight months of the calendar year by about $8 000 000

New Farm Station

Will Include Experimental Farm In Meitort Area

Ottawa The government has decided to develop an experimental farm in the municipality of Meifort, Sask., it was stated at the department of agriculture The farm will comprise 640 acres.

The farms will be located in clay-loam country, and will be planned to assist farmers in each districts of the prairies. The other experimental farms in Saskatchewan look after the needs of the people farming on the open prairies, but in these there are no experimental farms in the province dealing with conditions met with in the clay-loam belt.

Land has already been acquired for the farm and buildings are now being erected. It will be in operation next year. Livestock and forage-crop production will be to the fore in the experimental work conducted on these just as farms in other parts of Saskatchewan deal more largely with the problems of the grain grower.

Located in an old settled district which has not hitherto had the benefit of an experimental farm, the project is expected to be of assistance to farmers working under conditions such as prevail in the Carrot River valley.

Crop Payment Higher

Calgary — The initial payments of the Alberta wheat pool on the 1934 wheat crop has been boosted 15 cents a bushel to 90 cents. Better prices and a generally improved demand resulted in the decision to increase the payment from 75 cents a bushel, which was paid on the 1933 crop, to the half dollar mark, officials said

Review Of Drought Conditions Affords Appreciable Picture Of Situation In Various Countries

A review of the drought conditions, past of 1936, issued under date of August 24, 1936, by the Bureau of Agricultural Economics, United States Department of Agriculture, Washington, affords an appreciable picture of the situation in practically every country, especially in the United States, resulting from the unusual severity of rainfall which has characterized this phenomenon of this year.

The drought has been widespread in the United States and Canada. The affected areas last winter a belt running through Asia and North America which is about as wide as the distance from Northern Siberia to Central Texas. The drought in Europe has been particularly heavy in the United States, Canada and in Continental Asia. In the United States, northern Manitoba, parts of Australia and Argentina have been almost free of it to a great extent.

In the United States the main drought damage is in the shortage of feed, forage and pasture, necessitating heavy reduction in livestock numbers and reduced returns for the remaining animals. Crop prospects declined sharply in July, and the combination of unfavorable growing conditions practically everywhere except along the Atlantic Coast, in the Eastern cotton belt and in the Pacific Northwest. The most serious loss was in maize, of about 34 per cent, as compared with 1935, in corn production during this period and even the production of corn fodder was seriously reduced. The grain sorghums promise to yield well to less than 65 per cent of average. The continued drought and consequent temperatures prevailing over a wide area largely destroyed the season's forage crops planted. Burned pastures, prevention of any seeding growth to buy summer and stubble fields in many states and further reduced supplies of water for livestock. The worst conditions appear much of Missouri, Arkansas, nearly all of the Dakotas, Nebraska, Kansas and Oklahoma, much of Texas and the plains sections of New Mexico, Colorado and Wyoming. There was a further deterioration of crop conditions during July in most of the Western States for which range conditions figures are obtained.

Judging from conditions as of August 15th, there will be available for livestock in the United States this year only about 85 per cent of the usual amount of grain including corn, oats, barley and grain sorghums, and only about 66 per cent of the usual quantity of hay. Because of the short pastures a considerable amount of the 1936 production of hay and silage has been consumed by August 15th. Probably not more than half the usual amount of straw has been stacked, but somewhat more than the usual quantity may be fed. For these reasons a rather drastic adjustment in the number of livestock will have to be made before fall and winter feeding begins.

Broad grain crops in Central Europe and the Danubian countries are substantially below the crops of 1935 and 1934. The same is true of feed grains in the non-producing of corn in the Danube basin, where a substantial reparable surplus is exported. Excepting Northern France, where wheat suffered from drought, and England, where pastures were seriously affected, most of the other parts of Europe have escaped serious damage. Detailed reports on crop conditions in the Soviet Union are not available but it appears that a considerable part of European Russian experienced an unusually dry spring and weather that average crops may be expected. In Russian the crop is estimated at 10 per cent below that of 1935 and because of drought it is estimated to be at least 20 per cent. The Manchukuoan crop is estimated at about 20 per cent below that of 1935 due mainly to excessive rainfall and floods during July. Several parts of the southern hemisphere have reported drought conditions in recent months affecting crops in the interior of Argentina and Australia. The crop prospects in Argentina appear to be brought near to much 250,000 tonnes or about 9 per cent, under the previous 10 to 20 per cent.) is to prevent the average reduction in Australia is not altogether due to drought, but in part to a shift to sheep and wool.

The following references to Canadian crop production are from Canadian official sources and indicate the effect of the drought as experienced in Canada.

The Dominion Bureau of Statistics in a bulletin issued September 11, estimates the total yield in Canada as follows: Spring wheat, 270,382,000 bushels; Fall wheat, 7,842,000; Oats, 344,746,400; Barley, 62,850,600; Rye, 8,835,000; Flaxseed, 1,594,000. Yields per acre of all grains are below average but are slightly higher than the revised estimates for last year.

The hay and clover crop is estimated at 8,324,000 tons, the lowest recorded as compared with 11,432,000 tons in 1935 and an average yearly production of more than 16,000,000 for the four years 1932-1935. The four year November will founded that Canada might be faced with a hay shortage, and the Order-in-Council of August 30th was accordingly passed requiring a license for all exports of hay and straw. A subsequent amendment of hay supplies indicated some surplus in the Ottawa and St. Lawrence Valleys and in a few districts in the Eastern cotton belt and in the Pacific Northwest. The most serious loss was in maize

FORT SASKATCHEWAN RECORD
Ernest Neale, Editor & Publisher
WEDNESDAY, OCT. 10th, 1934

Grain started coming into the local elevators Monday. Threshing is under way in full, swing throughout the district. If present weather conditions hold, great strides will be made.

Some 85 school fairs were held in the province this year, according to a report just compiled.

******

The Fort Saskatchewan Women's Institute will hold their annual dance in the Badminton Hall, Fort Saskatchewan on Friday, October 19th. Frank Smith's Orchestra. Refreshments. Dancing 9 till 2 a.m. Admission 50c each. Come and bring your friends.

******

A large number of Badminton members and prospect members attended the outing held on Tuesday evening. Many games were played during the evening and a good start was made towards a very enjoyable and successful season.

According to present indications several new faces will be noticed on the Badminton floor this year.

Funerals

MRS. MARION GIBB

The funeral service of Marion Gibb, widow of the late Matthew Gibb, who passed away at the residence of her daughter, Mrs. A. Gibson, of Fort Saskatchewan, on October 2, aged 82 years, was held on Friday afternoon at two p.m. at Heward & McBride's chapel. Rev. D. C. Ramsay officiated and interment took place in the Mount Pleasant cemetery. The pallbearers were Messrs. Archie Gibson, W. Stephen, James Gibson, A. W. Adamson, William Duncan and Alex. Duncan.

Beautiful floral tributes were received from: The family; Gretta and Archie; Duncan Brothers; Princess Rebekah Lodge, No. 58, Fort Saskatchewan; Hugh and Lilian Barber; Mr. and Mrs. R. Ward and family; Mr. and Mrs. E. W. Chesbrough; Stewart family; Willing Workers of First Edmonton Wye Band; United Church choir. She is survived by two daughters, Mrs. J. M. Dickson of Paisley Scotland, and Mrs. A. Gibson, of Fort Saskatchewan; two sons, Robert and George, both of South Edmonton; two sisters, Mrs. R. Duncan, of Edmonton, and Mrs. J. Miller, of Barrhead, Scotland; and five brothers, John, Robert, James, Duncan and George Pollock, all of Paisley, Scotland. Heward & McBride, funeral service.

MISS BRIDGET BUNYAN

Miss Bridget Bunyan of Fort Saskatchewan passed away at the General Hospital in the city on Thursday, October 4th at the age of 62 years.

Miss Bunyan came to Fort Saskatchewan eight years ago and was a devoted member of the Catholic Church during her stay here. For the last six years, she was President of the Altar Society at the same time Secretary and a very devoted member of the society.

She may be said to be one of those dear souls who will be missed by all who knew her. She leaves to mourn her death; Mrs. P. Lee, of Fort Saskatchewan and Mrs. J. Hays of Arthur, Ontario; Two brothers, Mr. Daniel, and Mr. Thomas Bunyan, of Arthur, Ontario. The remains were forwarded Friday night from Connolly and McGinley's funeral home, to Arthur, Ontario, her old home, and interment will be held on Tuesday, October 9th. A funeral service will also be held in Fort Saskatchewan on Wednesday, October 10th, at 10 o'clock a.m.

Miss Beatrice Sellers of the Alberta Government Telephone staff, Wetaskiwin, is the guest of Mr. and Mrs. Ed. Davis this week.

******

The editor was among many others who took advantage of the holiday to hunt the elusive partridge and stray chicken in the Thorhild district.

******

Mr. and Mrs. P. Hill left Friday night for Arthur, Ontario, where they will attend the funeral of the late Miss Bunyan.

Mrs. W. A. Graham returned home Monday evening, after spending several weeks at the coast

******

Mr. and Mrs. Barney Klassen of Duhamy, Alta., spent the week-end at the home of his parents, Mr. and Mrs. B. H. Klassen.

CARD OF THANKS

Mr. and Mrs. Alfred Gibson wish to sincerely thank their many friends for the beautiful floral tributes received in their recent bereavement.

The Practical and the Ideal

Alberta Pool Elevators is a creation of the agricultural co-operative movement and as such is closely knit to the families on the land who believe in and act upon the principals of co-operation in order to better their condition.

Commercial success is highly important but it is to be regarded only as a means to an end—the improvement of the living conditions of rural people.

The major function of this extensive country and terminal elevator system owned by Alberta farmers is to give support to their natural aspirations for a more secure rural tenure.

Both the practical and the ideal sides of the farm movement are united in Alberta Pool Elevators and on this basis a general appeal for support is extended to all grain growers

Local Oddfellows Make Presentation to G. Becker And E. Kolterborn

Presentation of Jewels to Well Known Members of Local Lodge

An interesting presentation of a Twenty-Five Year Jewel to P.G., Bro. E. Kolterborn and P. G., Bro. G. Becker was made after the business of the regular meeting was held on Monday evening, October 15th, 1934.

Grand Warden Bro. T. M. McCallum of Edmonton supported by P.G.M. Bro. W. G. Shore; P.G.P. Bro. D. Wilson and L.L.G.M. Bro. E. Flintoff presented the Jewels to the two members.

A number of members from Edmonton Encampment No. 2, as well as from Lamont, were in attendance. After the presentation, several officers of the Order spoke and congratulated the members receiving the Jewels.

The officers speaking during the evening included the following

Grand Warden T. H. McCallum.
P.G.M. D. Wilson,
D.D.G.M. E. Flintoff,
P.G. A. Conford,
P.G. F. Baker.

THE LIVE STOCK SITUATION

Live stock generally is facing the winter season in fairly good condition. In order to avoid the necessity for shipping in feed for cattle to the dry areas, the provincial government is removing surplus cattle of the poorer type from these areas and disposing of them, the poorest of them going to packers, and the balance to farmers either for feeding or breeding purposes.

LITTLE IN RETURN

The farmer is on his land; the fishermen are busy on the Great Lakes; the lumbermen (who reap their strange harvest of gigantic plants in winter) are hauling their logs to the mills. The work of digging beauty and comfort and luxury out of the earth or whisking it off the surface of the earth is in swing. For that to what it all amounts in; beauty and the comfort and luxury are the colours of every stroke of the woodsman's axe or the miners' pick. From the soil and the sea and from the thin skin of the world covering which man has probed with his drills and his implements of exploration, the things which he prizes most are wrested with unremitting toil.

It would seem, then, that among the greatest servants of mankind are the men whose daily work it is to get from the sea or the soil the things which enable man to live as men have never lived before. The farmer who feeds and helps to clothe the world, the miner whose metals, when gems and whose beds are of such supreme importance, the lumberman and quarryman whose labors make possible the building and furnishing of great business and commercial palaces, the trapper whose furs are of such delightful softness and warmth —all these primary producers and the primary producers who drag food almost from the sea, are, it would appear, among the greatest benefactors of man. But how little of their benefactions do they themselves enjoy?

They are among the world's hardest toilers, but others enjoy the fruits of their labors.—Toronto Star.

The Crop Report

The crop season has been one of the most unusual in several respects in the history of the province. At this date a large proportion of the threshing of wheat and other grains still remains to be done, due to the unusually prolonged spell of cold, wet weather projected into the middle of the harvesting operations on September 12th, and lasting almost three weeks. During this period snow and frost alternated with rains to tie up farm operations throughout the entire province. Threshing was resumed a week ago under more favorable weather conditions, over most of the province, but in the Peace River district rains have continued and very little has yet been done in threshing of grain.

Vermilion Agriculture School To Reopen

The announcement has already been made by the Hon. F. S. Grisdale that the Vermilion School of Agriculture will reopen on October 30th. Already over 200 applications for admission have been received, and with the past week of excellent threshing weather, the number will grow.

Board and room has been reduced to $20 per day and there are no fees or costs of any kind. The girls of course, buy the material used in the dressmaking classes, but keep the garments for their own use.

The down age limit is 16 years, but this year's class will average from 18 years to 22 years. There are no entrance examinations and the work is of a very practical nature. One surprising feature this year is the large number of registrations from those who have their 9th, 10th and 11th Grade. Some even have their 12th Grade.

DEVELOPMENT OF TAR SANDS

Around McMurray, in the northern part of Alberta, there are enormous beds of bituminous sands, which have only waited for the discovery of a simple process for the separating of the hydrocarbons from the sands to become the basis of one of the largest oil fields in the world. For many years much engineering skill and money have been spent in an endeavor to perfect a simple, efficient process, and last summer Mr. Max Ball of Denver and his associates Mr. McClave, have, after many years of effort, evolved what appears to be such a process. There has been set up in Toronto a pilot plant for the separation of the sands, and within the next two or three weeks there will be joined with it a new type of refining plant, designed by the Smith Engineering Company of Los Angeles.

Those who have seen the preliminary tests on the separation unit pronounce it to be a complete success, and there is every reason to hope that the consolidation plant will be the solution of the problem of the development of this vast natural oil and asphalt resource. The solution will mean complete independence of the British Empire for oil.

There has been more tomato paste, tomato sauce and ketchup, and tomato soup imported into the British Isles from Canada than from any other country during the first six months of 1934.

Your Wagon to See Aboard —
... Fair and Efficient dealing is the A.P. Standard of Service.
ALBERTA PACIFIC GRAIN COMPANY

Partridge Hill NEWS

Threshing is going ahead at a good rate in this district. Given eight to ten days good weather we should see the finish. Yields vary, wheat runs 5 to 37 bushels per acre, grading 4 to feed. Some barley light, oats fair, but lots of fodder.

Monday 15th was a busy day for those who had stock out at the Reserve pasture, as it is always a big job in getting stock rounded up and safely home.

******

The ladies aid are planning for their annual chicken supper and concert as soon as threshing is cleared up. Watch for definite announcements later.

******

Mr. J. M. Alton spent the past ten days visiting friends in Edmonton.

******

Mrs. H. Phillips was a Lamont visitor last week.

******

We regret to say that Carl Krebs suffered a painful laceration on his arm while threshing last week. He is a patient at the Royal Alex. hospital in Edmonton.

******

Tom Whitson is building an addition to his stable this fall.

******

Mr. John Hooten of Dresden, Ont., is a guest of Mr. and Mrs. R. M. Warring.

******

Rev. Clyn. Jackson, D.D., of St. Stephens College, Edmonton, was the speaker at Harrot Home Service last Sunday. The Church was suitably decorated for the occasion.

******

The new home of Mr. and Mrs. Hugh Phillips was the scene of a happy gathering Tuesday evening, October 2nd, when a large number assembled to bid them welcome to the district. Rev. E. J. Hodgins on behalf of the Church, W. Gibbon of the U.F.A., Mrs. A. B. Whitson for the U.F.W.A. and Mr. Wm Osbaldeston for the Old Timers gave them a hearty welcome. To which Mr. and Mrs. Phillips replied.

******

Due to continued bad weather conditions and consequent delay Sunday threshing is not likely to be interfered with by R.C.M.P., it was learned on Wednesday.

"As far as the Lord's Day act is concerned, it all resolves itself into a case of necessity," said Commissioner Newson of the R.C.M.P.

The Observer

For this week I propose to take the lazy man's way of recommending for your careful study the opening paragraph of a short book by Professor Alfred Zimmern who holds the Chair of International Relations at Oxford. It is a plea for the cultivation in every democratic state of an intelligent opinion on world affairs as the only manner by which our present civilization can survive. He says:

Civilization is control over environment. A civilized man is a man who understands the world in which he is living and the forces by which it is moved, whilst a savage is a plaything of arbitrary and capricious powers acting beyond the limited range of his intelligence. A civilized society is a society equipped with the knowledge to control its environment, whilst a savage society for the lack of such knowledge remains steeped in what is rightly termed barbarism. The criterion is not ethical nor aesthetic, but intellectual and practical. The savage may be and, accordling to traveller's reports, often is, or has been, as virtuous in his customs and as refined in his sensibilities as the average modern town-dweller, whilst the records of civilized communities bear plentiful witness to the moral depravity which may accompany high intellectual attainments and wide information. There is no doubt an inner connection between intelligence and virtue; both are related to the order which is the ultimate condition of all human affairs. Of that order civilization, which is the work of practical intelligence is only one, and perhaps not, in the last analysis, the most important manifestation. Religion, conduct, culture, beauty, all have their place. The goods, according to Aristotle, tend to civilization. They dwell in a realm superior to it. Yet from his day onwards, Europe has accepted the Greek contention that civilization, or a control and orderly external environment, is an indispensable condition of human happiness; and this element in the European tradition is perhaps that which the societies of other continents have been most ready to accept.

TURKEY CROP ESTIMATED TO BE LIGHTER

The turkey crop is estimated to be from 10 to 15% lighter than last year, and reports from turkey raisers would indicate that this reduction in volume is due to the low price levels that have prevailed in the past two years for this product. The quality, on the other hand, over the greater part of the Province is almost average.

CAN YOU BEAT IT.

If you want to see a monster pumpkin take a look at the one grown by Floyd Baker and now on display in the Fort Hardware. It is fully ripened, and tips the scales at 35 pounds.

MORE THAN A GRAIN COMPANY

Every Alberta Pool elevator may be viewed as a sentinel guarding the marketing interests of grain growers in that district.

It also may be looked upon as a link connecting various parts of a great farm movement.

It is an emblem of a determined effort on the part of the farming population whose objective is a greater measure of social justice and economic security for the men, women and children engaged in Canada's basic industry.

Jones, Graham & O'Brien's

Lessons Of The Depression

Perhaps the wish is father to the thought but it is quite evident that, in steadily increasing degree, people are expressing the view that the depression which has hung over the world like a long fog for the past five years is lifting slowly perhaps but nevertheless surely, and that gleams of sunlight are seeping through for the encouragement of mankind and the restoration of confidence.

In support of this view statistics are quoted of increased business, rising prices, more employment, increased revenues for the railways, rising national revenues. Betterments of the kind are noted, not in one but in many countries, and from many quarters come reports that there is a growing tendency on the part of people with money to invest to again proceed to do so.

Whether this more optimistic viewpoint is justified we are not in a position to say, and it is just possible that the statistical betterment noted is the result of the injection of artificial stimulants into the arteries of business by governmental bodies, rather than the outcome of a natural and more substantial improvement in conditions. Whatever may be the underlying cause of this slowly returning confidence, it is undeniable that it exists, and people believe that the tide winters which have been running so strongly in an adverse direction for so long have passed the peak and are now beginning to flow in an opposite and more favorable direction.

Coupled with this, there to recognition in Western Canada that, while much betterments may be seen in other parts of the country and the world, there can be no marked improvement throughout this section of the Dominion until it is blessed with more favorable and normal climatic conditions. Nothing in some predictable return to more normal precipitation has the continuous baker they have expended. Unemployment has not been the curse of the vast majority of Western people. They have worked long and arduous days, 365 days in the year, but Nature in the shabbiest mood for some years past has denied to our working farmers any profitable returns from their labor; in fact, in thousands of cases no return at all. Loss has been added to loss, and the accumulations effect has been the ruination of either people out of employment because there was no work to be had. Such climatic conditions will not permanently continue.

Possibly one of the best indications that the depression in passing is that people are beginning to take note of the lessons which it has taught. Some of these are of a purely material and practical kind. For instance, and despite a certain school of thought which urges that man should plan his activities from year to year, and, as nearly as possible, balance production with consumption, there is a growing recognition of the wisdom displayed in Egypt in the days of the Pharaohs when under the guidance of, Joseph they laid by and accumulated reserves in the years of plenty to carry them through the lean years. It is more and more coming to be accepted as a truism that in Western Canada we must do likewise.

But above and beyond the material lessons taught by the depression,—a lesson, it is to be hoped, that have been well learned by many—there are moral, ethical, spiritual lessons, the importance and significance of which will, it is also to be hoped, leave a lasting impression.

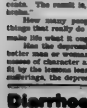
Kitchener, the famous pro-Scriptor, is reported to have once said that he never knew how good he was until he got his first kicking. Many of us have taken a pretty severe kicking in different ways during the past five years. It sometimes does a man good to be thoroughly floored. It may call up reserves of energy that he never realized were his. And this seems to be, ought to be, to the credit side of the depression. Adversity brings out the strength of character of men and women, or the lack of it. Possibly many strong men have gone down and gone under; others have displayed an initiative and developed traits of character and strength which even they did not know they possessed.

Assuming that the fog of the depression is lifting, and that we are again slowly emerging into the sunlight of more prosperous times, now is a good time to take stock of what the depression has actually done to us and taught us as individuals and as a nation. If we correctly size ourselves up as individuals, and profit by our inventory of ourselves, the nation will be better, stronger, more enduring. This, then, is a time for realistic balance sheets,—balance sheets of character, of habits, of motives as well as, and even more important in the final analysis than balance sheets of money, stocks, bonds and chattels.

"I have just taken a real inventory," said a man who has had his full share of bad business breaks. "I've thrown away a lot of stuff I used to carry as assets. For instance, I carried on my payroll a lot of useless hirelings that were called 'friends'. When I overtook the ugliness of adversity longer, I let them go. Then I found out that they had been standing in front of people that really were friends. I'd been spending time and money on people that didn't mean a thing to me, and neglecting those that did mean. Now I am a few special people oftener, and have a better time with them. I think, on the whole, I've come through the depression richer than before. My cash value of my estate has shrunk considerably, but that's balanced by a big increase in what one's friends would be willing to pay in dollars and cents. The result is, my net worth is greater. There's a good side to every bubble."

How many people have been wasting time, money and energy upon things that really do not count, and neglecting those that are worthwhile and make life what it ought to be and was intended by us to be? Many of us, for instance, have neglected the tonight you who reads this my business? Are you a better man or woman because of the depression, or have you revealed weaknesses of character and slipped? Are you more determination to the fight by the keenest keenest. If so, with all its worries and difficulties and even sufferings, the depression may be turned to good account. It's up to you.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains



Prompt treatment with Dr. Fowler's Extract or Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and exhaustion the sufferer associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 50 years—you do not experiment when you use it.

WHAT DOES YOUR HANDWRITING REVEAL?

by LAWRENCE HIBBERT
(Graphe-Analyst)
(All Rights Reserved)

(Editor's Note: These articles on Character from Handwriting have aroused enormous interest. Many readers are sending in specimens of their own handwriting for a personal analysis. If you want your handwriting analyzed, see the announcement at the foot of this article.)

A Graphe-Analyst's mailing is very interesting. It is a reflection of people's hopes and fears, worries and problems. It is a very mirror of life itself. And for each question, the Graphe-Analyst can supply an answer.

Hand writing shows as plainly the character of the writer. Graphe-analysis is an X-ray that cuts through the verbiage and gets right down to the very nature of the writer.

A girl writes in tormented fashion, pleading for advice on how to deal with her brother and father. They are making life miserable for herself and mother and divorce is to be. By her's the latter do not do what they are told in regard to some money that she must want. The writing of the father and brother show greed and dishonesty, and a brutal will that sometimes gushes over into violence.

Another girl is having trouble with her boy friend. Is he to be trusted? There are many traits of this kind. And very often, we can give a reassuring answer. Sometimes, our advice will hurt—but the truth is what people are asking for.

A mother in very anxious to know the disposition of her young daughters. And what talents they possess. In this way, she can encourage them along the lines in which they can most progress, and in which they will be happy.

Another mother is perplexed about her boy. He is the only child she has, but she doesn't understand him. Graphe-Analysis reveals his hidden traits, and suggests a line for the mother to work along.

A young man from the West says his life has been miserable, and, try as he will, he cannot do anything right. His writing reveals the trouble—a misfit in his nature, and the need for great control. He has a hard row to hoe before he can regain self-respect.

The letters show how many people are many pegs in round holes. Real talents wasted because the possessor is in a vocation totally unsuited to him.

Opportunities lost, because people have not developed the essential qualities of will and determination. Graphe-Analysis is very helpful. It reveals as only the major characteristics, but those hidden traits and forces that are gradually loosening up, and, if left long, affect one's mode of life. If they are strong points, they can be developed. Often, they are potential weaknesses, and need curbing. Graphe-analysis shows the way.

What does your handwriting show? Let a skilled Graphe-Analyst tell you the secrets that your writing reveals. You will be surprised at the revelations. Find out the true characters of your friends. Send them specimens of the writing you want analyzed, and enclose 10c coin for each. Enclose with 5c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 178 McDermot Ave., Winnipeg, Man. Letters are confidential and will be answered as soon as possible, but please allow at least two weeks for your reply.

Old Ship Scuttled

Otago Was Once Commanded by Cursed The Novelist

Sixty-three years ago a small sailing ship of 340 tons, the Otago, left Port Chalmers, New Zealand, for England. She did the voyage in the almost record time of 85 days, and returned to her home port after 18 months in the trade and at her destination.

Now she has been taken out to sea for the last time and scuttled. It just did not pay to brush her up, but her past was a tale of romance. She was owned by Joseph Conrad, novelist, and later he made references to her in his books—"The Shadow of the Sun," "Faith," and "The Shadow Line."

Built in 1869, she put up many fine performances, and once sailed 345 miles in 24 hours. Her last days were spent as a coal hulk in Hobart, Tasmania, a battered but proud vessel.

California has more than 17,000 trees with trunks at least 10 feet in diameter.

Abner Doubleday, of Troy, N.Y., founded the American national game, baseball.

The ENERGY VALUE of Cod Liver Oil PLUS SPEEDY ASSIMILATION

With established cod liver digestion begins at once in the stomach. Ordinary oils must first combine with and penetrate poison — no form on emulsion — before they can be assimilated.

Scott's Emulsion is more quickly and easily assimilated than plain Cod Liver Oil because it is already established. Scott's Emulsion is rich in body building hypophosphites of lime and soda. PLUS values you get in Scott's Emulsion of Cod Liver Oil.

World Peace

League Of Nations Society In Canada Organizing Mass Meeting

Canadians are vitally interested in world peace. Primarily this is true because of the humanitarian outlook of our people and because of the stress we rightly place upon law and order in all realms, nationally and of international affairs. This general outlook is strengthened by the by two special considerations. Firstly our position as a member of the British Commonwealth would make it exceedingly difficult for us to avoid becoming involved in any large-scale world war, and, secondly, as a country of a great exporting nation it is exceedingly important for us that confidence peace and stability be restored throughout the world.

The League of Nations Society in Canada is organizing a series of mass meetings throughout Canada late in October, 1934, with a view to bringing these and other important considerations before our people and developing a sound public opinion in support of the maintenance of peace. The three signatures hereto, being the Saskatchewan members of the National Council of the Society, urge all communities in Saskatchewan to join with the rest of Canada in this demonstration by organizing local meetings and addresses at that time. Programs and necessary information and assistance can be obtained from the Society's office, 124 Wellington Street, Ottawa, on request.

Canada is not a militaristic nation but the best safeguard against its becoming so and the best assurance of our influence remaining a strategic one at Geneva and elsewhere abroad is the development of a strong public opinion within our own country. We therefore confidently and earnestly commend this program to our fellow citizens of Saskatchewan.

C. C. Brouillet, Regina; Andrew R. Ribbald, Saskatoon; (Mrs.) Violet McNaughton, Saskatoon.

Submarines Made Safer

All the new submarines built for the British navy have two safety devices, one consisting of eye-bolts to which divers may attach a hawser in case of need, and the other being a battery of buoys which can be released from within the vessel to permit communication with rescuers.

BABY'S UPSET STOMACH Relieved!

Often when it is evident that the stomach is upset, Baby's Own Tablets are recommended. When Tablets are given at the first sign of trouble the upset stomach is soon strengthened by system, bowels regulated, and baby restored to health and happiness.

Write for free booklet to The Dr. Williams' Medicine Co., Brockville, Ont.

Sold by druggists everywhere, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

BABY'S OWN TABLETS

The shipments of livestock from Western to Eastern Canada for the first 36 weeks of 1934, ending September 7 included 62,560 cattle; 701 calves; 150,442 hogs; and 45,322 sheep.

Girl to Woman

Mrs. G. F. Power of Lewisporte, Nfld., writes: "When I was a girl developing, I was very thin, pale and weak. I was always tired, had dizzy spells and headaches. Dr. Pierce's Favorite Prescription built me up, strengthened my system, and I developed into a healthy woman."

Send 10c for trial pkg. of Dr. Pierce's Favorite Prescription Tablets. Write Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

The number of live cattle shipped to 1934 to the United Kingdom up to September 13 was 8,782 head compared with 36,239 head during the corresponding period of 1933.

DISCOVERY ALSO EASES BAD HEADACHES
MUSCULAR PAIN OFTEN IN FEW MINUTES

Remember the pictures below when you want *fast* relief from pain. *Aspirin* runs even a hard headache or neuralgia often in a few minutes! An *Aspirin* tablet begins "taking hold" of those pains practically as soon as you swallow it. And *Aspirin* is safe. *Yet Aspirin does not harm the heart.*

Remember these two points: *Aspirin Speed* and *Aspirin Safety*. And, be sure you get *ASPIRIN, the method doctors prescribe.* It is made in Canada, and all druggists sell it. Just say Aspirin to Harper in the form of a cross on every *Aspirin* tablet. Get the 12 tablets or economical bottle of 24 or 100 tablets.

Why Aspirin Works So Fast

(1) 5 SECONDS OF STUDY showing An Aspirin tablet starts to disintegrate and go to work.

(2) What happens in the stomach—ASPIRIN starts "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures
— ASPIRIN DOES NOT HARM THE HEART —

Radium Storage System May Result In Increased Use And Widen Scope Of Radio Activity

A storage system for radium rays whereby the precious metal can be kept at work 24 hours of the day, whether there are patients to be treated or not, was described at the International Conference of Physics by Professor J. C. McLennan, of the University of Toronto, who has been working in England.

The storage plan grows out of discoveries first announced by the late Curries, Dr. Pierre and his wife Marie, among the first to investigate radio-active elements.

They found that common elements of total 60 of them when bombarded by high energy rays become temporarily radio-active and gave off the same rays as radium for periods varying from a few seconds to a few months.

Prof McLennan applied this principle, using five grams of radium under his charge. Normally when not in use it was enclosed in a lead case to prevent the dangerous rays from getting about and causing injury, but if the disintegration which causes the radiation would continue at the normal rate.

The investigation has not been anything to worry about heretofore First because it would last thousands of years and second because nothing could be done about it.

Now Professor McLennan has imprisoned various metals in the lead box along with the radium. These include aluminum, boron and beryllium.

They pick up the radio-activity from the radium, he reports. Evidently the same thing happens to them as to the metals and other substances which the Curries have been bombarding with various kinds of high-powered rays.

What similarity seems to happen is that a little of the bombarded substances changes into something other than its parent. This bit of different or new matter does not last long. It blows up just like radium, only much more quickly.

This happens also to the metals which Professor McLennan imprisons under the full force of the radium rays.

After being removed from the radium chamber these substances give off rays of their own. Whether the rays have the same effect on living tissues as radium is now under investigation. Prof McLennan is using plants and small animals to test their effects.

If these short rays are like radium it appears possible that the medical men will have a whole pandora's box of rays at their command and under such good control that they can have a two-minute ray or a five-minute one—or even a very hard ray or a soft-lasting one, according to the diagnosis of the patient's needs.

John Cunningham McLennan, O.B.E., F.R.S., professor of physics and director of the physical laboratory at the University of Toronto. He is the author of numerous papers on radio-activity.

He was born at Ingersoll, Ont., in 1887 and finished his education at the University of Toronto and Cambridge. He was appointed scientific advisor to the British admiralty in 1918 and in 1920 was royal medallist and Bakerian lecturer of the Royal Society of London. He is a past president of the Royal Society of Canada and the Royal Canadian Institute.

Had Hot The Dragon

"I aren't 'ad a bite for days," said a tramp to the landlady of the George and Dragon. "D'yer think you could spare me one?"

"Certainly not," replied the landlady.

"Thank yer," said the tramp, and disarbed off, but a few minutes later he was back.

"What d'yer want now?" asked the landlady.

"Could I 'ave a few words with George?" quarted the tramp.

The oldest national flag in the world is that of Denmark, which has been used since 1219.

Early History Of The West

H.B. Company Traders Were Long Before Explorers

Long before official explorers came with drums and trumpets to "discover" the west, Hudson's Bay Company traders had crossed the plains and reached the Rocky Mountains. This was one of the interesting discoveries by Prof A. S. Morton of the University of Saskatchewan, who spend last year delving into the Hudson's Bay Company's records, which are stored in the London head office vaults.

The inside story of the British settlement on the Red River will need re-writing in several respects and the name of the fundamental wrong in the company's policy is made clear as result of Prof Morton's study of the records, which carefully filed more than a century ago.

DAYTIME CHIC FOR EARLY FALL AND A MODEL THAT CAN EASILY BE MADE AT HOME

A charming model is to-day's pattern which shows smart use of contrast Turn Parts in favoring for fall.

It is especially nice in crepe marocain, famous couturiers are sponsoring.

The original in black, combined with a novelty ribbed fabric in gold and white for its contrast.

Another version in mahogany brown crepe, which is deeply pointed at the front and has colored taffeta contrast.

Black and crepe is also fascinating for it with white contrasting trust.

Style No. 463 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. 16 requires 3 yards 39 inch contrasting.

Price of pattern 12 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Inspection In Air

Survey May Explain Why Epidemics Occur In Cities Far Apart

The first day's results in an "air survey" over Philadelphia gave scant comfort to hay fever sufferers. An airplane bearing a scientist and his instruments went 1,500 feet aloft and "measured" 100 cubic feet of air to find what proportion it contained. Examination revealed 182.5 one grains of pollen, 99 per cent. of which was ragweed. Dr. Theodore B. Appel, secretary of the U.S. State Department of Health, said the airplane "sniffer" may reveal why epidemics of sleeping sickness, infantile paralysis and influenza break out simultaneously in cities far apart. "It may be learned from the study," Dr. Appel said, "whether these germs are air-borne. Certainly, many epidemics that break out in communities widely separated cannot all be accounted for by human carriers."

MR. (CHIEF) FORD

Well Known Saturday Evening Post writer, with 35-lb. tyee salmon he caught on Sept. 3, this year, at Campbell river, the famous salmon fishing resort north of Victoria on Vancouver Island.

The Dominion Marketing Board Has Had Many Problems To Deal With In Its Brief Existence

Lessons From The Calls

Head Strength Into Storm And Let It Blow Past You

Blowing hard on the headland, the wind made walking, and even standing, difficult. Waves battle-driven and foam-flecked broke against the cliffs in continuous thunder. The lighthouse passing on to his home over the hill predicted that a wild night was coming. Watchers did not care to linger.

But Strong things were there that seemed to mind the tumult not at all. In their own way, they were perhaps enjoying it. A score of gulls were riding a hundred feet in air, heading directly into the wind, and almost motionless. They were maintaining position as easily as though calm weather was about them.

What superb streamlining nature provides for these birds of the air! Sharp bills, and straightened, streamlined bodies, offered little wind resistance. Broadside on to the gale, the birds must have been swept away. But they were too wise to allow that to happen. Facing the wind, they seemed fairly to cut it asunder. There was nothing in them for the gale to get hold of.

A white feather drifted down from aloft and fell within ten feet of us. For all one knows, it may have been a feather from the wing of a bird above the lighthouse. In any event, what it said to one admiring spectator was this: "See how we birds do it. The way to meet a storm is simply to head into it, and let it blow past you if you make yourself a small enough target, the wind may blow itself out and do no damage."

Christie Pevsner Monitor

The SNAPSHOT GUILD
USE THE FINDER

At what is the girl pointing? . . . Why? . . . What a lovely picture! But, unfortunately for her, it does not tell a story, and fails to explain itself. There is no question, however, about the snapshot of the hunter. It tells a complete story, its composition is successful.

Listen in on any snapshooting beginner as he goes over a fresh batch of prints.

"Say, lookat that! Got that string of trees right in the sky-line. Didn't see it in the picture! Now how did it manage to do a crazy thing like that?"

The answer is very simple. The beginner, the picture failed to see the view-finder when he made the shot. Had he looked for the string of fish was in view, but he purposefully shot the fish in the air. The picturing fish was neatly decapitated. Most amateur snapshots have two kinds of view-finders. First, of course, is the finder reflecting the good picture. The other is the finder above. Properly studied, it will tell you an accurate idea of what each shot includes. Then there is the subject view-finder, centered on the top or side of the camera. In using it you hold the camera at eye-level and sight through the two metal contrivances. What you see, the camera will get.

With either or both of these finders there is really little reason for failing to get what you want in a picture. Of course, there are limits, defined by the size and shape of the film and the capacity of the lens. You have to select the most interesting bits of a scene and concentrate on them.

When an artist does this, he "composes" his pictures. Many amateurs have been awarded prizes in photographic competitions, but the whole idea need be boiled down to this. A good composition is simply a pleasing arrangement of the elements of a picture, an arrangement that puts the emphasis on the most important feature.

A little care in using your view-finder will, almost invariably, give you a well-composed picture. Everyone will reject an arrangement that is confusing or displeasing. It is only when you have learned what you don't want that you can begin to get what you want. Then you will be able to tell a story—the story you had in mind when you undertook the camera.

For "telling a story" is the essence of a good picture. A Chinese proverb, a proverb, "One picture is worth ten thousand words." But the proverb applies only to good pictures.

Even a professional photographer spends hours studying the "view finder" of his camera before he makes a single shot. His success in business depends on his presenting vivid story-telling pictures. In any snapshooting we have no such weighty considerations. We have only ourselves and a few friends to please. But we can increase that pleasure vastly by pausing, just before we click the shutter to check up our pictures in the view-finder. If it's what we want—fire away! And, if it isn't, the finished pictures come back, we shall certainly not begrudge them the months of consideration that preceded.

JOHN VAN GUILDER

Lessons From The Calls

The Dominion Marketing Board, which was established recently has had many problems to deal with during its brief existence. Since the Natural Products Marketing Act is new legislation to most parts of Canada, there is considerable uncertainty concerning the method of operation. The nature and volume of correspondence suggests that the board will be called upon to deal with a great variety of problems.

Two schemes which had been prepared by interested groups prior to the establishing of the Board have been dealt with and approved. One of these provided for the regulation of the importation of apples and pears; the other deals with the marketing of British Columbia tree fruits. Considerable appeal to be operating with relatively little difficulty.

There is much interest concerning the procedure in submitting schemes and a little impatience at what appears to be delay in dealing with them. In this connection it should be noted that a scheme for the marketing of a product must be submitted by farmers or persons engaged in farming. It is not the function of the Dominion Board to prepare schemes for the industry concerned. When a scheme is prepared, it must be submitted to the Minister of Agriculture at Ottawa with a petition in writing. If submitted in proper form, the scheme is then referred to the Board. The Board examines and deals with briefly They request powers which are quite significant and have an important bearing on the welfare of many interests. When a scheme reaches the Dominion Marketing Board it is first considered in order to decide whether it is in proper order for consideration. This may require correspondence with those submitting the scheme as frequently the provisions are not clear. The effect of the scheme on producers and consumers must then be considered. If the scheme is to deal with export trade consideration of its effect on the importing country and its reception by that country must be given. It must be reviewed in the light of international relations and trade agreements. The legality of the provisions included in the scheme and their relationship to other acts and regulations of the Government must be studied. A number of hearings may be necessary in connection with a single scheme.

It is obvious that a good deal of investigational work must precede the approval of any scheme The time required for that will depend upon the nature of the proposal and the thoroughness with which preliminary work has been done by those submitting the scheme but in any case it may ordinarily be a matter of several weeks and possibly months.

The Dominion Marketing Board has a number of schemes dealing with a variety of products under consideration. During the month five delegations have been heard by the Board with reference to different schemes.

Those interested in the Marketing Bill may receive a copy on application to the Secretary, Dominion Marketing Board, Ottawa.

Hard To Explain

Why Water Obtained From Great Depth Is Cool

An artesian well has been bored in Dakota over 2,000 feet in depth and a fine flow of water has been obtained from it. The well bored at the instance of Sir Adam Beck in London, Ontario, will be unwatched on account of the opposition it aroused. West Chicago has a well 3,581 feet deep. St. Louis has one 3,843½ feet deep. At Potsdam Heights, Conn., there is one at 4,004 feet. One near Leipsic is 5,728 feet in depth. And still we are told that the earth is full of subterranean fires. The order is cool and fresh and pure there these depths. What's the answer?

FEAR THE PEACE OF EUROPE MAY BE DISTURBED

Paris—Fear the double assassination of King Alexander of Yugo-Slavia and Foreign Minister Louis Barthou at France might wreck the continental peace or did the killing of Archduke Franz Ferdinand at Sarajevo 20 years ago, loosened an blaze passed without bringing any major developments.

But the 70 deadly bullets fired by Petrus Kalemen at Marseilles left France shaken politically and Europe nervous over what may come next.

In many quarters belief that Kalemen may have uttered the cause of events in Europe was freely expressed.

The question of the assassin's nationality largely important because of its political implications, preoccupied police over the continent, and everywhere authorities sought clues which might enable them definitely to identify him.

France's Surete National and authorities at Prahla, Czecho-Slovakia, insisted the Czech passport found on Kalemen's body, which apparently had been visaed by Yugo-Slavian authorities at Zagreb, was forged.

Among documents seized in the homes of Yugo-Slav Separatists in Paris, police said, was one calling Alexander "tyrant king and traitor of his country."

Meanwhile, trouble for the government of Premier Doumergue appeared to be brewing over responsibility for failure to protect King Alexander, as groups of demonstrators on the boulevards shouted insults at police and Albert Sarraut, minister of the interior, for failure to prevent the assassination.

Interpolations already have been filed in the chamber of deputies and certain French newspapers have criticized the government sharply, while opponents have suggested it is time to overhaul the government of "tragically weakened authority."

Premier Doumergue himself took over the duties of Foreign Minister Barthou.

Throughout Europe police are searching for information about a group of international terrorists believed to have plotted the assassination of King Alexander.

Meeting secretly in some remote Balkan hideaway, police believe, the band of assassins drew lots to determine who would give his life to slay the king of Yugo-Slavia.

The task falling to Petrus Kalemen, the gang is believed to have planned the assassination in the fullest detail and equipped the slayer before sending him over the French frontier from Valiorbe, Switzerland.

Declares War On Racketeers

Ontario Government Will Protect People Against Improper Financial Practices

Toronto.—Premier Mitchell F. Hepburn declared the Ontario government would "wage war without quarter through its securities commission on financial racketeers and all persons engaging in improper financial practices."

The premier made the statement following a meeting of the cabinet.

"To this end new regulations were passed to strengthen the arm of Securities Commissioner Godfrey and to place his commission on a self-supporting basis," the premier said in a long statement.

Brantford University Appointment

Winnipeg.—Mr. Justice A. K. Dysart has been elected chairman at a meeting of the board of governors of the University of Manitoba, succeeding D. C. Coleman, senior vice-president of the Canadian Pacific Railway, who was recently transferred to Montreal. H. A. Bergman, K.C., was named vice-chairman to succeed Mr. Justice Dysart.

President Of Hospital Association

Edmonton.—R. H. Adams, M.C., Calgary, was elected new president of the Alberta Hospitals Association at the closing session of the annual convention here.

Society Woman Abducted

Wife Of Wealthy Kentucky Oil Man Is Kidnapped

Louisville, Ky.—Mrs. Berry V. Stoll, young society leader and wife of a wealthy oil man, was rescued from her fashionable home by a kidnapper who left a note containing a demand for $50,000 ransom.

Boston by the abductor, who gained entrance into the home on a pretext and left her bound, bound and gagged. Mrs. Stoll was spirited away in an automobile.

Federal, city and county authorities immediately began a wide search.

Mr. Stoll discovered the kidnapping when he returned home from the office late in the afternoon. There he found the maid bound hand and foot.

The maid said the abductor got into the house on the pretext of wanting to use the telephone. The maid was quoted as saying she "never saw a more fiendish-looking man."

As soon as he entered the house the man drew a pistol from his pocket and forced the maid to help him bind Mrs. Stoll's hands with tape. His work completed, the maid said, did this was evidenced by traces of blood found on the floor.

The abductor was described as being between 30 and 35 years old, about five foot eight inches tall, weighing about 130 pounds, having black hair, in the centre.

Mr. Stoll later issued a statement addressed to the kidnapper and said that if he published—

"Berry Stoll has just found the note regarding the ransom and arrangements are being made accordingly."

He declined to make contents of the ransom note public until he learned that it was useless to demanding money it contained a threat that William A. Stoll, president of the Stoll Refining Company, was "next on the list". He is a brother of Berry Stoll, the vice-president, and is president of the Louisville Board of Trade.

Stoll said the ransom note was found in an upstairs b dream.

People Living Longer

By Insurance Companies May Enable Them To Do So

Chicago.—People are learning to live so long that assembly insurance premiums are likely to be higher in the future.

Arthur H. Wood, president of the Sun Life Assurance Company of Canada, told that in an address before the American Life convention in which he warned that "if assembly premiums are based on the assumption that recent past experiences will be repeated, they will probably prove bankrupt."

He suggested that "to avoid incurring an ultimate loss, additional provision should be made for anticipated increase in longevity."

Outlaws Capture Missionaries

Chinese Take Three Church Workers Prisoners In Southern Province

Peiping, China.—A dispatch to the British legation from Changking, said three foreign missionaries, including Miss Grace Embleton, a British subject, had been captured by outlaws.

They were taken prisoners at Lohsanping, 60 miles east of Kweiyang, Kweichow province (southern China), the dispatch stated.

Advices from Shanghai said Miss Embleton is connected to the China Inland mission. The other captives are an Englishman and a Swiss.

Grenfell Service Promised

Edmonton.—Hon. [illegible] proposed health insurance scheme for Alberta, more people will get hospital service and more persons will be employed than at present, stated Hon. George Hoadley, minister of health, when addressing members of the Alberta Hospital Association and the Association of Registered Nurses in joint annual convention.

Ring Confess Guilt

London.—The official gazette announced that the king had conferred upon Prince George the titles of Baron of Dreyngarrick, Earl of Inval Andrews and Duke of Kent, in honor of his forthcoming marriage to Princess Marina of Greece.

Colonel Superintendent, Ontario District, of the Canadian Pacific Railway, who has been promoted to the post of assistant to the vice-president, with headquarters in Montreal.

Rise In Wheat Prices

Average Export Value Shows Sharp Increase

Ottawa.—The sharp rise in the export value of wheat in August, when it reached $12,866,000—was more than double in September the Dominion bureau of statistics reported. The quantity exported in September was 17,548,398 bushels and the value $13,223,000, about $300,000 more than a year ago.

The average export price in September was 87.3 cents as against 75.9 cents last year. During the first six months of the current fiscal year the export value was 268,937,000 compared with $69,276,000 last year, a gain of about $5,000,000 the bureau claims.

Refunding Loan

Believed That Original Amount Has Been Over Subscribed

Ottawa.—With the 1934 refunding loan an unqualified success on all final figures of receipts, explanations were issued but it was learned the only reason the books were being left open was to enable further subscriptions at 1909 Victory bonds. The government was assured the original objective of $50,000,000 would be more than reached but it was desirous of securing as many conversions as possible even if it were necessary to scale down some of the larger subscriptions to keep the total issue within the figure set.

Brew Brings High Price

Brandon, Man.—Believed to be the highest price paid in Manitoba for a horse in years, "Jack," a three-year-old draft gelding Clydesdale, was sold for $400 to A. Leslie of Waltrean, Sask. Winner of the Manitoba grand championship, "Jack" will be exhibited at the Royal Winter Show in Toronto.

Mining Town Growing

Jellicoe, Ontario, Is Hailed Of Real Mining Boom

Jellicoe, Ont.—A real metals boom has struck this isolated mining town as prospectors, geologists, miners and others rush to grab land and erect shelter against fast approaching winter. Even as mill rush down on the scene of Canada's newest gold a rumble

All along the Canadian National Railways right-of-way from the station to what was until recently Jellicoe's only entrance at a hotel tenters and town rerouted to the town proper like a mushroom. Many companies are constructing living and storage quarters at the mining country here. Long to finish them before the impending freeze-up.

Lots have been rented by the railway along the right-of-way and before the rusty sidings Hostess shanties and new stores are being built. A new hotel-tumbleroom has been boarded and all available sleeping space around its walls is rented, much of it permanently.

The problem of sleeping accommodation has been solved to some extent by arrival on one morning of a tourist sleeping car in which 24 hour company rents berths at nightly rates of $1.50 for a lower and $1 for an upper.

Follower Of Gandhi

Madeline Slade, Former Society Girl, Reaches New York On Mission

New York.—Madeline Slade, former English society girl who some years ago became "Mirabai," chief woman lieutenant of M. K. Gandhi, has arrived in New America on a clear conception of Gandhi

She travelled third class on the Majestic and said she regretted having been unable to use cabin class accommodation.

"Mirabai," daughter of a former admiral and all magnet before she renounced social life to follow Gandhi, was dressed in homespun clothing, a hand-woven shawl and sandals.

Miss Slade said she came on the invitation of the Rev. John Haynes Holmes, chairman of the American League for India's Freedom, for a lecture series

May Return To Britain

Report Says Earl Of Egmont Will Take Seat In House Of Lords

London.—Preparations are being made at Avon Castle, Hampshire for the early return of the Earl of Egmont, his wife and their infant son, according to the Daily Mail

The earl, who is only 20 years of age, is living at present on his Alberta ranch near Calgary.

The Mail says it is the intention of the earl to return to Avon Castle before he reaches his majority next April and to take his seat in the house of lords.

Chinese Charged With Possession Of Opium

Two In Saskatoon Alleged To Have Over $5,000 Worth

Saskatoon.—War against narcotic peddlers, recently waged successfully in Montreal with the breaking up of an important international dope ring, opened in Saskatchewan with the arrest of two Chinese merchants in Saskatoon in alleged possession of $5,000 worth of opium. With the arrests police believed they had secured the leaders of an important dope ring in the prairies. It was believed the largest seizure in the history of the province.

The arrests were made under the direction of Detective Sergeant L. J. Black, of Edmonton, in charge of the narcotic division of the Royal Canadian Mounted Police in Alberta. Sergeant Black recently returned from Montreal where he participated in the breaking of the $1,000,000 ring led by Pincus Brycher, wealthy New Yorker, who committed suicide after his arrest.

Those arrested were D. Lem, alias Dai Kwok Lune, and Fred Wens, who are in addition to the Banks' business connections in rural points.

Returns From Orient

Victoria.—Hon. C. H. Cahan, secretary of state for Canada, and Mrs. Cahan returned here aboard the Emp Empress of Japan after a holiday trip to the Orient. "It was purely a holiday trip, as I have nothing to say about business or my impressions of the Orient," he said. "I enjoyed my trip very much and I saw a great deal."

U.S. Crop Report

Washington.—The United States wheat crop was estimated at 498,982,000 bushels for this year by the department of agriculture, which also reported the indicated corn crop at 1,436,782,000 bushels, showing the ravages of this year's severe drouth.

SOME CONTROL OF INDUSTRY MAY BE INSTITUTED

Ottawa.—Suffering more widespread than that caused by the Great War had been brought about by unrestricted business, Tom Moore, president of the Trades and Labor Congress stated in an address here

"We are going to have industrial control in Canada whether we like it or not," he declared. "Industry has shown conclusively that it can not control itself.

"For the good of business itself for the good of the people, in order that social chaos which the Stevens investigation has shown to be so prevalent may be abolished, some control will have to be instituted that we must go carefully or we might establish a dictatorship."

Legislation should be brought in to effect only after collective agreements between those concerned employer, employee and consumer. It should be uniform throughout the Dominion. After that, the people should boycott all those who will not live up to the regulations and drive out those who will not play the game fairly. We must see that business is for public benefit and not for privateprofit."

Bringing of the British North American Act up to date—abnormal circumstances and industry-control were three ways in which Canada could combat "rebellious feeling." English society girl who some years ago became "Mirabai," chief woman lieutenant of M. K. Gandhi, has arrived in New America on a clear conception of Gandhi

She travelled third class on the Majestic and said she regretted having been unable to use cabin class accommodation.

"Mirabai," daughter of a former admiral and all magnet before she renounced social life to follow Gandhi, was dressed in homespun clothing, a hand-woven shawl and sandals.

Miss Slade said she came on the invitation of the Rev. John Haynes Holmes, chairman of the American League for India's Freedom, for a lecture series

CHINESE FEAR FOR AILING LEADER

Dr. Thomas Garrigue Masaryk, the founder and only president of the Czecho-Slovakian republic, is said to be slowly sinking, and political observers believe he will not be able to serve much of his third successive term, in which he was elected several months ago. Now 84 years old, President Masaryk has watched his "brain child" grow to manhood, with a powerful voice among European nations, and serve as the last outpost of democracy in dictatorship-ridden central Europe. He resides most of the time in his large castle in the capital, Prague. Our pictures show the veteran leader,

says MISS ETHEL CHAPMAN, famous cookery editor of the Former

MADE IN CANADA

THE TENDERFOOT

By GEORGE B. BOONEY

Author of "The Coronado Trail", "The Chasing Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerard Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was "growing up" himself—but as Gerald Keene, half owner of the Horse-Close Ranch, and not Dave Bloss, tenderfoot in a Montgomery Ward wildwest outfit.

Dad Keene, grizzled old and luckless prospector till now is returning to tell Dusty of the discovery of certain petroleum which he thought necessary for social legislation for Canada and in insurance for confederacy, to make it possible be insured, but to include those who for physical or mental other reasons were unemployable. Such a measure to be followed later by other means, benefits to be in cash qualifications to be governed by the number of contributions made.

Although it had been said when unemployment insurance was first proposed that it would impoverish the country stated Mr Moore, since 1930 Canada had spent $300 000,000 in direct relief and was now up piling $60,000,000 per month

It was a full two years since Dusty saw her when his eyes were opened like was coming out of the

"She is fleco and he, about to enter stood as though paralyzed at sight of her Her gray eyes stared at him unsmilingly and her bright head was ruffling as she paused and a couple of dry farmers giggled Dusty flushed. He did not know not would he have cared had he known that that very morning old Joe Carr had commented on his known conduct at a Mexican dance and on a household that he maintained in Sa-pulvida. Dustin raised his hat and stepped up to her.

"Aloud, you goin' to say 'Good morning'?" he asked quietly.

"To you? Why? . . ." Edith stopped and looked at him as one might look at a mangy dog and that looked burned even Sam Dustin

"I'd like to walk up the street with you," he suggested.

The looters at the office-door did not hear his words but they saw him drop into step with her and they nudged each other. Then they saw her stop and draw herself up There was no mistaking her words. They came with the whir and snap of a whip-lash.

"The street is open to the public I believe," she said. "When I walk with any one it will not be with a 'squaw man'."

That was all. Dustin, the big man of the Broken Spur, dropped back. His face was white with wrath and his lips were set. The men who saw it all never said a word about it till they got safely home but after that, word spread. They watched him launch his horse from the tie-rack and they preserved the silence of the damned till his horse was swallowed up in a dust-wreath. Then:

"She sure not fire to his shirt-tail," quoth old Styles. The others giggled uncomfortably. They knew Dusty fairly well.

Sam Dustin neither forgave nor forgot that incident and more than once he had planned revenge but no opportunity came his way That one hot encounter marked Edith Carr as the only person in the Valley worth the while and patience to tame her and Dustin swore to himself that tamed she should some day be Some day he would bring her to bee!

He had seems enough not to try to force his attentions on her He knew old Joe Carr too well for that for the old man was one of the old breed that held their women folk sacrosanct The man might be better than ordinary to get his Egg under old Joe Carr's table while the pretty Edith held sway That was also the beginning of trouble for the Hourglass ranch.

It was a big ranch For miles its wire flung up into the hills and its brand ranges pastured many cattle Just back doggedly at Joe Carr's every whim while old Joe Carr's daughter really subsidized some Edith's mother was laid away in the little burying-ground under the great cottonwood on the ranch.

From day to day Edith tried gallantly to stop that military drinking She knew that he maintained in some Sa-pulvida. Dustin raised his hat and stepped up to her.

"Aloud, you goin' to say 'Good morning'?" he asked quietly.

"To you? Why? . . ." Edith stopped and looked at him as one might look at a mangy dog and that looked burned even Sam Dustin

"I'd like to walk up the street with you," he suggested.

The looters at the office-door did not hear his words but they saw him drop into step with her and they nudged each other. Then they saw her stop and draw herself up There was no mistaking her words. They came with the whir and snap of a whip-lash.

"The street is open to the public I believe," she said. "When I walk with any one it will not be with a 'squaw man'."

That was all. Dustin, the big man of the Broken Spur, dropped back. His face was white with wrath and his lips were set. The men who saw it all never said a word about it till they got safely home but after that, word spread. They watched him launch his horse from the tie-rack and they preserved the silence of the damned till his horse was swallowed up in a dust-wreath. Then:

"She sure not fire to his shirt-tail," quoth old Styles. The others giggled uncomfortably. They knew Dustin fairly well.

Sam Dustin neither forgave nor

formed a deep pool at the end of the canon. In that great pool watercress grew rankly and cattle stood knee-deep in the water under the great trees Soda Springs was a constant and never failing source of water supply even in the long Dry Season when no rains fell To the sick and injured Joe Carr the news came like a thunderclap that Dustin and Gerard had brought out over the validity of his claim to the ownership of those springs. No one had ever thought to question his ownership before Dustin raised it and Dustin would never have thought of it but for a word from a drunken Reuter from whom he and Spike bought the "strip" that gave them a questionable title to the Broken Spur. No one had ever been refused waterrights there in time of need. The Springs might as well have been on the Open Range

But the days of the Open Range had passed and along with them went the old-time spirit of free-masonry that made all men free of water and grass at need. It remained for the Hi-ty-ty Spur to force old Joe Carr to test his title to those Springs by fencing them and barring them to the public It made him note too popular Where old Joe had once been the Nestor of the cattle men in Rose Valley, he was likely to become their Thersites thanks to the machinations of Dustin and Goddard He knew the cause of it all. He knew that drink added to the spirit of aggression already aroused by Dustin and Goddard was making him unpopular where he had once been a favorite and he could not give way. Finally dour silent became he had none to talk to, bitter with hate and wrath at his own inability to keep abreast of the times, he saw his ranch slipping into the cattle depression It did not improve his temper to note the success of the Broken Spur

From White To Blue

Buffalo's surgeons are now men in white no longer; their surgical dress is blue. "Time is preferred." Dr. James Burrell explained, "because it does not reflect the rays of light, as did the white Added to comment on the move, a number of prominent surgeons said it was all the same to them black, white, blue or green.

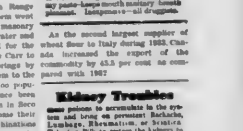
CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, up-to-date one which dentists prescribe such as Dr. Wernet's Powder—the largest seller in the world—gives tooth an never yet comfortable they feel natural. Positively no slipping or rocking—kind of comfort never all day long. Forms a special comfort cushion to perfect and hold plate. Tasteless, guaranteed, gum and paste—keeps mouth sanitary breath sweetened. Instantaneous—all druggists.

As the second largest supplier of wheat Soviet to Italy during 1933, Canada is a heavy contributor to the export of the commodity by 43.5 per cent as compared with 1932

Kidney Troubles

cause poisons to accumulate in the system and bring on prevalent Backache, Lumbago, Rheumatism, or Sciatica. Take Gin Pills to restore the kidneys to healthy condition and eliminate the poison from your system.



IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

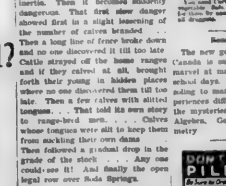
Wake up your Liver Bile —No Calomel necessary

For you to feel bright and peppy, your liver must pour two pounds of liquid bile into your bowels daily. Without that bile, undigested food sours, gas bloats stomach, you're constipated, your whole system poisoned and you feel miserable. Don't you realize that the quickest way to get that completely with more bile-moving calomel, or roughage? They don't make bile.

Ask for Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure in making bile flow freely. Refuse substitutes. 25c, at all druggists.

Home Consolation

New governor of the Bank of Canada is said to have been "no marvel at mathematics" during his early days. This should prove consoling to many a schoolboy who experiences difficulty in wrestling with the mysteries of that accursed trio Algebra, Geometry and Trigonometry



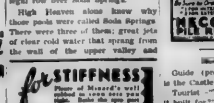
Shrewd Fellow

Guide (proudly)—"And this is the Castle of Sternfels."

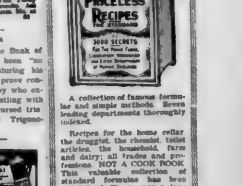
Tourist—"Yes? What picture was it built for?"

Guide—"But, my dear lady, this schloss was erected in 1392."

Tourist—"Well, I'm not familiar with many of those early films."



A Book You Should Own



A collection of famous formulae and simple methods. Seven leading departments thoroughly indexed.

Recipes for the home cellar the druggist, the chemist, toilet articles, the household, farm and dairy; all trades and professions. NOT A COOKIE BOOK This valuable collection of standard formulae has been carefully built up over a long period of time, resulting in the most complete book of formulas of this sort ever compiled Size 5¾ x 8¾ in. 368 pages.

MUCH EASIER

An Oakland country farmer was trucking a load of livestock to the Detroit market. Coming through Pontiac he had a blow-out just as he was passing the state inmate asylum grounds. As he repaired the tire two inmates watched him from the other side of the road fence. "Are you a farmer?" one called to him.

The farmer replied that he was, without looking up from his work.

"Have you ever been crazy?" asked the second inmate.

At that the farmer turned around to face his questioner. "Not that I know of," he said.

"Well," said the second inmate nudged the first, "you better try it, cause it's a sight easier than farmin'."

Thursday, Oct. 30th, 1915

Master Russel James Spence Phillips won the baby contest at the Fort Amond Fair held last week. Master William Hughes, came a close 2nd.

Dr. Mooney donated the prizes for this attractive event.

Johnston Carmodden's barn, with four valuable horses, seven sets of harness and all the chickens and turkeys were destroyed by fire last week. The horses and harness belonged to James McCartney

Another fire occurred on the farm of Philip Mohr when seven stacks of grain were burnt. The cause of the fire was believed to have been from a spark off the threshing machine.

Mr. and Mrs. George Easterby moved into their new home and gave a house warming to a number of friends.

The Women's Patriotic Fund organization realized over $135.00 during the two days at the Fair, due to serving light refreshments and tea.

The following members were winners in good competition in the District Poultry Association meet, held during the Fort Fair: Messrs. W. J. Williamson, Neville White, James Nichol, Paul Tercier, Geo. Hedley, and S. Trubb.

Special Constables To Patrol Streets Hallowe'en Night

A regular meeting of the Council of the town of Fort Saskatchewan was held on Wednesday the 17th October at 8 p.m.

Present Mayor Montgomery, Councillors Magee, Graham, Pettet and Gaul. The minutes of the last meeting held were read and adopted.

Dr. R. H. Mason was appointed Medical Health Officer for the ensuing year.

The Council decided to engage three men for special duty on Hallowe'en to act as Special Constables. The Council trusts the young people of the Town, and the old ones too for that matter, will refrain from any acts of mischief, and that this will be a safe and sensible Hallowe'en to persons and property.

Complaints are made of indiscriminate shooting in the Town, especially with 22's. It is against the law and a serious offence to shoot with any kind of weapon within the Town limits.

The following accounts were passed for payment: F. Elberton, seal $16.40; Alberta Government Telephones $8.80; Calgary Power Co. Streets $117.89; Town Hall $7.98; Memorial Hall $1.50; Dunlop Tire & Rubber Goods Ltd., 100 ft Hercules Redflex Fire Hose 2½ at $1.85; $185.50; Attaching 2 sets of couplings $1.50; W. J. Graham $4.65; F. Elberton 55c.

Mrs. Hannah Spallin Dies, Was Old Timer Here

The funeral of Mrs. Hannah Ashgall Spallin of Fort Saskatchewan who passed away on Thursday morning, October 18th, at the age of 77 years was held Sunday afternoon at 2:30 p.m. from the United Church. Rev. Ramsay officiated and interment took place in the Fort Saskatchewan cemetery.

The pallbearers were, Messrs Dr. G. H. Turner, Johnston Carmodden, H. B. Peters, H. McIlmoyle, T. Johnston and J. B. Armstrong.

Beautiful floral tributes were received from: The family; Mr. and Mrs. Thomas Brinkman and family, Kelowna, B.C.; Marvel, Muriel and Evelyn; Mr. and Mrs. McEachern and family; Mr. and Mrs. Edward Bunsph and family; Mr. and Mrs. T. Johnston; Vera and Clair; Fort Saskatchewan U.F.W.A. Local; Mrs. George Armstrong; Mr. and Mrs. A. B. Armstrong and family; Mr. and Mrs. Guy Armstrong; George and Ethel; Mrs. Fred Simmons and family; James Armstrong; Allen Armstrong.

Mrs. Spallin before marriage was Hannah Moorhouse born at Farrelton Gatineau Valley, Que., in the year of 1859. In 1879 she married John Spallin and moved to Minnesota, U.S.A., where they farmed 22 years, in 1906 they came to Alberta and located 2½ miles south of the Town of Fort Saskatchewan, where she has resided until the time of her death.

Mr. John Spallin died some twenty years ago.

She leaves to mourn her loss, six sons, Joseph, James, George, John and Alfred all of Fort Saskatchewan, William of Kelowna, B.C. and five daughters, Mrs. F. H. Robinson and Miss Elizabeth of Fort Saskatchewan, Mrs. C. Dockstader of Newbrook, Alberta, Mrs. F. J. Kritze of Grassland, Alberta; Mrs. Thomas Brinkman of Kelowna, B.C. A sixth daughter, Mrs. W. Young having predeceased her 5 years ago.

It is said Conklin, a British Indian State, is the most densely populated large region on the earth. Conklin has 814 people to the square mile.

Lessons will not decay if they are kept in cold water that is regularly changed every day.

Women's Institute Hold Successful Dance

A large gathering spent an enjoyable time in the Badminton Hall last Friday evening, when the Fort Saskatchewan Women's Institute held their annual dance.

The program varied from old-time numbers to the modern times, with Frank Smith's Orchestra supplying the music.

At midnight delightful refreshments were served, after which dancing was resumed until 2 a.m.

How To Lose Markets

The United States by virtue of its fiscal policy ably supplemented by its kinetic project of restricted production is in a fair way to lose its cotton trade with the world. A writer in Barron's Weekly tells the cotton farmer of their plight and what is happening to their markets:

"In attempting to help the cotton farmer, Congress and the Federal Farm Board have ignored every phase of the cotton-producing industry except the price per pound paid to the farmer. In so doing, they have unbeknown a train of consequences which is threatening the welfare and purchasing power of the whole south. The farmer by his own acts is losing his cotton-export market to foreign competitors.

"The United States cotton producer, who had been enjoying the most favorable position among the world's cotton producers, now holds the most unfavorable position, and is harassed by a character of competition he had never before encountered.

"Recently, the Argentine newspapers have been urging the Chaco farmers to plant more, and still more cotton. The South American cotton producers are now handicapped in the world markets, to your direct advantage', is how the Argentine press addressed to the Chaco producers.

"Not long ago Germany bought cotton from Brazil, and paid for it by selling coal to Brazil; Russia sold cotton to Europe, and bought machinery from Europe. Japan contracted to purchase 1,500,000 bales of cotton a year from India, and India contracted to buy 400,000,000 square yards of cotton cloth from Japan. Russia, finding that the capitalistic countries will buy cotton against the sale of commodities Russia needs, is encouraging cotton production. Manchoria, for the first time, has become an exporter of raw cotton. Egypt has removed all restrictions and control from cotton so that the cotton produced in that country may pass into economers' hands as rapidly as possible."

Every word of the warning can be adapted to Canada and her problem of finding markets for her grain. We have been losing these markets for years and we shall continue to lose them until we face up to the necessity of doing two things: meeting the competitive price of the wheat of other nations in markets where we have to compete on even terms, and taking payment for our wheat exports in the products of other countries, even though this may include manufactured products which will enter into competition with our native manufactures.

These are hard saying to the wheat grower or the handler of wheat who thinks we have the consuming public of the world by the neck and can make it take our product on our own terms; and to the Canadian manufacturer who believes that the home market should be his at whatever price necessary to make things comfortable and easy for himself.

Nevertheless these are truths; and if we reject them because we find them disagreeable to contemplate we shall encounter something much more disagreeable a little further along the road.

Foxes Escape From Byers Fox Farm

Four valuable cross foxes escaped from H. Byers Fox Farm last Wednesday night. The foxes were penned in an old hay barn and made their way to freedom through a hole between the logs. One fox was bought on Thursday and another was shot by Harris Byers, but up till Sunday, the other two foxes were still almost without bones.

The foxes are valued at about $200. each, but when it is necessary to shoot them, the pelts are only worth about half their original value. After an escape its is almost impossible to catch them alive with the result that they have to be shot.

Foxes that have been in captivity practically all their lives, don't live long in freedom.

GIRLS' A. A. A. CLUB TO HOLD HALLOWE'EN DANCE

The Girls' A.A.A. Club are holding their annual Hallowe'en Dance in the Badminton Hall on October 31st.

In previous years the social event has always been an enjoyable affair, and has attracted large gatherings. This year it is expected that the attendance will exceed any of the former events.

The Badminton Hall is being decorated for the occasion and the popular Frank Smith's Orchestra will supply the music for dancing. At midnight tasty refreshments will be served by the Girls' Club.

Everyone is assured of a good time, so make up your party and come out and celebrate Hallowe'en night on Wednesday, Oct. 31st.

REVISION OF 1933 WHEAT FIGURES

The Dominion Bureau of Statistics has issued a revision of its estimate of the Alberta wheat crop for 1933 following the close of the marketing season ending July 31 last. The first estimate was placed at 94,500,000 bushels, but the new revision based on marketing totals is placed at 101,500,000 bushels.

PRINT PRISON PAPER

Prisoners in British jails now have their own prison-edited and prison-printed newspaper. The first number has just been produced at Maidstone Jail, Kent, under the authority of the prison commissioners and has been circulated in about 10 prisons.

TO DISTRIBUTE TREES AGAIN

More than 100,000 white spruce trees, and some 8,400 green ash will be available for distribution next spring from the provincial nurseries at Oliver, it is announced from the forestry branch of the Department of Lands and Mines. These trees will be distributed on the usual plan adopted two years ago, to farmers who have wood lots, or submits, community centres, etc. Last year some 54,000 trees of various kinds were distributed from the nurseries, to 626 different persons, which included 163 farmers, 18 schools, 12 institutions, and 14 municipalities for community purposes.

Local Boy Hurt When Struck By Motorist

James Hurlbut was badly shaken up at dusk last Sunday night, when a hit-and-run driver smashed into his bicycle, the rider being thrown into the ditch. He was badly dazed, but after some difficulty managed to reach Mr. Warren Brink's near-by, who brought him home. His bicycle was a complete wreck.

The driver of the car failed to stop and the matter has been reported to the R.C.M.P.

When the accident occurred, James was proceeding to harvest work east of the Fort.

Taken from the Files

19 Years Ago Today

Thursday, October 25th, 1915

Dr. C. H. Grunert, V.S., is now permanently located in town, his office being in the Williamson Block.

A presentation was made to Mr. and Mrs. John Paul by the Sunday School Teachers and Rev. D. J. Ramsay.

H. LeMaistre has been transferred to another Branch of the Union Bank.

An elderly couple were left $20 through the will of a relative. When they got the lawyer's letter telling them the news they sat for late the night discussing what they would do in the future with the money. When they got up to go to bed, the old man said: "I suppose, Maggie, this'll mak' no difference: we'll jist speak to the neighbors as before."

The Observer
A WORD TO THE MOTORIST
The beginning of another school term has brought with it a need for greater caution on the part of motorists to avoid accidents. Among the army of young folk are scores of tots going to school for the first time. Many of whom are not old enough to understand what traffic rules intime stand for, or who cannot be expected to assess the hazards of the street in this motor age. That they will dart out from the curb in the absence of their childish play is no mistake. To prevent their doing so would be impossible unless the sidewalks were barred with guard rails.
Then it is a duty and responsibility of motorists to drive their cars, particularly in school zones, in such a manner as to reduce to a minimum the dangers which arise from the thoughtfulness of children in play.
Childhood is the happiest time of life, and to expect children never to think of anything else but hazards of traffic is to deny them something of their birthright. Motorists have rights, we know, but no motorist has the right to endanger human life; and too often have motorists taken refuge in the cliche': "He dashed right out in front of me," when a mishap and still form lies on the pavement. The motorist who is reasonably cautious but his car always under control. Near school zones and other centres where children are numerous he drives with the expectation that some child will dart out in front of his car, but his speed is slow and often he is able to stop.
The number of children slain in the streets by motor vehicles is so appalling as to sicken the public mind. Motorists have a duty and a responsibility in this matter, which most of them strive to appreciate. Those who are too selfish to do so should be sternly checked. Jay-walkers are one thing, but innocent children are another.
—Fourth Estate.

CATTLE TO OLD LAND

Alberta has shipped to date some 9,000 head of finished cattle to the Old Country markets, which is a slight increase over the figure for 1933 at the same date.

The "Toll Of The Road"

When in a hall to be called in the ever mounting toll of deaths and serious injuries attributable to automobile accidents.

It is well nigh impossible to pick up a newspaper these days without finding a tragic headline recording one more, or several more. fatalities and to learn that some pounding life has been snuffed out or the community has lost the services of some of its outstanding citizens.

If the total of killed and injured in automobile crashes of one kind or another, and from one cause or another, in all countries throughout the world could possibly be ascertained each and every day, and then made public. its daily, it would perhaps shock the contentment of most people. The opinion may be ventured that many a war has been fought in which the average daily casualties were not as great as to-day's average "toll of the road".

If the same number of men, women and children were being killed and injured each day and every day in a war being waged on the North American continent, our newspapers, peace societies, churches, governments, would begin to demand that a stop be put to the carnage.

But because the slaughter and suffering is merely the result of automobile accidents, people shrug their shoulders, give expression to some pointe words of sympathy, wonder why there should be so many accidents, and then pass on to discuss the price of wheat, the result of the international yacht race, or the outcome of the world's baseball series.

Governments and communities the world over have improved and continue to improve roads and main highways. Hundreds of millions of the taxpayers' money is being spent annually on this work. While the maintenance of these higher standard highways costs tens of millions more. And the better the roads, the more accidents.

Automobile manufacturers continue to take advantage of these better highways to turn out more powerful and even faster cars. They equip them with better brakes, better tires, safety glass, better devices of every conceivable kind, and then they are turned loose on the highways.

Volumes of laws and regulations are passed to control the operation of these cars and traffic regulations of many kinds are approved and ordered to be enforced. Some of them are, many are not. In fact, without a traffic officer posted every few miles, and even every road, complete enforcement of the many laws and regulations is physically and practically impossible. People know this and proceed to ignore laws and regulations enacted for the protection of themselves as well as other people.

Driving headlights which blind the driver of an oncoming car; only one headlight burning; no rear light; overtaking and passing and then cutting in ahead of another car and doing so at a high rate of speed; tearing up an hour in cities ignorance of the fact that another car may be nearing the other side; dashing in from a side road on to a main highway without stopping or slackening speed; operating cars with defective brakes,—but why continue the enumeration." These and many other violations of law and regulations are daily causing people to their deaths or to live on, helpless, suffering cripples.

When is it going to stop? How is it going to be stopped? Or have people become so reckless and so callous of death and suffering, and so careless of the rights of others, that they are quite satisfied that the "toll of the road" should go on mounting higher and higher?

The passing of even more stringent laws will not stop it, although they might prove, for a time at least, a greater preventive. The better enforcement of existing laws and regulations would help, especially if the penalties for violation of them were made much more severe. More and still more education of the people would ultimately bring some results.

But in the final analysis there is only one way in which this black blot on our present day civilization can be removed. The individual citizen must himself do it. Education, laws, law enforcement, more will never accomplish it. It is that strong, almost all-powerful Human Factor, which so many people to-day are inclined to ignore in the realms of society, economics and in relation to all public policies and acts, which constitutes the weak link in the chain of public conduct and public relationships.

Individuals must take this great problem in hand. They must not only understand and obey the law themselves, but whether they like to do so or not they must individually become guardians of the public weal and take an active part in moving the problem, rather than maintain a merely academic interest in it, saying "Let George do it" and relying on law and policemen to do what law and policemen alone can never do.

Looseness Of the Bowels During the Summer Months
It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into diarrhoea. Dysentery is never Complete, and has a tendency to weaken the system.
Do not check the discharges too suddenly.
Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 80 years.
Do not accept a substitute. Be sure and get "Dr. Fowler's" when you call for it.
Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

SUNDAY SCHOOL LESSON

OCTOBER 30

THE CHRISTIAN'S STANDARD OF LIFE

Golden Text: And be not drunken with wine, wherein is riot, but be filled with the Spirit." Ephesians 5 18.
Lesson: Ephesians 4 17 5 21
Devotional reading: Colossians 3: 12-17.

Explanations and Comments

Rev 6:9 Mine: the 1 salvaging Gentiles, 4-17-23. In these verses Paul warns his readers against the life of the Christians. His opening field, "Thus I say therefore and testify in the Lord," remind one of Christ's words, "Verily, I say unto you," having the same solemn force as the latter, calling attention to the weighty sens of the words that are to follow. In the importance of his readers bearing and heeding. And the exhortation that they ye no longer walk as the Gentiles also walk." Paul is writing to Gentiles, and in these words points to an unregenerate element, for they separate his readers from the life that the Gentile is. But his readers are living in the midst of those unChristianized, in danger of being influenced by their evil ways, and therefore Paul earnestly warns them against a relapse.

Do not live as they do, he urges, they are walking in intelligence, without God, their consciences are hardened into callousness, they have given themselves over to the grossest sensuality.

The New Man: Believing Gentiles, 4 20-24. Paul now tells his readers that the Gentiles of whom he had been speaking, they had learned the things belonging to Christ. "If so be that ye heard him and were taught by him, as truth is only my doubt as to the fact. The clauses rather intimate that these things can be assumed. The apostle is confident they be rendered, "as it may be assumed ye heard him," and that the acceptance of the message ye received, and included a training him ye were instructed in vital fellowship with him. The manner in which Christ Jesus became a matter defined as being known as truth as in Christ. In the fellowship of Christ, Jesus of Nazareth, are embodied the true standards of living, where the motives, the purity the holiness, which the followers are expected to accept, to assume, to reproduce The Christ of the Gospel is in the fullest sense "the truth," and the truth, and the life". (Charles R. Erdman).

Put away the old man: "Put away" against "put away the old man", their old nature, with all the vanities and vices which they had before they knew Christ, and being "renewed in the spirit of their minds," and "put on the new man," the new nature, which after God hath been created in righteousness and holiness and truth."

SOUR STOMACH, GAS

"I could eat only a small amount, because of the bad gas, sour stomach, indigestion, and constipation. Then I got Nuxated Iron and since then I can eat most anything I like. I feel like a new man." Mrs. Alex. Hamilton, Que. "I was all run down, had no appetite, constipation, dizziness and my digestion was all out of order, and I felt as if I must lay down. Nuxated Iron did me a world of good." Peter De Pauw's Sons, Buffalo, N. Y.

Woman Dispatcher Thrives

Looks After Passengers And Mail in All Weather

The aeroplane dispatcher at Concord, New Hampshire, airport is a woman, Mrs. Alice L. Marsten.

Four times daily a tri-motored passenger, mail or express monoplane alights there, and whether it be 35 below zero, as it was once last winter, or 90 in the shade, as it was more than once this summer, passengers are greeted by a trim, diminutive lady who, as Uncle Sam their tickets, assists them to alight and then tosses the mail bags on board or takes them off.

Second Time Call

A two-way conversation through an ordinary French-type telephone receiver installed in an automobile, was successfully completed for what General Electric Company engineers at Schenectady, N.Y., said the first time, when they exchanged greetings with Sydney, Australia, 10,000 miles away.

Canada was the largest supplier of fertilizers to the United States in 1932 and she was also the third principal supplier of foodstuffs during the same period.

WHEAT POOL WILL PAY DEBT TO MANITOBA

Winnipeg Assurance indebtedness of the Manitoba Pool Elevators, Ltd., to the Manitoba government would be paid in full was made by Paul F Bredt, Kenmay, Man., president, in the directors' report submitted to the annual meeting of the pool organization.

"The progress made in the last three years, despite light crops, is a very definite indication that the Manitoba Pool Elevators will be able to meet their obligations to the government," said Mr Bredt. "There need be no anxiety on the part of taxpayers generally that any loss will be occasioned by its operations."

The report showed a net operating surplus of $261,646. Payments of $184,972 due the government this year had been met in full and the $45,760 owing to cities was paid this year The indebtedness of the pool to the government, totalling $7,100,000 when the pool was reorganized in 1931, had been reduced to $1,648 602 at present. The balance of the operating surplus approximately $175,000, was added to the reserve account.

A payment of about $60,000 had been made to the Saskatchewan and Alberta pools on terminal No. 1 at Port Arthur. This pool was estimated to be worth $50 000 and the remained approximately $300 000 to be paid the two sister organizations within seven years.

"When reorganization took place in 1931," continued the report, "Manitoba Pool Elevators, Limited, owned the Manitoba government $2,100 000. This had been reduced to $1,648,402.

"The progress made despite light crops in Manitoba the last three years is a very definite indication they will be able to meet their obligations to the government in the future, and there need be no anxiety on the part of the taxpayers, generally, that any loss will be occasioned thereby."

No War Spirit

General Seems Done Not Think World Is in Verge Of Another Conflict

Dundee, Scotland.—"I do not agree with those who think the world is on the verge of another great war," declared General) Jan C. Smuts, empire statesman, who played a leading part in the World War, on he delivered his rectorial address to the University of St. Andrews.

General Smuts, noted soldier and scientist, former prime minister of South Africa, has been rector for the past three years of the 565-year-old university, but this is the first occasion on which he has been able to be present for induction. His term spares a few months.

Scaremongers were doing their best to create an atmosphere of war, but statesmen, and the present honorable failure of disarmament efforts; and despite the vogue of "silly drilling and strutting about in uniform," he said, "I do not find real war temper anywhere."

For Better Films

National Council Of Women Endorses Ban

Ottawa With the declaration that "low standards in the motion picture field have a direct relationship to juvenile delinquency and crime," the National Council of Women lined up in support of measures to clean up the pictures

The council carried unanimously the following resolution

"Realizing the powerful influence of the cinema in moulding and educating public opinion.

"Realizing too the fact how standards in the motion picture field have a direct relationship to juvenile delinquency and crime.

"The National Council of Women in annual meeting assembled, would therefore strongly urge all its federations, local, provincial and national, to lend their support in efforts being made at the present time to secure a production of pictures which would be a character reinforcement and will provide a medium of wholesale recreation."

A resolution which deplored "the increasing tendency of the Remembrance Day services in many parts of Canada to be a military pageant and a diplomatic ceremonial," evoked discussion but was referred to the convenor of the League of Nations committee in order to get local councils for expression of their opinions thereon.

Sell Lands Too Cheap

Criticism Of Disposal Of Alberta Land By Dominion Government

Ottawa. — The Dominion government was criticized for disposing of Alberta farm land, whether by giving it away to settlers or selling at $3 per acre when as much as $25 per acre was being realized on similar land in the Peace River district, by Mr. Porter, counsel for Alberta, appearing before the natural resources commission, who arguing the case of the province, asked permission for alienation by the Dominion government of 25,000,000 acres of western land.

Mr. Porter quoted extensively from sales records between 1908 and 1920 to support his claim the lands could have been profitably disposed of.

A number of maps were filed in an attempt to show lands situated in close proximity to railway land prices of from $4 to $35 prevailing, were by the act of 1925 either given away or disposed of for nominal sums, sold at $3 per acre on purchased homesteads or pre-emption.

Mexico Quick Recovery

Warsaw, Poland. — The paralyzing yellow fever epidemic which ravaged for 20 years took a sudden turn for the better—too sudden for a couple of wounded Americans. When the robber stalked into the paralytic's home in the village of Markeniski, near Wilno, the invalid suddenly vaulted from his bed, grabbed a gun, and began to fire away at the startled marauders, who promptly fled.

Miners In Hospital

Pecs, Hungary.—From many parts of the world messages of sympathy and encouragement for the 1,200 miners who remained on a live-and-a-half-a-day strike in a dramatic fight for better wages. One hundred and ten of them were in such a condition they were taken to a hospital after they were brought out.

Ask Addition To Agenda

Vancouver. - British Columbia has suggested that the question of representation for unemployment be added to the agenda laid down by Prime Minister R. B. Bennett for the impending conference of premiers on possible constitutional amendments, Premier T. D. Pattullo stated.

To Make Return Flight

Dublin.—Lieutenant Cmare Saletli, who crashed in Ireland with Captain George Pond on a recent unsuccessful non-stop flight from New York to Rome, arrived here recently, engine repaired, for a return flight from Ireland to North America.

For Water Survey

Winnipeg.—Appointment of a Dominion government commission to investigate means of water conservation in southwest Manitoba was urged here by Mayor Ralph H. Webb, upon his return from an inspection trip in that area.

Winnipeg To London By Air

Western Flyers Vision Regular Schedule To Be Covered In 48 Hours

Winnipeg Winnipeg to London by air in less than 48 hours and on a regular schedule is the plan of a group of local flyers revealed here.

Roy Brown, Ted Stull, Milton Ashton and Jack Moar, four men prominent in flying in northern Canada who combine more than 20,000 hours of flying experience are convinced of the feasibility of such a project and have mapped out "the northern route" the base of a daily air service with the Old Country.

The route they have studied lies on almost a direct west to east line from Winnipeg to the Fares Islands and then south to the northernmost tip of Scotland. It crosses Hudson Bay, Baffin Land, Greenland, and Iceland.

"This proposed service would not be a hit or miss affair, declared Mr. Moar Air conditions, communication lines and type of equipment had all been closely studied, he continued, and he was convinced there would be a regular air service within two years.

Would Abolish Radio System

Japanese Delegate To Tri-Power Naval Conversation Makes Position

London.—Admiral Isoroku Yamamoto, Japanese delegate to tri-power naval conversations here, said Saily Japan will demand abolition of the radio system of limiting naval armaments.

Instead, he revealed, the island empire will seek to substitute the global tonnage basis.

These proposals will be made to representatives of the United States and Great Britain in the course of talks scheduled to start here next week.

Yamamoto's announcement came soon after authoritative sources had disclosed the Americans, Norman H. Davis and Rear Admiral William H. Standley, will suggest substantial reduction in general naval armaments and removal of the Washington and London naval treaties.

Grain Smugglers Arrested

U.S. Farmers And Farm Laborers Have Admitted Guilt

Fargo, N.D. - Fourteen Towner county farmers and farm laborers, alleged by the government to have smuggled thousands of bushels of Canadian wheat into the United States and sold it, pleaded guilty in United States district court before Judge Andrew Miller

Passing of sentence was deferred at the request of P. W. Lanier, United States district attorney, until the Grand Forks term of court which opens Oct 23

Those in court were charged either with directly hauling the wheat to American markets or with conspiracy in connection with the delivering of the wheat to others who marketed it

Arrest of Thomas C. Wallish, Fisheery elevator man, alleged by the government to be one of the key figures in the smuggling, was announced a few hours before the 14 Towner residents appeared for arraignment.

Winnipeg Demand in the United States for soft grains for making cereal was seen here as the cause underlying the smuggling of wheat from Canada across the international boundary into the United States.

Failed To Take Precautions

King Alexander Lost Life Because He Did Not Wear Bullet Proof Vest

Belgrade. — King Alexander of Yugo-Slavia lost his life because he did not wear his bullet-proof vest.

The king assassinated last week in Marseilles, owned two bullet-proof vests in the "northern route" the base of a daily air service with the Old Country.

The vests they have studied lies on almost a direct west to east line from Winnipeg to the Fares Islands and then south to the northernmost tip of Scotland. It crosses Hudson Bay, Baffin Land, Greenland, and Iceland.

"This proposed service would not be a hit or miss affair, declared Mr. Moar Air conditions, communication lines and type of equipment had all been closely studied, he continued, and he was convinced there would be a regular air service within two years.

Wheat Export Cut

Australia's Surplus Will Be Less Than Last Year

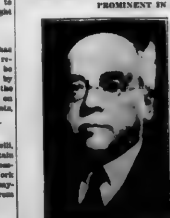
Rome. — Australia's surplus of wheat for export will be about one-third less than last year, the International Institute of Agriculture estimated.

The institute reported this year's crop at 138,000,000 bushels, as compared with 174,800,000 bushels last year, and the average of 140,400,000 bushels over the last five years. Allowing for a domestic consumption of 58,000,000 bushels, the export surplus will be not much over 80,000,000 bushels.

Fruit For Needy Areas

Toronto, Ont.—The national relief committee of the United Church of Canada announced it had arranged during the last fortnight for transportation to needy parts of Saskatchewan 40 carloads of Ontario fruit and vegetables. Many of the cars, the committee said, were filled on a community basis.

PROMINENT IN FRENCH NEWS



Because of the fact that the French people believe the police were lax in not protecting King Alexander of Jugo-Slavia from assassination, Albert Sarraut, French Minister of the Interior and head of the police force, has been forced to resign. It is also expected that Henri Chevau, Minister of Justice (right), may be forced out of office due to his department's failure to satisfy the public in his conduct of the investigation into the Marseilles assault.

DOUKHOBORS TO SELL LANDS IN SASKATCHEWAN

Winnipeg — Peter Veregin, president and chairman of the board of directors of the Christian Community of Universal Brotherhood Limited announced the entire holdings of the corporation in Saskatchewan were up for sale

Speaking through an interpreter, Mr. Veregin declared he could not at present disclose future plans for the sect in Saskatchewan.

First announcement of the sale came from John McDougall, an advisor to the Doukhobor chief. Bids by tenders were being call-d for on the properties, he said "They will liquidate their holdings in Saskatchewan," said Mr McDougall. He said the bids would be received here.

The Christian Community of Universal Brotherhood owns 24 000 acres of land in Saskatchewan and has a membership between 6,000 and 8,000 persons. It was believed that the money would remain on the land in Saskatchewan while others might move to British Columbia, where the brotherhood owns 40,000 acres which is not all being cultivated.

Cereal Wheat Standards

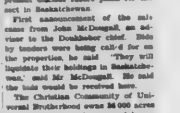
Tentative Grades Passed For Nos. And 3 By Committee

Winnipeg — Lowering of tentative wort in a sub-committee, the Western grain standards committee closed its two-day meeting. Tentative standards were passed for Nos. 1 and 2 Garnet wheat to give the inspection department a basis for grading Garnet separately when the revision in the Canada Grain Act takes effect. These grains will serve until such time as sufficient quantity of Garnet from the 1933 is delivered to permit of new standards being set.

The sub-committee appointed will hold another meeting to low grade grains all other working having been completed during the meeting. The proposal for two Garnet grades, because of variation in weight, was among the subjects given the subcommittee

Dominion-Wide Broadcast

Monday Mor. — The Philharmonic Society of Moose Jaw will broadcast over a Dominion-wide hook-up on Monday, November 14, at 8 o'clock in the evening. The program will be broadcast from St. Andrew's United church. The Philharmonic Society of Moose Jaw is one of seven Western choirs asked to put on a program for the C.R.C.

Now Science Explains Why So Many People Past 40
Feel That They're Slipping Losing Their "Grip" on Things


Many people 'round 40 think they're "growing old." They feel "dragged out," "tired," "have headaches, dizziness, stomach upsets.
Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.
All you have to do is to neutralize the excess stomach acidity.
When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all!
Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.
ALSO IN TABLET FORM
Phillips' Milk of Magnesia Tablets are now available. Each tablet is the equivalent of a teaspoonful of Phillips' Milk of Magnesia.
PHILLIPS'
Milk of Magnesia

Wider Distribution of Good Seed Is a Prime Essential In Putting Farming Back On Paying Basis

One of the improvements most to be desired in Canadian agriculture is a reduction in the number of varieties in use of cereals and other farm crops, and the more general substitution of better - yielding and grading of the best of the best varieties.

A small per centage of farmers who make use of the best varieties enable one of the best varieties enable one of the best varieties to stimulate the result that the good which they use is in all probability superior to the seed used by their neighbors, and it is unquestionably used to their detriment. Their crops are thus apt to be very much superior

On the other hand it is true that there are checks to stimulate the variety of the wheat oats or other import- ant crop they are growing. This is equivalent to saying that they do not know whether it is good, poor or indifferent seed in quality Other farmers again, are familiar enough with the variety names of their crops but have been misled on the subject of the merit of any particular variety and may be paying highly for which is not the best adapted to their particular locality or which perhaps is of inferior quality whatever.

Failure to compare carefully the merits of the different varieties and to choose the variety in each crop which under the prevailing local conditions promises both high yield and good quality is a misfortune, first from the standpoint of returns to the individual grower and secondly from that of the nation's total production.

Unfortunate too are the results from using seed which is not pure as to kind and variety. There are many instances where one kind of grain has been so contaminated with another, or one variety has been so mixed with one or more other varieties of the same kind, that the resulting crop has been unsuitable for seed and has had real serious deterioration in market value Differences in varieties as to time of ripening, colour, size and shape of kernel and in milling and feeding quality, emphasize the desirability of keeping each variety as pure as possible

Fortunately there are to-day in every province of Canada individual growers and societies of farmers who are specialising in the production of Registered, Certified or Improved No. 1 seed of the commoner agricultural crops. Their efforts in improved seed production, and the distribution of their product among other growers are being encouraged by both the Federal and provincial Departments of Agriculture

An Unusual Traffic Problem

Reindeer Man In Pelping Wanted To Cut Curves

Consternation was caused among Pelping's 20,000 rickshaw men recently when a new regulation forced them to go around intersections. Traffic signs instead of cutting across the shortest route, as they have hitherto been permitted to do. They readily understood that a motorcar should observe such a rule, but could not conceive of any sensible person going further than was necessary on foot. As most rickshaw pullers are so illiterate that they cannot read even the simplest regulations, traffic policemen stranded for days trying to explain verbally the logic of taking the long way round a corner, and to untangling the traffic line-ups which resulted from the frequent arguments. White directional arrows on asphalt street corners helped considerably, but on unpaved streets confusion continued for a week

---

Two Russians, who recently raised Ararat, a volcano 8,500 feet high, in Karbakia, crossed a barrier of snow and found the fiery crater, 600 to 650 feet deep and a mile in circumference.

There is a world surplus of silk and hide.

The next fatal of all hated vaccines is the extended gun.

What Does Your Handwriting Reveal?

By LAURENCE GOMEZ
(Graphe-Analyst)
(All Rights Reserved)

(Editor's Note: Interest is increasing in these articles on Character from Handwriting. Many readers are taking advantage of the author's offer to give them a free analysis. If you have not yet written for your free analysis, read the recommendations at the foot of this article.)

I mentioned in an earlier article that a handwriting expert a Graphe-Analyst in fact as I prefer to be not one who, by waving a magic wand, can transform you into a normal being, the mere expression of certain tendencies in your character does not change these tendencies into strong chains of character

A Graphe-Analyst's position is that of an adviser He can dissect your character and your talents, and can probe your nature and put his finger on the weak points, and he can delineate the good traits that you possess

It is up to the "patient" whether or not he acts on the suggestions of the Graphe-Analyst. If you go to a doctor, and he makes certain suggestions for treatment based on his diagnosis of your case, it is up to you whether you follow out his advice.

So with the Graphe-Analyst. The science of reading character from handwriting will be a tremendous help to you, and will, if you follow out the advice that is given you, stand on your handwriting, be of inestimable value to you.

* * *

Various correspondents have asked certain questions which I think have already been mentioned in my previous articles, but it will be well worth while reiterating one or two of them. Because the intervention of the value of Graphe-Analysis, these facts must be borne in mind.

Can handwriting change, or has it not, it cannot. We all know of women who have very strong qualities and very personalities who act like men are commonly supposed to act. And these women write like men. This in itself is a certain masculine quality of character, for example. This shows in their writing.

And some men are very effeminate. They write like many women. And these characteristics show up in their writing. But it is not possible to lay it down as a basic law, that sex can be shown from handwriting.

Is it possible to diagnose ailments and disease from handwriting?

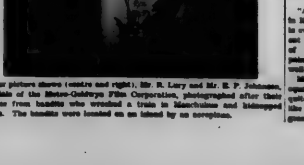
There are certain diseases, as heart trouble, for instance, which can be diagnosed from handwriting. But this angle of Graphe-Analysis is merely in the early experimental stages.

Nothing definite or scientific can be laid down in this respect, at the present time, and, for that reason, Graphe-Analysts do not attempt to inform questioners as to their specific ailments.

Graphe-Analysis is a scientific delineation of character and talents from handwriting. As such, it is of tremendous value to you. It is definite and accurate in portraying points, and to that regard can exercise a tremendously power for good.

Do you want to know the traits of character that your handwriting reveals? A personal analysis may be the means of swaying your whole future And do you wish to know the secret characteristics of your friends? Send specimens of the writing you have analyzed, and enclose 50c coin for each. Send with 3c stamp and addressed envelope, to: Laurence Hibbert, care of Winnipeg Newspaper Union, 173 McDermot Ave., Winnipeg, Man. Letters are confidential and will be answered as soon as possible, but please allow about two weeks for your copy.

More than 200 greyhound racing tracks are in operation in England.



SAVED FROM CHINESE BANDITS

Our picture shows (centre and right), Mr. R. Lary and Mr. E. P. Johnston, officials of the Metro-Goldwyn Film Corporation, photographed after their rescue from bandits who wrecked a train in Manchukuo and kidnapped them. The bandits were located on an island by an aeroplane.

Scientists Discover How To Convert Wood Into Glucose. The Fundamental Of All Foods

The age of miracles are on a little factory which has just been opened at Masnah im-Rhenania in Germany

This factory has been built with the support of the Nazi government

One of the scientists responsible for it is a Lancashire professor

Larry kinds of wood are going into it, and are being transformed by intricate chemical processes into some of the essential foods of life

It means that it will be impossible in future for any country with timber to be starved out in time of war

The timber is turned by dilute acid treatment into sugar not ordinary sugar but glucose the fundamental of all foods.

Glucose can be converted easily into yeast, foodstuffs, alcohol resin, glycerine for nitro-glycerine explosives and a hundred other things

Already the work is on a commercial scale, and millions of acres of Pampas land, which are regarded as useless except for timber, now become of equal economic importance with cultivated farm lands

The chemist responsible for this discovery are Dr Friedrich Bergius, a German scientist and Dr W R Ormandy, a research chemist from Wigan, Lancashire, who is now living in London

Dr Bergius has been working on the scheme for 15 years Dr Ormandy joined him 10 years ago.

British firms who have been supporting Dr. Bergius and Dr. Ormandy in their researches will share in the benefits of the discovery

There are 3 000 000 acres of woodland in Britain. The state controls 300,000 acres, and the other 2 700 000 acres are private property.

Britain, according to the latest figures, has only 1,500,000 acres of land under wood and a steady consumer of timber.

The means that Britain if equipped with these factories, could draw on 5,000,000 extra acres of land for a food supply in time of emergency

It's romantic and

"Germany realizes the importance of this discovery because of her experiences during the war.

She had to starve her population to provide material for explosives

"But now things are different, and that is what Hitler meant when he said recently 'German scientists with German materials are going to make Germany an independent nation'

"Every year on every acre of forest land nearly the same amount of digestible cellulose and other carbohydrate foods are produced as on an acre of land under cultiv

Only about half of the available wood can be used as timber, and it became obvious to us that there was an enormous amount of raw material for the production of foodstuffs at the disposal of mankind if only we could find a technical process to transform it into glucose.

"We soon discovered how to make alcohol from wood

We then found out how to produce a digestible sugar which can be used as human food directly in the form of pure glucose, or indirectly in the form of a cattle food.

The production of yeast followed quickly

The factory at Rhenaan is now capable of producing each year more than 4,000 tons of pure carbohydrate for food.

The discovery is an important a factor in guaranteeing an independent food supply as the final hydrogeneration process is in guaranteeing independence from supplies of petroleum oil"

A reporter tasted some glucose. It is like sherbet, but is sweeter and less cloying

Two tablespoonfuls are said by chemists to be equal in food value to a whole meal.

Would Reduce Street Noises

Rule May Make Autobus Drive Without Using Horns

As a result of recent tests, Italy is considering the abolition of street noises by forbidding the use of motorcar horns This silent regime has already been employed at night in England with success.

Every Italian automobile operator "driven with his horn," resulting in a decision of noise unequalled by any other country. All taxi and most private cars are equipped both with electric sirens and the old-fashioned horns with rubber bulbs.

At present all honking has to cease for the night at 11 p.m. to give citizens some chance to sleep. Recently a "week of silence" was tried out in Milan and there was not a single accident Now it is planned to ban horns altogether throughout the country.

Sir Kingsley Wood, British postmaster-general, told the advertising convention at Leicester he attributed much of the recent record increase in the business of the British postoffice to extensive and consistent advertising

Canada Not Infested

By Japanese Beetle

Traps Set But No Sign Of Destructive Pests Found

No signs of infestation by the Japanese beetle, which has been doing serious damage in the states, shrubs, flowers, fruits, vegetables and lawns in the northeastern states, have been found in Canada.

Early in July of this year, Japanese beetle traps, in which were placed geranniol and eugenol, two essential oils which attract the beetle, which it has been found the beetles are strongly attracted, were distributed in the Niagara Peninsula, Toronto, Montreal, Saint John, N.B., and Yarmouth, N.S., districts. The traps were distributed to determine whether the beetle had invaded Canada but none have been caught in any of the traps. The trapping activities attracted considerable attention from the public.

Many persons submitted insects to the Entomological Branch and to Entomological Inspectors which were thought to be the Japanese beetle, but none of the insects proved to be such. The Japanese beetle was first found on this side of the world during the summer of 1916 at Philadelphia, Pa., and since then it has multiplied and spread in the north-eastern part of the United States and has been discovered at several points not far from the International Boundary. It is one of the most destructive of foreign insects. Thru co-operation and assistance of the public it has been checked by the Dominion Entomologist and his staff.

Would Not Like It

Prince Of Wales Knew Late About His "Great-Grandpa"

"Are there any kings and queens in Heaven, or when you are an angel in everybody equal?" asked the present Prince of Wales when, as a child of seven, his portrait was being painted by Hon. Gertrude Massey, the well-known artist in miniature.

Mrs. Massey replied that all were equal in Heaven . . . "I think that is quite right, but great-granny won't like it," replied the Prince. "Great-granny" was Queen Victoria.

INDIGESTION? Then Try KRUSCHEN at NO EXPENSE

If you suffer from loss of appetite, indigestion, sour stomach or a miserable feeling after meals, here's nothing like Kruschen for relief. The little daily dose of Kruschen first stimulates the flow of gastric juices to aid digestion, and then ensures a complete, regular and satisfactory elimination of all waste matter every day.

If you suffer, you'll welcome the opportunity to try Kruschen Salts now positively free of charge Ask your druggist for the Kruschen Guest Package. This is the Regular bottle, together with a separate FREE TRIAL bottle. The the Trial bottle first. Then if you are not entirely convinced that Kruschen will do everything claimed for it, return the Regular package unopened to your druggist and he will redeem it at full value But act quickly or your Free Trial Bottle will be gone Your druggist has only a limited supply

THE TENDERFOOT

By GEORGE B. BOOTH

Author of "The Coronado Trail", "The Canyon Trail", Etc.

CHAPTER III.—Continued

Somehow the Broken Spur always found a market Broken Spur cattle were shipped periodically to California to be fattened in bring the highest prices in a falling market while the Hour-glass could not pay its freight bills for such shipments Four old Joe Carr saw the Hour-glass go to pieces under his nose while hands and he sought in vain for the reason That suit over Soda Springs was the last straw

"I know damned well they've been robbin' us deaf, dumb and blind," he snapped to big Crewe his foreman "But I can't prove it What can I do? There's nothin' I can do, Frank

"Huh. You might try lewin' the earth to that wholly bottle for a change, said Crewe, who was not accustomed to hearing Frank Carr cursed him and on that occasion left the cork in the bottle for an hour.

"I wish to God I could get track of that young fellow Gerald Keene," went on Carr fretfully "You know how old Peter Vinton left the Hour-glass Half to me and half to him and if one of us dies, the other gets the half of the one who dies Funny way to leave a ranch Nobody can find Young Keene No-body knows his address I've been runnin' into the red ink right along by borrowin' cash to finance the Hour-glass for the last few years. I've been doin' it on my own responsibility It ain't right that he shouldn't pay his share

"Listen here, Joe Crewe wheeled on his employer I've been to you for a lifetime as men count years. As a cattle-man nobody can teach you a thing about the business As a distiller you ain't much but as a steady consumer of bottled goods you ought to have a gold medal No me blinkin facts Ther's right face up on the table It's liquor that's helped put the ranch in the red Just liquor It might have happened anyhow but I know it helped a bad matter to git worse. It's time somebody's talkin' you

Carr began a futile protest but Crewe cut him short.

"You'd never have got into that card game in the Silver Dollar but for liquor That game cost you ten thousand and you know it You'd never have tried runnin' a horse for the Coahalla Sweepstakes if you hadn't been so full you couldn't hit the ground with your hat Then you made a bet you'd win it and when you sobered up you wouldn't even hedge. A cattleman's got no business runnin' a horse except at the end of his rope. You know it as well as I do, you're sober, too. That's what makes me so damned hot."

"I was tryin' to win back what I'd lost," said Carr.

"Hell, man! I know that. A fat chance you had of winnin'. Three strangers ridin' in the Sunset an' you with the only colt in town with Spike Goddard sittin' in the game and a bar mirror behind you that you never even saw till too late. Man, you were askin' for trouble."

"Well, I got it all right at that Listen Frank. Is there any way I can locate this man Gerald Keene? Can't you think of some way?"

"Simon Burwell of the Drovers Bank in Cato handled the ranch's business didn't he? Better write to him. What's the trouble, Joe?"

"Money," said Carr hoarsely. "I need money, Frank, and that's a fact."

"Can't you borrow enough at the Beco bank to tide you over? Old Pegram, the president there, ought to help you."

"Hell, man! It's old Joshuse Pegram I want to pay. They've yelpin' over some back interest that I reckoned hasn't been able to pay. I borrowed eleven thousand from Pegram on my personal note and I haven't been able to pay him the interest. It's about eleven hundred odd . . . ."

Crewe whistled. Eleven thousand at ten per cent. (and Texas allows a ten per cent. rate) meant that old Joe had borrowed about, all he could on his share of the ranch at prevailing rates in the money market. He wonder Joe was worried. No wonder he drank a little. Crewe suddenly made up his mind that never again would he criticise a man till he knew all about how much of the bottle you owe?"

Joe Carr flung up a pair of tired hands that looked suddenly old and frail

"I damned night more'n I've got or can raise," he said. "But if that damned Broken Spur'd keep their thievin' hands off me I could yet come clear I think."

"Well, they won't," said Crewe. "This suit over Soda Springs shows the they mean to drive you to the wall That suit'll cost you ten thousand in court fees. If they lose they can't pay . . . or won't. It'll all come back on us . . . You . . . ! Why not talk with Dustin over the matter?"

"Over an ivory front night," snarled Carr. "That's the only way I'll talk to him. See if you can't find out where I can get in touch with Gerald Keene. He owns half the ranch He might help."

In all attempts to find Gerald Keene had failed and at times old Joe doubted whether such a person really existed

"I don't know what to make of it," growled Crewe, tramping the floor. "It's as if he'd just dropped out of sight. Nobody knows where he is or even where he used to live."

"And to-day I was notified that old Pegram wants some definite action taken on my note," said Carr. "That means pay. How in hell can I?"

Crewe whistled again.

"It looks like they've got you by the short hairs," he growled. "If they crowd you, what'll you do, for God's sake? God! What can I do?" demanded Carr miserably. He remembered old days when a mere verbal statement that he would pay would have satisfied the bank but Pegram knew nothing of those days. "I'm too old to start in again," he said wretchedly. "I can't do it, Frank. Too. There's Edith to be thought of."

There had always been Edith and old Joe Carr had never ceased to think of her though his thoughts were not always sober ones. Crewe could not help reflecting sneaky that a few hours of thought about Edith at the proper time would have prevented much of the present trouble. But he only said:

"There seems to be only the off chance that we may find this man Gerald Keene. Still . . . Even then I ain't too sure he'd help much. You can hardly expect a man to shoulder half the debts you've incurred on your own sole responsibility. He don't buy dead horses as a rule."

"Huh. He made Peter Vinton would have done it." . . . Carr was desperate. "Peter and me was partners when it meself somethin' to back a man's play. There ain't much hope, even if we find this man Gerald Keene, that he could or would help much but as far as I can see, Frank, it's our only chance. If we can find him, he might be willing to help us out for the full ownership of the Hour-glass. What do you think?"

"Looks to me like you're about right," said Crewe "Our best hope is to find Gerald Keene."

CHAPTER IV.

"I'm still a-waitin' to hear you tell me how you plan to bring that red-headed girl of Joe Carr's to best"

Spike Goddard poured himself a generous drink and eyed Dustin quizzically across the glass Dustin continued to stare at him. Words finally came

"There's a lot more than any girl in this now You poor fool! Can't

you see as far as the end of your nose? Don't you see the mean we're in? Dad Kane knows enough of what Corse and Gray were doin' up in the hills to put you and me both behind the bars for ten years . . ."

(To Be Continued)

Now!...new aid in PREVENTING Colds

Remarkable New Formula is Especially Designed for Nose and Upper Throat where most colds start

AFTER years of research on the problem of colds, Vick Chemists have developed a remarkable new preparation—Vicks Va-tro-nol. This exclusive Vicks formula is especially designed to aid the functions which Nature has provided—in the nose—to *prevent colds*, or on those often off in their early stages. Used at the very first feeling of nasal irritation—just a few drops up each nostril—Va-tro-nol helps to avoid many colds altogether.

Relieves Head Colds at Every Stage

If irritation has reached the stuffy, uncomfortable stage—Nature's usual warning that a cold is developing—prompt use of Va-tro-nol helps to throw it off in the early stages.

Where irritation has led to a clogged-up nose (a stuffy head cold or nasal catarrh) Va-tro-nol penetrates deep into the nasal passages—reduces swollen membranes—clears away clogging mucus—brings welcome *relief*.

Va-tro-nol is *real medication*—not mere "old drops"—yet is *absolutely safe* for children and adults. It has been clinically tested by physicians—approved by specialists.

Easy to use, anytime or place—at home or at work. Keep a bottle always handy.

Introduces Vicks Colds-Control Plan

This new aid in *preventing* colds is the ideal companion to Vicks VapoRub (modern external *treatment for colds*). Together with certain simple rules of health, these two preparations form the new Vicks Plan for Better *Control* of Colds. Records of thousands of clinical tests—made over a period of two years, and under medical supervision—indicate that Vicks Plan greatly reduced the number, duration and dangers of colds. (Full details of the Plan in each package of Vicks VapoRub and Vicks Va-tro-nol.)

MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you sprinkle on Dr. Wernet's Powder — they're gently comfortably — they can't slip. Pleasant by world's leading dentists — they know it's the best! Does not taste — nor drug-like.

Said to be the oldest dated optical instrument in the world, a telescope recently in London bore the date in this new 1646.

Few Minutes Eases Neuritis Pains Now!

DISCOVERY BRINGING QUICK RELIEF FROM PAIN TO MILLIONS

Remember the pictures below when you want *fast* relief from pain. Demand and get the method doctors prescribe: *Aspirin*

Millions have found that *Aspirin* eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an *Aspirin* tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain practically as soon as you swallow it.

Equally important, *Aspirin* is safe! For wrestlin' lends show that *Aspirin does not harm the heart.*

Remember these two points: *Aspirin Speed* and *Aspirin Safety*, and, see that you get *ASPIRIN*. It is made in Canada, and all druggists have it. Look for the name Bayer on the box and on tablets. 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

A large number from the Fort enjoyed the Don Cossack Russian Male Voice Chorus concert at the McDougall auditorium last Friday evening. This brilliant chorus made a wonderful hit in Edmonton, when they packed the hall from cellar to garret.

The big game shooting season opens November 1st.

Mrs Aletha Orr, in private life, Mrs. Thomas Bignor of London, England, is momentarily expected here on the London stage. Miss Orr is an daughter of Mr. and Mrs. Orr of Peace River. She went abroad after a few years ago with her violin and cared, Mr. and Mrs. Frank Walker of Vancouver, formerly of Fort Saskatchewan, and has been playing continuously since her graduation with honors from the Royal Academy of Dramatic Arts in London in 1923.

The W.M.S. of the United Church had a "quilting" at the home of Mrs. Henry Dennis on Tuesday afternoon.

Mr. and Mrs. F. W. Hart of Lisburn, Alberta, were the guests of Mr. and Mrs. Hugh Watt for two days last week.

Mr. Frank Walker spent the past week-end at Bad Deer, and expects to leave for his home at the coast Thursday.

The weather has again turned fine, after the wet snowstorm of Sunday night, and threshing has been resumed. If present conditions hold, next week will see the grand wind-up of this years' threshing.

Mr. and Mrs. F. H. Walton and family motored to Sunby, Sunday, visiting Mr. and Mrs. W. Walton.

Bill Fraser and Tex Henry spent the week-end at the latters home here.

IN MEMORIAM

In ever loving memory of our dear Husband and Father, Joseph Fisher, who passed away October 22nd, 1932.

Gone is the face we loved so dear,
Silent is the voice we loved to hear;
Yes far away for sight or sound,
But not too far for thoughts to reach,
Sweet to remember him who once was here,
And who, though absent, is just as dear.

Ever remembered by Mrs. Joseph Fisher and family.

School Festival Executive Meeting

Last Wednesday evening at 8 p.m. the Executive of the Lamont Inspectorate School Festival met in Room IV of the Fort Saskatchewan Public School. The main topic under discussion was to decide whether this Inspectorate should adopt the music outlined as suggested by the Wetaskiwin Inspectorate. The main work of the Central Association of School and Musical Festivals this year was to adopt a Provincial Festival. This means that a standard program of music will be arranged which will be followed, as far as possible, by all local Festivals. In the spring, after all the local Festivals have had their own eliminations, the winners will be allowed the privilege of participating in the Provincial Festival for Rural and Town entries, which it is believed, will this year, be held in Edmonton.

The meeting eventually decided to adopt the program and, if possible, take part in the Provincial Festival.

A new feature of this year's Festival is the Band or Orchestra. The band is to consist of at least five pieces and must play two selections —a waltz and a march.

Mr. McKenzie of Smoky Lake occupied the chair. The following executive were present: Mr. C. H. Robinson, Miss Sutherland, Miss Mc Callister, Miss Pocock, Miss A. Dickson, Mr. M. Budner, Mr. C. Seely, Mr. Robertson, and Mr. Stan Hambly.

The itinerary program as followed in the past will still continue. The Festival this year will be held at Wetaskiwin. In 1936 it will be held at Mundare, providing suitable arrangements can be made.

A Timely Warning To Poultry Shippers

During the Christmas Season, complaints often arise from farmers who, in response to press advertising, mail circulars etc, have forwarded consignments of turkeys and other poultry to firms in various large cities in Canada. Usually exceptional prices and attractive inducements are offered, but the ultimate result is that the farmer receives practically nothing in return.

New firms arise and others have a change of name each year for this unenviable trade, thus creating a problem for enforcement bodies to cope. The protection of the farmer is paramount and they should scrutinize all advertising matter of this nature commuting from the larger cities.

Threshers Put Away For Another Year

Practically all threshing machines operating in the district this year were pulled into there resting places for another year. On some of the large farm threshers are still operating, but last week-end saw the majority wind-up this season's work.

According to information gathered throughout the district, farmers that were hit by the heavy frost, their wheat graded from No. 4 to feed and that a big percentage of the wheat in this district will be that grade. There are a few fortunate one who received No. 2 on Garnet wheat, but these are very few and far between.

Fall plowing and stacking of green-feed is the order of the day in the district.

Archbishop Johann Pommer, Greek orthodox primate of Latvia was slain on October 12 by assassins who tried to destroy the body by fire. The primate's suburban villa was pillaged and set aflame. Police suspect the crime was an act of vengeance in connection with a church dispute.

Letters of Thanks From Recipients of Vegetables

Mr. E. J. Hodgins has received the following letter of thanks re: one of vegetables shipped from Josephburg to Castor, Alberta.

Castor, Illinois,
October 18, 34

Mr. E. J. Hodgins,
Fort Saskatchewan.

Dear Sir:

It is with the greatest of pleasure that I take this opportunity of thanking you for your donation of vegetables for the poor and needy of our community. I can assure you they were greatly appreciated and that they were wisely distributed so that the people in the greatest need were given this much needed help.

You mention several churches which helped in filling this car. We would greatly appreciate it if you would pass on this word of appreciation to them.

Thanking you again, I remain,
Yours Truly,
A. R. Newsham, Sec.-Treas
Municipality of Progress, Castor

The Secretary of the Municipal District has been asked by the Secretaries of the Municipal Districts of Progress and Hirman to convey to those who so kindly donated vegetables for distribution among residents of their districts, the sincere thanks of the recipients. The car that was loaded at Josephburg was sent to the Progress district and the Fort Saskatchewan car to Hirman district. The combined weight of vegetables in the two cars was approximately eighty thousand pounds.

Old-Timer Dies Suddenly After Long Illness

Mrs. Anna Dickson, 84, one of Fort Saskatchewan's oldest residents, died at the home of her daughter, Mrs. R. O. Jones, on Saturday after residing at the Fort for 30 years. Born in Brockville, Ont., she moved to Seaforth, Ont., to teach school, and later to Fort Saskatchewan to reside with her daughter. Deceased leaves four daughters, Mrs. Jones; Mrs. Myrtle M. Corbett and Mrs. E. A. Corbett, both of Edmonton and Mrs. A. D. Sutherland, of Seaforth, Ont.; also one son, S. A. Dickson, K.C., of Edmonton.

The funeral service was held on Sunday afternoon at 4:30 o'clock at Howard & McBride's chapel. Rev. D. C. Ramsay officiated and the remains were forwarded on Sunday evening to Seaforth, where interment will take place.

CHARITY CONCERT ON SUNDAY

A group of 25 German-Canadians under the leadership of Mr. H. Stormer of Edmonton, will stage a high concert in German at Bradenbaks on Sunday evening, at 7:30, November 4th. The play carries the title "Kampf um Gott" (Fight for God) and lasts for 2½ hours. A good choir of 25 members will sing between the scenes. All German speaking people of this district are cordially invited.

The FIRESIDE PHILOSOPHER
By ALFRED DIGGS

Nobody is indispensable.

Never take love for granted.

Quick temper spells poor judgment.

Cheerfulness breaks down adversity.

Grief for the dead is a form of selfpity.

Learn that clash with common sense should be avoided.

By the way some folks go after money you would think they expect to live forever.

United Church Ladies Aid Hold Chicken Supper

The annual chicken supper staged by the United Church ladies aid, was held in the Classroom of the Church last Friday evening, and a large turn-out enjoyed the feature.

The tables were decorated in Hallowe'en colors, and were loaded with everything from "soup to nuts" and those who attended did full justice to the bountiful feast.

The supper proved highly successful too, from a financial standpoint, and those responsible are to be congratulated upon the results of their untiring efforts.

Fort Band To Hold Benefit Dance Nov. 9th

Arrangements have been made by the Fort Band to hold a Benefit Dance in the Badminton Hall on Friday, November 9th.

Last February the Band held a very successful dance, when a good time was realized, this fact, coupled with the fact that they have since had to buy instruments, parts, and music with the result at the present time, the Band's finances is badly depleted.

The Town Council have kindly donated the Vets' Room in the Memorial Hall for the use of by the Band and Boy Scouts, but these two organizations must supply a stove and furnish the fuel. As the above organizations have no direct sources of revenue, it was decided to raise funds by holding a dance, and anyone wishing to contribute sandwiches, cakes or cream for this dance to aid of this worthy cause, if they will notify the Band Secretary by phoning 98. All contributions will be very much appreciated.

Tickets will be sold by Band members, do your bit to boost The Fort Band by buying tickets and supporting the dance.

Josephburg Fowl Supper Draws Large Crowd

The Josephburg Ladies Aid held their annual Fowl Supper in the basement of the church on Tuesday evening.

A large number attended, with the Fort well represented sat down at tables fairly groaning with many good things to eat, and incidently many were heard to groan when they attempted to leave, after doing full justice to a very enjoyable meal.

The supper Tuesday evening, certainly backed the reputation these ladies have achieved at putting over fowl suppers.

The tables were well filled from six o'clock until long after eight, and a goodly sum was realized.

POPPY DAY SOUVENIR TENTS

The annual Poppy Day campaign sponsored by the Veterans throughout the world will be observed on Saturday, November 10th.

Flanders Poppies are the emblem of those who fell in the Great War and the League appeals to all citizens to wear a poppy on this occasion.

These poppies are manufactured in Canada by disabled and crippled ex-service men, and will be on sale all day Saturday.

By purchasing these emblems employment will be given to handicapped Veterans, and at the same time, tribute will be paid to the memory of those who sleep beneath the Poppies in France and Flanders.

"At the going down of the sun and in the morning we will remember them."

"What caused that explosion on Ed's farm?"

"He fed a chick some "Lay or Bust" feed and it turned out to be a rooster."

EDITOR VISITS SUBSCRIBERS

Ye editor spent considerable time during the past week in the Josephburg and Partridge Hill district, trip and several suggestions we hope, calling on a large number of Record has opened up new channels to work readers, and prospective subscribers on, all for the betterment of the and met with a good measure of success.

Grain and produce prices are, if anything better than they were last year so that subscribers are better able to meet small bills like ours. There are a number we didn't get around to, but hope to meet them during the next week.

Some interesting subjects were brought up and discussed during our items worth while.

"Hello! Information bureau? Can you tell me the name of someone who will lend me five dollars?"

Now is the time to pay your subscription up.

Is There Merit Here?

The Alberta Pool Elevator system has enjoyed a high reputation among grain growers of the province and the organization is making every effort to justify the confidence bestowed. Its aim is to give courteous, efficient and equitable treatment to all patrons.

Grain growers will find the Alberta Pool Agent anxious to obtain and merit your business.

The People's Responsibility

No apology need be offered to the readers of this column, we feel sure, for again discussing the same subject that formed the topic of last week's comment, namely, the ever mounting toll of deaths and serious injuries attributable to automobile accidents. The public apathy of minimizing as far as possible these tragedies is, it will be admitted, the arousing of public opinion because, unless public opinion is aroused, all the provincial laws in the world will not prove effective.

In conversation with the writer the other day a member of a family, eminently respectable, intelligent and of the very best of Canadian citizenship, one who takes a keen and active interest in all movements for the betterment of the community and province in which she lives, stated that only recently she and her husband had had the narrowest of escapes from a serious and probably fatal car accident. Let us recite the simple circumstances.

Driving at a moderate rate, her husband at the wheel came to a point where the making of a left turn was necessary. He proceeded to make it. At the same moment the driver of a car behind them speeding at forty miles an hour decided to pass ahead. Without slackening speed and without sounding his horn in warning to the car ahead, he shot past, thus violating the rules of the road in at least two respects. He side-swiped the car in which the lady and her husband were driving, smashed a headlight in passing, tore off the front bumper, and all but wrecked the car. He nodded the lady, we too, were to blame because my husband had neglected to put out his hand indicating his intention to make the left turn. Fortunately no person was hurt.

All simple things, failure to sound a horn before attempting to pass the car ahead, failure to reduce speed when overtaking and passing the car ahead, failure of the car ahead to indicate its proposed change of direction, and these endangered, several children narrowly escaped being orphaned, two families barely saved from lasting sorrow and much suffering. The laws were sound enough, a policeman right on the spot could not have enforced them in time to prevent a tragedy. In other words individuals were alone responsible for placing their own lives and that of others in jeopardy. Either one of them could have avoided that near collision.

It is probable that as these lines are being written other near-accidents of a more or less similar nature are taking place, and possibly serious injuries and even death are the result. Who is to blame? The people themselves. Nobody else. And such accidents will continue to occur with appalling frequency until people by observing all laws and regulations, and through the exercise of proper caution at all times, put an end to such accidents.

In this article, too, emphasis may well be placed upon the terrible menace of "glaring headlights". They are prohibited by law, yet are to be found upon practically every road and highway every night. Glaring headlights which blind the driver of any approaching car, making it impossible for him to judge his distance from the approaching car which has blinded him, or to see what is ahead of him. And because one car has such lights burning, the other driver refuses to dim his lights, and two high powered cars rush at each other,—sometimes they pass safely, sometimes they do not, and all too frequently even when a head-on crash does not result, one or both cars ends up in the ditch, or mounts some other adverse place.

The owner of the "glaring lights" is apparently quite reckless and indifferent to the fact that by blinding the driver of an approaching car he may be inviting his own death, because the blinded driver may smash into him; and when driver No. 2 refuses to dim his lights because the other fellow did not, he is only multiplying his own risks because he is blinding the other fellow. Again, who is to blame for the catastrophes which so frequently follow? Not the law, because the actions of those car drivers is unlawful. Nor can any army of policemen be maintained along every highway to enforce the law. The best that is possible is to make a strong appeal to the public and let it be responsible.

It is people themselves who are to blame, and it is well nigh impossible to identify the culprits because the glaring lights renders the taking of car license number extremely difficult. It is public opinion that must first be aroused and educated to put a stop to these violations. It is not legislatures, governments and police forces which alone have responsibility in this matter, the greatest responsibility rests with the individual citizens, it is the individual citizens in far greater numbers than at present discharge that responsibility humanity must pay the price, and this terrible blot rest upon our much vaunted civilization.

Way to Ease Headaches, Pain Almost Instantly

METHOD OFTEN RELIEVES NEURALGIA AND RHEUMATIC PAINS IN MINUTES!

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

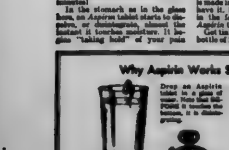
Millions have found that Aspirin eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to disolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show that Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer on the box or on every Aspirin tablet.

Get 12 of 24 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast



When in Pain Remember These Pictures

ASPIRIN IS THE TRADE MARK OF THE BAYER COMPANY, LIMITED

Recommended As Reducer

In Seventeenth Century Tea Was Supposed To Be Slimming!

Tea, in the seventeenth century, was recommended as a means of slimming. In an exhibition now in the Victoria and Albert Museum, London, of English silversmiths' work is quoted an old advertisement which says that China Tcha, or Tay, "doe Tea is "of great avail to men of corpulent bodies and to such as eat much." Apparently the ladies were not so keen on slimming in those days. Tea-drinking anyhow, must have been rather a trial when it was first introduced into this country, for the small leaves out of which the liquid was drawn had to be boiled, and people were compelled to hold them by the lip or pinned in their fingers.

Try KRUSCHEN NOW!

At no expense to you

If you suffer from rheumatism, stiffness, lumbago or neuritis you should try Kruschen for a few days, because your struggle is offering a FREE trial of Kruschen for a few days, because your struggle is offering a FREE trial of Kruschen for a few days, because your struggle is offering a FREE trial of Kruschen Local Package which contains a generous bottle and a FREE Trial Bottle. After using the Trial bottle, continue with the Regular bottle—unless you are not completely convinced that Kruschen is the best remedy you have ever had it, in which event your druggist will return your money if you send back the bottle with the unused portion.

But millions of people testify as to Kruschen's definite merit. This little seven countries package she has been found that gives the most satisfaction and Kruschen is the package without delay. The supply of Free Trial bottles is limited.

A Wonderful Machine

A scientist in Sweden claims to have invented a machine, somewhat similar in appearance and action to a typewriter, which can produce and transcribe coded messages many times faster than by hand. Those messages cannot be decoded either than through the use of a similar machine identically adjusted.

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Wernet's Powder is the world's largest seller and prescribed by leading dentists: it holds plates so firmly they'll be comfortable—that all day long you forget you have false plates. Gives a delightful comfort. Stops mouth sanitary, breath pleasant. The best powder you can buy for rest or money back! 25c at druggists.

Canada Takes Taxes Decided

Extracted Teeth For Indians During Year Of Jasper Bay Area

When Rev J Basile Rainsden went to work for the Department of Mines of statistics, he was a competent census taker, but to-day, as a result of his official labors, he is a first-rate amateur dentist.

He was engaged by the bureau to take a census of the Indians living along the eastern shore of James Bay. But he found that wherever he went in pursuit of figures, he was met by appeals from redskins to extract their aching teeth.

At one remote spot he sat down and solemnly pulled out Indians' teeth for several hours. Altogether he made more than 100 extractions during his tour.

Making It Clear

H. C. Hanks proposed to post himself to Berlin as the result of a census

European Countries Showing Some Sign Of Relaxing Nationalistic Trade Policies

Germany, Italy and France are showing signs of relaxing slightly their nationalistic trade policies, in the opinion of Dr T W Grindley, chief of the Dominion bureau of statistics' agricultural division, who was a Canadian delegate at the Red Cross conference of agricultural economists. But otherwise little indication of a relaxation in tariff and other trade barriers to agricultural products was visible at the party.

Dr Grindley went to Red Cross accompanied by Dr J H. Axtmer, professor of agricultural economics at Macdonald College, and Dr W Ann, professor of farm management at University of Saskatchewan, after attending the London wheat conference with John I. McFarland, head of the wheat pools' central selling agency. Views held by economists at the conference in Germany were "slightly interesting" in the light of the world wheat situation, he said.

International conditions responsible for nine-tenths of rigid trade policies in Germany, France and Italy were outlined by Dr Grindley. Germany had a short crop, and has to import wheat, rye and coarse grains, about the coarse grain coming from Canada, but most of it from Poland under a bilateral treaty.

Although France has a heavy surplus of soft wheat, hard wheat is needed for milling purposes and the country is ready to take Canadian hard wheat. A broadening out of Mussolini's agricultural program in Italy indicates a lessening of the emphasis placed on wheat production there. Italy's wheat barriers may be somewhat relaxed as a result.

While four of war cutting off food supply as may have been a factor in the inclination of the present agricultural policies in Europe, Dr Grindley believes it is no longer an influence. The main one seems to be to keep the large agricultural populations of Europe contented and prosperous.

From this point of view the policy pursued has been unquestionably effective. Farmers in Great Britain and Germany are highly prosperous, comparatively, he said. The United Kingdom has not gone as far as other European countries in tariffs, but has gone further in quotas and fixed prices. French and Belgian farmers with their small holdings cannot be compared readily with Canadians, but they too are benefitting from assistance and protection.

Seen Wheat From Plane

Soviet Crops Finding Method Successful

More than a million acres of grain in preparation for the harvest of 1936, will be kept in the Soviet Union from aeroplanes.

Self-seeding first tried experimentally in 1931, now has been declared successful in the quality of work. Seeding from aeroplanes equals that done either by hand or by tractor-drawn machines. The government's Agricultural experts have found.

And the speed with which the job can be done is a great deal greater than any other method.

In 1935, it has been announced, much aeroplane seeding is moving needed between 1,000 and 1,500 acres in a day, planting a total of 1,000,000 acres, on men that will be somewhat lessened for 1936.

In addition, it is declared, districts sown from the air showed a yield 10 per cent greater than similar tracts sown by hand.

Aeroplanes equipped for grain planting carry seed in large tanks from which it drifts down to the ground. Best results, it has been determined, are achieved when plants keep an absolutely straight line between two markers set up to guide them and above the ground as close by as possible.

Also among the advantages claimed for the new method is that, from aeroplanes, super-quality sowing is important advantage in view of the short Russian growing season.

Superphosphate, it is pointed out, can pass over and seed fields which are impassable to heavy machinery because of the mud and melting snow.

Great Health Record

Women Of The Road Are Held To Be Most Interesting Specimens

The Canterbury bathing properties of the waters of the Dead Sea were referred to by Major T. G. Tulloch, R.A., in a lecture recently before the Royal Society of Arts.

"The water," said Major Tulloch, "is not only charged to the extent of twenty-five per cent. with salts having beneficial medicinal properties, but is also highly radio-active.

"The effect of a bathe there is very remarkable, for it has an extraordinary rejuvenating effect, and although it is hardly credible, I have seen people emerge looking years younger than when they went in an hour before.

"Many business men come down every evening after their work for a bathe, and they find that the amazing 'tonic' effect of the water strengthens them mentally and physically in a very short time."

The fact that the northern shores of the Dead Sea and its neighbors are so healthy is due apparently to the purity of the air. Major Tulloch was in thought to be its great depth below sea level (the Dead Sea is 1,292 feet below Mediterranean) and the elements there to them unique, while there is sixty-five per cent. more oxygen in the air there than any other open place in the world.

Finds People Honest

Illinois Farmer Says Stranded Car Receives Fine Pair

Orson Morgan, farmer residing near Mason City, Illinois, has developed a great confidence in the honesty of the motoring public as a result of his experience of nearly a month.

Living near a state highway, Morgan has been called on frequently into the garage to assist motorists when a supply has given out. He always has kept a can of gasoline in an emergency, he explained.

When a motorist calls at Martin's home late at night, Martin simply supplies the person in question with the gasoline supply and goes back to sleep. Over a period of ten years Martin has yet to accommodate a motorist who has failed to return the gasoline can and leave sufficient money to pay for the fuel obtained.

Losses from forgeries now total more than $2,000,000 annually.

A Co-Ordinated Health Program For Canada Being Urged By The Leaders Of Welfare Groups

A co-ordinated health program for Canada, whereby present health machinery would work more smoothly under a comprehensive nationally organized effort to preserve health and prevent disease was urged by preachers, physicians provincial and civic officials, and leaders of welfare groups in a series of addresses under the auspices of the Canadian Social Welfare Council in Toronto during the last two months.

Suggestions ranged from formation of "a national health council" to eliminate provincial preparonism and overlaps there with the federal department of health, to a general program of health throughout the Dominion, and said that no city could be provider of any organization there. Dr Charles Hastings, the Mayor of Toronto, Justices, judges and health directors of independent bodies. Organizations represented included the Canadian Red Cross Society, the National Council of Women, the Social Hygiene Council, city and provincial health departments, churches, independent welfare bodies and the Young Women's Christian Association.

It was contended by speakers that the value of health education had been proved by results of programs directed at the prevention of venereal diseases, tuberculosis, diphtheria, typhoid fever, and, in fact, any disease that can be quickly but could be cut in half if present knowledge and equipment for disease prevention were made available to the public.

Premier Bennett was commended for placing national health before the forthcoming conference and urged the case of premiers and support was urged to buy more which might energy from the conference towards broader health education.

More than 16,000 persons who heard the addresses delivered during the showings of "Damaged Lives", a health educational film, endorsed petitions which were forwarded to Ottawa urging representatives at the conference to give national health the utmost consideration.

Although this map was made in 1926, it has of the "hot" of quality, because the color assisted the drawing of hue or horizon.

The SNAPSHOT GUILD

ANIMAL PICTURES

Animals—from household pets to jungle giants—adored ideal snapshots. Fun for the whole family. Don't panic; they are always entirely natural and, as a result, lovable. Most of the things they are the finest "actors" in the world. So simple to photograph that they do not "act".

To get good pictures of any animal the first essential is patience. It is quite possible that the family dog or cat may be photographed at any moment, but to picturing all other animals it is necessary to spend time and wait for the picture you want.

And that brings us to the question—what do you want in an animal picture?

Many of fifteen years ago there was a great call for pictures kittens in any series of embedded poses. The very little tykes were dressed up, arranged up, and photographed although they were popular in a manner, they were not particularly lovable. Every picture of animals to they really are lovable will usually popular with people. Don't try to put kittens on a piano with a string or a dog investment with a toy child.

Domestic animals, of course, offer the best opportunities for pictures, but one can get them to come where the wild is right. Open fields, on a bright day, will be found best. As for shelter speed (if your camera has variable speeds), you'll need a shot of a second or faster, to catch fleeting poses and expressions. Use the light at comparatively. Many beginners in Western Canada had indicated him to believe there was more need for governmental assistance in medical services to citizens than ever before.

Railway Fog

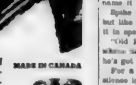
When does fog become a "railway fog"? An official of the London and North Eastern Railway has explained that it becomes "official" — in other words, a signalman cannot see a fixed signal 300 yards away. The signalmen informs his station-master, and the station-master announces his fog-men to lay detonators so long as the fog lasts. For fog services there are special timetables which reduces the number of trains by a quarter and the safety speed.—C.N. Railway Magazine.

LESS THAN 1¢ WORTH IN A CAKE

MAGIC

JUST THINK—it takes *less than ½ worth of* Magic Baking Powder to make a delicious three-layer cake! And Magic is always dependable—gives the same perfect results—every time. No wonder Canada's leading cookery experts say it doesn't pay to take chances with inferior baking powder. Bake with Magic and be sure!

MADE IN CANADA



"CERTAIN NO ALUM." This statement on every can is your assurance that Magic Baking Powder is free from alum.

THE TENDERFOOT

By

GEORGE R. SCOBEY

Author of "The Coronado Trail", "Dan Tyrrell", Etc.

SYNOPSIS

"You've fallen hair to a half-share in plenty of trouble," the lawyer told Gerald Lewis. "The Broken Spur has been systematically losing the ranch. And old Joe Carr, your partner, is drinking himself into ruin."

Hal Keene decided to go see what was happening for himself—not as Gerald Keene, half owner of the Broken Spur Ranch, but as Dave Stone, tenderfoot in a Montgomery Ward wheel-chair outfit.

Dad Kane, desert rat and herbivore prospector, fell now in narrative to tell Dustin and Spike Goddard, owners of the Broken Spur ranch who had grubbed him, at the discovery of gas on a rich gold mine, and shown samples of it—or its near Broken Spur ranch—purchasing Hear-glass cattle and prospects—against it.

Joe Carr's daughter, Edith, repulses Dustin when he wished to make her acquaintance, saying when she walked with a man, it would be with him as a square man. He plans revenge, but has had no opportunity as far. Affairs on the Broken Spur go from worse to worse, Joe Carr takes to drink.

(Now Go On With The Story)

CHAPTER IV.—Continued

Spike gaped at him. Then very slowly realization came. His eyes glimmered and his red face got redder and his wire-stiff beard seemed to bristle like the mane of an angry lion.

". . . You know how these damned old fools of prospectors talk. They masters worse old Kane can square himself with Joe Carr by letting' him in on what he found on the Hour-glass land. See now?"

never see any use to talk to an old muckha. When they do get a chance the cash glows way and there's a fond. If old Dad Kane goes in to Seco he'll tell about his gold-find of just as sure as God made it'l apples. He can't help it. The matter of Cray and Carse is bound to come out. . . ."

Bill Spike stared at him. The full import of what Dustin said had not yet sunk in.

"They'll hardly dare tell what they done," he growled. "It'll mean jail for them, too."

"They'll turn State's evidence and get exemption. That's the way Burke, the Prosecutin' Attorney, wins his victims. You gone fool! Can't you see? You'll look good in a striped suit . . . if it gets that far."

"What do you mean by that? 'if' it got that far?"

"Huh. That's easy. We're none too popular in the Valley. There ain't a Dry Farmer in thirty miles that don't want our holdin's. If we win that suit over Soda Springs it'll let them have any . . . cause to think I've gone to make arrangements for him to go back to open the mine. Then we're here till I get ready to start out and all I can about old man Carr's finances."

Spike nodded at that truth: the real reason for the constant feud between sheep and cattle-men.

"It will make no difference to you and me," said Dustin hotly. "We'll be backed away somewhere nobody can hurt us . . . I tell you we're in a hell of a mess. Old Dad Kane know now just what our men have been up to. Those men will swear to clear themselves, that they were only carryin' out orders from us. It'll all come out. . . . To make

Spike Goddard licked his lips in silence and stared at his partner with a look of mingled fear and anger. He was not a particularly strong man but like most men of his kidney, driven to bay he could fight desperately.

"Well," he croaked, "what's the answer?"

"That's easy. . . ." Dustin drew a breath of relief. To plan as he had planned in the last ten minutes was one thing. But mass planning derriment needs help. He knew now that he could count on Spike as never before. Dustin went on:

". . . You and me, Spike, have made too much off the Hour-glass to let it ever get into court. Even old man Carr will! All dreadful damn pictures, don't know what you've published him for. Thank the Lord you've been too careful to show the source of our income but . . . We've got a nice wad of cash right now in the office safe. Too dangerous to put it in the Seco bank. I figured we might need it for a get-away if some one spills the beans . . . Like old Dad Kane. He can do it any minute he chooses to open his mouth and talk. The matter boils down to this. . . . Old Dad Kan has come in here with the finest ore we've ever seen. It was found on the Hour-glass lands and old man Carr doesn't know of it. While he was lookin' for coal ore, old Kane found some of our men at work and can send us to jail for what he saw on dam'. Get me? You know what's got to be done. I needn't name it. What's the answer?"

Spike Goddard knew that answer but like his partner he dared not put it in speech. Dustin finally dared it.

"Old Kane has got to show us where he found the stuff and then he's got to disappear," he said.

For a long moment silence fell; a silence in which a clock in the ward chirped loudly and the ticking of the cheap clock on the table sounded like the crack of doom. Spike passed a hand over his forehead drink. He needed it badly. He knew what was meant.

"How?" he asked hoarsely.

"I'll see how personally about it the better for us both," said Dustin. "It's a one-man job and I trust no other man where may come life is at stake. All I say is that I'm not goin' to jail for pleasin' old man Carr or Carr either. Not any."

"It sure does . . ." Spike had sudden visions of himself in a striped suit and he did not admire it. "I'll help you. . . ."

"Help me hell," said Dustin fiercely. "I tell you it's a one-man job . . . One-and-a-half is twice as many goin' in to Seco on business. Be sure you keep old Dad Kane here. Don't let him leave on any excuse. I'll see him I've gone to make arrangements for him to go back to open the mine. Then we're here till I get ready to start out and all I can about old man Carr's finances."

Spike nodded at that truth: the real reason for the constant feud between sheep and cattle-men.

"It will make no difference to you and me," said Dustin hotly. "We'll be backed away somewhere nobody can hurt us . . . I tell you we're in a hell of a mess. Old Dad Kane know now just what our men have been up to. Those men will swear to clear themselves, that they were only carryin' out orders from us. It'll all come out. . . . To make

Spike Goddard licked his lips in silence and stared at his partner with a look of mingled fear and anger. He was not a particularly strong man but like most men of his kidney, driven down to bay he could fight desperately.

"Well," he croaked, "what's the answer?"

Use Only by Your Druggist

Free Samples at Druggists of the Remarkable New Aid in the Prevention of Colds

Local Druggists Are Now Offering A Free Trial Of Vicks Va-tro-nol For Nose and Throat—Also Of Its Ideal Companion, Vicks VapoRub

NEW PREVENTION IDEA

This Discovery Introduces Unique Vicks Plan For Better Colds-Control

HOW VICKS PLAN WORKS

Following years of research on the problem of colds, Vick Chemicals have developed a new aid in preventing colds. Vicks Va-tro-nol, for nose and throat. This new Vicks Preparation is the ideal companion to Vicks VapoRub, the modern method of treating colds.

These two Vick preparations, together with a few simple rules of health from the unique Vicks Plan for Better Control of Colds. The helpfulness of the Plan in reducing the number and duration of colds has been clinically tested by physicians.

Full details of the Plan are in each package of Vicks Va-tro-nol and of Vicks VapoRub.

Briefly, here is how Vicks Plan works:

To Help Prevent Colds

Watch yourself and children after exposure to any condition that you know is apt to be followed by a cold, sneezing.

Contact with others leaving fresh noses crowded, stuffy ill-ventilated places and sudden chilling changes in temperature exposes in irritation. Then use ever-ailing sneezing or drinking, which reduces body resistance.

Then—at the slightest irritation in the nasal passages, where most colds start—use Vicks Va-tro-nol at once. Just a few drops up each nostril. Repeat every hour or so if needed. Va-tro-nol aids Nature's functions—in the nose to prevent colds, and to throw off colds in their early stages. Used in time, Va-tro-nol aids in preventing many colds.

To Help Shorten a Cold

If a cold has developed, rub Vicks VapoRub well over throat and chest at bedtime. Through the night, Vicks VapoRub attacks the cold direct two ways at once—by inhalation carried through the skin, like a poultice or plaster, and by absorption of its medicinal vapors direct to the inflamed air-passages. Thus it helps stimulate bodily action between phases, relieves irritated bronchial tubes, checks coughing, and loosens tight congestion.

Keeping the day—any time, any place—use Vicks Va-tro-nol every few hours, as directed. This gives you full 24-hour treatment to reduce the risks of constant internal dosing, which at times upsets the digestion—especially of children.

Trial Packages Free

Your druggist has free combination packages containing a regular bottle of Va-tro-nol and VapoRub also folder telling how these two Vicks Plan Better Colds and shorter colds are used in millions of homes to control colds. Ask for yours today as your druggist's supply is limited.

Little Helps For This Week

"Wherefore beloved be diligent that ye may be found of Him in peace without spot, and blameless." 2 Peter 3:14.

His conscience knows no secret sin.—Young.

White grace and joy combine To form a life whose holy springs Are hidden and divine.

—Isaac Watts.

Even the smallest discontent of conscience may render turbid the whole temper of the mind; but may produce the effect that restores its peace and over the whole sins sphere a breath of unexpected purity is spread, doubt and irritability pass as clouds away the withered sympathies of earth and home open their leaves and live, and through the cleared blue the deep is seen of the heaven where God resides.—J. Martineau

The state of mind that is described as meekness, or quietness of spirit, is characterized in a high degree by inward harmony. There is not so formerly that inward jarring of thought contending with thought, and conscience asserting rights which it could not maintain.

Jumpy Nerves

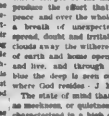
Yield to the soothing action of this medicine. You will say "Ahhh . . . sleep hover . . . feel like I had Hillman's hair." Also will assist worth living again. Don't delay any longer. Begin taking it now.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Alida (to garage man): "Henry Gearshift tried to make me believe he'd driven the same car for five years. Never paid a cent for repairs. Do you believe that?"

Garage man—"Yes; I'm the fellow who's made all the repairs.

Change of Climate, Diet, Water Often the Cause of Diarrhoea



If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, get that tested valuable cure, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This famous compound remedy has been on the market for the past 80 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

New Industry

Plant For Production Of Sodium Sulphate May Come To Saskatchewan

Establishment of a new industry in Saskatchewan, believed to be for the production of sodium sulphate, is being contemplated by a firm of manufacturing chemists with head office in New Jersey, and branch offices in Montreal and Toronto.

Government officials received a communication recently from officials of the firm asking for detailed information concerning labor and coal costs, and other particulars.

The location of the plant, according to the letter, would be in southern Saskatchewan, either in the United States border, some 12 miles from the nearest railway.

Here Cars in British Columbia

Number Increased By Over 5,000 In Last Year

An increase of more than 2,000 automobiles in the last year in British Columbia is shown in a report completed by Inspector G A Hood, of the motor record office At the end of December there were 79,918 passenger vehicles operating and 15,642 piled in the commercial trade. Last year at the same time there were only 69,372 passenger cars on the road and 15,081 commercial cars. This represents a combined increase of 2,135

Infants' Colds Relieved

Young children suffer very cold. So Mrs. Russell Wood, of Hilton Beach, Ont., writes to tell us. "I assure that there is any sign of a cold I give Baby's Own Tablets and feel they are a great help." Thousands of mothers do the same not only for colds but for feverishness, indigestion, constipation, sour stomach, colic, upset stomach and so on. Baby's Own Tablets are safe and sure to relieve. Sold by druggists or sent postpaid at 25c a box.

Municipal District Hold Regular Meeting

The Council of the Municipal District of Clover Bar held their regular monthly meeting on Saturday, the 3rd instant, with the following members in attendance: D. Gunn, E. Keith, H. B. Peters and R. Berg.

The minutes of the last meeting were adopted as read.

Mr. Keith was unanimously re-elected as Deputy Reeve for the ensuing six months.

Mr. LeChasseur, representing the Edmonton General Hospital, took the next five hours of the councillors' time in an attempt to arrive at a settlement of hospital accounts amounting to $1700.00 incurred by supposed indigent residents of the Municipal District. After analyzing each individual account, the sum of $350.00 was offered Mr LeChasseur in full settlement of same. The amount was not accepted and a compromise was arrived at by increasing it to $360.00, which was finally accepted in full settlement of the district's liabilities of all accounts due to that hospital as at the 30th of June, 1934.

Adjutant Waterston of the Salvation Army was in attendance in support of the District's annual donation. Realizing the value of the work accomplished by the Army, the Local grant of $50.00 was given.

The following election officials were appointed for the forthcoming municipal elections: M. Laisan, returning officer; L. Storms, F. T. Jackson, I. E. Lindsay, J. P. Gallowary as deputy returning officers with power to appoint poll clerks.

Messrs. H. B. Peters and D. Gunn were selected to represent the district at the annual municipal convention to be held in Calgary this month. The Secretary-Treasurer was given leave of absence to attend same.

Confirmation was given to the action of Councillor Gunn in arranging for a right-of-way across the farm of J. Spicer. The action was deemed necessary in order to obviate the construction of a road at this time.

The council resolved itself into a committee to investigate the circumstances of all relief recipients. It was also decided to investigate the request of Messrs. Cholomski, Fluker and Poucton in connection with the draining of sloughs on their farms. The council is undertaking the work of investigating these two matters on Friday, the 9th.

Two applications for Old Age Pensions were approved.

The Reeve submitted the report of the inspection of the Department of Municipal Affairs covering an inspection of the books and records of the District made since the last meeting.

With the reading of correspondence and the passing of pay sheets and accounts the meeting adjourned at 7 o'clock p.m.

Girls' A.A.A. Hold Enjoyable Hallowe'en Dance

The Hallowe'en dance last Wednesday evening under the auspices of the Girls' A.A.A. Club was a most enjoyable and successful affair.

The Badminton Hall was artistically decorated with orange and black crepe streams, witches, black cats and many other symbolics of of Hallowe'en adorned the walls, and showed the results of many hours spent on the part of the decorators.

The moonlight waltzes were very popular, there being only a big harvest moon in the north-west corner of the stage to throw its beam among the dancers.

At midnight refreshment were served by the Girls, after which dancing was resumed.

The popular Frank Smith's orchestra supplied the music for dancing.

Partridge Hill News

Mrs Albert Osbaldeston and daughter, Miss Ella of Vermilion, Alberta, spent a few days last week visiting their kin folk in the district.

Wedding bells have sent out their merry peal in Partridge Hill this past week, when a pretty wedding of local interest was solemnized in the United Church here last Thursday, with Rev E. J. Hodgins officiating, when Blanche second daughter of Mr and Mrs Robert Godsoe, became the bride of William James Bennett, of Goose Hope, Alberta. They were attended by Leslie Gordon and Miss Blanche Burnett with little Miss Audry Gordon as flower girl.

During the signing of the register, Mr Frank Kulak sang "O Father all Creating".

The happy couple left that evening on a motor trip to the coast.

Good wishes from a host of friends go with them. On their return they will reside on their farm in Vermilion Valley.

The bride to be was the guest of honor at a well attended shower at her home Tuesday evening

The ladies fowl supper drew a splendid attendance last Friday night. The ladies of the Indies sustained their reputation as good providers. The program which followed was well received.

The Clover Bar Sunday School Institute was held in that Church on Tuesday, Nov. 6th, when helpful addresses and discussions were enjoyed Rev. Dr. Grant of the Metropolitan Church, Edmonton, and Rev. Dr Mitchell of St. Stephens College gave inspiring talks.

Those in attendance from here included: Wilmot Aiken, Wesley Attewell, Mr. William Osbaldeston, Mesdames, Ryg and Pfleisdf, Mr. Norman Hambly, Mesdames George Osbaldeston, F. Kulak, G. Houston and Miss

Mr. and Mrs. Hugh Phillip are spending this week with friends at Picardville, Alberta.

LOCAL NEWS

Mr. and Mrs. Frank Murray and son Jack of Gadsby, Alberta, were the week-end guests of Dr. and Mrs. W. P. Calhoun.

Owing to bad about conditions in the Gadsby district, Mr. Murray stated that during the summer three hailstorms completely wiped out everything, and that the people in this district didn't know the meaning of hard times. He also stated that the school in Gadsby would very likely close next month, due to lack of funds.

While in town, Mr. and Mrs. Murray looked up many friends.

At the regular meeting of the Girls' A.A.A. on Tuesday evening, it was voted to extend thanks through the local paper the sincere thanks of the Club Members to those young people who so ably assisted in decorating the hall for the Hallowe'en dance and to Mr. Dave Roberts and Mr. Gordon Neale for their assistance at the dance.

The meeting was held at the home of Miss Gwenyth Roberts, Edmonton.

Mrs. George Hampshire of Gadsby, Alberta, was the guest of Mr. and Mrs. A. H. Rogers over last week-end.

Mrs. F. W. Smith and daughter will spend two weeks with her parents, Mr. and Mrs. Savage of Clyde, Alberta.

Miss G. Reeves of London, England, is visiting Mr. and Mrs. H. Lesher.

The United Church ladies aid held a bridge party in the Union Hall, Tuesday evening with a small crowd in attendance.

Eleven tables were in play, the winners being ladies first, Mrs. H. Butler, Gents first, Mr. H. Walton.

After cards refreshments were served.

JOSEPHBURG NEWS

Horrice will be held this Sunday as usual, Sunday School 10.30 a.m., Service at 11.15 p.m.

Mrs. J Thomas spent several days at Vegreville with Mr. and Mrs. Philip Mohr.

Mr. and Mrs. Immelman and daughter, Mr. Josh Hollinger and several others of Edmonton spent Sunday with Mr. and Mrs. John Mohr Sr.

Mr. and Mrs. Philip Mohr visited over the week-end with relatives at Vegreville.

Mr. and Mrs. Albert Mohr had as their guests on Sunday, Mr and Mrs. Val Berg of Edmonton.

A very enjoyable Hallowe'en Party was held at the Josephburg School on Friday last for the young people. Games of all sorts were indulged in, and also dancing. Luncheon was served at midnight.

The Josephburg Jr. U.F.A. was held at the school on Monday night. After the business was discussed the social committee reported that they have decided upon having a Telephone Whist Drive at the homes of Gus Frey, Ed. Frey and A. Underschults on Thursday, Nov 15th at 8 p.m.

Future plans for a play were discussed and practicing will soon begin.

The Josephburg Seed Club had a meeting on Nov. 5th. A seed fair will take place at the school on Saturday, Nov. 10th.

REMEMBRANCE DAY

NOVEMBER 11

Remembrance Day this year falls upon a Sunday and in consequence the Local Branch of the Canadian Legion has to alter in some respects it, program of previous years. As the Branch is now without a chaplin, the United Church managers very kindly consented to have their minister officiate at the two minutes silence at 11 a.m. on Sunday morning. Everyone is asked to be in attendance at the Memorial Plot at ten minutes to eleven. The service there will be conducted by Captain Bob Pearson. The Brownies, Girl Guides, Cubs and Boy Scouts will be on parade. After the Last Post is sounded the parade will move to the United Church for the usual Sunday morning service where Captain Pearson will again officiate.

If the weather is propitious we hope to see the biggest turnout in years.

Remember wear a Poppy on Remembrance Day.

GOOD HOPE NEWS

Mr. and Mrs. Hugh Morrow of Edmonton, Miss Watson of Grande Prairie and Mrs. George Smyth and Miss Smyth were week-end visitors at the home of Mr. and Mrs. Dave Cranston.

Mr. and Mrs. Dave Cranston celebrated their silver wedding anniversary last week.

Mr. Charles Thomas has left for Winnipeg.

Miss Verna Cripps was a week-end visitor at her home here.

Miss Vera Lounsbury has returned to her home in Stewartfield, Alberta, after spending the last two months in Good Hope.

Mrs. T. Magee is visiting her mother, Mrs. Davidson of Moosida.

Miss Webber spent the week-end at her home in Whitebourn.

Threshing is all finished in this district again. We must all say the weatherman was very favorable to us, during the season.

Additional news on page three.

A Call To Citizenship and Humanity

With the approach of winter in this country located in the northern latitudes where winter weather is rigorous and prolonged, numerous organizations supported by the thousands of warm-hearted and generous men and women are actively intervening in matters in the welfare of other thousands of these fellow citizens who are in distress and destitute, lack adequate shelter, clothing, fuel and food. These various organizations, each in its own field, are making appeal to the whole citizenship of Canada to come to the aid of all those who are in need of assistance. The press, the pulpit, the public platform and the radio are all enlisted in promoting this humanitarian work, and all of these agencies are gladly extending their services.

It is the interest, the sympathy, the generosity, the sacrifice of the individual citizens that is now required. Whatever organizations may have been devised by many people in years gone by as to whether or not they were these brother's keeper, surely there can now be no two opinions as to the responsibility of each citizen for the welfare of other citizens. Duty is duty, and whatever one's own family reasons, as it always must remain, but the formerly extraordinary consequence of that duty has narrowed during recent years, while new duty to others has greatly widened. Past selfishness is the cause of much of the suffering and loss of to-day, most unfortunately, and the present patriotism in the universal call of duty to-day.

Because of continued unemployment everywhere and the plight of so many people in Western Canada, especially in south-western Saskatchewan and in portions of Manitoba and Alberta because of another extensive crop failure due to drought, the need for enlisting continued sympathy and thousands of families in no great as in any preceding year, and in some respects even greater.

Governments, acting on behalf of all the people, are shouldering the major problem. They are mortgaging the future in order that people may survive in the present. It is the only thing to do, it must be done, and it be done. The Governments must be left the responsibility and duty which of them. But, as Premier Bennett stated in a recent address in support of the various charity drives now in progress across Canada, Government relief efforts, no matter how extensive, can never take the place of the human touch provided by private social welfare agencies. As a result, the responsibility on those in a position to contribute to the assistance of the needy is greater than ever in these times.

It is gratifying to note that appeals being made are not falling upon deaf ears or stony hearts. At the time of writing the article no less than 227 railway cars of produce, fruit and vegetables, have been voluntarily contributed by people in the right other provinces to the drought stricken areas of Saskatchewan, and additional cars are being provided every day. Churches, service clubs, the Red Cross, Community Chest organizations, and groups of public spirited men and women in cities, towns and villages all over the Dominion are at work, and the rural districts unaffected by drought are nobly responding.

But, as always, there are many who remain wrapped up in their selfishness, but who at a minimum of personal sacrifice could and should make substantial contributions to the needs of others. Too many people who are still in fairly comfortable circumstances consider the matter hardship and say they cannot make contributions which they ought to make, simply because their incomes to-day are reduced from what they were a few years ago. In these better times they were not called upon to give in proportion to what they had become the need on the part of others did not exist To-day that need does exist, and it is their duty to respond to present appeals in still larger measure than formerly out of the becomes and reserves they still possess.

Our whole citizenship has a duty to perform because of our relationship to our fellow men. If that duty is not fully and even gladly met, then our much vaunted civilization is a sham and should and will crumble in ruins. Therefore, in every community no matter how small where an appeal on behalf of the needy is made, and regardless of the organization that may make the appeal, or the particular need which it is designed to meet, there should be a co-ordinate welcome extended to those who are giving of their time and energy in promoting the success of the appeal, and the most generous response possible consistent with one's own actual needs as these may be measured and understood in the light of the actually desperate needs of others.

Commercial canning is one of the oldest of the larger organized industries in Canada. Napoleon is credited as the originator of using air-tight containers for army rations, but the development of the industry in international in 1809, in France, Frenchman Appert found that food put in air-tight containers required to be that of Burma and Argentina, the shortest. Englishman invented harvest of the latter also carried on the tin can, and North American practically made canning the great industry it is to-day.

The month of October means the end of harvest in the northern hemisphere. In Canada, Australia, and Norway; and the beginning of harvest in the southern hemisphere. November in the harvest month of South Africa. December is throughout January, which is also the harvest month of Uruguay, Chile, and Australia.

Watering On Sunlight

British Inventors Claim Illuminant Buys Supply Sufficient Energy

Motoring on sunlight instead of petrol is the latest scientific dream, based on a discovery by Sir Dutch inventors. These men claim to have harnessed the sun's rays and multiplied their power a thousand times in a photo-electric cell, thereby manufacturing sufficient energy to drive a high-powered car or aeroplane engine. Already the sun has been made to work for men in Egypt where by concentrating its rays on solar boilers enough natural steam is generated to drive low-pressure turbines. The new system will, if practicable bring about an industrial revolution.

Room To Have No Limit

Japs Hold First Place For Inventive Genius And Initiation

Our good friends the Japanese appear to have no limit to their inventive genius is concerned. They have apparently discovered the secret of applying it to the imitation of anything that can possibly be manufactured in their own land. They have copied, at a few cents, the fountain pens for a few cents, they have produced silk socks for a few cents; they have exported millions of gramophones for a few cents. Now they are shipping tons of thousands of spare automobile parts for a few cents apiece.—Montreal Star

If you suffer take advantage of this offer to try KRUSCHEN at NO EXPENSE

Sufferers from rheumatism, sciatica, neuritis, neuralgia, lumbago, Kruschen tells at our expense. With your internal organs functioning as nature intended they should you'll find new health and new energy. Try Kruschen today AT OUR EXPENSE but remember, your druggist has only a limited supply.

Many parts of England are using coal gas as motor fuel with success and economy.

Have You Pimples or Boils?

Mrs. T. A. Bryant of "Wellington St., Ottawa, Ont., says: "I had a bad case of boils on my face. I tried many remedies but could get no relief until I was induced to use Fruit-a-tives. After using only one half I took two bottles of Fruit-a-tives and my skin is now clear and smooth." 50c a box. Sold by druggists everywhere. Manufactured by Fruit-a-tives Limited, Ottawa.

Could Not Be Done

Uncle Tom: "So that's the baby?"

Father: "Yes."

Uncle: "I hope you'll bring him up to be a conscientious, upright young man."

Father: "I'm afraid that'll be difficult."

Uncle: "Pshaw! As the twig is bent so is the tree inclined."

Father: "Yes, but this twig is bent on being a girl, and we're inclined to let it go at that."

Criticism Often Unjust

The Ottawa Journal says most of us are always ready to criticize the police. And our criticism is often unjust. For the miracle of police work, as it is organized to-day, is not that so many criminals escape, but that so many are apprehended. The public takes note of the few failures; it forgets the thousands of cases where the police succeed.

A noted French performer died recently, and among his effects was found a document in the form of a will leaving recipes, formulae, ideas and suggestions for perfumes, inventions, creams, to keep the laboratory staff busy for years.

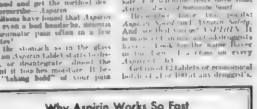
Even Rheumatic Pains Eased Fast Now!

BAD HEADACHES, NEURITIS PAINS OFTEN RELIEVED IN MINUTES THIS WAY

Remember the pictures below when you want fast relief from pain. Demand and get the method these pictures prescribe.—Aspirin

Millions have found that Aspirin eases even a bad headache, neuralgia or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate almost the instant it hits the moisture. It begins "taking hold" of your pain at once.



When in Pain Remember These Pictures

ASPIRIN IS THE TRADE MARK OF THE BAYER COMPANY, LIMITED

Shooting The Fog

Record Chemical Makes Air Clear In Five Seconds

Lightning raids on fog are foreshadowed by a secret chemical in which a trial was given recently. When a typical pea-soup specimen loomed up, engineers, having mounted their "guns", an array of centrifugal pipes suspended thirty feet horizontally above the ground first streams of this liquid into its midst. In a few seconds a river path had cleaned in the gloom, and while the chemical attack lasted, every fog particle, as it came within range of 3,000 feet, was brought to earth in the form of water. It is anticipated that aerodromes will be among the first to install this new fog-clearing equipment. Already thousands of pounds are expended annually on special fog signals and guidance signs.

World's Neatest Bird

Cockatoo Can Drawn Out Human Motor Car Horns

The newest of the peacock can be heard a mile away, but the noisiest bird in the world is the cockatoo. A single bird can make a din which would drown a dozen motor car horns and dim the sound of a steam whistle. The bell-bird of Brazil is runner-up to the cockatoo. This white bird is about the size of a pigeon. It lifts its head in the air and makes a noise that sounds like the bang of a hammer on an anvil.

Cottonwood, Texas, has a well in the middle of its main street.

Automobile tires nowadays commonly run from 15,000 to 25,000 miles, as compared with 3,000 to 4,000 miles, which was the life of a tire before the war, says a British writer.

SOURED ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile —No Calomel necessary

Many people who feel tired, sluggish and generally constipated make the mistake of taking a purgative intended to move bowels only. What you need is to wake up your liver bile. Your liver should pour into your bowels a pint of liver juice daily. You can tell when your liver is sluggish or bowels constipated when you have Lazy Liver Pills are pure to get. Purely vegetable made from herbs. Ask for Dr. Edwards' Lazy Liver Pills. Only 25c at all druggists. 14

Brazil, with an area of 3,176,395 square miles, has a population of 28,000,000.

CHEST COLDS — MECCA OINTMENT MUSTARD POULTICE

Relieves Congestion — Does Not Blister

At first sign of a cold on the chest apply a Mecca Poultice with the addition of mustard. The warmth in combination with ingredients known to the medical profession for their value in relief. Full directions in each package. 13

Post Office Building A Credit to Town & District

The local branch of the Canadian Legion is to be congratulated on the improvements made to the Post Office building. Situated on the main highway the modern effect of the building is very attractive to those passing through. We are advised on very reliable authority that the Town now possesses the most modern post office building between Edmonton and Vegreville. While the exterior of the building received the most attention the interior was not overlooked. Linoleum was laid in the public office and the walls were decorated in white and maroon giving a most pleasing effect. The improvements are also enhanced by the tar and sidewalk recently put down by the Town Fathers. Both improvements are a credit to the Town for which the residents can be justly proud. We hope that similar improvements will be a common thing in the Town in the future.

The work of stuccoing the building was done by Stanley C. Gee, contractor, Edmonton, who is to be congratulated for his fine workmanship. Mr. Gee is a returned man, having served in France with the Canadian Machine Gun Battalion. All material used by the contractor was supplied by the Beaver Lumber Company, Limited, a local firm which carries a complete line of building supplies and lumber of the highest quality which with the up-to-date service they render equals economy. Brickwork was done by the genial Charlie Mager, who is an ardent worker for the local branch of the Legion. The work of re-shingling was contracted for and done by George Stuckey who is well known to the residents of the Town and District. Paints and hardware were supplied by the Fort Hardware Company, a firm which stocks a complete line of quality shelf and heavy hardware, coupled with courteous service. The tinsmithing was done by A. M. Carscadden, a merchant who has catered to the needs of the district in tinsmithing and hardware for over 20 years. We must not overlook our capable postmaster, Mr. A. H. J. Wootton, known to everyone as Alf. He has been connected with the post office since 1918 when he was discharged from the Canadian Forces for wounds received in France. Alf was second in command to the previous postmaster, Mr. W. G. Sbera, for a number of years until he assumed the postmastership in 1926.

The Observer

Quite the most remarkable specimen of lost work in the writer's opinion was that in which it was announced that a responsible Minister of the Crown, addressing a convention of those interested in promoting tourist traffic, proposed that legislation should be introduced to provide penalties for those who fail to greet the tourist with a cheery smile, or charge him twenty cents for his cream when the neighbours get it for fifteen. The reason assigned for this you will notice is not that it is contrary to the will of Heaven—there is, indeed, good scriptural authority for despoiling the Egyptian, and levying tribute from the Gentile—but because it is bad for tourist business. We note here the smile assessed at its true value. It will no longer be the index of a warm heart but of the itching palm. The farmer who parts with his breakfast cream at bargain prices must throw in a wide grin as well to show that he likes it. His coffee will have a richer flavor when he remembers that he has helped to boost the business of the Mountain View Hotel a hundred miles farther on. The proprietor will not fail to profit by the enthusiasm of the guests who arrive glowing with admiration for the dear peasants who were so generous and helpful but whether he shares his profit with the peasant is more doubtful. One is reminded of the story of the lady who paid half a crown for two poached eggs at the village inn. When he inquired gently whether eggs were so very scarce in the village he got the frank answer, "No, but bishops are." I have always thought that the royal origin of this story was that the bishop must have enjoyed it too, otherwise he would not have told it. But now his duty as a good citizen will send him hotfoot to the nearest magistrate to inform on the culprit. He may reflect on the fate of the Bard of Avon had some observations upon the man, who "dressed with a little brief authority.....plays such fantastic tricks before high Heaven as make the angels weep."

C.I.G.T. MEETING HELD

On Monday evening, November 5th, the "Happy Heart" and " Northern Light" groups of C.G.I.T. held their meeting in the United Church Classrooms. Members of the W. M. S., and mothers were invited to be present. The usual business meeting was held. The "Re-Affiliation" ceremony and the unveiling ceremony followed, and a talk on the work of the C.G.I.T. by Supdt., Mrs. Logan O'Brien was well received. Camp reports given by Margaret Glover, Una Williston, Roberta Little, Evelyn Cranston and Rena Sherman, these also included camp songs which were enjoyed by all present.

The meeting closed with community singing, all taking a hearty part, and Mrs. Glover, The Leaders, Mrs. The groups sang Taps. (C. McKenzie and Mrs. R. Downes and members of the groups thanked Mrs prise. Dainty refreshments were served by Williston and Mrs. Glover for their aid by two mothers, Mrs. Williston kind and chancy thoughtfulness.

WHAT TO DO ABOUT "Acid Indigestion"

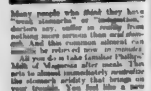
A WAY THAT RELIEVES THE CAUSE IN A FEW MINUTES

Many people who think they have "weak stomachs" or "indigestion," doctors say, suffer as really from nothing more serious than acid stomach. And the common ailment can usually be relieved now in minutes!

All you do is take familiar Phillips' Milk of Magnesia after meals. This acts to almost immediately neutralize the stomach acidity that brings on your distress. You feel like a new person!

Try this next time. Take either the familiar liquid "PHILLIPS" or the new Phillips' Milk of Magnesia Tablets. But watch out that you get the Genuine PHILLIPS' Milk of Magnesia. Made in Canada.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tablet is the equivalent of a teaspoonful of liquid Phillips' Milk of Magnesia.



PHILLIPS' Milk of Magnesia

WORLD HAPPENINGS BRIEFLY TOLD

Four common law criminals, all under 20 years of age, were executed by the axe in the court of the prison at Dessau, Germany.

Third man to join the old Royal North West Mounted Police when it was formed in Ottawa in the early '70's, James McFerran, 88, is dead at Hamilton.

A direct tax on industrial payrolls which would raise $200,000,000, lies at the heart of the new unemployment insurance plan now being worked out for presentation to the next United States congress.

A new rose, shown for the first time at the National Rose Society show at Horticultural Hall, West-minster, has been named "Princess Marina." It has velvety salmon petals tinged with orange.

Charged with participation in Communistic activities at the University of Chiforum at Los Angeles, John Barnacle, president of the Associated students, and four other students have been suspended for one year.

Registration and fingerprinting of all persons in the United States, as a means of weeding out undesirable aliens, was advocated in a report submitted to the state chamber of commerce.

George Walker, K.C., solicitor for the Canadian Pacific Railway Company at Calgary has been appointed assistant general solicitor of the company with offices in Montreal, E. W. Beatty, president of the railway, has announced.

SUNDAY SCHOOL LESSON

NOVEMBER 11

THE CHRISTIAN CITIZEN

Golden text: "All they that take the sword shall perish with the sword." Matthew 26:52

Lesson Christmas 3:13-26

Devotional reading: Micah 4:1-5.

Explanations And Comments

Line of Prophets With One Another, verses 13-15. The people to whom Paul wrote this letter lived in Galatia, the Roman province which extended north and south across the central plateau of Asia Minor. In Southern Galatia were the cities where Paul founded churches on his several missionary journeys. Antioch in Pisidia, Iconium, Lystra and Derbe. He visited Galatia again on his third missionary journey, and two or three years later wrote the letter.

In the beginning of the fifth chapter Paul tells his readers that Christ sets them free from the bondage of the old law and urges them to hold fast their freedom. Then in our lesson text he tells them not to err in thinking that freedom from the requirements of the law means disobedience to its spirit, which is that of love to others. "To men who have been accustomed to think of law as the only obstacle to free self-indulgence, or to those who have been accustomed to high ethical standards, freedom from law may easily seem to mean that for the Christian there is nothing to stand in the way of the grossest indulgence of his own impulses. Of this danger Paul is aware (Rom. 6:1, Rom. 8:17, Col. 3:1), and beginning with this verse he solemnly warns himself against meeting and arresting it."

Brethren, wrote Paul, you are free from the law, but Christian liberty does not mean that you can do as you please. Liberty and license are not synonymous. Do not use your freedom as a license for indulging your lower impulses, but live in accordance with the law of love. "Paul is used here for 'that element of man's nature which is opposed to goodness and makes for evil. It signifies the entire potency of human nature, having service for others, continued Paul, you fulfil the whole law of love, which is, Thou shalt love thy neighbor as thyself.

"A Christian may be the most free of men, and yet subject to none, a Christian man is the most destitute servant of all, and subject to all." (Martin Luther).

Then, remembering that the Galatians were prone to quarrel, Paul adds, "But if ye bite and devour one another [set toward one another like dogs or wild beasts], beware lest ye be consumed one another [one another's spiritual life]."

"He next resolved to make the most of himself—an entire change from his former conduct. Still he could be relied to take all the consequences, including the vindication of his temper and the loss of self-control."

Little Journeys In Science

GLASS

(By Gordon H. Cozet, M.A.)

Historians tell us that the Egyptians discovered how to make glass. The production of glass on a large scale started in Egypt about 1370 B.C. Alkali (sodium carbonate) was fused or heated, crushed quartz, limestone, and copper compounds in crucibles to give a blue glass. Glass made in Egypt was shipped to all parts of the Roman Empire.

Science has shown the business manufacturer how to produce many new and useful kinds of glass. Ordinary glass, which is composed of sand, lime (or shells) and crushed rock when suddenly heated or cooled. If certain metallic oxides in the formula of ordinary glass produce a type of glass known as Jena glass, which can stand high temperatures. Recently scientists have produced pyrex glass by replacing some or all of the lime with aluminum or some other metals.

Pyrex glass is strong and stands changes in temperature so well that cooking dishes can be manufactured from it. Silica, commonly known as sand, can be converted into a transparent glass known as silica glass which can be heated to redness and plunged into cold water without being fractured.

Optical glass for lenses of all kinds is produced by adding lead oxide to the glass mixture. Optical glass must be free from all color-producing materials and must also be free from very small air bubbles or stringy waves. Cheap imitations of genuine are made from glass very rich in lead (paste), and the gloss of which cut-glass ornaments is made is of this same kind but it contains less lead.

Recently a plate glass has been produced in England which has special strength and toughness. The glass does not splinter when broken, but forms small comparatively harmless fragments. This toughened glass is about five times as strong as ordinary sheet glass.

A Scenic Highway

The Edmonton Journal says visitors to Jasper Park who have motored along the 24 completed miles of mountain road that will eventually connect Jasper and Lake Louise, are agreed that it will prove to be one of the continent's great scenic highways. It will be within national parks throughout its entire length and, according to the engineer in charge, will not present any steep grades, while the resulted in mostly long brwed out of wind rock.

FALSE TEETH

Dr. WERNETS POWDER

Would you take false teeth to fit so nicely yet comfortably they feel natural —and, short, laugh—all day long you can forget about them. SPECIAL FEATURE removes fruit-acidism protects sensitive gums—keeps mouth clean and mouthy. Inexpensive—try druggist.

Was Familiar Character

"Old Mail" Was Carriage Attendant In London Thirty Years

"Old Mail", a familiar character in London, who is estimated to have opened the doors of more than 2,000,000 private cars, taxicabs and hansom cabs, had died in that city, aged 74. His name was Walter Mathews, and for thirty years he was the carriage attendant outside Bumpus's in the Strand. In his youth he was a noted boxer, and later went to New York as a butler. Since returning to London he declined several offers to return to the United States.

Lumbering In B.C.

In the first eight months of this year, the British Columbia log scale was 1,297,000,000 feet. An increase of 8 per cent. over the corresponding period last year. In the month of August, the scale was 200,000,000 feet compared with 140,000,000 feet in August, 1932.

Kept Her Promise

Because she kept her word not to write of battles in Russia during the last seven years, nine she was permitted to leave that country, Princess Irina Skariatina, author and lecturer, was allowed to revisit the country of her birth and was treated hospitably by the Soviets, she said upon her arrival to live in Philadelphia. Her parents were killed in the Bolshevik's during the revolution.

WHEAT PRICES TO BE PEGGED FROM NOV. 1ST

Winnipeg Effective Nov 1 wheat prices will be "pegged" at 75 cents a bushel for the December future and 80 cents a bushel for the May future it was announced here by the Winnipeg Grain Exchange.

The pegging of the prices, on the Fort William basis was made by the grain exchange at the request of the federal government. John I. McFarland, general manager of the central selling agency of the Canadian Wheat Pool, declared the removal of outside trading recently complained of had caused the pegging.

Text of the Winnipeg Grain Exchange statement follows:

"The government has requested that minimum price be not made May and December wheat contracts of 80 cents and 75 cents respectively, Fort William basis, there to take effect November 1, and the government agrees over to take hedges on grain purchases. The council of the exchange has acted in accordance with the request.

Duration of the pegged price was not set. Last year, from August 18 to September 1 (Rule 8:1, Rule 8:17, Col. 2:1), and beginning with this wrote John Bunyan himself vigorously meeting and arresting it."

Probe Munitions Sale

British Government May Investigate Private Manufacture Of Arms

London—The British government has decided to establish an inquiry into the private manufacture and sale of war materials it was stated in political quarters. Official confirmation, however was lacking for the present.

The Daily Mail said the government's decision was partly a result of the senatorial inquiry at Washington and also partly because of a deadlock in the disarmament conference.

It was believed the government also would propose other nations join a conference to-day for the manufacture and exportation of arms with a view to secured a convention establishing international control.

Such a conference it was suggested might take the place of the disarmament conference.

Announcement that these steps have been determined upon, it was stated, will be the government's answer to labor's demands in the House of Commons, and suggestion of the admiralty for an independent inquiry into the private manufacture of naval construction.

Urges Development Of The Tourist Industry

Director Of Canadian Travel Bureau Addresses Boston Club

Immediate Development of the tourist industry between Canada and the United States can forge a new instrument for peace between the two countries, said H. Leo Boivin, of Ottawa, in addressing the Canadian club of Boston.

Mr. Boivin is director of the recently-established Canadian travel bureau and he urged an ever increasing tourist traffic between the United States and Canada.

The people of the United States had spent on travel last year "the astounding figure of $8,000,000,000," said Mr. Boivin, adding "the great need of reciprocity of travel between the United States and Canada." Last year, he said, Canada showed Canadian travellers spent approximately $40,000,000 in the United States.

Sedition Measure

British Government's Settlement To Disaffection Bill Subject To Change

London.—The government's settlement to the Disaffection bill passed through report stages in the House of Commons but several amendments were framed into it during the brief two-day debate.

An amendment by the labor opposition providing a search warrant should be issued only by a high court judge and not as originally proposed in the bill by two magistrates, was rejected by the government. A further change was made when the government accepted an amendment providing no prosecution could take place without the consent of the director of public prosecutions.

The bill purports to check distribution of seditious literature among the [illegible] of the country.

Baptism Quintuplets

Ceremony Is Performed At Age Of Five Months And Two Days

Callander, Ont. — Solemn ceremonies of baptism of the Roman Catholic church for the Dionne quintuplet sisters were performed at a private service in the Dafoe hospital here. Rev. H. T. McNally, parish priest of Corbeil, officiated.

The ceremony, performed five months and two days after the babies' birth, was a simple one. It was witnessed by members of the families of both Mr. and Mrs. Oliva Dionne, the parents, and others, including Moise Legros, father of Mrs. Dionne; Miss A. Dionne, sister of Oliva Dionne; Dr. A. R. Dafoe, the attending physician, and five godfathers and godmothers.

New Locks Opened

Hatton, Warwickshire. — A new boost was given inland waterways in England when the Duke of Kent opened the new locks on the Grand Union canal between London and Birmingham. The ceremony marked the completion of a $5,000,000 improvement which began in May, 1932.

First Criminal Court

Court Hears At The Pas Crowded Where Sessions Open

The Pas, Man. More than 200 persons from the mining camps of the north and the cities of the south crowded the rooms and corridors of the community building to attend the first criminal sessions of the court of the king's bench ever held in The Pas Mr. Justice J. A. Adamson, Winnipeg, presided. There were 15 charges and nine indictments on the list. The charges arose out of the strike at Flin Flon on June 30.

Bright Students

Third Grade Pupils In Toronto Schools Can Answer Questions

Toronto.—Two Toronto senior third grade pupil whose classes claimed marked superiority over similar bodies in London, Ont., when several students correctly identified Prime Minister R. B. Bennett and Premier Mitchell F. Hepburn of Ontario.

Major R. J. Hanna, of Willkinson school, said 15 of 23 pupils in the senior third grade of his school knew R. B. Bennett was prime minister of Canada and that 23 of the same group could identify Premier Hepburn. Twelve others had heard of Mr. Bennett but could not describe his office, and two appeared never to have heard of him.

Ten students did not know who Mr. Hepburn is.

Seven knew "Dizzy" Dean was a baseball player, five knew he played for St. Louis Cardinals, but the remaining pupils had never heard of him.

In a North Toronto public school, 12 third grade pupils correctly identified Mr. Bennett, five described him merely as premier, one as "governor of Ontario," two as prime minister of Ontario, one as "secretary" of Ontario and one as "president of Canada".

New German Stamps

Berlin.—The reich government announced that a series of postage stamps will be issued depicting the peaceful activities of the German people. The stamps, which will be of five to seven pfennigs in value will be issued early in 1933 and the proceeds devoted to charity.

Scales Victory

Herman Trelle presented and an other wrestl victory in the time against the elements play weather conditions played havoc with crowds at the Pance Pivre during the first test time but the crowds upon Wembley too late. Mr. Trelle had completed his harvest.

Discuss Meat Imports

British Submits Memorandum For Future Discussions With Dominions

London. — Conversations between British representatives and delegates from the Dominions concerning the United Kingdom's meat imports were resumed at the Dominions office and it is understood the Britons submitted a memorandum which will form the basis of future discussions.

The memorandum, it was learned, has been called overmeat to the governments of the various Dominions for their observation. Meanwhile discussion on the question, of vital significance to British farmers as well as to the Dominions, has been adjourned for at least a fortnight.

Canada and the other Dominions were represented either by the high commissioners or their representatives. Walter Elliott, minister of agriculture, and J. H. Thomas, Dominions secretary, with other British government officials were also present.

Completes Long Flight

Melbourn And Sussex Beach Mechanic Flies Home

Melbourne, Aus.—C. J. Melrose, the solo flying Australian, and Lieutenant M. Hansen, the Dane, both had completed the London-Melbourne flight Nov. 1st, coming in seventh and eighth respectively.

Mister Melrose beamed between the pylons at Flemington race-course his reputation for coolness was considerably enhanced. Tagging behind him came the tale of how when he was lost 15 miles from Charleville he landed and hailed a passing motorist seeking directions.

"He's a casual customer all right," said the motorist later, adding his verdict in that already expressed in England a month ago when the flyer stepped from the cockpit after an eight day and nine hour flight from Australia with as little ostentation as if he had made a hop from the nearest airport.

Will Claim Damages

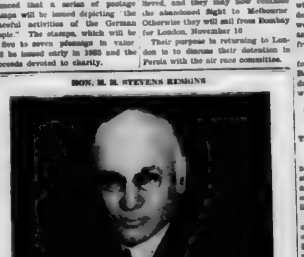
American Flyers, Detained In Persia, Want Compensation

Calcutta, India.—John Wright and John Polando, American flyers in the Melbourne derby, who were detained by the Persian border for more than 24 hours, said they intended to claim damages from the Persian government.

After stripping their engine, they were amazed to find a faulty cylinder was not cracked, as they first believed, and they may now continue the abandoned flight to Melbourne. Otherwise they will mail from Bombay for London, November 15.

Their purpose in returning to London is to discuss their detention in Persia with the air race committee.

HON. H. H. STEVENS RESIGNS



Hon. H. H. Stevens, Minister of Trade and Commerce, who resigned from the Cabinet on the mass buying issue. The resignation came after his alleged refusal to retract utterances made while chairman of the Royal Commission on Price Spreads and Mass Buying.

PRIME MINISTER ANSWERS LETTER OF HON. STEVENS

Ottawa. — Suggesting that the tenancy of Hon. H. H. Stevens with respect to events leading up to his resignation as minister of trade and commerce was "at variance with the recollection of my colleagues and myself," Prime Minister R. B. Bennett, in a letter expressed the opinion no useful purpose would be served by further correspondence.

Mr Bennett's letter was in reply to that sent him by Mr Stevens in which the latter stated at some length his criticism of the prime minister and his colleagues and dealt particularly with the commemoration vot him accepting his resignations.

The prime minister's letter to Mr. Stevens was sent to the former minister following a brief session of council and a short time later copies were made available to the press.

In the meantime rumors circulate courtly of impending cabinet changes but no announcements in this respect are anticipated until the return of Hon. R. J. Manion, minister of railways and canals.

Mr Bennett's letter follows.

"Dear Sir:

"I received your letter of yesterday in due course.

"As you resigned as minister of trade and commerce and chairman of the royal commission on price spreads and mass buying, the ministerial duties connected with your former offices will be carried on by my colleagues at the meeting of council on Thursday last, when all the relevant papers to which you refer were available to you, no useful purpose will be served by anticipating parliamentary discussion and continuing the correspondence with respect to events of which I think it necessary to state that your indicated memory is at variance with the recollection of my colleagues and myself.

"Yours truly,

(Sgd.) "R. B. BENNETT"

King Boris Drives Train

Takes Place Of Engineer Who Was Seriously Burned

Sofia, Bulgaria.—King Boris risked his life to save an engineer from death in his burning locomotive, and then himself took the throttle to bring the train more than 100 miles to Varna.

The king left his special car, attached to the train, near Shumen when fire broke out in the coal bunker. Noticing the engineer's clothes were aflame, he climbed into the cab and pulled the burning garments from the man's body.

After arranging for medical care for the seriously injured engineer, Boris took the driver's place and drove the locomotive the rest of the way into Varna.

Trade With Newfoundland

Tariff Reductions Have Good Effect On Trade With Canada

Ottawa. — Tariff reductions announced by Newfoundland's commissioner of public utilities will, it is anticipated, have a beneficial effect on Canada's trade with Newfoundland.

In the three months ended June 30 of the present fiscal year, Canada exported merchandise to the value of $1,833,433 to Newfoundland. Exports of wheat flour totalling 73,116 barrels, were valued at $206,104. Imports from Newfoundland during the same three months amounted to $197,367.

Rocket Mail Tested

Trieste, Italy.—A steel tube was rocketed from the side of a mountain near here, and landed undamaged in a valley 3½ miles away, with a cargo of 1,000 letters. The demonstration, testing a speedy means of transporting mail between nearby points was termed a success by its inventor Gerard Zucher.

Washington. — Hironi Saito, Japanese ambassador to the United States, asserted his country is demanding a navy equal to the strength in the world because the Japanese insist their empire is the equal of any other nation

Greatest Hunt For Gold In The History Of Canada Has Been Carried On Over Wide Area

A season that brought what is believed to have been the greatest hunt for gold in Canada's history is drawing to a close. No figures are available to show the exact number of prospectors and assistants who struggled through often inhospitable country, but a careful approximation indicates a total of almost 15,000.

Increased prices for the yellow metal spurred prospectors' activity. An added factor was extensive use of aeroplanes, which provided means to new districts and revealed evidence of still more. Aerial photography, it is said, has revolutionized the metal-mining industry.

Pictures taken from speeding aeroplanes tell experts much. The topographical survey of the Department of the Interior positioned 60,000 aerial photographs during the summer. From these most of them taken in Northern Manitoba, Athabaska, Great Bear and Great Slave regions and in the Nahanni district near the Yukon boundary, maps are being developed.

Planes of the Royal Canadian Air Force carrying aerial surveyors made flights over the famous Long Lac district in Northwestern Ontario. Some flights were made in other provinces. Much of the aerial photography this year was designed to help gold seekers.

Lands, prospectors and geologists say, is still the most important factor in the hunt for gold and less valuable metals. Once a tree was blown in. Its roots tore up the soil surrounding and and bared what developed to be one of the richest veins ever discovered in Canada. Lead summer a prospector stopped on the shore of a lake because a high wind smashed the canoe White he waited for the storm to abate he discovered what is regarded as one of the most important finds of the year. Such incidents are said to make prospectors superstitious.

Aerial photography has removed some of the chance from prospecting. It tells the field man what rocks contain no gold and the territory where the soil, not what miners call "overburden," is too deep for them to find workable veins, even if they did exist. They help him concentrate his efforts where it is most likely to succeed.

Pictures show greater formations in which indications are outlined, and, on the other hand, indicate geological "faults" and great fractures where profitable mineralization is more probable.

Stereoscopes pinned over the pictures show the valleys and hills in relief. After discovery of a vein a study of the pictures helps in development, as it shows the contour of the country and indicates the best route for a road and most advantageous location for a mill.

In the Ottawa of the topographical survey 600,000 negatives are kept and a sufficient number of prints are available to prevent any possible shortage.

Get What She Wanted

Action Of New York Girl Would Seem Justifiable

Another story of an individual finishing the idea of big business is told us by a young lady who wanted six buttons. Simply six buttons of a certain size. She found the type she wanted at Altman's, but told the girl she needed a size larger than those on display. The girl solved her relief, and the young lady said that the color didn't matter, because she was going to cover them with cloth. Altman's covered buttons, the girl said, and would be pleased to do the covering. The young lady said she'd like to never have buttons, please. In that case, the girl said, she couldn't sell the buttons. Altman's never sold buttons for covering. Then our young lady drew herself together and told a little white lie. She would take six red buttons, and wouldn't ever dream of re-covering them. The girl sold them. —The New Yorker.

Developed in England, a new type of cottonpro having neither wings nor rudder has long endurance in the air and land on a smooth sport.

W. N. U. 1971

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HOMENT
(Graphos-Analyst)

(All Rights Reserved)

(Editor's Note: Hundreds of readers write, each enclosing 10c in stamps for a personal character analysis. Here you are. The well-known Graphos-Analyst who is writing this series of fascinating articles will be glad to analyze your writing. Send a sample of the specific offer at the end of the article.)

This week, there are several letters that have a personal appeal to a good many of my readers, dealing, as they do, with self-analysis. One will arise for anyone.

Miss J., of Winnipeg, says: I am a stenographer, but simply detest the work. I can shorthand and feel that I am wasting my time. I have dabbled a bit with painting and drawing, and would like to make a little extra money now and again in this way but don't know how.

There are very definite indications in your writing that you have a very talent for artistic work. Some of my readers have made such ability their life up art as a career, and I am forced to advise them against it. But in your case, I can very earnestly suggest that you can take up drawing as a career and do well in the main, of course, that you are to give up your present occupation at once.

You must take up your art work, nevertheless, in your spare time. Work hard at it, take a good course, become it will pay you in the long run. Don't waste your life in merely earning a living and bored what developed to be one of the richest veins ever discovered in Canada. Lead summer a prospector stopped on the shore of a lake because a high wind smashed the canoe White he waited for the storm to abate he discovered what is regarded as one of the most important finds of the year. Such incidents are said to make prospectors superstitious.

Aerial photography has removed some of the chance from prospecting. It tells the field man what rocks contain no gold and the territory where the soil, not what miners call "overburden," is too deep for them to find workable veins, even if they did exist. They help him concentrate his efforts where it is most likely to succeed.

Pictures show greater formations in which indications are outlined, and, on the other hand, indicate geological "faults" and great fractures where profitable mineralization is more probable.

Stereoscopes pinned over the pictures show the valleys and hills in relief. After discovery of a vein a study of the pictures helps in development, as it shows the contour of the country and indicates the best route for a road and most advantageous location for a mill.

In the Ottawa of the topographical survey 600,000 negatives are kept and a sufficient number of prints are available to prevent any possible shortage.

Indian States Pay High Tribute To Lord Willingdon By Erecting Statue In His Honor

Family Life In Russia

May Be Wrecked By Duty Of Citizens To Work

A wholesome family life holds any race together. It is impossible when the sanctity of the home is disregarded or social laws are abrogated. It is not unlikely the Soviet rulers of Russia may smash on that phase alone for the Bolsheviks or new deal over there are playing with fire. In discussions in Russian newspapers the young communists are asking if it is possible to continue the family organization and at the same time discharge these regiments duties to the state. The burden of the correspondents is the complaint that the amount of work required of citizens by the community leaves neither men nor women sufficient time to develop a wholesome and affectionate family relationship. Some frankly ask why, if it interferes with the discharge of the duties imposed by the state, family life should not disappear at any rate for the present. The appalling implications of this suggestion show how far the process of regimentation has diverted the mind of Soviet youth. Brandon Sun

Manitoba Pension Plan

Has Change In System Contemplated By Government

Changes in the Old Age Pensions Act in Ontario proposed by Hon. David Croll, minister of public welfare appeared to be a move toward the system now in effect in Manitoba, C. H. Newcomb administrator of Manitoba old age pensions states.

In Winnipeg applications for old age pensions were made to the social welfare commission. In all other Manitoba towns applications were made to municipal councils. Those whose applications were rejected may appeal to Mr Newcomb for a hearing.

Mr Newcomb said he had no reason to believe any changes in the system were contemplated by the provincial government at present.

It is an honor almost unique that the princes of the Indian states are paying Lord Willingdon viceroy of India. They have subscribed funds with which a statue to his honor will be erected in New Delhi "to express, in the words of the official explanation, the high esteem they had ventured to extend his activities beyond seas. He was like Kipling's Peacock that all his life tried to master courage to turn to the middle of the floor Peters mustered that courage once and Dustin caught him with a hand of five thousand dollars in his house. That loan saved Peters but "was, just as much to make him the benefactor of Sam Lantan

"Just a moment, Peters . . ." Dustin drew him aside "Those cards in your hand. Can't you draw that Ace over the bank? I've got to have."

"Impossible!" Peters quivered. He didn't own the bank at all. Mr. Dustin. He did own the bank but old man Ingram took it up. It is a note and bill transaction. Peters knew what to do with it. He'd lost a hell of money and needs cash.

"How much is the note for?"

"Well . . . Old Carr hasn't paid any interest on it for a year. It is about twelve thousand dollars right now. I'll tell you what I'll do—"

Dustin was already gone. Peters heard him call Ingram letter he got all hobbs over it past as soon as he can get to town in a hurry."

Dustin's heart gave a great jump. This was better than he dared hope. It looked hard at the little figure before him.

"I've got a five thousand dollar note in yours, Peters, he said "It is secured by the bank and both of you."

"Yes sir. That's me."

Dustin held on his throat seemed to choke the little gray father

"I . . . sir, I, I swear I don't see how I can fix it It's Mr Peters grain business I . . ."

Leads In Literary Output

Russia Claims Production Of Greatest and Greatest Number Of Books

Soviet Russia, to the exclusion ago the most illiterate country of Europe, has been amassing its literary achievements and today boasts that in the production of books it has surpassed not only every other nation, but even the United States and Germany combined.

Just recently 500 Soviet authors met in the first All-Union Writers' congress, and laid down the general lines of Russian literature for the future.

In connection with their meeting, figures have been published that show the vast progress the Soviet has made in book publishing since the revolution.

Not less than five million books have been issued within the past 15 years.

Within the past five years the circulation of the writings of Maxim Gorki alone, for instance, has been 18,000,000 copies.

Shalaiev, author of "Still Flows the Don," has sold 2,100,000 books.

And even poetry, rushing over the low prose in other countries, has vast popularity in Russia. Official figures show that Pushkin and Demyan Bedny's verse at 7,000,000.

The yellow meal worm is a pest that is easily dealt with in winter time in Canada. With the meal or flour placed outside in a rat-proof container, the cold weather will kill all the pests in a night. If the temperature does not go below 20 degrees Fahrenheit, it is better, says the Dominion Entomologist, to leave the food out two days.

The South Atlantic ocean contains islands which cannot have used for years, but have never seen. They are in a perpetual fog.

THE TENDERFOOT

By GEORGE B. BOMBY

Author of "The Cowards Trail", "The Canyon Trail", Etc.

CHAPTER IV. Continued

Dustin swung ahead to face a gray little figure that stiffened at sight of him. Sam Peters had been cashier of the Bow Bank for more than thirty years. Honesty, devotion and efficiency by unbroken record had he ventured to extend his activities beyond Seen. He was like Kipling's Peacock that all his life tried to master courage to turn to the middle of the floor Peters mustered that courage once and Dustin caught him with a hand of five thousand dollars in his house. That loan saved Peters but "was, just as much to make him the benefactor of Sam Lantan

"Just a moment, Peters . . ." Dustin drew him aside "Those cards in your hand. Can't you draw that Ace over the bank? I've got to have."

"Impossible!" Peters quivered. He didn't own the bank at all. Mr. Dustin. He did own the bank but old man Ingram took it up. It is a note and bill transaction. Peters knew what to do with it. He'd lost a hell of money and needs cash.

"How much is the note for?"

"Well . . . Old Carr hasn't paid any interest on it for a year. It is about twelve thousand dollars right now. I'll tell you what I'll do—"

Dustin was already gone. Peters heard him call Ingram letter he got all hobbs over it past as soon as he can get to town in a hurry."

Dustin's heart gave a great jump. This was better than he dared hope. It looked hard at the little figure before him.

"I've got a five thousand dollar note in yours, Peters, he said "It is secured by the bank and both of you."

"Yes sir. That's me."

Dustin held on his throat seemed to choke the little gray father

"I . . . sir, I, I swear I don't see how I can fix it It's Mr Peters grain business I . . ."

More than ever did Sam Peters regret that occurred flyer in wheat that

wins to remove him and his old wife from any danger of poverty. He made one final struggle for escape.

"As matters stand, I don't see how it can help you to own a bill against the Hour-glass ranch," he said.

Half of it. Yours is plain fool Peters. I'll own the whole place Soda Springs and all," he added. Old man Carr owns the Hour-glass don't you know."

"He owns half of it," said Peters. That's all. When old man Peter Vinton died he left the Hour-glass half to Joe Carr his old partner and half to his sister's son-in-law Gerald Keene. When Carr wanted to borrow on his half of the place we had to back up the will. That's how I know. I saw the will. It says that if either Carr or Keene dies his half goes to the survivor."

"For the love of God!" Dustin was breathless . . . "Say that again."

Peters said it again and Dustin sure that he had not misunderstood took a go smoke-screen of profanity. It was not the jovial profanity of good-nature but the vitriolic overflow of one who feels he has been hurt by the failure of the extra of the injury. In one brief bake-oven moment the failure of his plans seemed sure if Gerald Keene, the nephew of old Peter Vinton, owned half the Hour-glass then he Sam Peters, even if he was needed in getting Carr was only getting a few months when he did not even know.

He asked old Peters God whirled him almost in the moonlight to face him. There was but one thing to be done. Too much depended on what old Kane knew! That miserable old derelict could send him to Spike to jail for a half a dozen years. Carr could keep him out of a sudden. The solution came on a sudden storm of all-consuming noise

"I've got to get a move on over your old wife's head to snatch you up for the rest of your days," he said "Carr has engaged I want to own the half-share of the Hour-glass. Get me."

Peters gazed helplessly at him.

"I mean what I say you old fool Where can I find this man Gerald Keene? The man who owns the other half of the Hour-glass."

"I don't know. Mr. Dustin I swear I don't. Nobody knows. Even his wife doesn't know Keene don't trust trying to find him through Mr. Burley of the Drovers Bank in Calo but he never got that far when handling Mr. Keene's business and that Mr. Keene was traveling somewhere and couldn't be reached just now."

Dustin grunted disbelief but he could do nothing at present. He had plenty of money in the bank and Peters knew it. There was no question of the validity of the check that Dustin wrote at the hotel desk and passed to the gray-faced little cashier who took it unsteadily. He pouched it, refused a cigar and headed for the bank feeling like a condemned criminal who has received notice of an unexpected reprieve.

"I'm sorry for old Carr," he muttered; "but I can't help it. I can't see Mame go to the Poorhouse and that's what'll happen if Dustin once out that note. Oh, hell! What's the use kickin'. But I wish I could put a spoke in Dustin's wheel . . ."

He saw Pegram at the bank who was only too glad to get rid of Carr's note for Dustin's check and he turned that over to Dustin who promptly headed back for the Broken Spur. He found Spike anxiously awaiting him and he was drawn into the office by a nod from his partner.

"What's the hunch, Sam?"

"The best in the world except for one thing. I found out that old Carr does not own all his property. He owns half of it. The other half belongs to one Gerald Keene, nephew of old Peter Vinton. If either Carr or Keene dies, the other gets the whole place."

"Well," said Spike who saw no further than the end of his nose.

"You call it well, do you? Damned if I do. I can't get at this man Keene. A few simple rules of health, form the unique Vicks Plan for Better Control of Colds The beginning of Vicks Plan in reducing the number, duration and dangers of colds has been clinically tested by practicing physicians. The Plan is fully explained in each Vicks package.)

Here, briefly is how Vicks Plan works

To Help Prevent Colds

Watch yourself and children after exposure to any condition apt to be followed by a cold; such as Contact with others having active colds—crowds, public places, stuffy ill-ventilated rooms sudden changes in temperature, wet or cold, or unaccustomed exposure- excesses in living which lower resistance, such as overeating, smoking, or drinking -after a hard day when you are overtired.

Then, if you have that stuffy, sneezy, irritation in the nasal passages where most colds start, use Vicks Va-tro-nol at once. Just a few drops up each nostril. Used in time, its medicated vapors are inhaled with every breath direct to the inflamed membranes. This combined double action through the night loosens phlegm, soothes irritated membranes eases difficult breathing helps break congestion

During the day any time any place use Vicks Va-tro-nol every few hours as needed. This gives you full 24-hour treatment without the risks of constant internal dosing, which often upsets the digestion—especially of children.

Tried Package Free

Your druggist has free combination packages containing trial sizes of Va-tro-nol and Vap-Rub also folder telling how these two aids to fewer and shorter colds are used in Vicks Plan for Better Control of Colds. Ask for yours today, as your druggist's supply is limited

Great RADIO INVENTION for UNWIRED HOMES!

- A marvelous new source of radio power—brings a new type of radio—with the quality of the finest electric set you have ever heard—and electric set convenience!

AIR-CELL RADIOS

- Are built to operate with the new EVEREADY Air-Cell "A" Battery, an amazing electrical unit that re-energizes itself for at least 1000 hours—which, at 3 hours a day is almost a year's service in the average household.

NO MORE RECHARGING

- You have no more battery recharging. Every program comes through clear as a bell for the entire life of the Air-Cell Battery.

But don't confuse the new Air-Cell Radios with ordinary battery-powered sets. They are as unlike the old sets as anything can possibly be. They are new in perfect reception—new in easy operation—new in low upkeep cost.

Air-Cell Radios are now being built by all radio manufacturers—designed specially for the EVEREADY Air-Cell "A" Batteries. Ask any dealer for a demonstration—your interest will be well repaid.

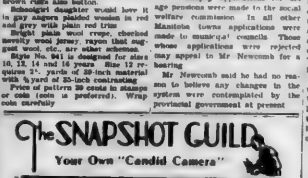
The SNAPSHOT GUILD

Your Own "Candid Camera"



A "candid camera" snapshot, made with the maximum atmosphere of an unposed picture.

Some suggestions and newspapers making a great to-do about "candid camera" snapshots, and the fact that they portray the great and near-great in unposed, natural attitudes.

Many "candid camera" shots have been made at banquets, receptions, conferences and other such affairs where the subject is unaware of the presence of a camera.

Naturally such pictures have a lot of human interest, because the people they really are eating, talking, worrying.

Actually candid snapshots are usually made with very small cameras, which can be concealed in the hand or under the coat. Such cameras do not require bulbs, although they can be handled so carefully that they can be used indoors.

But you don't need any such camera to make your own candid camera shots. Any camera will do, provided it is held so that small objects will not be noticed. Most cameras have a lens of f.8 or faster—but you will find that a little practice in placing where the light is better.

Your camera should be in the hands of Dan or Dorothy or Harold or Mother or Father, or Uncle or Aunt, or some other member of the family "candid camera" snapshots.

What a local farmer says about Elephant Brand Fertilizer

November 2nd, 1934

The Fort Hardware Company,
Fort Saskatchewan, Alberta.
Agents for Consolidated Mining and Smelting Co.

Dear Sirs:-

I have used Elephant Brand Fertilizer for the past two years and have noticed the following points in favour of it's use:-

(1) Grain matures at least one week earlier.

(2) Weeds between drill rows are checked considerably where land is clean when fertilizer is sown.

(3) As I did not use a check strip to ascertain any increased yields I cannot say definitely the number of bushels increased instead but I do know that there was a considerable difference and would not be surprised but what the use of fertilizer would increase the yields in many cases as high as 10 bus. per acre.

(4) This year I was late getting my crop in on account of the excess moisture and weed growth. I sowed my wheat on May 18th, plus two weeks later than the most of the wheat sown in this district. In spite of the frost on the 26th of August it yielded 41 bus. per acre at 60 pounds and 52 bus. per acre on 7 acres and graded No. 5. This wheat would have yielded well over 50 bus. per acre had it escaped the early frost.

(5) In 1933 I also used Ammophos Phosphate on Rosthern and was well satisfied with the results obtained.

(6) I am satisfied that it has paid me to use Fertilizer the past two years and I intend to continue the use of it on Wheat and Barley this coming year.

Yours truly,
Gordon Pengelly,
Fort Saskatchewan.

Farmers intending to use Fertilizer next spring should order before Nov. 25th at a saving in cost. Farmers will be interested to know that there is a new attachment out which sells for $25.00 for a 20 run Drill. See your local dealer The Fort Hardware Co.

Fort School Board Holds Monthly Meeting

A regular meeting of the Fort Saskatchewan School Board was held in the Council Chambers on Monday the 5th November at 8 p.m. Present Mr F. Atkinson, Chairman, and Trustees Dr. Calhoun, Dr. Turner and Mr. R. M. Barr.

The minutes of the last meeting held were read and adopted.

From reports received the Board decided that the Medical Health Officer should be requested to make a medical inspection of the school on Tuesday the 6th. inst.

Mr. Anderson the Principal was present and submitted attendance and other reports.

The following accounts were passed for payment:- The Alberta Pacific Grain Co., Ltd., car of coal $1282.60; The Record, $6.90; J. Crampe for ladder $10.00; A. M. Carmendale [illegible]

Girls Club To Supply Milk To School Children

The November meeting of the A. A. A. was held at the home of Miss Gwyneth Roberts in Edmonton on Nov. 6th.

It was voted to donate $10 to the local Red Cross, since the Hallowe'en dance had been a financial success, and to purchase milk for the school children for four months this year, starting December first.

It was decided to hold the Club meetings the first Tuesday of December and the second Tuesday of every month thereafter. The December meeting is to be held at the home of Miss Margaret Robertson.

After the business meeting, some time was spent at cards and a dainty lunch was served by the hostess.

Liberals in the Fort District Hold Meeting Tuesday

The Fort Saskatchewan Liberal Ass. held an organization meeting in the Empress Theatre on Tuesday evening. On account of various activities and the Veterans Banquet in progress at the time of this meeting, the crowd was small, although the absence of a large crowd was made up by warm enthusiasm.

The following were elected to carry the burden of the Liberal Local for the next term, President, J. P. Wiebe, Vice-Pres., Dr. C. H. Grauert, Sec.-Treas. F. A. Sherman. The executive will be chosen by the presidents.

Mr. Otto Noack, President of the district Liberal Association was present and gave an interesting talk on organization work. Mr. William Roe of Edmonton also spoke briefly on the Educational question and Mr. E. C. Stavely Kerr, K.C., and Dr. Hope of Edmonton outlined the Liberal platform.

Preparations are under way for lining up delegates and arranging for the place and date at which the Liberal Convention of the Clover Bar constituency will be held.

Several cars of supporters from Bruderheim and out-lying districts were present, thus being evident of the keen interest taken in the political situation of the Province.

An addition to the Methodist church is under construction

Rural mail boxes have arrived and are being put in their respective places this week.

G. H. Rix sold 614 eggs from his flock of hen during October.

A. M. Sutherland, Dr. Bacon, Philip Thomas, W. Simmons and J. Jackson each secured a moose on their recent hunt.

Re-Union of Khaki Clad Veterans

Ex-servicemen of Fort Saskatchewan and District, augmented by a number of their old dugout comrades from the Redwater District held a muster parade in the Fort Hotel on Tuesday evening to celebrate the signing of the Armistice. Almost every branch of the defensive army of the Empire was re-presented at the re-union. There were men who had marched across the veldt of South Africa with Roberts on his march to Pretoria, there were those who served for Kitchener during the Boer War, following these were those who represented the Empire, and the Fort Saskatchewan District in particular in the Great War from Mons 1914 to Mons 1918. Among these present was an old South African veteran who went with a squadron of Cavalry composed of R.N.W.M.P. and Western Cowboys. This vet, by the way, took his horse with him from Fort Saskatchewan to South Africa

Cook-house door was sounded and the boys then sat down to a very substantial repast. During the dinner old yarns were swapped which brought back memories and incidents of the days when real comradeship was practiced in word as well as in deed. Following the dinner, canteen sergeant was indulged in with wartime initiative and marching songs predominating. One old vet. caused much mirth when he related his feelings of how he felt, when in the attack on the Canal du Nord in the last big push of the war, he was forced to jump into the Canal on a nice cold September morn, and that with hilt, no more, no less. Oh, boy! what a life.

The oldest soldier in the District, W. G. Shera, sent his regrets for not being able to attend on account of a very bad cold. Mickey got his baptism of fire whilst serving with the Little Black Devils in the Red Rebellion.

Before singing the national anthem the boys expressed the conviction that this was the best muster parade yet.

The boys were also appreciative of the manner in which "Quartermaster" Pettet had assisted in making the event a success.

The following answered the roll call:

S. M. Hanlan, 8th Batt. Little Black Devils.
Richard Todd, R.N.C.V.R.
C. Mayer, 51st Batt.
E. Hallam, 1st Sask. Batt.
A. C. Ashton, 8th Batt. Little Black Devils.
F. H. Walton, 8th Batt. Little Black Devils.
J. W. Lewis, 8th Batt. Royal Welsh Fusiliers.
G. J. Dawson, 10th Batt.
T. Dey, 9th Batt.
Rich. Edwards, 79th Batt.
J. S. Wright 2nd Batt. South Lancashire Regt.
W. E. Griffee, 6th Can. Field Ambulance.
Tom Wall, Kitchener's Field Scouts, South Africa.
T. Chenton, 6th Batt. Had Fourth.
D. Roberts, 6th Batt. Had Fourth.
M. A. Roberts, 56th Batt.
J. Dewar, 12th Batt. Royal Highlanders of Canada.
W. Gunn, Howitzer Battery.
Chas. Fisher, 39th Batt.
Alex. Adamson, 151st Batt.
Wm. McAdie, 107 Batt.
H. D. Booth, 60th Battery.
F. G. Stuchey, 151st Batt.
Hugh Stewart, 1st Aux. Transport.
W. G. Honeybourne, 47th Batt.
D. Gunn, 44th Batt.
S. Dennis, 21st Batt.
L. Diamond, 1st Mach.-Gun Batt.
L. D. von Iffland, 151st Batt.
A. B. Davies, 60th Batt.
H. J. Brunton, 60th Batt.
A. B. Hopper, 194th Batt.
C. C. Simmons, 44th Batt.
*A. H. J. Wooston, 37th Batt.
C. R. W. Mugan, 9th Field Co. C.E.

SUPPORT THE ADVERTISERS

JOSEPHBURG NEWS

Mr. Lachkevich, M.P., and the Hon. N. R. Gerlitzki, minister of Agriculture will speak at the Josephburg school on Wednesday, November 21st, at 8 p.m.

GOOD HOPE NEWS

Mrs. Dave Cranston entertained Thursday, November 8th at a miscellaneous shower in honor of Mrs. Raymond Miller, formerly Miss Mamie Whitson. The room was decorated in green and white and gifts were presented by little Kathleen Hillman and Bessie Moyer dressed very becoming as bride and groom.

An interesting time was spent when tea-cups were read by Mrs Watson, Mrs Dunn and Mrs Hawkes of Edmonton

Dainty refreshments were served by the Misses Evelyn and Marion Cranston, Miss Moyer and Miss Pool

The guests were Mrs. A Moyer, Mrs Cooke, Mrs. Seymour, Mrs Berguson, Mrs. Moffat, Mrs. C. Thomas, Mrs. G. Cranston, Mrs. Cluney, Mrs. G. Moyer, Mrs. D. Whitson, Mrs. Millar, Mrs. T. Johnston, Mrs. E. Ashton Misses Lucy Cranston, Vera Johnston, Velma and Hilda Moyer

Duncan Cranston will spend the winter at Fort St. John, and will visit the Pouzny's.

HOCKEY MEETING

The Fort Senior Hockey Club will hold their annual meeting on Thursday, November 22nd, at 7 p.m. sharp in the Town Hall (downstairs).

All members of last years' team as well as all other players seeking a tryout this year and interested citizens are asked to attend.

Fort Band Gives Successful And Enjoyable Affair

The Benefit dance put on by the Fort Band in the Badminton Hall on Friday evening was a very enjoyable affair. There was an excellent crowd and the music was supplied by the Band orchestra which has recently been organized.

The dance program consisted of Old-Time and Modern dances, which were enjoyed by all.

Tasty refreshments were served by the members of the band, and the Club will clear about sixty dollars.

The Fort Band wishes to thank, the ladies who so kindly donated refreshments for the dance, the Fort Badminton Club, Mr. J. D. McLean and all others who helped make the dance a successful affair.

COMING EVENTS

The regular monthly meeting of the United Church W.M.S. will be held at the home of Mrs. E. A. Wilmeroth on Tuesday afternoon, Nov. 20th, at 2 p.m.

The Catholic Altar Society Ladies will hold a Sale of Home Cooking and Tea on Thursday afternoon, Nov. 29, in the Memorial Hall from 3 till 6 o'clock, to be followed by a Bridge, Whist Drive and Concert at 8 p.m. Door prize. Admission 25 cents.

The Better Way

A news item containing only a few lines appeared recently in one of Western Canada's daily papers. It was not featured in big type nor with dogging headings as are accounts of accidents, strikes, meetings of protest and relief quest etc. but it nevertheless recorded an event of real importance to the community concerned which might well be accepted and acted upon by other communities all over the country.

In order to provide a measure of relief assistance to people in need of it, the local authorities decided that, instead of continuing with a policy of giving direct relief to the exclusion of any and all other forms of assistance, they would provide a measure of work, and the town in which this occurred were in new made recorded the results, which, briefly, were

One hundred miles of rural telephone lines badly in need of repair were reconstructed, the old poles cut off and re-set, ten rural systems were reconnected to the old wires and numbering them saved were utilized to repair the lines on the seven systems, between 70 and 80 men employed on the community were each given fifteen days work, and the only cash outlay for new materials was $4.25.

Several highly important things were thus accomplished. First and foremost these men instead of being placed deeper in debt, as they would have been if merely handed direct relief, were given remunerative work which enabled them to discharge some of their past indebtedness. Secondly, the rural telephone systems which serve their own community were re-established for the benefit of the people there and these systems likewise were again placed in a position as feeders to the long distance Government system. Thirdly, all the money expended, except $4.25, went to the people of the district who most badly needed it, and no additional capital debt was placed on the rural telephone company, while the reduction of ten systems to seven should make for efficiency and less cost in operation.

It would appear to be gain to the people all round, in work provided, in past debts or taxes reduced or restored and improved telephone service for the community and the probability of larger future revenues for the Government long distance system. It was worthwhile, constructive work without the imposition of any additional burdens of debt.

Attention is called to this incident for one reason, and one reason only and that is to suggest to readers of this column, and in particular to those occupying some position of authority in their particular community that they take a look around their own districts and see if there is not some kind of useful community work in which their own people in need of assistance could be employed to their benefit and to the benefit of the community as a whole.

There are other rural telephone lines in Western Canada badly in need of repair and rehabilitation; there are local roads that call for improvement; there are school buildings that require attention and repairs, there are other buildings, large and small, that have been neglected because of lack of funds. Why make a survey of the community and then organize the people to attend to all such matters, giving those in need of assistance an opportunity to work at burdensome arrears of taxes or earn a few dollars instead of relying solely upon the distribution of direct relief.

By the one method municipalities are placed in a stronger position financially because their tax arrearages are reduced; by the other both municipalities and its residents are placed deeper in debt. Furthermore, by the one method the community as a whole is bettered and improved and its nervous and institutions efficiently maintained, and the morale of its people strengthened; by the other neither the municipality nor its residents have anything to show for their added liabilities but the fact that they maintained their existence, leaving to the future the ultimate discharge of those liabilities.

What one community has done for its own advancement and the welfare of its people, many other communities can do, if they will. It requires thought, study, planning and organization, and it will be worth the time and the concentration of people through the distribution of direct relief is, no doubt, an easier way, for the time being. But sooner or later the blindest must be served, and paid off, and the longer the grappling with it is delayed the larger, heavier, and more difficult the burden becomes. Why not tackle it now in a forward-looking, constructive way?

One method, it may be said in conclusion, inspires new hope and confidence, with one good example encouraging another, whereas the idleness method leads to deeper discouragement and a further loss of that self-reliance and determination to provide self-help which is essential to the maintenance and further progress of any people and of all communities.

Discoveries Make Discovery At Base Of Mountain In Valencia

An entire prehistoric Iberian city has been discovered at the base of the mountain of San Miguel in Valencia, the Excavation Commission there announces. Further discoveries are expected. Among the remains, for which great value is attached, are ancient vessels, on one of which are painted soldiers on foot and on horseback. A complete Iberian alphabet has also been found.

KRUSCHEN Strikes at the Usual Cause of FAT

Try Kruschen at Our Expense

If stout, unhealthy fat is bothering you, take advantage of this offer to try Kruschen at positively no expense. Your druggist has a limited number of the Kruschen Laxo Package now in stock. This is the Regular bottle together with a separate TRIAL bottle of Kruschen Salts. Take the Salts first. Kruschen combines wonderful power from six ingredients—daily, if you follow the instructions. It is the only fat that attacks the usual cause of fat but at most of half the human ills. Internal constipation. If you have no room for Kruschen will not cause you to lose a pound. Kruschen is only a few cents a day to use and it makes you feel like a million dollars! Get your Kruschen Package today. If you are not quite convinced after using the Free Trial Bottle, your druggist will cheerfully refund your money when you return the Regular package unopened.

The old English pound was originally the weight of 7,680 grains of wheat "taken from the middle of the ear and well dried."

Dr. Wernet's Powder For FALSE TEETH

A Joy To All Users

Can't Slip or Slide

Sprinkle on Dr. Wernet's Powder and have no fear that your false teeth will slip or slide. Keeps them tight all day long. Anyone can use it. Not necessary to make a paste. Tasteless, odorless. Gives a feeling of comfort and security. Prevents that offensive breath caused by ill-fitting plates. Sold by druggists everywhere. Large economical size. Money back if not satisfied. Ask druggist.

An aeroplane would have to travel 700 miles an hour to keep up with sound.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

—No Calomel needed

When you feel blue, constipated, sour on the world, that's your liver which, by a peculiar process, should pour two pints of liquid bile into your bowels daily. If this bile is not flowing freely and you want quick, joyful relief, get from your druggist a 50c bottle of Dr. Chase's Liver Bile. Dr. Chase's Liver Bile has been used for over 35 years. Ask for them by name. Refuse substitutes. Sold by all druggists.

The inventor of a salt cellar that will always have salt in it will supply a long-felt want.

Empire Air Routes

Sir Philip Sassoon Says Flying Time Must Be Speeded Up

Flying times on the long-distance Empire air routes must be progressively and drastically reduced, declared Sir Philip Sassoon, British undersecretary for air, on his return from a tour as far as Singapore, longest air line ever undertaken by a government official.

The air ministry, the post office and Imperial Airways had resolved the conclusion schedules must be speeded up, said Sir Philip. Measures particularly must be taken for development of the air mail service, he added, with extension of night flying. Sir Philip, an aviation enthusiast, said he had often landed at night-times and he considered commercial night-flying was a practical proposition.

Work Among Treaty Indians

Canada Has Been Faithful to Her Pledges Regarding the 113,000 Treaty Indians in the Country According to Herbert N. Awrey, Department of Indian Affairs, Who Addressed the Rotary Club in Ottawa

Mr. Awrey who is known to the Indians of Northern Ontario as "Bauma Ogema," or "Big Mouth Man" described his adventures as an Indian Commissioner dispatched to treat the Indians the money guaranteed to them by treaty with the government.

Pointing out that civilization had been ushered with the Indians since Confederation Mr. Awrey remarked that in 1933, $4,000,000 had been expended on these people. Interest from funds held in trust for them by the Dominion and $234,000 in annuities.

Tracts of land had been wisely set aside at the outset for the Indians where they could live in communities and now there are over 200 of these communities. Canada Money found on timber sold was held in trust by Canada and the fund now totalled $12,000,000. Interest from this amount goes to the Indians. Provision for education is also generous.

R. J. C. Stead thanked the speaker and expressed the view that other government employees should realize the work they carry out with such integrity and regard for the public interest.

Girl Proved Innocent

Truth Stranger Than Fiction In Chinese Murder Story

Stranger than fiction is the story concerning the release from prison of a 20-year-old Chinese girl in Tientsin who was serving sentence on the charge of murdering her brother-in-law. She was released after four years imprisonment and was tried to re-enact the crime as she had been accused of poisoning her relative, with soup. She did, and it was noticed that several drops of what seemed water dropped into one bowl when the soups reached the willing investigation revealed a large, venomous snake occupying a swallow's nest, and that venom dripped from his jaws into the soup when the hot steam reached his hiding place. The girl is once more free.

Ear Damages Microphone

An electric eel, making its first public appearance, knocked the telephone out of commission with dynamic personality." The radio staff, in the course of a broadcast from the St. Louis zoo, sought to demonstrate the peculiar weapons of the eel that emits electricity. One announcer dangled his fingers in the aquarium and joined hands with a second, who touched the microphone. The set turned loose its voltage and the microphone went dead.

Thirty per cent. more grain has been shipped from Vancouver this season than last.

It's the Old Rolled Story

Oldest Firm In World

Stora Kopparberg's Bergslags Aktiebolags, of Stockholm, Sweden, which has been found to be the oldest trading concern in the world is still actively in business and keeping up with the changing world. It has been operating since the twelfth century and has documents over 700 years old.

Shakespeare used 24,000 words in his complete works, a remarkable vocabulary in his day.

Here's Way Science Now Relieves Pain in Minutes

BAD HEADACHES, NEURITIS AND RHEUMATIC PAINS QUIET ALMOST AT ONCE

Remember the pictures below when you want fast relief from pain. Aspirin eases even a bad headache or neuralgia often in a few minutes!

An Aspirin tablet helps "get a hold" of your pain practically as soon as you swallow it. And Aspirin is safe. For Aspirin does not harm the heart.

Remember these two points: Aspirin Saves! and Aspirin Safety. Be sure that you get ASPIRIN, the purchased doctors prescribe. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet. Get tin of 12 tablets or economical bottle of 24 or 100 tablets.

Why Aspirin Works So Fast

Drop an Aspirin tablet in a glass of water and watch it disintegrate. It quickly reaches the bottom in a distinct grating.

What happens in tests proves why Aspirin relieves pain so fast. Aspirin starts "taking hold" of pain a few minutes after taking.

Drop an Aspirin tablet in a glass of water and watch it disintegrate. It quickly reaches the bottom in a distinct grating.

IN A MINUTE OR TWO

An Aspirin tablet starts to disintegrate and go to work.

When in Pain Remember These Pictures

LOCAL NEWS

Shutting on the river near the Island has been enjoyed by a large number of the young folks over the last week-end.

Incidentally this brings thoughts regarding hockey and curling activities for the coming season. Re organization meeting of these two winter sports will be held next Mon day evening.

After the first real fall of snow, work will be started on the Fort's celebrated bob-sled hill. This thrilling sport drew hundreds from far and near last winter, and will no doubt be well patronized this season.

At a meeting of a Community League in Edmonton recently it was decided to investigate the possibility of making a 500 foot bob-sled ride in that city.

This is one time when the country town puts one ahead of the big city.

Fred Henderson, internationally known British economist and author will lecture in the Empire theatre on Monday, Nov. 19th. The subject of Mr. Henderson's public lecture will be "Money Power", which is also the title of one of his best known books.

The Observer

It would be interesting to inquire into the relative advantages of spreading the gravel on the highway by motor truck on the one hand, and by wagon and team on the other. The general opinion seems to be that the work can be done more cheaply by motor truck, and probably that is right. That is to say, for each dollar spent in doing the work by motor truck more gravel is spread than if the work were done by wagon and team. But one questions whether that is the whole answer or even the most important part of it. Where does the money go? In the one case it goes to the oil companies for gas and oil, to the truck manufacturers for the trucks, to the makers of tires and other accessories and to the drivers' wages. In the other case it goes to the makers of wagons, to the breeders of horses, to the blacksmiths for repairs and to the men for their wages. I venture the opinion that in the first case not more than twenty cents out of each dollar goes into wages and the balance finds its way indirectly but surely to advance interests in which we have no direct concern; and that in the second case as much as eighty cents out of each dollar goes in to wages, horses and labor (directly or indirectly in our own citizens) and not more than twenty cents to interests in which we have no direct concern. If this is even measurably close to the truth there can be no doubt we ought to be doing this work by team and wagon. An exact analysis of the facts should be very interesting.

Remembrance Day

Residents of the Town and District were out in force on Sunday last to pay homage to those boys of the district, who fell in battle in their Country's Call in 1914, fell asleep in the poppy fields of Flanders.

Armistice Day was first time that Remembrance Day fell on a Sunday since the day was declared a National Day of Remembrance by Act of Parliament. The combined with the propitious weather was no doubt responsible for the excellent turnout.

The ex-servicemen paraded in front of the Memorial Hall and marched over to the Memorial plot, followed by the Brownies, Girl Guides, Cubs and Boy Scouts, where Pre-sident Wooman of the Legion deposited a wreath in mem-ory of their fallen comrades. M. S. Hennig, M.L.A., performed the duty of depositing a wreath on behalf of the Provincial Government.

With the first toll of the bell hats were doffed and heads bowed to observe the two minutes of silent tribute to the glorious dead. After the silence had been observed Corporal Andrews sounded the last post, this was followed by a short prayer offered by the Rev. Capt. Robt. Pearson of Edmonton. The parade then moved off to the United Church where Capt. Pearson again officiated.

A Scotchman had been arrested for inebriety, and had an unusual excuse in court next day.

"I wasna' drunk, sir," he said earnestly. "I fond masself outside a church, and knowin' my unworthiness to gang inside, I knelt doon on the steps and said a wee prayer."

"I see; you were really holding a little sermon of your own?" asked the magistrate.

"Yes, that was it, sir."

"Well, we'll now take up the collection. Two dollars, please."

...Helps to AVOID MANY COLDS altogether

VICKS VA-TRO-NOL

...New Formula BY MAKERS OF VICKS VAPORUB Remarkably Successful

Quick! At that first nasal irritation, sniffle or sneeze—just a few drops of Vicks Va-tro-nol. It stimulates the functions provided by Nature—in the nose—to prevent colds, and to throw off colds in their early stages. Used as tonic, Va-tro-nol helps you avoid many colds entirely.

Where irritation has led to a clogged-up nose (a usually head cold or nasal catarrh) Va-tro-nol penetrates deep into the nasal passages, reduces swollen membranes, clears away clogging mucus—brings comforting relief.

VICKS PLAN CONTROL OF COLDS

Gun Muzzle Light Rays

Two inventors in France claim to have perfected a gun which will shoot "light rays" capable of paralyzing an entire army bringing down his aeroplane. They say the rays can be generated to any intensity.

Why at 40 You Think You're "GROWING OLD"

It's Frequently Just an "Idea." Not Age. And Something to Remember, Else Is Becoming No More Alarming Than A Touch Of Acid Stomach.

At about 40, many people think they're "growing old." They're tired a lot. Have headaches. Stomach upsets. Dizziness. Nausea.

Well, eventually say the cause, in a great many cases, is merely an acid condition of the stomach. The thing to do is simply to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, all you do is take Phillips of Magnesia after meals and before going to bed.

Try this. You'll feel like another person! Take either the familiar liquid "PHILLIPS"—or the convenient new Phillips' tablets of Magnesia Tablets. Modern Forms.

Also in Tablet Forms

Phillips' Milk of Magnesia Tablets are now on sale at all drug counters. Each tablet is equivalent in the neutralizing power of a teaspoonful of Liquid Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

Relieved/

Mrs. Edward James' baby had two teeth when less than three months old. She writes: "He has 10 now and I can truthfully say that giving him Baby's Own Tablets keeps him splendid. He is never ill in bed except when teething is a useless feminine idea for babies but the little one can always be soothed and the fever reduced by giving sweet, safe Baby's Own Tablets. Very easy to take, no other efforts. Print 25c everywhere.

Little Journeys in Science

THE SECRET OF THE FIREFLY

By Gordon H. Grant, M.A.

Light is produced in numerous living creatures such as the firefly, the glow worm and certain varieties of mould and fish. This light is accompanied by very little heat and hence is called cold light. The search for luminous illumination is a fascinating one because cold light is more efficient than electric light if the scientist can discover enough why the secret of the firefly he will be able to produce light much cheaper than warm light. At the present time the consumer of electricity for the production of light pays not only for the light, but also for the heat which is always given off along with the light.

The bodies of animals have a marvelous mechanism for the changing of foods into heat and energy which comes into light and electricity. A steady combustion takes place within the body of an animal during its entire lifetime and it is only when the heat is regulated so that it is quite independent of cold. The firefly can flash its light, and electric fish can generate sufficient electricity to run a door-bell.

There are a great many light-producing organisms. Scientists have found that there are at least 46 orders of animals which contain one or more light-producing forms and that there are two groups of plants namely fungi and bacteria which are luminescent. Fireflies glow at regular intervals, millipedes, centipedes and squid are all light producing organisms. It has been observed that when the eggs of some mammals are immature. Light producing elements at never found even in fresh water fish all live in the sea or on land. Most of the luminous animals are small. Found many feet below the surface.

The glow of damp wood is known as foxfire, is due to fungi. A few other plants in which moss and spiders belong. The phosphorescence of dead meat or fish is caused by bacteria. It has been only in recent times that scientists have perfected the microscope that the phosphorescence of the sea, the shining of damp wood and that of dead fish and meat have been shown to be due to different forms of living organisms

Cultivation Of Seaweed

How to scientifically cultivate seaweed may be studied by Philippine government authorities. Seaweed for edible algae abound in the coastal regions of the archipelago and are used in preparing salads, soup and pickles. The Food and Game Administration has been directed to collect data regarding the extent of the present seaweed industry.

NOVEMBER 13

THE CHRISTIAN AS CHURCH SALT

Golden text: "We are members of his body." Ephesians 5:30.

Matthew 5:13-16; Acts 2:41-47.

Devotional reading: Ephesians 5: 14-21.

Explanation And Comments

Considerations of Christians, Mt. 5:13-16. In our First Quarter we had Matthew's account the Sermon on the Mount the first one being the twelve verses recorded in Matthew's Gospel our text for to-day. They began, you will recall, with the statement that seeing the multitudes, Jesus went up into the mountain, and when he had sat down his disciples came unto him and he opened his mouth and taught them, saying. The Beatitudes followed. Verses 13-16 our text for to-day, give Jesus' succeeding words which emphasize the influence and responsibility of disciples.

"Ye are the salt of the earth," Jesus declared. Salt was used in ancient times by Jews, Greeks and Romans, and was an emblem of purity and of the influence of a holy life upon others. Salt preserves from corruption Jesus was comparing his disciples by his statement that it was their duty to keep others from moral corruption. There was an old Roman proverb to the effect that "nothing does more good than sensible and salt."

"But," continued Jesus, "if the salt have lost its savor, wherewith shall it be salted?" They must beware lest they lose their Christian character and become as useless in the Kingdom as salt that has become good for nothing and is cast out upon the ground and trodden under foot of men. This was no mere figure of speech.

Another figure Jesus gave to stress the personal duty that his disciples should render "Ye are the light of the world." They were conspicuous witnesses for him, comparable to a city which could not be hid, for it was built upon a hill. A bed often been suggested that from the Horns of Hattin, where the Sermon on the Mount has been localized, Jesus may have pointed as he spoke to Safed, a conspicuous hilltop city.

Ye are the light of the world from whom men receive your light. And as Phillips Brooks reminds us, the sun must stand in the sunlight to bear witness to the sun.

Mixed On The Widows

Strange regulations covering divorces and marriages have been issued by the Serb-Greek-Oriental Church through its synods. The most stringent of the regulations forbids widows to remarry until 10 years after the husband's death. A widower, on the other hand, must wait only 40 days before remarrying.

Australia has exported more than 70,000,000 bushels of wheat this year.

TELL YOU HOW TO ROAST MEAT BETTER

—and no pan-scraping afterwards

Line your roasting pan with Canapar Cookery Parchment. The fats and juices won't burn. The meat is more succulent—and you save yourself all the bother of scraping or scouring the pan afterwards.

You can cook three vegetables at once in the same pot—when you place each in a bag of Canapar. No odors escape. All the goodness is sealed in. Use only ONE burner and turn that down low. Save fuel! Boiled or steamed fish is better, and less work, cooked in Canapar.

Just rinse the sheet of Canapar and use it over and over again. It won't absorb odors. Many women use it for a dish cloth. It's just like silk when wet—is very tough and does not shed lint.

BRITAIN PLANS TO PROVIDE MORE WORK FOR IDLE

London The "permanent" and unavoidable surplus of unemployed in Scotland should not be more than 60 000 and in South Wales 29,000, declares the reports of special commissioners who have completed an investigation for the government of the more seriously depressed areas.

The reports cover Scotland, Durham and the Tyneside, Cumberland, South Wales and Monmouthshire. They recommend improvement of existing industries of those areas, introduction of new industries, transfer of surplus unemployed to other parts, training of juveniles and schemes of land settlement and afforestation.

The etrgatic advantages from the defence viewpoint of the West Cumberland and Clydeside areas are cited in connection with proposals for the establishment of government factories there.

Related schemes generally are discounted as merely palliative, but the reports suggest the government be prepared to hand out subsidies covering the first two years' wages of unemployed absorbed by any permanent plan to provide a remote factory.

Preparation of a government scheme for making the above-mentioned areas will be spurred by the reports and it is expected that legislation may be introduced early in the winter session, opening at the end of the month.

Farmers Battle Police

Fourteen Pickerers Are In Jail As Result Of Skirmish

Mundare Alta Fourteen members were in jail, one man suffering from a de p gash over an eye and several others nursing bruises caused by police clubs in the hands of R.C.M.P. officers in a battle to round up grain strike pickers here The men are held without bail.

The battle started when John Lomah, anti-striker, stepped here with a wagon load of wheat and cut the side of R.C.M.P. Constable Pearlmen. Constable Pearlmen drove with him toward an elevator and 20 pickeers advanced, spilled the wagon and caused Pearlmon to land on his head.

Reinforcements from the Vegreville detachment of the R.C.M.P. under Inspector Brett rushed the pickeers, and with clubs and drawn pistols routed in when the men refused to submit.

Steve Hawbo received a gash over the left eye in the battle and several others were bruised about the head. Finally, 14 were herded together and marsh to the town cell. Only one R.C.M.P. man was hit by a picketer, it was announced.

Nine of the picketers were taken to the Fort Saskatchewan provincial jail, and a camera held by one of the picketers which recorded phases of the battle was confiscated.

The grain strike is based on protests of certain groups of farmers who are protesting against what they claim is unfair grading at the elevators. Mundare is a settlement of Central Europeans and is about 35 miles east of Edmonton.

Convicts Escape From French Penal Colonies

Sailored Many Floridians In Stunned-Men Trip To Safety

Aruba, Dutch West Indies Ten escaped convicts from three French penal colonies off French Guiana reached Aruba to tell an incredible tale of hardships suffered during their escape

The men, headed by Jean Duvet say, made the perilous ocean crossing despite the fact there was not one sailor in the lot.

For three of their 32 days until the roaring Caribbean sea they were without food and for five days no water passed their parched lips. Twice their frail boats were wrecked and many times they were near death.

Favor Independence

Dublin. A majority of the Irish people are prepared to vote for complete independence of their country, Thomas Walsh, president of the Irish Free State, declared in an election address at Limerick.

Conference Head Continues

London. Great Britain and the United Sates agreed again that tripartite naval conventions must continue until an agreement is reached but insisted any concessions must come from Japan.

Wishing Request From League

Premier In Prepared To Send Troops If To Save

Paris Foreign Minister Pierre Laval told Roland Koester, German ambassador to France, that Fraser stands ready to send troops into the Saar Basin if the League of Nations so requests

He denied, however that special military improvements already have been ordered.

The ambassador replied Germany had no intention whatever of disregarding conditions fixed by treaty in order to assure free voting in the Saar.

Salzburg, Austria. —A member of the Austrian Nazi legion appearing before a court here on high treason charg e told how plans the legion had been prepared in Germany for "action in the Saar."

Interesting Ceremony

Duke Of Kent Is Presented To The House Of Lords

London Centuries rolled back as the Duke of Kent, youngest son of the king, was presented to the house of lords.

Members of the workaday house of commons left their precincts to crowd their gallery in the house of peers. The deputy earl marshal and other dignitaries led the procession immediately followed by the Duke of York, the Duke of Kent and lastly the Prince of Wales. The clerk read the letters patent creating Prince George the Earl of St. Andrew's and Baron of Kildi.

Interested in Butter Plans

Many Inquiries At Ottawa In Connection With Marketing Control

Ottawa. The butter schemes proposed by the National Dairy Council and now under consideration of the Dominion marketing board in the subject of innumerable inquiries from all sections of Canada, it is learned.

The scheme, it is believed, has not been before the board, as yet, in a serious way. The absence from Ottawa of important members of the board has made it impossible to deal with the butter question and important developments are not expected for a few days.

For Western Bank

Edmonton. Formation of a central bank for the four western provinces was advocated in a resolution passed by an economic conference of Edmonton Liberals here.

Boy Be Important Find

Tar Sand Has Been Struck Near Hudson Bay Junction

Regina Samples of tar sand discovered in boring operations in Hudson Bay Junction vicinity have been received by company officials here

Companies in joint drilling operations there are the Trail Blazer Company and the Standard Oil and Gas Company, of Ottawa. The tar sand was struck at 300 feet and the drill continued another 20 feet still in the tar sand.

Operations were forced to stop owing to the tar sands backing up in the drill casing. As a result work has ceased until further casings can be obtained. The drill before it hit the tar sands went through from three feet of limestone under the top soil, 60 feet of gypsum stronghed with lime, a small sand strata and then the tar sands.

The geology of the under-surface is reported to be favorable for the discovery of oil, according to Mr. Grant. Samples have been brought to Regina and they show a high quality product, but as far only will be completed in time for the celebration of the Jubilee of the Coronation of the King n at spring

Winston Churchill, one of Britain's most famous political leaders who never from politics in the cause to make a film record of the last 25 years at British Instory. The record will be completed in time for the celebration of the Jubilee of the Coronation of the King n at spring

Coast Mayoralty Fight

Interest Aroused In Elections At Vancouver To Be Held In December

Vancouver The Capital Union has a most colorful political personalities as aggressive critics of civic administration and a more youthful campaigner whose plans for national monetary reform created Dominion wide interest last spring will seek the Vancouver mayoralty in the elections of December 12.

C. H. McGeer, K.C., Liberal member of the British Columbia legislature for Vancouver-Burrard, added fresh item to an ambitious political program when he announced he would oppose Mayor L. D. Taylor's bid for re-election Mr McGeer had previously stated he would seek the Liberal nomination in the federal constituency of Vancouver Burrard for the next elections.

Before "Gerry" McGeer's announcement, Mayor Taylor was the only candidate definitely in the race for the next two-year term of office at the head of the city council

Planning Australian Flight

London. Capt Charles Ulm, Australian airman planning a flight from Vancouver to Australia, figured his specially-engined plane will have a cruising radius of between 3,500 and 4,000 miles. This is roughly 1,000 miles more than the greatest cruising radius of the entrants in the London-Melbourne race.

Alberta Appointment

Edmonton. George W. Gorman, chief inspector of schools in Alberta for the past 13 years, was appointed deputy minister of education, it was announced by Hon. Perren Baker, minister of education.

Co-operation Is Promised

Federal Government Willing To Help Tourist Industry Claims Premier

Ottawa Prime Minister R. B. Bennett gave the tourist industry of Canada a pledge it would be afforded the full co-operation of the federal government but at the same time he added a note of warning it was up to the industry to protect the good name of Canada by seeing the tourist received the fairest possible treatment from the standpoint of courtesy, reasonable rates, education and honest price charges.

The prime minister addressed the members of the Canadian Association of Tourist and Publicity Bureaus and other tourist publicity experts representing the transportation companies municipalities and private organizations and members of the motor tourist committee, at a dinner which concluded a nation-wide tourist conference called by the Canadian Travel Bureau

Death Rate Lower

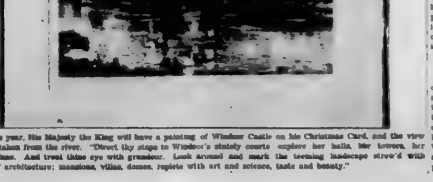
Has Decreased In Canada During The Period Of Economic Stress

Toronto Canada's death-rate has decreased during the past four years of economic stress until now it is the lowest in the history of the country according to Dr Grant Fleming director of the department of public health and preventive medicine at McGill University, Montreal

Dr Fleming spoke on "Health and the Depression" at the 30th annual meeting of the Canadian Dental Hygiene Council here

Officers of the C.D.H.C. for the coming year were named, with the president E. E. Reid, London, Ont The executive committee includes Dr L. J. D Pinhero Regina.

THE KING'S CHRISTMAS CARD



This year, His Majesty the King will have a painting of Windsor Castle on his Christmas Card, and the view will be taken from the river. "Direct thy steps to Windsor's stately courts explore her halls, her towers, her sacred fane. And treat thine eye with grandeur. Look around and mark the towning landscape strew'd with gems of architecture: mansions, villas, domes, copiets with art and science, taste and beauty."

MOST EMPHATIC ENDORSATION OF NEW DEAL IN U.S.

New York Power of the anti-new conservative Republicans was broken in the congressional elections and the Democratic party, or the New Dealers found themselves masters of the senate and house of representatives, rapidly moving toward complete and final control of governors, mayors and legislatures in 33 states

In the fifth winter of a depression the voters of the United States declared with no uncertain voice for the policies of federal relief and government control of business and agriculture instituted during the past two years by President Roosevelt

The Roosevelten New Deal independent brother age rout repudiation of devastating sweep

The country has given Roosevelt the signal to go ahead with his rumbled new deal by sweeping Democrats into federal and state offices in unprecedented numbers Far from losing ground, as usual in off-year balloting the jubilant Democrats invaded such Republican fortresses as Pennsylvania and seemed assured of commanding two-third majorities in both branches of the next congress

With the overwhelming stamp of approval placed on his programme President Roosevelt may be expected to push ahead with two plans close to his heart the Lame Duck amendment and increased international trade

Recently Roosevelt has sworn the st remains to be seen. If the great it remains to be seen. if the great body of Democrats will prove as unwieldy as to force his hand. Many of them verge close to the outermost border of the left, others swing as decidedly to the right Only time can tell which carry the weight

Want Grain Grading Probe

Investigation By Board Of Grain Commissioners Asked By Alberta Liberals

Edmonton — An investigation by the board of grain commissioners into grain grading holding of an immediate Alberta general election, and powers for the dominion railway board of this province to reduce principal and interest were some of the demands made in resolutions passed by the central Alberta Liberal economic conference in session here

"Certain manipulations of the and of terminals was charged by delegates who urged the grain grading inquiry They also commented upon what they described as a feeling spread between track and street prices. It was also claimed that grain similar to what had been graded as No 2 last year had been graded No 4 this year in one instance

Italy's Wheat Imports

Slightly Higher In October This Year Than Last

Rome Italy imported 32,370 quintals of wheat during October, compared with 31,062 in October last year 4A quintal of wheat is 3.67 bushels.

A general statement covering the four months period from July to October shows that imports decreased this year by 39,504 quintals, whereas those of maize increased 65,-935 quintals.

Prelate's Many Honors

Edmonton. — Increase in United Farmers of Alberta membership of from 1,000 to 5,000 was predicted by Vice-President Norman F Priestley here Mr Priestley said that improved conditions in farm communities of Alberta together with revival of interest in U F A objectives would

Moving To Toronto

Toronto C.C Stewart, traffic and operating assistant to the general superintendent of the Canadian National Telegraphs at Winnipeg, will take over the same position on the eastern lines, it has been announced. His headquarters will be in Toronto. W. M. Hamilton, western lines inspector will take Mr. Stewart's place at Winnipeg.

Approval Of Public Health Measures Under Federal Control Is Expressed By All Provinces

Sterling converted action by the federal and provincial governments in matters of public health, Dr. George Brown, general secretary of the Canadian Social Hygiene Council, made known the unanimous opinions of provincial authorities with a view to co-ordinated measures under Dominion authority, evolved at through a federal-provincial conference.

Dr. Brown declared that in the British North American Act the only reference to health was in subjects dealing with quarantine and establishment and maintenance of marine hospitals. Because of this, he believed there was "no good reason why the Dominion should not enter into full participation in any scheme for the promotion of health throughout Canada."

From each of the nine provinces came expressions of approval of co-operation along health lines.

Hon. C. H. Wolf, provincial secretary for British Columbia, said his province is anxious to co-operate with the federal authorities in the promotion of public health which we regard as the very cornerstone of national well-being," and declared "From the standpoint of scientific public health provincial boundary lines have little significance."

From Alberta came pronouncement from George Hoadley, minister of health, that "there can be no question in regard to the desirability of representatives of the various provincial governments and the federal government meeting for the purpose of giving consideration to the many health problems confronting us, both provincially and nationally, the question of health is one which is vital not only to each of the provinces but to our country as a whole."

Hon J. M. Uhrich, minister of public health for Saskatchewan, stated "there appears to be a definite place for the Dominion department of health in connection with the co-ordination of provincial activities, especially those relating to interprovincial matters."

Premier John Bracken of Manitoba stated inter-governmental discussion of national health was "very desirable," although his government was not disposed to make any pronouncement before the proposed conference

Milk In The School Lunch

Should Be Included in Some Form Every Day

If a child must carry his or her lunch to school it should be carefully planned for, after all, it is one of the three meals of the day and should, therefore, provide its share of food requirements. Milk should be included in some form in every child's lunch to avoid a daily shortage of the food so necessary for the growing girl and boy. The milk may be carried in a screw-top jar or thermos bottle or it may be more convenient to have a supply of milk delivered each day to the school. When planning a lunch pudding for the main dish of the family one are at home for the noonday meal, it is an easy matter to add a second supply of the custard mixture for the next day's school lunch box. Wherever possible, particularly during the winter months, arrangements should be made to provide one hot dish or school to supplement the cold foods brought. Soups, stews and hot dishes such as cream soups, cocoa, cream vegetables, cereal, eggs or meat are easily prepared, easily eaten and will add materially to the nourishment and satisfaction derived from the school lunch.

A Welsh Eisteddfu

London Syndicate Buys Up Ex-Spas and Gold Mines

Terms of open cuts, tunnels and shoots for crushing quartz discovered on property of Welsh Eisteddfu have been worked by the Bowman flower of these ancient gold-mines, tucked away in the folds of the Merioneth Mountains are to be re-opened by a London syndicate, who hope, by utilizing modern machinery and engaging expert gold miners to establish a Welsh Klondike in their prehistoric days, a few years before the war. Welsh mines yielded £1,000 worth of pure gold weekly; the workings kept of the Queen and the Princess Royal are made of Merioneth gold. Ore extracted from the Prince Edward Mine, near Dolgelly has on occasion assayed at eight ounces of gold per ton which realize it in richness of yield with the gold-bearing quartz of the Rand.

SO ENTIRELY WEARABLE, SMART!

Handsturdying by simple to make dress patterned for to-day!

Very practical and lovely is this dress-and-jacket model and a dress with all day needs most admirably.

It is both a pretty dress and a very convincing jacket frill that is part of the collar and that is repeated in attractive touch. The stitching on the sleeves is smart. The pattern provides perforations for cuffs. It may be omitted, however, if you prefer.

Another point commends this smart crepe model with wool crepe collar and cuffs.

Model threaded woven, velveteen, velvet or velvet would also be charming for this model. Or challenging for that matter.

Style No. 630 is designed for sizes 32, 34, 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 5½ yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Write coin carefully.

Important Military Air Bases Are Being Considered For Protection Of Far-Flung Empire Outposts

Construction of an important military air base in the Malay archipelago is being considered by the British air ministry, it was learned in connection with its vast plan to expand existing air communications and protect the far-flung outposts of the empire.

There are at present three so-called aerial "empire routes" one of these with regular air connection, the other with partial aeroplane service and the third being contemplated. They are London-to-Melbourne, London-Cape Town and London-Ottawa.

Regular air service on the Australian line at present goes only so far as Singapore, Straits Settlements. This, however, is soon to be expanded so as to link the British capital with Australia.

"Protection" of the Malay archipelago by means of an air base, it was pointed out, is therefore a natural outcome of such aerial connection and at the same time a strategic measure of vital importance.

The Malay air service is in operation between Singland and Cape Town, Union of South Africa. It is understood that 10-day air journey to the union will in the near future be accelerated to eight or nine days by a twice-weekly service.

The Ottawa plan is still incomplete Contrary to assertions made recently by certain newspapers that such an airline route would crystalize shortly, Lord Londonderry, minister of air, announced in the House of Commons that the ministry envisaged no such move at present

Homing Instinct Of Pigeons

Theory In Thus Magnetic Influence Draws Bones Back

Thousands of British racing pigeons are liberated every week-end at distances ranging from 100 to 700 miles from their lofts, yet enough in the case of severe Channel storms or attacks by peregrine falcons, few fail to find their way home. Training, moreover although, does not entirely account for the homing instinct One theory is that when a bird is taken from the loft, a kind of invisible elastic or magnetic influence is set up, which draws the racer irresistibly back from wherever it is released. Pigeons of the second generation, bred in the same loft, appear to have this power more highly developed than others. The most expert fanciers are at a loss to explain a recent well-authenticated case, where a brood of pigeons, hatched out in an Egyptian loft, flew straight back to that loft, having never previously set eyes on Britain.

Styles In Sheep Changing

Heavily Fleeced Animals Are NO Longer In Demand

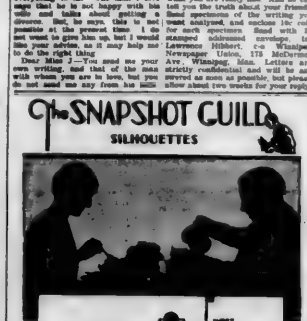
Even styles in sheep are changing. The plaids of the heavily fleeced, wrinkled sheep is rapidly being taken by a new model of more generous proportions, says a bulletin from the University of Wisconsin. This is due, explains James J. Lacey of the university's College of Agriculture, to the fact that with modern improved homes and comfortable equipment for travel there is less demand for heavy clothing. The heavily fleeced animals, therefore, are being replaced by models of the meaty type.

One Handy Tool

Chatterbox Made Or Shaved By Everyday Razor

Every hour of every day our discipleship is put to the test. The care we take and the uses we make of our bodies, the government of our appetites and passions, the thoughts and feelings we cherish in solitude, the tempers we exhibit to each other, the habits and motives which control us in industry, trade and politics—surely these have far more to do with making and marring our character than our theological speculations and our church professions.—Amiel.

If your throat is rubbed with fresh beef and then thoroughly basted in the oven before it is used it will not rust afterward.



An evolved doorway between living and dining rooms, a boat shoot and a bright light — these are the only special requirements for this do-it-yourself silhouette picture.

With the advent of cooler weather, picture-taking season is over. And the snapshot guild comes a lot of fun and good pictures.

Matter of fact, with the new films and developers now available indoors the snapshot season is continuous. Winter or summer, everyone likes to read and eat. We shall have much to say in these columns about the former, but let's talk now about the latter. For a starter here's a silhouette picture that is fun to make. It is directly on an imaginary line between the light in the ceiling and the object. The shadow appears on the paper below. Then the object is removed and the paper is held black side down over the subject and through the subject. The diagram above explains this. Use in the simplest way. When the picture is taken, the light shines through the object should be the only light in either of the rooms.

Subject matter is unlimited. If you use the fire-wall image, you will need an object about 10 inches high and the lens well opened, with a photoflood, a couple of seconds will suffice. Using the "projection" idea, the "silhouette" turns out all lights, open the shutter, and expose for about two seconds (or any instant's vivid light). Then the "silhouette" is locked up so that all creases and wrinkles are smoothed.

To light up the background, a strong light must be used, such as a No. 2, about five feet away either reflected or photoflood. Or, if you have a No. 1 photoflood, you can use it at a distance of about three feet. The more it is used the better the picture. The more it is used the better the picture. The more it is used the better the picture

Public School To Be Closed On Friday

A special meeting of the Fort Saskatchewan School Board was held in the Council Chambers on Tuesday night at half past seven with Mr. F. J. Atkinson, Chairman, and Trustees, Dr. Grasset, Dr. Turner and Mr. R. M. Ray present.

The Chairman explained that the meeting had been called to consider the matter of ohn affection reported to be amongst the students in school. The Principal and all the teachers were present, except Mr. Hambly, who was unavoidably absent. After the question had been discussed at length, and various suggestions made it was put wi h the trouble, it was decided to close the Public School next Friday in order to have all the desks etc., in the school cleaned and treated with 5% Lysol solution, so that the whole school can be cleaned up during the week-end A resolution was also passed That parents and guardians be advised to take children promptly to their family physician for treatment as soon as a child even shows about itch That the Medical Health Officer be asked to prepare and publish in the local paper, advice as to preventive measures to be taken in connection with the epidemic.

Scabies — Itch

In order to combat the Epidem the following instructions are issued. Any person so afflicted should

1. Take a hot bath preferably at bed time.
2 Thinly smear whole body with Danish Ointment. Not the face.
3 Put on old suit of underwear.
4. Rest for 24 hours. Rest is advised in order that the ointment shall not rub off.
5. Take hot bath after 24 hour treatment, then use clean underclothing.
6. Bedclothes should be thoroughly washed and ironed with hot iron.
7. Suits and clothes which cannot be washed should be hot ironed inside and outside. Ren hot iron down all seams inside clothes.

PRODUCERS TO VOTE ON POULTRY MARKETING SCHEME

Every poultry producer with a flock of 25 birds or more will be given opportunity to vote for or against the proposed Alberta Poultry Marketing Scheme and the application of that scheme in the province will depend entirely upon such vote, a statement issued by the Alberta Poultry Marketing Board emphasizes.

Poultry producers are urged by the Board to fully acquaint themselves with the details of the proposed scheme before making their personal decisions. It is pointed out that the petitions condemning the scheme at present being circulated, are mainly from sources whose interests are not identical with those of the producer and the members of the Board are extremely anxious that producers fully satisfy themselves concerning both sides of the question before reaching a decision.

Temporary headquarters of the poultry marketing board have been opened at 606 Northern Investment Building, Edmonton. Copies of the marketing plan may be obtained from this office.

All poultry producers are also invited by the Board to register their names and addresses and the number of birds they control, with the Board at the above address, in order that these may be checked against the registered lists now being prepared and then absolutely insure the opportunity of voting for or against the proposal.

A number from the Fort enjoyed the lecture by Mr. Fred Wenderson, Socialist Author and lecturer in the Empire Theatre last Monday.

Carriers Elect Officers For Coming Season

A meeting of the Fort Saskatchewan Curling Club was held on Monday evening in the Town Hall, with a large number in attendance.

The election of officers were as follows:

Hon. President, Mr J. D. McLean.
President, J. Wright.
1st. Vice-Pres., F. W. Smith.
2nd. Vice-Pres., C. Ashton.
Sec.-Treas., J. Dewar.

Executive Committee, W. A. Graham, A. Mann, W. A. Anderson, P. Morel, F. Flintoft, and Dr. Calhoun.

Ice Committe, R. W. Pocock, W. A Graham.

Entertainment Committee, A. Mann convenor.

Canvassing Committee, J. Connelly, and A. Simmons.

It was decided to leave the fees the same as last year.

Art Simmons was engraved as Caretaker for the season of 1934-35.

The making of ice in the curling rink and skating rink was started on Tuesday and with continued cold weather playing will be enjoyed by both curlers and skaters shortly.

Agricola News

On the afternoon of November 9th, the pupils of the Agricola School, and their teacher Violet Reynolds entertained the Mothers and Daughters of the district at a Remembrance Tea. An enjoyable program was given by the pupils, after which they served lunch.

Those present were: Mrs. T Johnston, Mrs. T. Cunnamon, Mrs. A Walker, Mrs. J. Grayson, Mrs G McConnell, Mrs. T. Boag, Mrs J. Booth, Mrs A. Boag, Mrs. M. Newell, Mrs. Tinkham, Mrs. Dugan, Mrs Gudson, Mrs. R. Melnik, Mrs. G. Cummings, Mrs. E. Mackay, Mrs. H. Hutchinson.

Misses Bernice McConnell, Marie Cummings, Doreen Stetson, Marion Melnik, Gladys Cummings, Vera Grayson, E. Gunderson, Marjorie Cummings and Hester Reynolds.

Wedding Bells

A pretty wedding took place on Monday morning, November 12th, when Cecil, daughter of Mr. and Mrs. Joseph Normandeau, became the bride of Mr. Maxime Villeneuve, son of Mr. and Mrs. Camille Villeneuve of Lamoureux.

The ceremony was performed by Rev. Father J. H. Garnier of the Lamoureux Catholic Church.

After the wedding ceremony the party proceeded to the Fort Hotel where a sumptuous wedding breakfast was enjoyed, at which the following were present:

Mr. and Mrs. Maxime Villeneuve, Mr. and Mrs. Camille Villeneuve, Mr. and Mrs. Joseph Normandeau, Rev. Father J. H. Garnier, Miss Cleir Garnier, Mr. and Mrs. Jean Normandeau, Mr. and Mrs. Leo. Godbout, Mr. and Mrs. Henri Normandeau, M. and Mrs. Omer Villeneuve, Mr. and Mrs. Euclide Villeneuve, Mr. Adelard Gagnonet, Mr. Emile Normandeau, Mr. Joseph Villeneuve, Mr. Sophie Normandeau, Mr. Raoul Villeneuve.

Miss Cecil Paradis.

The party proceeded to Edmonton, returning to Lamoureux where a dance was held bringing the enjoyable day to a happy conclusion.

A Spaniard, an American, and a Scotsman were discussing what they would do if they awoke one morning to discover that they were millionaires.

The Spaniard said he would paint a bull ring.

The American said he would go to Paris to have a good time.

The Scotsman said he would go to sleep again to see if he could make another million.

PATRONIZE OUR ADVERTISERS

Hockey Club to Hold Dance

The Fort Hockey club held it's annual meeting in the Town Hall on Monday, Nov. 19th.

The following officers were elected for the coming year

Hon.-Pres.- J. D. McLean
President. Joe Latour.
Sec. Treas Earl Sherman.
Manager, "Pip" Collins.
Executive, J. Dewar, Pete Morel, Fred Sherman.

It was decided that we hold our annual dance on Friday Dec. 7th and the following were elected as a dance committee.

Jim Taylor, Fannie Flintoft, Arnold Mann, R. W Pocock

There was a large attendance of players on hand and a very enthusiastic meeting took place.

As the Junior team of last season has disbanded the Senior Club decided to take in all the junior players and will form two teams Team No. 1 will be a selection of the outstanding out players. The other will be "farmed" out to team No. 2 and the two teams will practice against each other Games will be arranged for both teams and any players on team No. 2 who show exceptional improvement will be promoted to the first team This method of classing the players should prove very successful as it will encourage all the boys to play hockey

The Club is very fortunate to have Jim Taylor formerly of Scottlar Jim has already proven his ability at the practices held down at the island and he will with his experience prove very valuable in directing the plays of the forward lines in particular.

The Observer

Winter, as we say, is upon us. In this northern latitude we have a certain feeling about winter which, while perhaps it is not dread, at any rate approaches dread, and is something akin to the profound respect which one feels for a strong adversary. In the country districts winter presents grave problems concerning the feeding and watering of livestock, and getting the children safely and comfortably to and from school, and keeping the home fires burning and all that sort of thing. All those things the careful husband man has foreseen and is prepared against. But it also presents great opportunities for leisure and one hopes that the same careful husband man will have made provision against this as well, that so to say, for the wise use of it is reading and reflection and social intercourse. The hard times which we are experiencing make extended pleasure tours impossible and force one to make a better and completer use of the resources we have within and around us by which our leisure may be turned to profit and put without making any demands upon the purse. All this we may do to our own advantage and so find with Shakespeare how "Sweet are the uses of adversity".

Girl Guide Notes

The regular weekly meeting of the Girl Guides was held Monday, Nov. 19th, at the home of Lieutenant Margaret Katherborn. The meeting was called to order by Captain Ethel Treby, then work was begun on the "Signal Flags" and "Nature Study Work" for the second class tests.

Other business was discussed and the meeting dismissed.

At the Court of Honor which was held afterwards it was decided that the next meeting should be held at 7:30 in the Fire Hall, Monday, Nov. 26th. Margaret McLellan was elected secretary.

Whaling is carried on in Pacific waters. In 1933 there were 339 of these mammals landed in British Columbia and manufactured into meal, oil and fertilizer.

Popular Saxmith Divine Accepts Call

The Rev. Robert Simms, minister of the Saxmith United church for the past four and one-half years is uncred to his congregation on Sunday evening that he intended to accept a call to the United church at Fort Saskatchewan.

Mr. Simms came to the Grande Prairie Presbytery almost ten years ago and has given faithful and effi- cient service at Wembley and Saxmith since that time. He will be missed in the Presbytery where he has acted as Home Missions Convenor for four years. The call to Fort Saskatchewan is in the nature of a substantial and well-earned promotion for Mr. Simms, and the good wishes of his many friends in the north country will go with him.

Mr. Simms will leave Saxmith about December 4th.

—Grande Prairie Herald

EQUIPMENT TO BE AUCTIONED

A busy auction will dispose of the operating equipment of the World's Fair, which will end its two-year run on Thursday, Nov. 29, it was announced today. The catalogue now being prepared, will list enough office equipment for a four-story building, enough flags for a major war, a big set of livery uniforms for police, and guides, a fleet of automobiles, 3,000 miles of light wire and park benches to seat 50,000.

JOSEPHBURG NEWS

No service will be held on Sunday, November 18th, as Rev. Wambersack will be holding service at Brush Hills, Alberta.

The Ladies Aid meeting will be held at the home of Mrs. Wambersack on Dec 6th, at 2 p.m.

Mr and Mrs. John Mohr and family of Vegreville are spending a week with Mr. and Mrs. J. Thomas and other relatives.

COMING EVENTS

The regular monthly meeting of the United Church W.M.S. will be held at the home of Mrs. F. A. Wilsworth on Tuesday afternoon, Nov. 20th, at 3 p.m.

The Catholic Altar Society Ladies will hold a Sale of Home Cooking and Tea on Thursday afternoon, Nov. 29, in the Memorial Hall from 3 till 6 o'clock, to be followed by a Bridge, Whist Drive and Concert at 8 p.m. Door prize. Admission 25 cents.

The Fort Badminton Club DANCE in the Badminton Hall FRIDAY, NOV. 23rd. Refreshments Good Music Dance 9-2 Admission 50c each. Everybody welcome

Remembrance Day — Its Memories And Lessons

The world has commemorated another anniversary of the signing of the Armistice,—the sixteenth. Remembrance Day, for we have retained, appropriately to call November 11, falling on a Sunday as it did this year, was observed by hundreds of thousands of people in nations all over the world. From the pulpits of churches of all religious denominations Peace sermons were preached and the horribleness and brutality of war vividly depicted and unanimously condemned. Gathered at the graves of Unknown Warriors, assembled about cenotaphs and other monuments erected to the memory of the gallant dead, or meeting in solemn memorial services, men and women formed an almost unbroken circle around the world as they stood with bowed heads and in impressive silence as the hour of eleven o'clock struck.

It was Remembrance Day! Pumps were flaming red poppies symbolical of Flanders Fields and of the bright red blood of youth there shed. Nevertheless they laid wreaths of poppies in many hallowed spots. People heard the pipes and drums play "The Lament," the bugler sound "Last Post" and "Reveille", and they saw the Colors slowly dipped.

Pride and sorrow were interwoven and strangely mixed as the memories of those of older generations were carried back to 1914-1918 and to the first Armistice Day, pride that men, and women too, had responded to the call of duty when that call came; sorrow that so many had been called upon to make the supreme sacrifice or go through life maimed and handicapped to the end of their days. And mingling with pride and sorrow there was a righteous anger that such a barbarism as War should be permitted and sanctioned by peoples and nations styling themselves Christian and civilized.

But when Remembrance Day means nothing more than this? Does it begin and end with the twenty-four hours of November 11, and are we then to lapse into forgetfulness for the remaining 364 days of the year until once again November 11 calls upon us to stand in silence and remember?

Consider, you who are now rending these lines. Have the memories stirred only a few short days ago not already begun to fade? Is not that almost red hot righteous anger against War and all that War means which you felt so recently already rooting off? If your passionate demand for Peace, and that never again shall War blast its way in this world, is hour-by-day as it was when you stood in silence that could be felt just a few days ago? Alas, it must be so. Indeed it is well that in many respects our human memories are short, else we could not bear the burdens which memory would bring. But it is vitally important to the future of mankind that we should never forget all the tragedy that Remembrance Day brings to mind. So far as the awfulness and unnecessariness of War is concerned, every day should be Remembrance Day.

Canada is a peace-loving country. If the decision could be left to the Canadian people there would never be another war waged anywhere on this world's surface, nor upon its seas, nor in its air. Canada has always set the nations an example in disarmament; or rather by its refusal to engage in armaments. Our paltry permanent force and numerically small and widely scattered militia is but a domestic police force maintained to guarantee law and order. Of offensive armaments Canada possesses practically none.

But as a nation of Peace, Canada has a duty to the whole world. At Geneva the voice of Canada is always raised for Peace and our influence in Canada's vote is always cast for Peace. But the responsibility is ours to make our voice for Peace stronger and still more emphatic in a world of nations apparently bent upon war. Canada is in a position unprecedented and unparalleled in all history.

Narrow nationalism, with all its selfishness, its suspicions, its jealousies and its ammunition in the bank, the underlying cause of war. The truth of this statement is emphasized over and over again by the well known international correspondent, Isaac F. Marcosson, in an article entitled "Does Europe Want Disarmament?" Selfish nationalism wrecked the World Economic Conference called to bring about tariff and currency readjustment, and because of that failure the whole world still staggers and suffers. Selfish nationalism has rendered every disarmament conference a failure. And because men still insist upon such narrow national selfishness, the nations are heading straight into another war.

Canada is not free of the taint of selfish nationalism, but it has not the grip on the people of this new and young land that it has upon the older countries of Europe and Asia. Nevertheless, if Canada's voice for World Peace is to be as strong and emphatic as it ought to be, the Canadian people must not only place it each upon the growth of any spirit of selfish nationalism but we must seek to eradicate it from our individual minds and hearts and from the policies of the Canadian Dominion.

Let us remember and keep fresh the memories and lessons of Remembrance Day; abhor War and all that tends towards War, and think and plan and live for Peace at home and in the world.

Dominion Drama Festival

Eminent British Playwright Pays Compliment To Canada

Canada is fortunate in having the Dominion Drama Festival established on such a firm basis, in the opinion of Noel Coward, brilliant British playwright, composer and actor, who is paying his first visit to Canada.

The Drama Festival, he believes, is a distinct contribution to the theatre in that it makes people "theatre-minded," and stirs up interest among the members of little amateur groups in their plays and amateur life, an ever-widening circle.

"It is most interesting," said Mr. Coward, in an interview at Ottawa. "I should like to attend a festival. If possible, I shall be here next spring."

Only 30 years old, Mr. Coward is one of the most successful living writers for the stage. He already has had 24 or 25 plays produced. Now he is on the way to Milwaukee to attend a rehearsal of his latest play, "Point Valaine," which will open in Montreal December night.

Chinese Farmers Lose Heavily

Loans to Chinese farmers and peasants occasioned by the prolonged drought and record heat wave of the past spring and summer are expected to exceed $1,000,000,000, according to a report issued by the National Famine Relief Commission, based on reports received from the stricken districts.

INDIGESTION?

Then Try KRUSCHEN at NO EXPENSE

If you suffer from loss of appetite, indigestion, sour stomach or a miserable feeling after meals, there's nothing like Kruschen for relief. The little daily dose of Kruschen Salts stimulates the flow of the gastric juices to aid digestion, and then nature's internal regulator and enabler, the elimination of all waste matter every day.

If you suffer, you'll welcome the opportunity to try Kruschen Salts now generously offered by Canada's leading druggists on the following liberal offer. This is the Regular bottle, together with a separate FREE TRIAL bottle. The Free Trial bottle is sent to you if you are not entirely convinced that Kruschen will do everything claimed for it, return the Regular package unopened to your druggist and the Free Trial bottle is your gift. But act quickly or your Free Trial bottle will be gone. Your druggist has only a limited supply.

There would appear to be a serious shortage of skilled workmen if demands in Canada next spring are the 1924 production, plus the small carry-over, is not expected to exceed more than 1,000,000 units, Canadian Automobile Chamber of Commerce, Toronto Board Branch.

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates won't possibly slip when you sprinkle on Dr. Wernet's Powder. Holds them firm all day. Tasteless. Don't risk! they won't annoy you as cements. Also keeps mouth sanitary, breath sweeter. Get Dr. Wernet's Powder today. Three sensizes guess from getting each. Small cost—any druggist.

Nobel Literary Prize

Pirandello, Famous Italian Dramatist, Receives Award

Luigi Pirandello, famous Italian dramatist and novelist, was awarded the Nobel literary prize. Selected from a host of American and European literary lights, the award was given the famous award, which last year went to Ivan Bunin, Russian author, and which normally is worth about $44,000.

Pirandello was born at Girgenti, Sicily, in 1867, and was educated at Rome and the University of Bonn. His present home is in Rome. His writings have been varied, including poetry, plays and prose.

His best known writings include: "As You Desire Me", "Six Characters in Search of an Author", "The Rules With the Fingers in His Mouth", "The Mask Respects", "The Life I Gave You".

Business Improved

Conditions In General Throughout Canada On Uptrend

Conditions in general throughout Canada have improved considerably and gradually since the low point in the early spring of 1933, the executive council of the Canadian Manufacturers' Association reported, coincident with the official opening of the Produced-in-Canada exhibition in Montreal.

Figures the council believed encouraging were presented in regard to empire trade. For the 12 months ended September, 1934, Canadian exports to empire countries represented over one-half of total exports to all other countries. The report adds "for this 12-month period our exports to empire countries amounted to almost $330,000,000 which is greater than our exports to empire countries in 1930 when they amounted to $316,000,000.

"Our exports to foreign countries, however, for 1929 were no less than $967,000,000 as compared with $397,-000,000 for the year ending September, 1934.

Will Have Representative

A representative of the Peace River district will be added to the western board of grain standards, it was promised by H. H. Ramsay, chairman of the board of grain commissioners.

Canada's Courageous West

Keeping Alive The Spirit Of Courage Handed Down By Pioneers

Evidence of the amazing ability of the Canadian West to take its knocks standing opposes as the outstanding feature of the business situation. In that area following a survey made by the Financial Post. Despite adverse conditions, the West remains definitely a "must your" country and keeps alive that spirit of courage and determination handed down by the settlers of pioneer days.

Improvement in sentiment was noted throughout the whole country. Manitoba is stimulated by good average wheat yields, heavy premiums on durum wheat and malting barley, and considerable new mining activity. Southern Saskatchewan has suffered from the drought but in the northern areas some good yields were seen and these will bring higher prices than in the past two years. Refusal [illegible] that the southern half [illegible] Though as a whole producing area in general, and big profits are expected when average precipitation is resumed. Higher average returns have been obtained in most areas of Alberta, but in some districts grade has suffered from unfavourable weather conditions. Higher hog prices have meant much to farmers. Sugar beets have proven profitable. Alberta continues to look for the large crude oil field which many expect will place the province on the map as an important oil-producing area. In British Columbia extensive lumbering and mining operations have helped maintain activity. Fruit yields are better than last year and the overseas market seems receptive at slightly higher prices.

Making The Air Safe

In Misty Weather Aviators Should Always Fly High

The News of the World, London, says steps should be taken without delay to improve the safety of the air over the Channel at such a height as would enable the pilot in case of emergency to land safely.

What caused the loss of the Hillman machine will never, perhaps, be known with certainty. But the accident is, at least, a reminder that in a locality where high-flying contributes to safety it should be made compulsory.

In misty weather, if the pilot flies low in an effort to discover his bearings, he runs a risk of striking the sea at a speed of possibly 120 miles an hour.

Such a collision means instant destruction.

In a dense mist, with his front engine stopped, the pilot cannot hear a ship's siren, and the pilot of a passenger machine may have no time to avoid one.

In the neighborhood of the Channel he has Croydon to help him with his bearings.

British air-liners fly more than 2,000,000 miles a year, and carry annually over 60,000 passengers.

This year to date 17 lives have been lost.

For 1933 the number was 15, less than the toll of the roads in twenty-four hours!

The Mysterious Apple

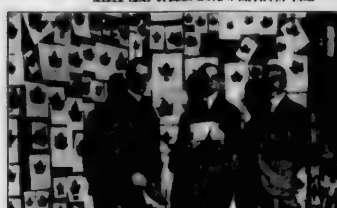
Discussions From "Elderly" Fruit Will Stage Human Quixotry

An apple mystery was revealed at a recent meeting of the British Association of Refrigeration when it was discovered that "elderly" apples give out emanations which have the effect of ripening bananas quickly and also unripe apples. The emanations exercise a still more startling influence on potatoes. These vegetables, if placed in the stream of air coming from the elderly apples, either do not sprout at all, or produce sprouts which are like warts. It was found. Investigations are being made into the nature of the emanations which have these mysterious effects, but so far the scientists have not been able to track them down.

First Aviator — "No one has a chance to beat Bill in this endurance flight."

Second Aviator — "Why?"

First Aviator — "His wife told him she was planning to start cleaning house as soon as he came down."



Judges, all members of the Royal Canadian Academy, selected the five prize entries at the Royal York Hotel, Toronto, recently, from the 10,502 maple leaves sent in for the Dominion-wide contest organized jointly by the Canadian Pacific and Canadian National Railways. The judges left to right: F B Challener, Toronto, F. H. Osborn, Montreal, and C W Jefferys, Toronto. W. J. Phillips, R.C.A., Winnipeg, also acted as judge.

Cheese As A Food

Highly Prized As a Staple Diet In Many European Countries

One pre-eminent characteristic of Canadian cheese is that its manufacture does not impair the nutriments in the milk from which it is made. Almost all the protein of the milk, the body building element, is present in the cheese, and, if the cheese is made from whole milk, almost all the valuable fat, with the associated fat soluble vitamine which is indispensable to growth and mental development. Cheese also contains some of the water soluble vitamine and most of the mineral matter so necessary for building bones and teeth. One pound of cheese contains nearly all the protein and fat in one gallon of milk. By weight, its composition is approximately one-third protein, one-third fat and one-third water.

Cheese is a very concentrated form of food and, compared with other protein foods, is economical. Its meat substitute is a favorite with those who do not like meat, and is a staple in many European countries, cheese is one of the most important foods. A generous 4 oz. hard mature cheese ration is sufficient to maintain health and strength for his work and it provides a high percentage of body building substance needed by the growing girl or boy. In Canada, cheese is used more for its flavour than as a main dish of a meal, but it could very advantageously be given a more important place in Canadian dietaries. It can be procured almost anywhere and at all seasons of the year.

Four Simple Rules

Motor Club Tells How To Avoid Auto Accidents

An article prepared by the Delaware Automobile Association, of Wilmington, Delaware, sets forth as follows four simple rules of avoiding fatal accidents.

"General observation of four fundamental traffic laws and knowledge of a few simple driving rules would eliminate 80 per cent of the accident toll. The fundamental laws are:

1.—Slow down on approaching intersections.

2.—Observe traffic signals.

3.—Give hand signals and make turns properly.

4.—Grant the right of way.

"And," says the article, "remember that although you may not by wish violations of the traffic law—the law of gravity is always enforced."

There are more than 100,000 lepers in India.

Was Thoroughly Cured

Would-Be Suicide Survived Jump Into Active Volcano

The attempted suicide of a man who jumped into the great Aso volcano, in Japan, and survived has startled the authorities. The victim rolled 1,000 feet down the side of the volcano, and, after miraculously missing the active crater, lay for several hours unconscious on a bed of cold lava and ashes. When he recovered he began a 16-hour climb to the top, eventually reaching an observatory shelter in an exhausted condition. He said that all thought of suicide left him as he lay inside the volcano.

FANCIFUL FABLES

International Music

Competitions Are Apt To Occur In Ethiopia

Music is international too much so, according to the Chinese political mission to Tibet which has been protesting against the fact that the Lhasa police band plays "Cock o' the North" and other British tunes in the streets of the sacred city instead of national airs. But perhaps the tendencies don't know any national airs. They didn't seem to know anything about music at all when they were sent to an Indian Army regiment in 1917 for instruction. And it is doubtless that training which is responsible for the tunes they are playing now. But musical complications are always occurring. There was a sensation when the band at the Dublin Horse Show, started to play "God Save the King," the other day. Then it was explained that it wasn't "God Save the King" at all, but the Ethiopian National Anthem, which has the same tune in that case the anthem was doubtless played in compliment to someone, but hands, as a rule, have a cabalistic taste, and by the whole world under construction in a good marching tune will travel round the globe. And it isn't always wise to ask what a band is playing. Queen Victoria did once, at a review of 11th at the time of the Zulu disputes with an increase of $107 664 in the capital invested. There was also an increase of 110 in the total number of employees with an increase in the annual payroll of $64,840. The gross value of production rose to the extent of $1,643,979, or 14.8 per cent., while the cost of materials used and the value added by manufacture were increased by $109,339 and $38,541 respectively.

In addition to the bottoms made in Canada large quantities have also been imported annually from abroad. In 1933 imports of bottons of all kinds were valued at $167,361, a decrease of $38,918 compared with the previous year. Exports are small amounting to only $10,197 in 1933 and $13 960 in 1932.

Rail And Air Speeds

Old Records Are Being Surpassed By Astounding Margins

The Scott-Black record by air from London to Melbourne 11,322 miles 70 hours and 30 minutes. Former record 4 days 17 hours and 45 minutes, made a year ago.

The new rail record from Los Angeles to New York 3,394 miles, by the Union Pacific stream-lined train M-10001 56 hours and 54 minutes. Comparable record (from San Francisco, made in 1906) 71 hours and 27 minutes.

Old records not only are broken, they are surpassed by astounding margins. Aviation is now and its maximum speed, already 420 miles an hour, was being increased in Italy to 440 miles while Scott and Black were making their amazing flight by flying 7 1-3 miles a minute, the Italian speed and, Lieut. Francisco Agu.in, had even unofficially beat his own record by a substantial increase.

Assuming the required endurance in fliers and motors, starting now air records are to be counted in fractions as the efforts to increase rail speed are a century old, the record from run may be the most remarkable achievement. The utmost was believed attained by the rail-roads 50 years ago.

But the railways have awakened. They are producing news comparable with the air news. Revolutions of train design, resorts to new motive power adaptations from the latest to mcnstrucy and engineering are opening up a new era in American railroading. Detroit News.

Over A Million Buttons

Button Industry In Canada Reports Increasing Activity

Button industry in Canada makes the buttons". In Canada they are made in Ontario and Quebec, the fruitbearing provinces. Of the seven button factories and the latter five During 1933 these eighteen plants had a capital investment of $1,238,-745 and a payroll comparing 80 per-sent, who received $434,541 in salaries and wages. The cost of material used in the manufacture of buttons amounted to $389,803, and the value of the output was $1,126,-"God Save the King," the other day Then it was explained that it wasn't "God Save the King" at all, but the Ethiopian National Anthem, which has the same tune in that case the anthem was doubtless played in compliment to someone, but hands, as a rule, have a cabalistic taste, and by the whole world under construction in a good marching tune will travel round the globe. And it isn't always wise to ask what a band is playing. Queen Victoria did once, at a review of 11th at the time of the Zulu disputes with an increase of $107 664 in the capital invested. There was also an increase of 110 in the total number of employees with an increase in the annual payroll of $64,840. The gross value of production rose to the extent of $1643,979, or 14.8 per cent., while the cost of materials used and the value added by manufacture were increased by $109,339 and $38,541 respectively.

In addition to the bottons made in Canada large quantities have also been imported annually from abroad. In 1933 imports of bottons of all kinds were valued at $167,361, a decrease of $38,918 compared with the previous year. Exports are small amounting to only $10,197 in 1932 and $13 960 in 1932.

Animal And Fish Hikers

When Marked And Released They Cover Long Distances

A salmon taken in the nets at Gaspe river was marked and released. Twenty-four hours later it was taken sixty miles away at Bathurstmouth. Good going yet not equal to the travelling powers of the seal. Seals marked on the Pribiloff Islands in the far north have been taken in the Atlantic, 10,000 miles away. They had covered that distance in five months. Most wild creatures are home-lovers and spend all their lives in one district, but there are exceptions. The curlews of Canada trek north in spring and south in autumn. They move in herds so large that they will take forty-eight hours to pass one spot, and they cover between fifty and seventy miles daily. Elephants move in small herds at irregular intervals. They travel by night and, considering their weight, it is remarkable that they can cover fifty miles between dusk and dawn.

Little Journeys in Science

BACTERIA

(By Gertrude H. Grant, M.A.)

When the microscope was invented a new field of science known as bacteriology, was opened up. Bacteria is the name given to a large group of plant organisms of many sizes. Some of these have a rod-like appearance, some are spherical, and some look like trailing bits of filament. The rod-like type are called bacilli, and it requires twenty-five thousand of them placed end to end to occupy one inch of space.

Bacteria reproduce by the division of their bodies, one rod or sphere changing with great rapidity into two. The bacilli which bring about the fermentation of hay, double their length and divides every half hour.

Many kinds of bacteria are killed by light while others cannot withstand great extremes of heat and cold. A few varieties, however, exist in a dormant state at 223 degrees below zero. A temperature of 67 degrees above zero destroys most bacteria, but are known to live in hot springs where the temperature is 194 degrees.

Because they are plants, bacteria have no stomachs, and as they cannot absorb undigested food. They therefore go into their food. When they have penetrated into the material which they are going to use for food, they give off chemicals which change the material into a form in which it can be absorbed. Those bacteria bring about the decomposition of dead plants and animals. Shortly after the bacteria bring about the complete decomposition of the dead matter into many compounds, including such important substances as carbon dioxide and ammonia. If it were not for this process of destruction all living things on the earth would soon perish, because the chemical constituents upon which life depends would be locked up in dead plants and animals. Thus the chemical elements necessary to life are always travelling in a circle. Everything come from the earth, returns to the earth and is used over and over again. If this circle is ever broken all life would stop. Bacteria play an important part in keeping this vital circle unbroken.

A Product Of Proved Merit

Vicks Va-tro-nol, For Preventing Colds, Stocks With Wonderful Success

Windsor, Ont - An intensive newspaper advertising campaign introducing Vicks Va-tro-nol, the new aid in preventing colds, has just started in Western Canada. Introduced in Ontario last year, and in the United States two years before, Va-tro-nol immediately became immensely popular.

Newspapers were selected as the principal medium for the introduction of Va-tro-nol because of the excellent results they have produced for Vicks VapoRub, according to the announcement.

For many years VapoRub has been the world's most extensively used cold remedy—the family standby for treating colds in 60 countries. Vicks officials attribute much of the tremendous VapoRub sales—over 30,000,000 jars last year—to honest continued prewar advertising backing a product of proved merit.

Similar international success is being achieved now by Vicks Va-tro-nol—companion to VapoRub in Vicks Plan for Better Control of Colds. Vicks chemists and medical consultants developed the formula for Vicks Va-tro-nol after years of clinical research. It is especially designed for nose and throat, where most colds start.

Based on a new and true preventing idea—by using Nature's own cold-fighting functions in the nose—Va-tro-nol is introduced as "the ideal companion to Vicks VapoRub, the modern external method of treating colds." Together with certain simple rules of health, these two preparations form Vicks Plan for Better Control of Colds. Records of thousands of clinical tests—conducted over a period of two years under medical supervision—indicate that Vicks Plan greatly reduced the number, duration and dangers of colds.

In accordance with the Vick Company's policy for nearly 30 years, VapoRub and Va-tro-nol will be heavily advertised in newspapers throughout the season. They will also be backed by the distribution of thousands of samples through drug stores in the Dominion.

Since 1909, Vicks has steadily increased its advertising while other companies were drastically curtailing theirs or eliminating it entirely. And during these five turbulent years, sales of Vick products have increased from 36,000,000 to over 85,000,000 packages annually, despite adverse business conditions.

Having been made for more than 100 years the great organ of the Church of St. John Lateran, at Rome, likely, is being reconstructed for use in the next church festival.

CHRISTMAS CAKE—Christmas dinner . . . a monster turkey, cranberries, paper hats which come from the gaily colored Christmas crackers — and to bring to a conclusion the year's glorious feast — a Christmas Pudding and a Christmas Cake made from PURITY FLOUR. You'll appreciate the high quality, the absolute uniformity of PURITY FLOUR in the success of Christmas baking. It's best for all kinds of baking. All baking made with it is marked by a distinctive, pleasing flavor, an even texture, good color and the other qualities which fill the housewife's heart with pride. Buy a bag today from your grocer, and keep only one brand of flour in your kitchen.

SUNDAY SCHOOL LESSON

NOVEMBER 25

THE CHRISTIAN STEWARD

Golden text: "Well done, good and faithful servant; thou hast been faithful over a few things, I will set thee over many things; enter thou into the joy of thy lord." Matthew 25:21.

Lesson: Matthew 25:14-30.

Devotional Reading: Malachi 3:7-12.

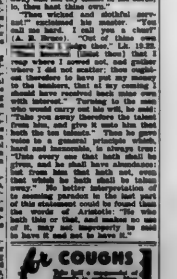
Explanations And Comments

The Charge to the Stewards, verses 14, 15. Jesus was talking with his disciples about the Kingdom of Heaven, and he began an illuminating parable by saying that the situation was comparable to that of a man who, being able to go into another country, called his servants and delivered to them his goods. A sum of money at the time of Christ on leaving home for a long and indefinite period, he intrusted to whom he could hand over the conduct of his affairs, the things of his land, and the use of his money in trade.

How the Stewardship Was Carried Out, verses 16-18. The servants who received five and two talents respectively lost no time in trading with them and doubling each his amount, but the man who received one talent hid it in the earth. It was a common practice in the East to bury money for safekeeping, but his master wanted increase as well as safety. Hence he was angry with him (verses 19-23. After a long time the master returned and the servants made their reports. "Well done, good and faithful servant," he said to the man who had doubled his five talents "thou hast been faithful over a few things, I will set thee over many things; enter thou into the joy of thy lord." "Come over and rejoice your master's (your) is Moffatt's translation.

The Man Who Received Possibly, verses 24-30. "Lord, I knew that thou art a hard [austere, Lk. 19:21] man," said he who had received one talent, "reaping where thou didst not sow, and gathering where thou didst not scatter." He was proverbial expressions for describing an unscrupulous grasping man. "It is all work and no pay," to his master's surprise, "the matter (also all the increase and gives the laborer no share in the reward," he then says, "And I was afraid," he continued, "and went away and hid thy talent in the earth; lo, thou hast thine own."

Then wicked and slothful servant!" exclaimed his master. "You knew me hard. I call you a cheat" (A. R. Brace). "Out of thine own mouth will I judge thee." Mt. 19:22. "You knew [[that thou] that I reap where I sowed not, and gather where I did not scatter." He should not therefore to have put my money in the bank, and at my coming I should have received back mine own with interest." Turning to the man who would carry out his will, he said: "Take you away therefore the talent from him, and give it unto him that hath the ten talents." Then he gave voice to the principle of reward, hard and inexorable, is always true: "Unto every one that hath shall be given, and he shall have abundance: but from him that hath not even that which he hath shall be taken away." No better interpretation of the seeming paradox in the last part of this statement could be found than the parable of the talents: "He who hath this or that, and makes no use of it, is not improper to be said to have it and not to have it."



Tested Eczema Remedy

In Demonstration of Doctor

Your skin troubles whether it is eczema, acne, hives, dandruff, ringworm, athlete's foot or pimples and boils will be positively benefitted by D.D.D. Internal D.D.D. as a tonic and internal Physician's Prescription. D.D.D. was developed originally for his own patients by Dr. D. D. Dennis. It is now endorsed by the makers of Cuticura and Baby Ruth. In 35 years D.D.D. has brought clear, healthful skins to millions. At druggists. Trial size 35c. Guaranteed to give instant relief or money back.

A soft answer may stay, good luck your way.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of bile juice into your bowels every day. Without this bile, food does not digest. It just decays in the bowels. Then gas bloats up your stomach. You get constipated. Your whole system is poisoned and you feel sick, headachy, nauseated, and everything you eat sours. Your bowels need a thorough cleansing. Dizziness, acid stomach, sallow skin, and constipation usually follow. Don't suffer this way. Get a 25c package of Dr. Caldwell's Senna Laxative Pills. Purely vegetable. Mild and gentle but sure in action. Ask for them by name. Insist on Dr. Caldwell's. 25

WORLD HAPPENINGS BRIEFLY TOLD

Lieutenant-Governor Herbert A. Bruce of Ontario has been elected to the board of the Dominion Bank.

Robert W. Bishop, statistical expert, advocates a coalition government in the United States beginning in 1937.

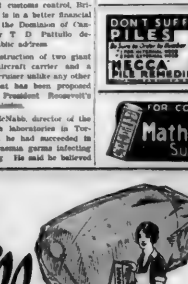
Given similar jurisdiction, namely, monetary and customs control, British Columbia is in a better financial position than the Dominion of Canada." Premier T. D. Pattullo declared in a public address.

Prompt construction of two giant airships, an aircraft carrier and a "flying deck" cruiser unlike any other ship now afloat has been proposed privately to President Roosevelt's aviation consultants.

Dr. A. L. McNabb, director of the Ontario health laboratories in Toronto, revealed he had succeeded in isolating tuberculosis germs infecting a human being. He said he believed it was the first time such an assistance had been achieved in Canada.

Indigestion, Gas

Thousands find relief from Indigestion, Gas, Sour Stomach and Constipation by taking Dr. Caldwell's Medicine. Mrs. Elizabeth Moffat of 176 N. Gladstone St., Toronto, Ont., writes: "I have had no stomach trouble in years. All ingoing." Write Dr. Pierce's Clinic, Buffalo, N. Y.



TELL YOU HOW TO COOK FISH

—with less work and no odor

Boiled or steamed fish comes out firm and solid, swimming in its own juice, when you cover it with CANAPAR Cookery Parchment. No fishy odor. No gummy steamer or saucepan to clean up afterwards.

And how delicious vegetables are when cooked the CANAPAR way! You can boil three in one saucepan without the flavors mixing—over a single burner. Save fuel. Eliminate odor in the house. Preserve the rich mineral salts. Cut down work.

CANAPAR can be used over and over again. It won't absorb odors. Try it as a dish cloth—especially for glasses.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

WILL MEET TO PLAN CHANGE IN WHEAT QUOTA

London -The ultimate fate of international efforts to regulate the export of wheat may be at stake when the international wheat advisory committee meets again at Budapest Hungary this week.

Although it is a committee meeting, representatives of all 21 signatories to the world wheat pact signed in London in August, 1933, are expected to be on hand.

The cardinal questions that will arise concerns the following:

Extension of the wheat agreements from July 31 1935 (when they formally expire) to July 31, 1937.

Provision for continuation of the efforts to adjust wheat supply to demand and thus dispose of the long-standing surplus.

Readjustments of the percentage upon which wheat export quotas for the principal exporters are calculated.

Subdivision of the crop year quotas into quarterly periods instead of one 12-month quota as at present.

The creation of a system of quota reserves designed to meet special contingencies, and impart greater flexibility to the working of the wheat agreement.

The proposed changes in the export quota system affect the machinery of the whole wheat agreement. Hitherto, the world demand for imported wheat each year has been divided among the chief exporting countries, and their export quotas fixed accordingly.

The Argentine's export of the first crop year of the pact ending last July 31 exceeding her quota by nearly 40,000,000 bushels. She continued heavy shipments as a result of which fixing of quotas for the present crop year was deferred until the meeting next week instead of being settled in August.

It is to meet the patently preponderance of such a contingency, forced by higher production than estimated, that the principle of quota reserves is proposed. The world demand for the present crop year ending next July is estimated at 4,000,000,000 bushels. Basic export quotas will, it is proposed, be again distributed on a pro rata basis.

But from the basic quotas, under the new plan, five per cent. in each case would be set aside as a reserve. These would be utilized to meet the export needs of countries with more than average yields per acre as against countries with under-average yields.

It is hoped, furthermore, that institution of quarterly instead of annual quotas will tend to make the whole system of regulated exports more workable.

Naval Conversations

British Makes Attempt To Iron Out Some Of The Difficulties

London. — Reliable reports said Great Britain has taken definite steps to induce the United States representatives at two-power naval conversations here to abandon their opposition to compromise proposals put forward by the British delegation.

A lengthy surprise conference at which the British delegates further explained their plan—which would, it is understood, grant Japan naval equality in principle but not in fact—failed to shake the Americans' insistence on continuance of the basic principles of the Washington and London naval treaties.

The British representatives had asked for the meeting and in its course, it was learned, they asked many questions trying to get the United States delegates to offer substitute compromise proposals. All of these the Americans evaded.

Was War Nurse

Montreal Miss Harriet Edith Carman, one of the most distinguished of Canadian overseas nurses, died in hospital here after a brief illness. Miss Carman, who went overseas with the McGill hospital unit and served for nearly five years in military hospitals, being decorated for her services, was born in Winnipeg.

War On Insect Pests

Will Continue Increasing Fight On Wide Front

Ottawa. Plans for the continuation of the increasing war on insect pests on a front extending from the Atlantic to the Pacific will be thrashed out at a conference here on Nov 26 Thus all the officers in charge of the Dominion governments entomological and field stations will gather here to review the work done on insect control in the past few years and discuss plans for the future.

The last conference of this kind was held nearly a years ago, and the coming gathering is expected to have an important bearing on future policy The officers who will come from various parts of Canada are those who have charge of the field work of the entomological branch of the department of agriculture and they will meet in various groups with the headquarters staff here.

Grasshopper control in the prairie provinces will be an important matter under discussion, for the last few years have been difficult ones for the officials fighting the grasshopper pest and preliminary reports from field officers indicate next year will find the hoppers again attacking western grain fields in large numbers

Arms Situation Difficult

Premier MacDonald Urges Liberals To Solve Problem

Southampton, England Prime Minister Ramsay MacDonald reiterated his conviction that the only way to solve the disarmament problem is by bringing an international licensing system for manufacture of arms in a speech at Southampton

In addressing Parliament he expressed his adherence to the cause of peace while pointing out the difficulties confronting the government in dealing with the armaments question.

The government was zealously pursuing a peace policy he said but the foreign secretary (Sir John Simon) had to sit around tables not with peace-loving peoples, but with representatives who "do not share our views and have grievances."

"You can pipe but if they don't want to dance you cannot compel them," he said.

"We have got to accept armaments which I work day and night to diminish." he said, adding he would accept no defeat in his efforts to advance peace.

Fog Cost Three Lives

Transportation Paralyzed In Some Sections Of United Kingdom

London. A thick fog which cost three lives and spread generally throughout the United Kingdom, paralyzed transportation in some sections.

London and the area to the south were clear, but the country westward to Bristol and northward to Glasgow was thickly smothered.

A train killed two railway guards who were unloading mail near Derby, while a motorcyclist died after a collision at Kettering. Six fishing vessels collided off Lowestoft and fog held ships at Liverpool, while the Caledonia from New York was forced to wait at Greenock before proceeding to Glasgow. Shipping in the Bristol channel, on the Mersey river and the River Clyde did not move and boats for Dublin and Belfast were held up.

Was Nurse To Premier Of France

Pierre Etienne Flandin, erstwhile Minister of Public Works, who succeeds "Papa" Doumergue as Prime Minister of France. Said to be six feet in height (he never needed only 10 hours to put together the pieces of the Cabinet were left by Edouard Herriot a radical Socialists

Remains House Leader

Hon. George S. Henry Endorsed By Ontario Conservatives

Toronto. Hon. Geo. S. Henry former premier was endorsed as house leader for the Conservative opposition at the next legislature session by Conservative members in caucus here The meeting recommend a provincial convention be called immediately after the session to consider party leadership and policy

Karl K. Homuth former Conservative member for South Waterloo has called on Mr Henry to resign and to summon a convention to choose a new leader After the caucus Mr Homuth declared himself satisfied with the results and maintained he had "won the fight"

"I feel that the course I have taken was well worthwhile," Mr Homuth said "After the session is over the reorganization of the party as a whole can take place"

The members also recommended all Conservative candidates at the June 19 provincial election be summoned into conference with Mr Henry and his legislature followers before the session convenes The conference would be for the purpose of considering party questions and advice to members Mr Henry declared this would be done.

Labor Legislation

Proposed Changes Approved By The Ontario Cabinet

Toronto Proposed labor legislation of Hon. A W Roebuck, Ontario attorney-general and minister of labor, has been approved by the cabinet and will be submitted to the caucus of Ontario Liberals here this week, Premier Mitchell F. Hepburn announced after a lengthy cabinet session.

The premier in announcing the cabinet's decision, insisted the legislation had been incorrectly termed "radical." He emphasized that none with price-fixing in the United States.

Ontario's legislation has nothing to do with price-fixing, Mr Hepburn stated but is aimed to improve the social standard of the worker and combat cut-throat competition in industry The element of compulsion will be absent

An Irish Republic

Says German Steamers Unloading Cargoes At Irish Ports

London. — "Within a very few months President Eamon de Valera will be in a position to declare an Irish republic both de jure and de facto" declared John Morgan, professor of constitutional law at London University at a meeting of Irish loyalists here

The meeting passed a resolution calling on the British government to declare its intentions in regard to "repeated violations" of the Anglo-Irish treaty, outstanding of which is the non-payment of land annuities that led to the tariff war between Britain and the Irish Free State

Prof Morgan said "the so-called treaty was legally dead The Dublin legislature had abolished four of its most important clauses, embodying safeguards vital to maintenance of the British connection. He said loyalist friends in Ireland had told him that German steamers were unloading cargoes at Irish ports with the greatest secrecy, and he would leave his hearers to guess what those cargoes contained

Farm Club Movement

Thirty-Two Teams To Compete At Royal Winter Fair

Toronto Thirty-two club teams of two members each will compete in livestock and field crop projects at the Royal Winter fair here this week in competition for the title of the national club contests, held in connection with the boys' and girls' farm club movement

Only two girls are included in the teams coming to Toronto this year They are Bernice Hornbrook of the Burnt Poultry Club, Bancroft, N.B and Louise McDermont of the Hazelridge Poultry Club Hazelridge Man

Identifies Meisner

John Labatt, London Brewer, Declares Meisner One Of Kidnappers

London, Ont John S Labatt London brewer, identified David Meisner as one of three men who kidnapped him on a lonely western Ontario road last August and held him for almost 48 hours before releasing him near Toronto

Labatt was the first witness called at the preliminary hearing of Meisner conducted by Magistrate C W Hawkshaw

Meisner was committed for trial at the next assizes

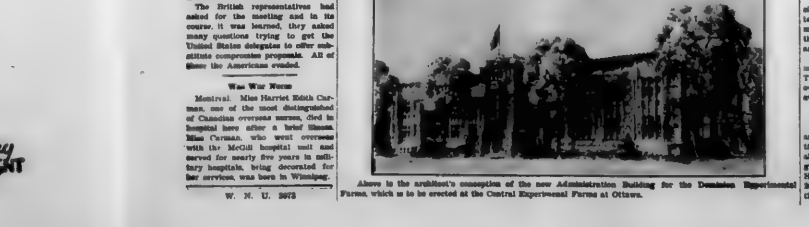
Saskatchewan Oil Find

Antigonish, N.S.—Dr Donald F MacDonald, associate professor of geology at St. Francis Xavier University and former United States government expert, has been granted leave of absence to report on a new discovery of oil in central Saskatchewan. He will leave shortly for the west, planning to return to the university within a month.

Air Mail Plane Crash

Sydney, Australia.—Four persons, three members of the crew and one a passenger, were killed when an Imperial Airways air mail plane crashed 29 miles from Long Reach Queensland. Long Reach is approximately 200 miles northwest of Brisbane The cause of the crash was not immediately known.

EXPERIMENTAL FARMS TO GET NEW ADMINISTRATION BUILDING



Above is the architect's conception of the new Administration Building for the Dominion Experimental Farms, which is to be erected at the Central Experimental Farms at Ottawa.

TO PREPARE FOR VOTING ON THE SAAR QUESTION

Geneva With Europe's pointiest atmosphere disturbed by reports German Nazis are planning to seize the Saar by force and French preparations to forestall any putsch the League of Nations council will meet Nov 21 to compete arrangements for the Saar plebiscite

Tension prevailing during recent weeks has been eased however, during the past few days as result of statements by German authorities that no putsch is being prepared and disclaimers by the French that they intend to send troops into the region

Residents of the rich Saar basin reversed since the treaty of Versailles by the league vote Jan 13 to remain under the league or go back to Germany or join France

German circles at Geneva expressed the belief the disarmament situation, insofar as Germany is concerned, may be clarified after the plebiscite which it is agreed here, will remove a serious problem from the continent's political life

The Germans however, insist there must be recognition of their right to equality in arms before they return to the disarmament conference

The council's chief task at its meeting here will be to devise ways of interpreting the will of the voters as expressed at the plebiscite

Pending a new treaty provision which declares a majority vote of the inhabitants will decide the issue for the territory as a whole If certain electoral districts vote overwhelming for league trusteeship or annexation to France, it is believed probable provide for the council to allocate these regions in accordance with the will of the voters

Winnipeg Bread War

Chain Stores Are Blamed For Cuts in Prices

Winnipeg Blaming chain stores for conditions in the baking industry which have led to a "bread war" in Winnipeg the Retail Merchants' Association submitted a brief to Premier John Bracken urging that immediate action be taken to remedy the situation

Enforcement of rules and regulations now on statutes of labor and health departments, it contended, would do much to alleviate the bakery troubles and enable independent bakers to remain in business

The brief referred to an order-in-council passed in Alberta appointing a deputy minister to investigate the Alberta baking industry, and the fact bakers there have submitted a code for approval so they may act under the "Trades and Industries Act."

The association charged chain stores would not permit retail shops to sell bread at the same prices the chains quoted, and consistently undersrut prices As a result, wages in bakeries dropped until "men worked 14 and 16 hours daily for as little as $10 a month. Quality of bread likewise suffered and in some instance was practically unfit for human consumption."

Bread prices in Winnipeg were as low as two loaves for five cents, and reports came from points in the district of drastic cuts in prices.

Canadiens Works Program

Cabinet Council In Session Attended To Routine Matters

Ottawa — Meeting in two brief sessions, cabinet council devoted its attention to an accumulation of routine matters. At the close of the sittings though, there was no matter on which an announcement was available

Public works program was the main subject under consideration Tenders for various works were gone over with a view to deciding the awarding of contracts.

Majority Against Lottery Bill

London The government's betting and lotterie bill, which forbids sale of tickets and publication of any news about lotteries and sweepstakes was given third and final reading by the House of Commons. The vote was 206 to 30. The bill will now go to the house of lords.

Good Success Is Attained In Search For Drouth Resisting Wheat Of High Quality

Six years' intensive study to-day is bringing success in the search for a drouth resisting wheat with all the qualities of the famed Marquis and Reward strains.

Unsuiting wheat, including all the desirable agronomical qualities, is being achieved although a few years more will be required before it is ready to be placed at the disposal of the growers," declared Dr O. S. Aamodt, assistant member of the department of field crops, University of Alberta.

Dr Aamodt took time out from the meetings of the numerous committees on grain research, a branch of the national research council, to describe what is involved. "But don't think we are producing a wheat that will grow without moisture," he warned. "That is impossible."

The characters developed so far in the drouth resisting wheat hybrid were the ability to resist permanent wilting, growth habit favorable to dry periods, intensity of root systems and ability to germinate in dry soils. "Experiments in actual growing in the last two years show clearly drouth resistance can be transferred from one variety to another and in combination with other desirable agronomic qualities," Dr Aamodt declared.

Ability of the strain to resist permanent wilting was among the major tasks. Many wheats in one new take root and start to grow but when a dry spell comes along they wilt and die. The objective in the drouth resisting wheat is to give it the ability to recover from the wilt a case of lying dormant when moisture is lacking and taking life again when rain falls.

The growth habit came in for study when it was found drouth caused its greatest damage when the green shoots started to appear. Tests made show that the drouth resisting hybrid goes through the shooting period in one week compared with two or three weeks for most other grains. Thus the danger period to the plant in its early stages is greatly reduced.

Intensity of the root system was a vital factor because the greater the intensity the more moisture the plant is capable of drawing from the soil. In this respect Dr. Aamodt pointed out past studies throughout the world were largely confined to the part of the plant above the ground.

Lives Like Robinson Crusoe

Governor Has Enjoyed Himself On Island Twenty-Two Years

Paul Tile, a German, has been living as a modern "Robinson Crusoe" on a small island near Port Joggins, for twenty-two years, and enjoying it. He was discovered recently and now crowds are visiting the place. Women, when they see Tile-khan, have "crushes" the island by wearing male apparel. The man has built himself a home, a workshop, mixed goats, kept bees, built a house inside fishing nets and tools, and grown, and fed his chickens. He has even built concrete bridges across the narrow strip of water which separates his island from the mainland. Tile, once was a German hotel keeper. He drowned his wife in 1912, and since then has always steamed into sight of a woman. He sold his hotel, and bought the island.

Learned Another Way

A hamptonee fellow was giving evidence in a police court.

"You say you stood up?" called the Magistrate.

"I said," retorted the crestfallen one, "that I stood. If one stands one must up. There is no other way of standing."

"Oh, isn't there?" replied the magistrate.

"Pay two pounds for contempt of court, and—stand down!"

Attendant: Do you wish to connect Wyoming Furlong, the great Chinese sprain?

Woman: Ay, hae—tell 'im 'e mother's 'ere from Lonnahrr.

Skilled Hand Considered

More Men Attended But Death Rate Higher For Women

Staff physicians of hospitals at Ste Agathe, who treated many heat victims last summer, are now checking over their records and nothing is known more light on the subject. Medical literature, they say, does not hold a great deal of information on heat attacks.

At General Hospital 82 cases were treated, of which 68 were heat exhaustion. In the former it was found the temperature usually was far above normal, but the body was cold and clammy. More men were felled by the heat than women, but the mortality rate was higher for women. Death resulted in 9.54 of the 82 cases, 22 of the deaths being among those suffering from heat stroke.

Other data showed that where the temperature reached 105 degrees death resulted in 69.4 per cent. Those who suffered from cyanosis (blue lips and finger nails) died in 78 per cent. of the cases. The death rate of those who lost consciousness, or became delirious, was 50 per cent.

The most outstanding feature of the October 1 survey of employment was the unusually pronounced expansion in bush operations, which directly provided work for over 7,000 persons. Among the co-operating farms Mining showed the greatest October 1 gain on record, transportation, building and construction trade reported considerable improvement over the preceding month. A slight advance occurred on the whole in manufacturing, but this is the first consecutive gain since the opening of the year. On the other hand, communications, electric light and power construction, and hotels and restaurants reckoned a large number of persons on the various season drew to a close.

Around The Way

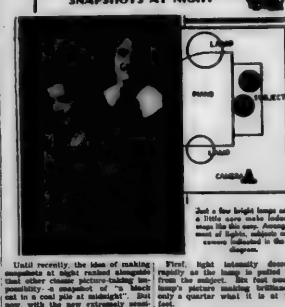
Rising salad, after his great victory, if he did not think others could have accomplished it. Columbus is said to have invited a number of men to make an egg stand on end. When he failed, Columbus struck the egg on the table and made it stand on the broken part, so suggesting that now he had shown the way to the New World anyone could follow it.

Canadian Employment Gains

Increase Of Ten Thousand Workers Shown As At Oct. 1st

Industrial employment in Canada at the beginning of October showed an increase of over ten thousand workers amounting to a substantial one, based by the Dominion Bureau of Statistics. Reports were received from 8,984 firms, whose staffs aggregated 953,686 persons, as compared with 943,675 in the preceding month. The gain in employment at this time of the year is particularly important, as in the thirteen preceding years for which statistics are available nothing has frequently declined between September and October. The index, based upon the average for the calendar year 1926 as 100 stood at 109.6 on October 1, 1934, compared with 98.8 on September 1, 1934, and 90.6 on October 1, 1933.

The most outstanding feature of the October 1 survey of employment was the unusually pronounced expansion in bush operations, which directly provided work for over 7,000 persons. Among the co-operating farms Mining showed the greatest October 1 gain on record, transportation, building and construction trade reported considerable improvement over the preceding month. A slight advance occurred on the whole in manufacturing, but this is the first consecutive gain since the opening of the year. On the other hand, communications, electric light and power construction, and hotels and restaurants reckoned a large number of persons on the various season drew to a close.



Just a few bright lights and a little care make indoor snaps like this easy. Arrangement of flash and subject is shown in the diagram above.

Until recently the idea of making snapshots at night ranked alongside that other elusive picture-taking lu-minosity—of making brilliant pictures out in a coal pits at midnight". But now, with the new extremely sensitive films and brilliant, inexpensive lights, reproduce indoors at night are as easy as any others.

Let's say you want to snap Rus-sell at the piano—remember that the backs and feels natural there—take a few practice shots with camera, to the side of the piano. There's an intriguing Scotch picture of those three-light affairs—just beyond the piano and another at your right. Both groups are fairly well in the field of your camera finder. Tilt the shades so that light reaching your subject is subdued. Put two or three photoflood lamps in the two lamps. Have them turned on, and, if you can, that's better for your subject, and in the meantime hang, turn was on—and shoot.

If yours is a box camera, either use a photoflood bulb or flash. (The latter is controlled a few pictures are shown.) Use the other hand, if you can, to make a second exposure with a bulb that's "finished" burning. By the time that the photofloods quite so much to the eye.

The Taylor compiled statistics for 1,200 of a number of with the brick industry, showing a total loss from the spoiling of 12.5 or greater.

The diseases which influence the relative burning of product, highest on the edges of the pile, and lowest on the floor. Obviously, you will arrange the lights as you see fit, but keep in mind these simple rules.

First, light intensity decreases rapidly as the beam is pulled back from the subject. Six feet away, a 500-watt lamp is making brilliance is only a quarter what it is at three feet.

Second, shield your camera lens from direct rays of light.

Third, while you can use photofloods (they cost a quarter and are good for at least two hours of picture making) in ordinary fixtures, they are more economical to operate—either home-made or inexpensively purchased.

Fourth, don't try to light up everything in a picture. Keep the background low and the highlights.

Fifth, avoid lighting that throws a glare into the lens—that causes fog. The result will be flat and unnatural. Sixth, always use reflectors. Seventh film. It's available in the standard makes, at very slight extra cost.

Indoor snapshots may also be made with daylight film. If you want to stop ping-pong players in their tracks, however, you'll need flash, incandescent flash bulbs are just the thing. Be very careful to follow the bulb's directions for their use, and never use them in an enclosed space. If you haven't a battery-operated flash outfit, you can easily use power line flash bulbs and socket—but be sure to follow the directions carefully, or you may get a shock.

The combination for indoor snaps is a fast film, a flash bulb and a reflector. If you haven't tried your camera indoors at night, you've missed a lot. And that's no fail.

JOHN VAN GUILDER.

Speaker Maintains That Drouth Is Only Passing Phase And Climatic Conditions Not Changed

CHOOSING YOUR SWEETHEART BY HIS HANDWRITING

By LAWRENCE HUBERT
(Graphio-Analyst)

(All Rights Reserved)

(Editor's Note: Many letters of appreciation have been received from readers who have accepted the author's offer of a personal analysis from their own handwriting. Have you sent yours? See the announcement following this article.)

The value of Graphio-Analysis is never more evident than when it is used to assist Cupid. For it leans aside the veil that now so often covers and reveals in unerring fashion the characteristics of the writer.

It is not merely a question of honesty and straightforwardness though these are points that have to be considered. The emotions and the degree of expressiveness of those emotions those are of vital import-ance.

Take, for example, a girl who has a warm and ardent nature; who feels things very deeply, and who engages that feeling. She likes to be loved and would be very unhappy without the affection of others. The source of happiness would she have married to a man who is cool and unemotional, who dislikes any manifestation of affection, and who is an extremely logical mind that he hasn't a generous streak in his nature?

Only the other day, I received a very poignant letter from a girl of 24 years of age. She was married two years ago, but had never been happy, since the first raptures departed. She is of the type I mentioned above, and asks me why she is unhappy, and wonders whether she is responsible

The writing of her husband, which she enclosed, shows that he has about as much feeling and affection as a piece of paper.

These two are mismated; I can see very little chance of happiness for them. Here's a case where the advice of a Graphio-Analyst would have prevented much unhappiness.

There is an old saying that opposites make the best combinations. This is fallacious. Look on every side of you, and you will find many people who are unhappy and discontented, because their natures are unlike.

Marriage demands affinity of interests. It is too much to ask, or to expect, that the average couple will have all the same interests, the same likes and dislikes and there is a good deal of compromise necessary in most marriages.

But a young couple whose natures are at the opposite ends of the pole are starting out with a tremendous handicap. And in most cases a penalty is seen by the number of unsuccessful marriages.

M. H., Toronto. By all means see your husband for divorce. Life is a sad case. Married four years ago, your husband left you three years ago, and now you meet a young man who loves you. He is a straightforward young man, and is trustworthy, which cannot be said for your husband. I am writing you direct regarding the personal matter.

Can the author help you? Can he show you what your friends are really like? A personal analysis may be very helpful to you. Send specimens of the writing they have analysed, and enclose 10c coin for each. Send with 3c stamped addressed envelope, to: Lawrence Hubert, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. Letters are, of course, confidential, and will be answered as soon as possible, but please allow about two weeks for your reply.

An Ancient Puppet Show

Small Figures 4,000 Years Old Found In Tomb

Marionettes have been found somewhat rubbish in the shaft of a tomb near the pyramid of Senosiris at Lisht. The tomb is of the twelfth dynasty, and other objects found in the rubbish are certainly of that period, so that there is no doubt the puppets are 4,000 years old. They are three figures two inches high representing little men dancing and clapping their hands. One of the toy is apparently half grown, having attained an small podendo they fit twenty inch on every stick, and both head and stick are pierced with holes through which strings can be threaded and pulled to make the figures dance.

"Did you pass your exam?"
"Well, it was like this—you see it—"
"Student Mother did I."

Studying Lake Of Reptiles

Expedition Finds Queer Creatures Within Borders Of Abyssinia

Lake Rudolf, in Africa, where reptiles rule supreme, so they have been for years, is being studied by an expedition which has established itself on the shores of a volcanic island four square miles. The brackish sheet of water covers 2000 square miles and is 1,000 feet above sea level. It is within the borders of Abyssinia, Kenya, and the Sudan. Crocodiles abound there, while monitors larger than man prowl slowly about, eager for the crocodile eggs on which they feed. They resemble dragons as they stand out their long purple tongues. Monster turtle ignore the crocodile, whose teeth would break against their hard shells. The few species of birds include pouched spoonbills, which lay orange-colored eggs on rocky ledges, water-loving cormorants and ospreys, who visit the lake only at night.

THE TENDERFOOT

CHAPTER V - Continued

"You see I ain't done much real cow-brand work. I was livin' in town and I got me a little bit o' money. I learnt what I could from a few books I read an' then I came West to learn the business an. That's how come I was hired ."

"Hah! Year . I . ! We are ! That's fine ." Baines took in the creaking newness of boots and clothing, the clumsy equipment on the pony and he grinned into his head. "I see you've got three matches on your gun," he said, with a grin at the others. "Where'd you buy it?"

"I bought it before I started West. All the books said that a notch is cut on the handle for every man who's been killed

"Great God all mighty," said Baines, all at once. "You mean you've killed three men? In Chicago with a machine gun I reckon . ."

"Nope . I killed with an automobile . . . I got all three of 'em at once It was just like killin' quail. They was all sittin' when I hit 'em. You see I was crankin' downhill an' the machine wrung off the roadside. They was all in the danged cavalcade just like you was when I rode up and they was talkin' a lot o' damn fool talk same as you So I killed 'em

At that even Silent Lee laughed

"Oh, let him alone," he said, grinning. "You'll get nothing offen him."

In this manner did Duro Stone come to the Hour-glass ranch.

The bunk-house did not know that Ruth Carr, the pretty, red-headed daughter of old Joe Carr, now the new arrival She was mixing a mint julep for old Joe who was sitting in his front doorway, his gaunt legs stretched out before him on a chair when Stone arrived. She promptly took her business to the back-office but was quite close enough to hear what took place.

"I've heard you want new ," quoth Stone. "I'm lookin' for a job."

"Eh! no?" demanded Carr. "What kind of a job?"

"Mostly cattle with a little unofficial drinkin' throwed in. I don't mind some drinkin' on a hot day, horse. I kin split wood and haul water an' . . ."

"By God," said Carr, "that's more'n most can do who hire out as cowhands. Know anything about cattle or is that outfit all bought from a catalogue?"

"Not all of it," said Stone, grinning. "I won the spurs in a poker game."

"You're hired. Get back over to the bunk-house and kill the first cowpoke who tries to play practical jokes on you."

Edith came back into the room giggling. "I'm glad never seen any one just like that before.

"Who in the world was that, Daddy?" she asked. "The bunk house a walking advertisement for Christmas presents."

"Looks like he'll do for you to play with, honey, when he ain't workin'. We're sure out of luck when we have to hire men like that. He ought to do to ride herses or leave the other men free for regular work. When Frank Crewe goes back home him to us, will you, please, honey?"

Edith gave him his julep, nodded her bright head and, picking up her quirt, passed out to the tie-rack where Duro stood. She was very young; distinctly more than merely pretty and she dominated every soul on the Hour-glass. As her father watched her go, his face darkened. His bad leg hurt him but other things hurt worse and a little later, when Frank Crewe came in for a chat, he found his boss and old friend in the depths. Crewe did not help matters, for his dark face was darker with wrath where ordinarily it radiated good humor.

"Nothin' right, Joe," he said cryptically. "We've been combin' the back-ranges for a week an' we got maybe four hundred. Not prime stock at that . . ."

"Four hundred. . . ." Joe Carr's long registered utter consternation. "The beginning of the round-up and only four hundred calves from more'n three thousand cows. . . ."

"Calves, hell . . . Crewe exploded, "a billin' you, Joe, this four hundred is all! Git that? It's cows an' calves an' steers an' bulls, too We've looked high an' low back-

Carr tried to rise but sat back with a groan of pain.

"Hell," he finally ejaculated. "That just ain't possible"

"I know it ain't And I know, too, where the stuff's gone but I'll be damned if I could either prove it to be our stuff or show how it was stolen. I know those damned robbers have got it but I can't get at the bottom of it. I know they sent two thousand head out to California two months ago to fatten for the market and I know they got seventeen dollars where we got eight-fifty. They're glad to ship their cows out o' the State. But we were asleep. We ought to have a man at the loadin' pens."

"I know . . . I know," said old Carr placatingly "I didn't have a man to send, as you know, and I didn't have the money to hire an extra man. I'd give a lot to pin what I know Dustin is doin' on to his card. But I can't. I wish to God we could find that man Gerald Keene. We've talked him over so damned often that I've got to sort of feel that he's one of us. I'm sure he'd help us if we could find him. I don't know but what he might. . . ."

"Huh. If you could get in touch with him, he might" commented Crewe. "Somethin's got to turn up . . ."

"Yeah. Like a hoe-handle when you step on the blade an' hand your fool brains out," said Carr viciously. "I got to borrow money to meet our next pay-roll, Frank. I reckon I'm busted flat. I'm sixty-five past and I've got Edith to take care of . . . She didn't come till I was past forty, Frank. I've got to find some way to take care of her

"You needn't worry about her," said Crewe, who openly adored her. "Plenty of men'd be glad to relieve you of that care Sam Dustin, for instance . . ."

(To Be Continued)

Where Minutes Count

A pneumonia patient should be given emergency treatment as quickly as a man hit by a truck, Dr. Russell L. Cecil of Cornell University told the Oklahoma City clinical conference. Describing pneumonia as an illness where minutes count, Cecil related recent discoveries which have made detection of pneumonia possible within two hours Previously as long as two days had been required for the definite diagnosis, he said.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child on Unknown Remedy to Take

Every day, unthinking, mothers take the advice of unqualified persons — instead of their doctors' — on remedies for their children.

If they knew what the scientists know, they would never take the chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia" is the one to buy for your child."

Remember this — And Always Say "Phillips'" When You Buy. Your child deserves it; for your own peace of mind, see that you get it — Genuine Phillips' Milk of Magnesia.

Also in Tablet Form

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores every where. Each tiny tablet is the equivalent of a teaspoonful of liquid Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

Ask Mother — She Knows

Mother took this medicine before and after the babies came. It's now a best mate to strength and energy when she was nervous and rundown . . . help her on the look all through the Change. No wonder she recommends it.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Mothers adopt Vicks Colds-Control Plan

Helps the Whole Family to Enjoy Greater Freedom from Colds

Doubly welcome to mothers is news that the makers of Vicks VapoRub have perfected a Plan for Better *Control* of Colds—to help reduce the *number*, *duration* and *dangers* of colds. Vicks Plan is introduced along with Vicks Va-tro-nol, the remarkable new aid in *preventing* colds—companion product to Vicks VapoRub, the modern method of *treating* colds. The Plan includes simple, easy-to-follow rules of health—to build resistance to colds.

TRIAL OFFER BY LOCAL DRUGGISTS

Get these two Vicks products and use them as directed in Vicks Plan for Better Control of Colds. Full details of the Plan are given in each package of Vicks Va-tro-nol and Vicks VapoRub. Unless you are delighted with results, your druggist is authorized to refund your money.

BRIEFLY, HOW VICKS PLAN WORKS:

• TO HELP PREVENT COLDS
At first *sniffy* feeling, that first nasal irritation or sneeze, quick!—Vicks Va-tro-nol—just a few drops up each nostril. Especially designed for nose and upper throat—where most colds start—Va-tro-nol stimulates the functions which Nature has provided—in the nose—to *prevent* colds and to throw off colds in their early stages. Used in time, Va-tro-nol helps to avoid many colds entirely.

• TO HELP SHORTEN A COLD
If a cold has already developed, apply Vicks VapoRub at bedtime. VapoRub acts *direct* through the skin like a poultice or plaster, while its medicated vapors—released by body heat—are inhaled *direct* to inflamed air-passages. This *double direct* attack loosens phlegm—soothes irritated membranes—eases difficult breathing—helps break congestion. Often, by morning, the worst of the cold is over.

Faster Way Found to Relieve Headaches

NOW PAIN OFTEN RELIEVED IN MINUTES!

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe — *Aspirin*.

Millions have found that *Aspirin* eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an *Aspirin* tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain practically as soon as you swallow it. Usually impersonal, *Aspirin* is safe. For scientific tests show this: *Aspirin does not harm the heart.*

Remember these two points: *Aspirin Speed* and *Aspirin Safety*. And, see that you get *ASPIRIN*. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every *Aspirin* tablet.

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

IN 3 SECONDS BY STOP WATCH — Drop an Aspirin tablet in a glass of water. Note that BEFORE it reaches the bottom it is disintegrating.

At last Aspirin is ready to go to work. Already millions of tablets have begun to relieve pain. Aspirin starts to relieve pain in a few minutes after taking.

LOCAL NEWS

Mr. Harry Peters, Mr. Dave Gunn and Mr. Dave Roberts, are attending the Alberta Association of Municipal Districts convention in Calgary on the 21st, 22nd, and 23rd of this month.

The dance held on November 13th, was not under the auspices of the St. George's W. A.

Several inches of snow fell over the past week-end, bringing a decided change in the weather. Wednesday morning bit ten below for the first time this season.

Lord and Lady Rodney have left for the Old Country, where they will spend the winter.

The travelling "Minstrel", Wm. J. Carter called at The Record office today and clipped off a few old-time tunes on several whistles and on a old violin, which is said to be 150 years old. Mr. Carter is working his way back to Saskatoon by playing at various towns along the line.

Don't forget the annual Nothey Dance on Dec. 7th. (Watch the Record for further announcements.)

Miss E. Fairman of Edmonton, has been visiting Mr. and Mrs. A. H. Rogers for the past week.

A large number of Personal Greeting Card orders are ready for delivery.

The Fort was well represented at the benefit dance of the Horse Hill U.F.A. last Friday evening in the Community Hall.

At midnight refreshments were served in the basement of the hall after which everyone enjoyed another two hours of dancing.

BORN

Born to Mr. and Mrs. C. Edwards of North Cooking Lake on November 8th, a daughter, Mary Lesley.

Curfew By-Law To Be Enforced

A regular meeting of the Council of the Town of Fort Saskatchewan, was held in the Council Chambers on Wednesday the 21st, at 8 p.m.

Present: Mayor Montgomery, Councillors Magor, Watt, Graham, Gant and Pettet. The minutes of the last meeting held were read and adopted.

Instructions from the Charity and Relief Department regarding unemployment relief submitted to Council.

A resolution was passed accepting the offer on $25.00 for the house lately occupied by J. Littlechild. Mayor Montgomery voted against the motion.

A motion was passed that arrangements be made for snow plowing the streets and sidewalks as required, as has been done in previous years.

The Council agreed to let the Girl Guides have the Council Chamber on Monday evenign, when the hall is not otherwise required.

Complaints were made to the Council about hogs roaming the streets and making themselves objectionable, and the Town Constable was instructed to see that the Curfew by-law was strictly enforced. In this connection the Council asks the kindly co-operation of parents and guardians.

The monthly financial statement was submitted and filed.

The following accounts were passed for payment:- Fort Hardware Co., $37.55 for sanitary benches; Northwestern Utilities Ltd., $40.00 for 8 lengths of 10" pipe; Freight and cartage on piping $19.39; Calgary Power Co., $139.55; Glover & Graham, coal $15.80; F. Ethertan, coal $23.13; F. Etherton, gravel and grading etc. $7.00; F. Chambers, gravel $9.80; Telephone Co., $9.85; Western Canada Stationers $1.00; Beaver Lumber Co., 26.35; University of Alberta Hospital for info Mrs. Ford $147.20, and Royal Alexandra Hospital for Almoner Whitford $34.50; W. G. Ross Insurance $7.50. Howard & McBride, Funeral expenses Mrs. Ford $87.50, and Funeral expenses late J. Lorne $60.50; For labor preparing streets for piping $12.00.

Wedding Bells

A wedding of very great interest which took place on Sunday at Fort Saskatchewan, was that of Miss Evelyn Jeanette Anderson, daughter of Mr. and Mrs. F. W. Anderson, of Edmonton, to Mr. W. Clayton Rumble, son of Mr and Mrs. W. F. Rumble, also of Edmonton, Rev. E. J Hoigins officiating.

Mr. and Mrs. Rumble have taken up their residence at 10051-107 st.

BIRTH NOTICE

Mrs. Jeanette Jane Steel

Jeanette Jane Steel, beloved wife of W. H. Steel of Gibbons, Alberta, passed away at Gibbons on November 20, aged 51 years. She is survived by her husband. The funeral service was held on Wednesday afternoon at 2:00 p.m. at Howard & McBride's chapel. Rev. R. C. Ramsay officiated and interment took place in the Edmonton cemetery Howard & McBride, funeral service.

WHO WANTS CARAGANA?

The Dominion Experimental Farm at Lacombe will supply a reasonable amount of caragana seed to all farmers desirous of starting a shelter belt. Seed and instructions will be supplied on receipt of a request accompanied by stamps to cover postage or express charges. Two pounds of seed requires 1lb postage and will seed about 2000 feet of drill.

Skating Rink Opens Monday Fort Band in Attendance

At a meeting of the Executive of the Curling Club held at the Curling Rink on Tuesday, Nov. 27th, it was decided to undertake necessary alterations and repairs to the lighting system on the skating ice to ensure adequate and satisfactory light for both hockey and skating. A Grand Opening night will be held at the skating rink on Monday night, Dec 3rd with the Fort Band in attendance.

A nominal charge for adults with all children free. No charge for these holding 1935 35 season tickets.

The Roaring game will get under way at an early date. A general meeting will be held at the rink on Friday, November 30th for the purpose of electing skips and lining up rinks. A cordial invitation is extended to all interested to be present. Come along and let us get away to a good start. Fees are moderate.

Appreciation was voiced by all present for the generous assistance received from Warden McLean in preparing the ice.

The expected arrangements will be completed by the Curling Club for a Grand Dance on New Year's Eve.

C.G.I.T. News

On Monday evening, November 26th, the "Happy Heart" and "Northern Lights" groups of the C.G.I.T. met in the United Church classrooms. Each group held their usual business meeting, then a Department meeting was called. Margaret Glover was elected President and Gilda Bacco Secretary-Treasurer for the season.

An "Opening Ceremony" was held, each Group taking part, after which Mrs. L. O'Brien, the Supit., gave the meeting a "Travelogue of India", which was greatly enjoyed by all.

The Leaders, Mrs. C. McKenzie and Mrs. S. Dennis thanked Mrs. O'Brien, for her most interesting lecture. The meeting closed with Taps.

DANCE SUCCESSFUL

The Fort Saskatchewan Badminton Club held a very successful dance last Friday evening in the Badminton Hall, when a large crowd attended and enjoyed a program of old and new dances. The music was supplied by Frank Smith's Orchestra. At midnight dainty refreshments were served after which dancing was resumed until the usual hour.

PERSONAL JOURNALISM

(Vancouver Sun, October 29)

Vancouver is host today to members of the British Columbia and Yukon Press Association.

It is a pleasure to make them welcome, for these men are outstanding individuals in a journalistic group that stands taken on the whole profession of journalism.

The editor of a metropolitan newspaper, immersed in moving world events, sometimes loses touch with the realities and verities of life.

But the editor of a country weekly is rooted pleasantly and usefully in the very soil of his community. He not only gets to know events but to know men.

His is a personal journalism. His is a high and personal service. His is a fine duty of community leadership.

Then the weekly newspaper and weekly newspaper editors are one of the most influential and benign forces in the life of this continent.

This convention in Vancouver is the more notable in that British Columbia weekly maintains a standard of journalistic efficiency that is unusually high.

We are proud of our provincial papers. We are proud of the men who operate them.

And we are glad to have them here.

CHRISTMAS MAIL FOR OVERSEAS

Parcels and other mail for delivery in European countries for Christmas should be mailed within the next week and at the very latest to connect with the S.S. "Duchess of York" sailing from St. John, December 6th and from Halifax, December 9th.

Girl Guide Notes

The regular weekly meeting of the Girl Guides was held Monday, Nov 26th, in the Town Hall. The meeting was begun by inspection and unfurling the flag, then Gladys Wedgewood was presented with her tenderfoot badge and made a member of the Guide group.

The patrols then went to their corners and work was continued for the second class tests. The meeting was brought to an end by prayers and furling the flag.

The next meeting will be held with the Boy Scouts on Tuesday, Dec. 4, in the Town Hall.

The Observer

We have been treated this week to a wonderful spectacle, the whole country side decorated with diamonds and festooned with pyres of pearls on a scale so lavish that an Indian durbar would seem like the garnishing of a peasant stand by comparison. A breath from the King of these northern latitudes and the thing is done. These are some of the compensations for our living in the north. Prince George and his Princess may take these as our contribution to the preparations for the royal wedding. He will certainly not find anything finer anywhere in the kingdom.

Reciprocity is a good thing, both in spirit and in fact, for both parties. It is more than merely a business of "you scratch my back and I'll scratch yours". It is a recognition of common interests, an acknowledgement of the fact that both parties are contributing to the same cause and helping to advance the interests of the same neighborhood. It may be practised between nations, between states and provinces, between communities and also between citizens of the same community. When you patronize the merchants of your own town you are not only helping them but you are also helping yourself. Their taxes are helping to maintain the school which your children attend, and their contributions and gifts help to support the church and the societies which make up your social and spiritual life. I don't suppose that the butter or the cream or the fowls I can get in this district are any better than those I can buy in the market in Edmonton and they may even cost a trifle more, but I would feel a little ashamed if my neighbours here found me making such purchases there; and conversely I should feel a little bit critical of those if they passed me by to obtain in another community a service I was able and willing to give them here. A town is something more than an elevator, a post office and a railway station.

Exports of Canadian fish and fish products during 1933 had a value of $30,323,610, an increase of 9% over the previous year.

4 Pages of Christmas suggestions will be featured by Fort Merchants in next week paper. Watch for it.

Fort School Children Get Holiday Thursday

The Fort Saskatchewan School Board has declared Thursday, the 29th instant, to be a school holiday, in honor of the wedding of Their Majesties' youngest son, Prince George, the Duke of Kent, and Princess Marina of Greece.

Hon. Perren Baker, minister of education, on Monday issued the following statement:

"School holidays in Alberta are fixed by law and the Lieutenant Governor in Council apparently has no authority to declare a school holiday. It is hoped, however, that school boards will respect the wish of His Excellency the Governor General, by granting the children a holiday on Thursday, November 29th.

"The day will be counted a school day by the education department in recovering of school grants."

The minister acknowledged receipt of a wire from Hon. C. H. Cahan, secretary of state, expressing His Excellency's desire that a holiday be granted.

The Royal Wedding ceremony will be broadcast Thursday over a coast to coast network and can be picked up at 8 a.m. A reproduction of the Wedding will be again broadcast at 7 p.m Thursday evening.

PLUG SMOKING TOBACCO

The Trend of Population and Power

"Go West, Young Man." Such was the advice tendered by a great American to the youth of the United States back in the last century. It was based, probably, upon a knowledge of the vast resources and wealth of opportunities of that then largely unsettled area. It would have to be united from a study of the movements of people throughout the ages of the past, pointing to the historical fact that "westward the course of empire takes its way." At all events it is interesting to note that, for some reason or other, the business of this country's population is largely from the east to the west.

In the dim dark ages of the past, Europe was settled by the migrations of people from Asia; Christopher Columbus discovered America; the pioneers who followed him opened the way for the great movement of people across the Atlantic from the countries of the old world to the new western world of the Americas, and on this continent the trek of people has constantly been a steady stream from east to west. The "Canadian Pacific" was the first, but even there the advice and slogan to-day is "Go West, Young Man,"—toward into the new Japanese protectorate being carved out of Manchuria on the mainland of Asia.

In Canada we are, of necessity, profoundly interested in this trend of population to the west. It has already had a tremendous effect upon national and economic policies in this Dominion, and it is certain to have an even greater significance in the years that lie ahead. Nor is it without its significance and value that this movement of population in Canada parallels the similar movement which has occurred and is still continuing to the south of the international boundary line of the 49th parallel.

The extent and rapidity of this western movement of population is revealed in a recent article in the Canadian Geographical Journal under the title "The Centre of Population Moves Westward," based on figures revealed by the census taken every ten years. As recently as forty years ago, (1881), only 7.9% of the population of Canada was to be found in the four Western provinces, but that percentage has risen by progressive steps until at the last census, taking, (1931), 29.9% of Canada's population resided west of Lake of the Woods and Lake Nipigon.

At the time of Confederation, the centre of population in Canada was near the city of Montreal; at the time of the last census in 1931 the centre of population had moved westward nearly 400 miles and was located near Sault Ste. Marie, and practically 260 miles of this westward travel have taken place since the beginning of the present century.

Not only is the centre of Canada's population moving westward, but it is also moving northward. This is accounted for by two major factors,—the opening of the vast mineral regions of the pre-Cambrian area, and the fact that the Western Provinces lie in higher latitudes.

This movement of the centre of population steadily westward is, as already stated, having a pronounced effect upon both the political and economic life of Canada. Under our constitution, representation in the Parliament of Canada is based upon population; consequently the determining influence in national policies is steadily shifting westward, and the voice and views of the West becoming stronger. To-day, practically one-third of Canada's population resides west of the Great Lakes, and as these trends of population westward continues, albeit not quite as marked as in the past few years, there will obviously political power almost equally divided between east and west, with all that such equality of power may mean in the national policies of the Dominion.

Coincident with this shift of the centre of population, and as the natural and inevitable result of it, the centre of manufacturing activity likewise moved westward. In 1850, the centre of manufacturing was midway between Kingston and Peterboro in Ontario; now, forty years later, it is found midway between Hamilton and Sault Ste. Marie, and is, therefore, only about 60 miles behind that of population. It is estimated that within a few years the centre of manufactures is nearly 130 miles behind that of population in the western provinces.

With the opening up of the northern mineral areas of Manitoba, Saskatchewan and Alberta,—which gives promise of being the greatest development in the West as it was in Ontario and Quebec in recent years,—and the further development of the Churchill-Hudson Bay route, another westward shift will take place in the economic relationship as between east and west, and further impetus given to the western movement.

Such developments are bound to have a marked effect upon both the political and economic life of this Dominion. It is true that as the centre of population of manufacturing moves west, the relative importance of agriculture increases, and it is to be expected, therefore, that the westward movement of these centres will not be as rapid as in the days of heavy immigration and the settling of the prairie areas. But the northern development of the northern half of the Dominion will speed up the westward movement. The advice and slogan to youth to-day is not merely "Go West," but also "Go North."

WHY SUFFER FEELING IS LONELY LIFE

Make up your Liver Bile

Dr. Chase's Nerve Food

Sufferer From Pleurisy

Mrs. Lucinda R. Young, an obscure of St. Louis, is grateful for the benefit she received from a poultice for pleurisy. Her letter is one of many received from users of this poultice. The plant, pleurisy root, is a favorite at Christmas time, known in southern states.

One secret of success in the cities to keep your eyes young.

Canada's Pension Bill

No Provision Yet Made in Regard to Pensions

Canada takes far better care of her criminals than of her destitute blind, stated Dr. Layton, president and founder of the Montreal Association for the Blind, declared at the 20th annual meeting.

Australian blind received a pension at the age of 16, he explained. New Zealand had since 1898 effective legislation to insure the welfare of her blind population. But only did blind people receive a pension in Great Britain, but the carnage of blind workers were supplemented by the government and this was done despite the heavy taxation burdens placed on the shoulders of the British people, Mr. Layton commented. Both in Northern Ireland and the Five State province were granted to the blind.

In Canada there is no system of pension for the blind. The way of the blind was particularly hard. Even those who were fortunate enough to get work received only the bare necessities of life.

Not only is this activity causing much consternation to the local pedestrian population, but it is also bringing sorrow to dog-lovers, many of whom have been victimized. The latest dividends involved in this heartless traffic smash the reasons that render the license of their owners and other collect a reward for the animals' return or sell them to hospitals. Considerable sports there is to be had among alarmingly large proportions. The dogcatcher wakes with the morning that only the more expensive types of dogs are dispossessing. They have also decided on a method of dyeing the dog's hair so that recognition is almost impossible.

If the owner of some expensive type of dog refuses to pay the demanded reward, the canine is dyed and shipped to some other city and there sold at a profitable sum.

Squirrel Fights Hawk

Succeeds In Killing Bird After Dust In Air

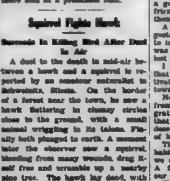
A dust to the death in mid-air between a hawk and a squirrel is reported by an amateur naturalist in Jacksonville, Illinois. On the horse of a farm house, he observed a large hawk fluttering in clumsy circles close to the ground, with a small animal wriggling in its talons. Finally, with plunges into the air, the hawk rose to the observer saw a squirrel emerging from many wounds, drag itself free and commence to lick the fallen prize. The hawk lay dead, with blood pouring from a wound in its throat.

Three Cages In Honey

Leyniss (fruit sugar), one of the three sugars found in honey, is the most granulating and is usually the predominating one. The other two sugars, dextrose (grape sugar) and sucrose (cane sugar). Dextrose is a rapid granulating sugar. Sucrose is present in honey only in very small quantities.

Sure Signs

of [illegible] troubles are pain in the back, dizziness, [illegible] and disturbed kidney action. Gin Pills relieve these troubles by helping the kidneys in flushing off poisonous matter. Get a box at all druggists.



New Plan Helps Mothers Solve Problem of Colds

Mothers Adopt Plan by the Makers of Vicks VapoRub for Better Control of Colds in the Home.

Introduced with the Remarkable New Aid in Preventing Colds—Vicks Va-tro-nol

Every mother is burdened with the problem of colds especially the frequent colds of children. It is good news indeed then, that the makers of Vicks VapoRub have perfected a Plan for Better Control of Colds in the home. The helpfulness of Vicks Plan in reducing the number and duration of colds has been tested by 2,500,000 people and proved in every day home use by thousands.

Tried Only to Vicks Users

Vicks Plan is introduced along with the new Vicks Va-tro-nol, based on a new idea for preventing colds—companion product to Vicks VapoRub, the modern method of treating colds. Get a bottle of the new preparation and keep it beside your jar of VapoRub for use as directed below. Unless you are delighted with the result, your druggist is authorized to refund your money.

YOUR HAND WRITING REVEALS SECRETS OF YOUR CHARACTER

By LAWRENCE HIBBERT
(Graphic-Analyst)
(All Rights Reserved)

(Editor's Note: Many letters of requests have been received from readers, who find these articles on Character from Handwriting extremely interesting and of absorbing interest. Read the authors offer to you at the end of this article.)

* * *

One of the most interesting features about Graphic-Analysis, the science of Character Reading from Handwriting, is the opportunity it presents of finding the truth about oneself.

Oh, and some power the gifts gie us
To see ourself's as ithers see us!
—Burns.

Burns spoke truly when, in those memorable lines, he expressed the difficulty of people to really know themselves. Graphic-Analysis provides a power that opens the door to self-knowledge.

Nearly a year ago, a young lady wrote to me, and explained that she was a poor, but honest girl, had a good-looking, and educated, but had a good personality. She could make friends easily, but could not keep them!

A glance at her handwriting suggested the reason. She was inclined to indulge in sarcasm, and this will was rather biting. No wonder she had her friends!

I told her the truth. I suggested that she curb this tendency, and cultivate a more kindly disposition towards people.

Not so long ago, I had a letter from her, in which she expressed her gratitude for my advice, and told me that she no longer found her friends deserting her like had cared because she had "sarcastic tongue."

The unfortunate thing about handwriting is that, as yet, the majority of people do not know that we are guilty. Their handwriting is the mirror that reveals the truth.

That is where the Graphic-Analyst is able to be of great help to you.

B.J., Winnipeg.—You have a very great emotional capacity. And you are very expressive of your emotional power. Keep you along. You must gain control over them. Of course, I will not be easy, but it is worth the effort. As it is now, you are swept hither and you, without any check or control, and you are liable to do things, and say things, that you will bitterly regret afterwards.

W. J. R., Regina—Yours is a very reserved nature. You feel deeply, and reserved nature. You feel deeply, but you are backward in expressing your feelings. You keep your reserve almost to a point of coldness, and alienate friends, against your will. The cure is in your own hands. Try and cultivate a friendly disposition towards people and you will find that people will reciprocate, and you will be better liked for the present time, you do feel for those people, and their sorrows. How you do not show this feeling.

Do you want to know the weak points in your character? The author will tell you what you are really like. And would you like to know what your friends really are? Send specimens of the writing, you want analysed, and receive 10c coin for each specimen sent, with a stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Free Press. 170 Hibbert Bldg., Winnipeg. Specimens must be written in ink, on one side of the paper only, and must be signed by the writer, stating age, sex, and whether married or single. Only one specimen will be analysed in each issue. Address envelopes clearly, and write your name and address on the back of the envelope. Allow at least two weeks for your reply.

Anti-Grasshopper Campaign

Saving Of Wheat Seed Is In Western Provinces Is $1,824,000

The anti-grasshopper campaigns saved $17,760,000 for farmers of all three prairie provinces, according to a Searle Grain Company report. The estimate of wheat saved for Alberta, Saskatchewan and Manitoba was 26,-[illegible] bushels.

Unofficial information gives the cost of fighting the grasshopper pest as 11 three provinces as considerably [illegible] $1,[illegible].

Alberta's campaign accomplished the greatest saving in the three provinces: 11,339,000 bushels or 18.11 per cent. of the harvest.

In Saskatchewan it saved [illegible] bushels or 21.50 per cent. of the harvest.

In Manitoba it saved [illegible] bushels saved or 18.60 per cent. of the harvest.

Grasshopper infestation wreaked a loss of 14,943,000 bushels of wheat; in oats, 1,907,000 bushels; in barley, 1,-[illegible]cheven, 6,344,000 bushels, and in Manitoba, 4,082,000 bushels.

United States Sends Protest

Complaint To Peron Regarding Machine Gunning Of Plane

The United States has formally protested to Peron against the recent machine-gun shoots there recently to two United States entrants in the England-Australia air race.

In a note that made no pretence of friendliness, detailing the treatment accorded John H. Wright and John Polando when they made a forced landing at Coy, Lt. Commander Hannersrah and Alsedan because of minor engine troubles, the United States note was "at a loss to understand" the action of the Peruvian authorities.

Although granted Peruvian permission to do so, the aviators that country and that there if necessary, Wright and Polando were detained 24 hours and subsequently withdrew from the race at Karachi, India.

The Acropolis in Athens even in ruins is one of the world's most famous pieces of architecture.

Bad Weather Hard On Russian Silo

Cold which, rain and snow are the greatest enemy of the silo, composed of brush, such said Sec. Bad weather does not affect the silo, but it does affect the material and eventually cracking and chopping.

Since 1875, millions of men and women have called in Black Flag and Rough Cross for greater skin protection and skin comfort in bad weather. A small, [illegible] in bad weather. A small, [illegible] Cream gives relief immediately upon [illegible] skin, soothes and heals the [illegible] skin, soothes and heals the chapped skin, soothes and heals the [illegible] skin, soothes and heals the chapped skin, soothes and heals the [illegible] skin, soothes and heals the chapped

Try KRUSCHEN NOW!

At no expense to you

If you suffer from rheumatism, neuritis, backache or injuries you should try Kruschen Salts right away because your drugget is offering a FREE trial at Kruschen for a limited time only. Ask him for the Kruschen Guest Package which contains a regular bottle and a FREE Test Bottle. After using the Test Bottle, contrast with the Regular bottle—unless you are not completely convinced that Kruschen will do every thing claimed for it, in which event your druggist will return your money if you take the regular package unopened.

But millions of people testify as to Kruschen's effectiveness, for in 119 different countries nothing else has been found that gives the same results as Kruschen. Let your package without delay. The supply of Free Trial bottles is limited.

WORLD HAPPENINGS BRIEFLY TOLD

A giant flying boat with a cruising range of 3,000 miles and intended ultimately for experimental flights across the Pacific ocean is now being tested for his worthiness.

Fred Burns, Canadian Pacific telegraph messenger, found three pearls in a quantity of oysters brought in to Westcott, Ont., fish shore. One pearl was valued at $35 by a jeweler.

J. N. Cartier, of Montreal, has been appointed vice-chairman of the Canadian Radio Commission. The announcement was made by Minister of Marine Alfred Duranleau. Mr. Cartier succeeds Thomas Mahon, who resigned in August.

Rear-Admiral Richard E. Byrd flew deep into southeast Antarctica, and reported he had made important discoveries of conditions in the interior lands of unexplored square miles covered in the first few hours of the hour.

The medical faculty of McGill University, Montreal, will receive a bequest estimated at $100,000 under the will of the late Mrs. Blanche Elmore Payne Hutchinson, probated at $162,-000 in supreme court before Mr Justice H. B. Robertson.

Dowager Queen Marie of Roumania hopes to visit North America again some time soon, taking her grandson, young King Peter of Yugoslavia, with her. From there she hopes to continue on around the world.

Purchase of 50,000 pounds of beef by the Alberta relief commission for distribution as food for relief purposes and as a measure to partially relieve the extremely critical beef market of the present time, was announced by Hon. F. S. Grisdale, minister of agriculture for Alberta.

Duplication Of Blame

Freighter Refusing To Change Company Also Called "Queen Mary"

It has been discovered that there is a small freighter called Queen Mary belonging to a Glasgow company, the owners of which have generously changed the name of their packet to Queen Mary II. Some pups are not knowing that there was a racehorse called Cyclops, an Englishman chose the name for his motor launch, but was refused and he called it Cyclops II. But registration was again refused because there was already a Cyclops II. So he named his house, Cyclops Two. Possibly we shall see Queen Mary Two, too.—St. Thomas Times-Journal.

Approximately 11,000,000 acres are spoken by the average man every year.

Little Journeys in Science

BACTERIA IN THE SERVICE OF MAN

(By Gordon H. Grant, M.A.)

Scientists believe that bacteria were the first forms of life on the earth. Many people believe them to be a form of animal life, but such is not the case, for they are lowest plants which can only be observed with the aid of a microscope. These small one-celled organisms are very important because all plant and animal life depends on them. Every person has millions of them in his body some of which are beneficial. Others cause illness.

All infectious diseases are due to bacteria. Some are contagious, and influenza by passing entrance to the blood stream. Some they only may cause illness. Typhoid fever, lymph fever, hydrophobia and the bubonic plague are also due to these organisms, which result in death if they get beyond control.

Some bacteria are very useful to man and everything much to his well-being. Rawhides could not be changed into leather without the use of certain bacteria, and it would be impossible to make certain kinds of cheese without their assistance. Farmers or labours it will be interesting to know that special bacteria farmers are due not so much to the influence found in certain kinds of bacteria which take part in the curing of the leaves.

The fact of existence that bacteria perform for man is almost endless, but perhaps the most important one is the changing of inert into a form in which it can be used by plants. Woodstock, Ontario, fish shore. One pearl was valued at $35 by a jeweler.

Buying Special Privileges

Large Sums Paid to Peer For This and That

Lord Nelson a perpetual pension of £2,000 a year is to be bought out, and his in the last of such pensions. In 1924 the £2,000 a year granted in 1783 to Lord Rodney for his great victory over the French was commuted for a sum of £42,000. Large sums have been paid to the past to buy out the privileges of certain peers. The duty of a shilling on every ton of coal exported from the Tyne granted to the Duke of Richmond and his heirs in 1674 was redeemed by a payment of £633,333. The Duke of St. Albans received £18,335 in compensation for his dues as Master of the Hawks, while £478,000 was paid to a former Duke of Atholl in exchange for his sovereign rights in the Isle of Man.

Mourning Doves: Their Habits and Migration

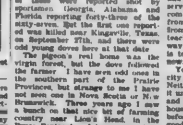
By JACK MINER.

Among my earliest recollections of my dear mother is how she would gather us kiddies about her and try to teach us how to distinguish the different birds by their calls. We can tell the Red-Headed Woodpecker from the Black bird and so forth to tell the Wild Pigeon from the Dove was a different problem as both were white eggs that hatch in two days. The hole and protect their young from their own prying comment, the old dove usually sits on nest of eggs while Cock Bird follows day. Consequently one of these twins is a twenty-four hours the oldest. We have known them to fly in less than but usually from twelve to fifteen hours. This year we have found several nests on the ground in the cornfields. The dover only protection from their natural enemies in their speed and their ability to locate their protection I often see one hundred or more rise out of a corn field, who discovered and pursued by a winged enemy.

Last year I handed about five hundred and eighty dozen Sixty-seven of these were shipped to the Georgia, Alabama and Florida reporting forty-three of July sixty-seven. But the first one report of was killed near Kingsville, Texas, on September 27th, and there were odd young doves here at that date.

The pigeon's real home is the virgin forest, but the dove followed the farmer. I have seen odd nests in the southern part of the Prairie Provinces, but strange to me I have not seen one in Nova Scotia or New Brunswick. Three years ago I have seen them on that nice bit of farming country near Lion's Head, in the Bruce Peninsula. I have also found on Manitoulin Island and this year I saw a pair near Huntsville. Ontario. I have every reason to believe that the younger generations are going to be more to the north as Season goes.

In closing I wish to say that the mourning Dove is one of the best birds we have on the farm. He eats and drives more weed seeds for the insignificant amount of grains he eats than any other bird in America. Last year a young dove flew against the service wire near my home and hit its stomach to be adapted. The following is the report. This dove's stomach was not quarter full. If a



Jack Miner and son, Manly F. Miner, who acts as his father's secretary.

person tells you that one adult dove will eat and digest ten thousand small germinatable weed seeds it is day you can believe him.

Specimens L. L. Snyder of the Royal Ontario Museum, Toronto, examined one dove's crop and pellet which contained: 8,333 seeds of the Three-Seeded Mercury, 30 seeds of Ragweed, and 3 small grapes, and by weight the ginseng contained the same amount.

Professor M. R. Ferguson of the University of Western Ontario, examined one we sent him which contained the following: 1,864 Green Pea-Tail, 60 Yellow Pea-Tail, 7 green clover, and 3 grains of wheat.

OLD PEOPLE FEEL YOUNG

Just because more years than you care to count have fled by on your life's calendar is no reason for feeling old. Age affects all but a matter of years. It is a matter of health. You're as young as you may young. But how you ask. Do it the way thousands of people of advancing years do. Take Wampoles regular!. Wampole is a delicious wine, free from drugs, that brings you all the valuable elements of grape concentrate with the highest grade beef and guaranteed malt extract. Its invigorating effect is almost magical yet perfectly natural.

Many aristocratic old Wampoles give your ageing system exactly the help it needs. Remember it requires. They soothe your nerves, enrich your blood, and flood your whole body with almost youthful buoyancy, and vigor.

More than 28,000 confused men have found Wampole's regular!. Wampole is a great tonic. It will make you feel young again by creating the true elements of strength and energy. Get Wampole's regular!. Sole Canadian Agent: Harold F. Ritchie & Co. Ltd., Toronto.

THE CHRISTIAN AS WITNESS

Golden text: But ye shall receive power, when the Holy Spirit is come upon you: and ye shall be witnesses both in Jerusalem, and in all Judea and Samaria, and unto the uttermost part of the earth.—Acts 1 v.

Lesson 1 Thessalonians 1 1-10
Devotional reading Psalm 107 1-9

Explanations And Comments

Thanksgiving for those who belong, verse 2-10. "Ye imitators of me, even as I also am of Christ". Paul would return here in March and start in early April to rest from three to five times. They lay raw white eggs that hatch in about ten days. To hide and protect their young from their own prying comment, the old dove usually sits on nest of eggs while Cock Bird follows day. Consequently one of these twins is a twenty-four hours the oldest. We have known them to fly in less than but usually from twelve to fifteen hours. This year we have found several nests on the ground in the cornfields. The dover only protection from their natural enemies in their speed and their ability to locate their protection I often see one hundred or more rise out of a corn field, who discovered and pursued by a winged enemy.

Last year I handed about five hundred and eighty dozen Sixty-seven of these were shipped to the Georgia, Alabama and Florida reporting forty-three of July sixty-seven. But the first one report of was killed near Kingsville, Texas, on September 27th, and there were odd young doves here at that date.

The pigeon's real home is the virgin forest, but the dove followed the farmer. I have seen odd nests in the southern part of the Prairie Provinces, but strange to me I have not seen one in Nova Scotia or New Brunswick. Three years ago I have seen them on that nice bit of farming country near Lion's Head, in the Bruce Peninsula. I have also found on Manitoulin Island and this year I saw a pair near Huntsville. Ontario. I have every reason to believe that the younger generations are going to be more to the north as Season goes.

In closing I wish to say that the mourning Dove is one of the best birds we have on the farm. He eats and drives more weed seeds for the insignificant amount of grains he eats than any other bird in America. Last year a young dove flew against the service wire near my home and hit its stomach to be adapted. The following is the report. This dove's stomach was not quarter full. If a

CHILDREN'S CONSTIPATION
Ended
Mrs. H. T. Rowsome, Athens, Ont., writes, "My baby boy was troubled with constipation. I gave him Baby Stuart Tablets as directed... before I had given half the box the constipation was righted." By relieving constipation, Baby Stuart Tablets prevent many serious illnesses developing. Much easier to take than nauseating laxatives and perfectly safe for little folk. Only 25c box at druggists.

OLD PEOPLE FEEL YOUNG

Just because more years than you care to count have fled by on your life's calendar is no reason for feeling old. Age affects all but a matter of years. It is a matter of health. You're as young as you may young. But how you ask. Do it the way thousands of people of advancing years do. Take Wampoles regular!. Wampole is a delicious wine, free from drugs, that brings you all the valuable elements of grape concentrate with the highest grade beef and guaranteed malt extract. Its invigorating effect is almost magical yet perfectly natural.

Many aristocratic old Wampoles give your ageing system exactly the help it needs. Remember it requires. They soothe your nerves, enrich your blood, and flood your whole body with almost youthful buoyancy, and vigor.

More than 28,000 confused men have found Wampole's regular!. Wampole is a great tonic. It will make you feel young again by creating the true elements of strength and energy. Get Wampole's regular!. Sole Canadian Agent: Harold F. Ritchie & Co. Ltd., Toronto.

NO INCREASE IN WHEAT DEMAND IS ANTICIPATED

Budapest.—The international wheat Conference closed at the nationalistic policies of wheat importing countries in a strongly-worded statement on the world grain situation.

The statement painted a gloomy picture for exporting countries for at least two more years, predicting the annual world demand for exported wheat would remain at 600,-000,000 bushels until at least August, 1936.

Concerning the demands of importing countries the statement said "until there is a fundamental change in the wheat policy of importing countries there is no prospect of a considerable increase in demand for wheat unless yield per acre proved to be of low average."

Owing to the present policy of some important countries of protecting almost regardless of cost—their wheat growers against foreign competition and a sharp upward trend of unit yields, the commission's statement continued, "there seems to be no prompt reason for anticipating in the next few years an annual European demand for imported wheat in excess of 450 000 000 bushels."

"As a result of Japan's policy in become self-sufficing in wheat," the statement said, "and of the great expansion of wheat growing in several European countries, it is impossible the annual imports of European countries will in the near future be more than about 150 000 000 bushels.

"The world demand for imported wheat in recent years has declined by 20 to 25 per cent. below what was looked upon as normal prior to 1932 and is likely to stay also (April 17). They had remained steadfast in the faith of good example to others. In Acts Rivers in Macedonia (of which province Thessalonica was the capital) and in Achaia (Paul was writing the epistle from Corinth, the capital of the province of Achaia, Greece).

Not only had they loudly proclaimed the Word of the Lord in Macedonia and Achaia but everywhere where they had gone their faith in God had been made known. Those living in the places visited by Paul (from which he had had reports had informed him how the Thessalonians had turned to God from idols to serve him, and to wait for the second coming of Jesus whom he had raised from the dead and who delivers us from the wrath to come." Paul's teaching in this letter is that the best way to prepare for Christ's coming is to live a life of love and service now.

"We are the light of the world. A city set on a hill cannot be hid (Matthew 5:14). Men light a lamp and put it under the bushel, but on the stand, and it shineth to all that are in the house. Even so let your light shine before men, that they may see your good works, and glorify your Father who is in heaven.

"Feel Up to the Scouple." Several years ago a Chinese came to visit this country. He had the opportunity while here to learn something of Christianity in a so-called Christian land. At the close of his visit he made this significant comment regarding our religious life—"It is not up to the sample."

When a commercial traveller takes an order from a merchant he promises that the goods, when delivered, will be as good as the sample. Otherwise the purchaser is not obliged to accept the consignment.

The Chinese, while not a professing Christian, had read the New Testament from it he had learned what ought to be seen in those who profess to follow him. In "Christian" America he had made the painful discovery that the majority of the people whom he met here were not living in accord with the life of Jesus.

Contrary to common belief, the eating quality of old carrots is no good or better than that of young carrots, says a Cornell crop specialist.

Germany's Plunge Swifter

So France Wants Huge Sum To Build Motley Machines

Paris.—Minister of Air Victor Denain told France that Germany's planes are "terrible and more modern and safer" than those of France (about $230,000,000) to make the French air force superior.

"Since Goring (Herman Wilhelm Goering, cousin of Hitler's minister of air) came to power, Germany has a military air fleet available and progressive," Denain told the chamber of commerce here.

"This air force is to be feared because it is composed of modern pursuit and bombing planes," he said.

Protesting against "panic fomentors" who pretend Germany has thousands of military planes, the air minister estimated that the Reich will have 1,800 to 1,100 planes at the beginning of 1936.

France has more machines, he admitted, but the French models "are less swift and less modern."

Drug To Lengthen Life

Claim It Increases Resistance To Disease And Reduces Worry

Cleveland, O.—Human life can be lengthened at least a little, by use of a drug that is claimed to reduce worry and increase resistance to disease, Dr. Wilder D. Bancroft of Cornell University predicted before the National Academy of Sciences.

He has not tried it on humans yet, but based his predictions on preliminary tests on rabbits and chickens. The drug is sodium rhodanate, used in other experiments by Dr. Bancroft to treat drug addicts.

Opponents Will Be Heard

Poultry Pool Objectors To Come Before Marketing Board

Ottawa Ont. The Dominion marketing board has announced that the second week of December will be set aside for the hearing of representations of those who are opposed to the poultry schemes sponsored by the three prairie poultry pools.

The board has received many petitions from the west opposing the schemes and several organizations have written seeking an opportunity to appear before the board. Every opportunity will be given to these organizations. The actual dates for hearings have not yet been fixed but the board, and fixed your whole body with almost youthful buoyancy, and vigor.

Urges Building Program

Could Be Handled As Government Policy Says Stevens

Ottawa.—With the declaration that during the depression Canada "could wisely and economically spend over a billion dollars in housing and slum clearance projects," Hon. H. H. Stevens, former minister of trade and commerce, went on record as favoring a direct building program for the Dominion.

Characterizing the government's $40,000,000 building program as "a mere drop in the bucket," Mr. Stevens advocated calling a conference of bankers, loan and mortgage companies, labor and others, with a view to evolving a plan for financing his huge construction project.

"If they fail to act promptly," he added, "then in my opinion the government of Canada ought to take the matter in hand as a government policy."

The former minister and chairman of the home buying committee was guest speaker at a banquet of the Ottawa Junior board of trade.

Self Rule For India

Federal System Is Advocated By Select Committee

London.—An Indian federation comprised of self-governing units was advocated in the long-awaited report of the select joint parliamentary committee on India today.

The report urges this system be substituted for the present centralized government of British India.

Of British India, two of them now, would be linked in the federal system with Indian states, provided that a majority of the princes of India would enter the federation by voluntary act of their rulers.

These recommendations in the report, which fill a volume of more than a thousand printed pages, the parliamentary committee estimated that the Reich will have 1,800 to 1,100 planes at the beginning of 1936.

France has more machines, he admitted, but the French models "are less swift and less modern."

Drug To Lengthen Life

Government Buys Building

Old Industrial Building At Winnipeg Acquired From C.N.R.

Ottawa. — The Dominion government has purchased from the Canadian National Railways the old industrial building in Winnipeg adjacent to the railway terminal there, on the corner of Main and Water streets. The purchase price was $178,000. The industrial building will be razed and a seven-storey department building will be erected in its place. It will be an office building, one floor of which will be rented to the railway to house its officials occupying the present structure.

Budget May Be Cut

But Manitoba Government Is Not Closing Government House

Winnipeg.—W. J. Tupper, newly-appointed lieutenant - governor of Manitoba, will be sworn in here December 1. It was announced at the legislative buildings. He succeeds Hon. J. D. McGregor. Lieutenant-governor since 1926.

Premier John Bracken of Manitoba, referring to rumors Government House might be closed, declared there might be reduction in the government budget for Government House. It was not the government's intention to close it, he said.

Out Of The Market

United States Did Not Export Any Wheat Last Week

Washington.—For the first time since the west's fertile prairies were tilled with regularity, the United States last week failed to export a bushel of wheat or flour.

"The drought and steadily declining exports," was the explanation given by officials, who say they were not surprised at the department of commerce report.

Only a few years ago, 270 000 000 bushels of grain were sent out of United States in one year, and exports averaged around 150 000 000 bushels up to 1929.

Since that time Canada and the Argentine have cut more and more into the market once held by the United States.

FARM CLUBS SECRETARY

Here is a photograph of A. E. McLaurin, who, as General Secretary of the Canadian Boys and Girls' Farm Clubs is largely responsible for the successful results obtained in the junior club work throughout the Dominion. Thirty-two club teams representing all of the Provinces of the Dominion competed in several Live Stock and Seed judging contests at the Royal Winter Fair in Toronto.

Vessels Collide In Fog

Four Lose Lives In Accident On Great Lakes

Alpena, Mich. Four members of the crew of the steamer W C Franz were lost in a collision in heavy fog, 30 miles south by east of Thunder Bay Island, Lake Huron, between the Franz and the Edward E. Loomis A message from the steamer Kirin Brothers, standing by, verified by C. K. Fulor, operator of a radio station at Negro City, and the Franz sank; and that 14 survivors of its crew had been taken aboard the Loomis, which was proceeding south under its own power, with considerable water in its forward hold.

The Franz had a crew of 18. Radio messages said the Loomis was badly damaged forward in the collision.

The Franz had delivered a cargo of wheat at Port Colborne, Ont., and was upbound for another load of grain.

Grasshopper Problem

North Dakota Conference Says Emergency Still Exists

Fargo, N.D.—The grasshopper problem was characterized as a national rather than a state problem by state entomologists attending the closing session of the second annual hopper conference here.

Experts from several northwest states and Canadian provinces adopted resolutions recommending an annual grasshopper egg survey by the federal government in co-operation with the various states and an adequate appropriation to the bureau of entomology for the purpose.

In other resolutions the group went on record as of the opinion that a grasshopper emergency still exists. Although various speakers said the past chapter had been reduced by poison campaigns and the drouth, one resolution said "the grasshopper outlook for 1936 is most serious in North Dakota, Minnesota, Wisconsin, and Michigan."

New Relief Policy

Ontario Minister Of Welfare Would Place Single Men In Private Homes

Toronto.—Hon. David A. Croll, Ontario minister of welfare and municipal affairs, announced a new relief policy affecting single men. Under the new plan single men will be encouraged to place single unemployed in private homes.

Municipalities and hostels—that is what they are aiming at," said the minister in announcing a plan whereby municipal authorities may pay board for single men in private homes at a rate not exceeding $1 per week and supply food by voucher at the prevailing retail rate. The policy is adopted locally the province will pay its share of the cost, the minister said.

That is one idea of the first step towards re-establishment of the individual. Let him get away from the barrack-like atmosphere of the hostel and return to a normal domestic existence," Mr. Croll stated.

Japan Continues Its Insistence On Naval Parity

London.—The outlook for the tripartite naval conversations became gloomier than ever, with a Japanese declaration that in the very May event of failing to reach an agreement on tonnage limitation of navies, she could not agree to limitation of specific types of vessels and their numbers.

The Japanese indeed made themselves very clear, removing a couple more obstacles standing in the way. It is plain the best the British and Americans can hope for, so far as tripartite agreement is concerned, will be a tonnage as much as they can of the Washington agreement. And there does not seem to be much that can be saved.

First, the Japanese denied the widely-accepted view on of their demand for parity with the British and American navies. They said that while insisting on being granted parity she would not actually build up to it. This was a complete misconception. Reuters was told by Ambassador Tomoso Matsudaira.

The actual position is that Japan, if accorded parity, might not need to build up to it in all categories," he said. "But she has certainly made no statement to that effect."

The other "misconception" the Japanese removed was a report they had declared themselves not averse to having a fleet inferior to the British, so long as the Japanese fleet was equal to that of America. The Japanese emphatically declared they want full equality with both the British and the Americans. The inference is that Japan is not considered treaty Japan will independently build up to it.

The statement that Japan cannot accept restriction of tonnage of various types of vessels and gunpower is the different classes if there is no agreement on total tonnages, clearly heralded independent action should she be granted parity, which is unlikely.

Admiral Yamamoto, naval delegate, was responsible for the statement regarding refusal to accept quantitative restriction.

The clarification of the Japanese position made known to newspapers the British moves for an agreement with the United States in the hope of getting a quantitative naval pact to which the Japanese would be invited to join later.

Indicates Improvement In Business Conditions

Flin Flon Lower Freight Rates In Good Sign

Winnipeg.—Numerous applications for freight rate reductions were handed by F. Napoleon Garcia, K.C., deputy chief of the board of railway commissioners, as an indication of improving business conditions.

"People think they have a demand for their products, or they hope to find markets and that is why they are making applications for rate reductions," said Mr Garcesa. The dull years of 1933 and 1932 produced few applications, he said.

The commission opened sessions to hear applications of local nature. It is returning after sittings in Victoria, Vancouver, Nelson, Edmonton, Saskatoon, Moose Jaw and Swift Current.

May Visit America

Belgrade.—Queen Maria.—Dowager Queen Marie of Roumania hopes to visit North America again some time soon, taking her grandson, young King Peter of Yugo-Slavia, with her. From there she hopes to continue on around the world.

Amsterdam. — K. D. Parmentier and J. J. Moll, Dutch aviators who won the record handicap air race from London to Melbourne, landed their transport plane here recently to the cheers of 50,000 persons.

LOS ANGELES MUSIC TEACHER HELD BY NAZIS

Above is a picture of Miss Isabel Steele, pretty young music teacher of Los Angeles, whose long imprisonment in Germany on charges of alleged espionage is the subject of a diplomatic protest by the United States Government.

Says Production On Farms Should Be Governed By The Requirements Of The Market

Consumer research and adaptation of its findings to production were advocated as the solution of agricultural perplexity by Dr. Horace Hunter, deputy minister of agriculture, in an address he was speaking at a dinner of the eastern Ontario branch of the Canadian Society of Technical Agriculturists.

"Consumption has been taken too much for granted in the past," the government said. "It should be scientifically investigated in all phases. Canadian farmers should find out what appeals to Canadians and direct production accordingly. They had better be looking too much to the export market."

Service to the consumer should be the object of all production, Dr. Hunter believed. This solution he placed in opposition to three previously advocated solutions for planned markets of alternative production, control of production and elimination of production entirely.

Cost of marketing was relatively higher than production cost, he declared. There were too elaborate facilities in a very complicated marketing machinery, though necessary in its measure produce from 750,000 farmers in 16,000,000 people. Although there had been a tendency to centralize marketing, the farmer was having less and less to do with it. The farmer does not understand the system, but he must endure to live and he has no alternative but to accept the price offered.

Marketing was a social state and the only approach to the problem was through a research-mind historical of the problem should be investigated, examined and analyzed. Great Britain was determined to bring her farmers back to prosperity and to carry out the provisions of the Marketing Act, said H. D. Barrow, former minister of agriculture in British Columbia. He recently returned from a visit to the United States. Already improvement was to be seen among the farmers.

Observation Were Useful

U.S. Dairy Industry Representative Addresses Prairie Dairy Workers' Institute

Each fat globule in cream carries an electric charge investigators in the dairy industry department of the University of Manitoba have discovered in an investigation into the time it takes to make butter out of cream. They found this time varied with the degree of acidity of the cream, and that the amount of electricity also varied with this factor. There is no danger of getting an electric shock from churning a glass of milk or cream, but the electrical charge is a part of butter, an expert can also know. They found that the observations were useful, as when the churning gives a sound of splashing the fat loses and in reducing the time required to make butter. The acid the cream the stronger the negative charge on the fat globules. The more acid the cream the more negative was the charge, and finally a point was reached at which the decreasing activity resulted in an increasing positive charge on the globules.

Income Still Progress

Production Greater Than Although Believed 5,000 Years Old

Income more than 2,000 years old has been found by archaeologists in the Bullish canal bank near Tegenning on the Sea of Asia. The income, a laboratory and vegetable cellar, still produces aromatic flavor when not burning. It was found in a number of sacred black hieroglyphic vessels on the site of a Scythian burial ground dating from the second or third century B.C.

Centuries Household — "And how would you like a nice shop?"

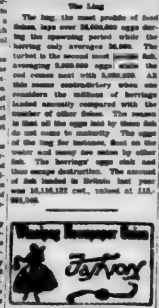
Weary Tramp—"Dat all depend, lady—is it bank park or creed?"

A U.S. tourist bought 10,000 pounds of beef at a Florida drug store. The captain happened in to get a bottle of sarsaparilla.

Twenty-Six Billion Eggs

Most Profits Of Food Future Is The Egg

The big, the most profits of food values, says over 26,000,000 eggs during the spawning period while the hatching only averages 20,000. The turbot is the second most prolific fish, averaging 2,000,000 eggs while the cod comes next with 5,000,000. All these same considerations when one considers the millions of herrings landed annually compared with the number of other fishes. The reason is that all the eggs laid by these fish do not come to maturity. The eggs of the large fishes float on the water and many are eaten by other fish. The herrings' eggs sink and thus escape destruction. The amount of fish landed in Britain last year was 10,136,122 cwt., valued at 113,- 981,045.



Designed to give a soft line at the throat.

Lovely green nursery crepe was selected for the original with decorations of white piping and buttons.

You can copy this very model. Even if you are an amateur at needlework, you can accomplish it with a bit of dexterity in making it.

Pleated crepe results in wide yet fit leather adjustable without much pressure.

The "batting" sleeve is another thing in which we are most interested. For anything, before we make ideal subjects, because they are so easy. They're always natural.

There are baby pictures and baby pictures, of course. Some aren't worth saving at all. Others are worth the time and money we spend on them. One of the easiest ways to make baby pictures indoors, during the daytime, is to get the subject fairly close to a big window (not necessarily a sunny one) and then use a photoflood-type lamp to light the side of your subject that's away from the window. A photoflood bulb in one of those inexpensive reflectors will be found very useful for this and other indoor shots. If there's a lot of light coming from the window, you'll be able to use a rapid shutter speed, especially if your camera is one of the modern types. If you're not sure, better work with the lens at its widest opening. Wait until your subject strikes an interesting pose, then click the shutter and the picture's done.

Don't forget that you can use inexpensive film to get beautiful action shots with much less light than you'd imagine. Speed

And let your baby subject "direct" his own pictures. Let him do as he pleases, with only slight suggestions from you. So doing, you'll get real, natural, delightful pictures. And you'll always treasure them.

JESSE VAN GUILDER

Hudson Coast For Speed

Has Shortest Haul Of Distance With Three People

Citing speed records made by transatlantic liners, the Ottawa Journal asks "Why the hurry?" In these days, the journal says, a person may pick up a telephone and speak to anybody almost anywhere, or send a wire, so it can't be terribly important that he may get to a destination a day or a few hours sooner than ordinarily. Something along at 115 miles an hour on a train weighing thousands of tons is to do so.

Isn't it the truth that it's the rush who is usually going nowhere in particular or who has time to burn on his hands who has the greatest concern for speed? Take some modern cars. They will drive like fury through the country passing everything in sight and at the end of the journey halt hour after hour at time doing nothing. The man who has a real business to get through with usually takes a reasonable amount of time to make the journey; his chief aim is to get there.

This craving for speed has become a sort of disease with some people. It isn't the character to find fault with the enthusiasm for cramming faster trains. They have to cater to people who want speed and if these people do not provide such service the railroads they will patronize the airlines or whatever else gets them through speed in record time.—St. Thomas Times-Journal.

Holding Now About It

Noted World Figures Had Wives Who Were Famous

Miss Martha Dickinson, who became marriage licenses at Windsor, Ontario, notes a tendency of men to marry women who are famous. But there is really there is nothing new about that. Among world noted figures Napoleon was 26 years of age married Ann Hathaway, 18. The famous British statesman D'Israeli's was much younger than his spouse and there are many other instances of the domain. Among ordinary folk a like disparity frequently exists and probably things will do so.—Brantford Expositor.

The hedgehog status of Mexico can live five years without a drop of water. When it rains it lifts up its head, drinks until it swells, to nearly twice its normal size.

Central Seed Cleaning Plant System Developing Steadily During The Past Ten Years

Secret Of His Success

Great Polish Chemist Practises Many Hours Every Day

Ignace Paderewski, aged, and probably still the greatest living pianist in the world. At any rate his name is surrounded by more glamour than any other pianist living, and despite the fact that he is nearly 75 years of age, he is the greatest drawing card before the public so far as piano art is concerned.

A noted New York music critic visited him at his home in Paris recently to see if he had anything to say about his forthcoming tour in the United States. "What am I doing?" he repeated, echoing the interviewer's question. "I am working hard to polish my technique."

At the almighty Paderewski is still trying to improve his technique. And there are lots of great players before the public who could, if they wished, be better than they are if they could play even less well than the famous Pole.

The truly great artist is never satisfied. The truly great artist is constantly striving to do even better. Paderewski, who practises six or seven hours a day when preparing for a tour, says that if he misses one day's practice he notices a difference himself; if he misses two days the critics notice it; if he misses three days the public notices it.—St. Thomas Times-Journal.

Potato Yield Higher

All Provinces Except Saskatchewan And Alberta Showed Increase

An increase of 5,447,000 hundredweight in the estimated yield of potatoes in Canada, 1936 crop, compared with 1935 is shown in the potato, root and bulbous crop report issued by the Dominion bureau of statistics. This was due to an increase of 41,000 in the acreage and from an increase of 1.1 cwts. per acre in the yield.

All provinces except Saskatchewan and Alberta showed increases, particularly good harvests being reported from the Maritime provinces.

The seed grower who markets his seed cleaned and graded has the same status as the manufacturer who turns out a finished article and thereby realizes the highest return for his product. Further, the farmer who sells a finished product has a definite incentive to produce the best, while on the other hand the low prices obtained by weed infested crops constitute the best known argument why the grower learns to improve his methods and produce cleaner crops.

Comparatively few farmers are equipped with the means for properly cleaning the seed they grow. The carefully operated cleaning mill with clean grain satisfactorily only when the common impurities are to be taken out, but under the ordinary circumstances it is almost impossible to accomplish similar results with clover and timothy seed. Fortunately, the central cleaning plant system has been developing steadily during the past ten years, and has become a highly specialized business in several areas, particularly in the Ottawa Valley district. These central cleaning plants, equipped with several grades of machines for cleaning and grading seed of cereals, clovers, grasses, and other farm crops, are performing services of inestimable value to the various communities but more especially to the farmers who have seed as a cash crop. The plants are being operated successfully at moderate rates for seed cleaning and have been established either with or without government financial assistance. A thousand plant, provided with complete machinery and equipment, is equal to the seed cleaning requirements of most farm communities and costs about $1,500.

Added to the advantage of being able to grow bigger and better crops, the seed producer, particularly of clover and timothy, derives a further benefit to the central cleaning plant. His seed, well cleaned and brought to the highest grade obtainable by the skilful use of the most up-to-date machinery, can now be marketed at its full value, while growers who are obliged to sell their seed in the rough are realizing returns from 25 to 50 per cent. less. Another aspect was fully demonstrated this season, growers in the Ottawa Valley receiving as much as from $4 to $5 cents per pound for timothy seed, cleaned and graded No. 1, while in other parts of the province of Ontario farmers are reported as receiving 10 cents per pound for seed of similar quality, but uncleaned.

Believe wonder the standard of the seed trade of both grain and forage crops, such thousand plants is a result directly attributable to the central cleaning plan in every community in which one has been established, and in the Ottawa Valley, apart from the fact that the 14 central cleaning plants in 1935 turned out 79,000 pounds of grass and clover seed, ranked as Canada No. 1 grade, and 6,000 bushels of record seed of Registered grades, the improvement in yield and quality through the cleaning plants was extended to barley growers as well. Large quantities of such crops which are now being produced in that area and are now finding a ready and profitable market with malting companies in Canada.

Other districts are now reaping the grain without cleaning before shipping, over 200 carloads of malting barley being shipped out of the Ottawa Valley in 1935, and more than 300 from this year's crop.

Scotland Likes Canadian Eggs

The following is an extract from a report by the Canadian Trade Commissioner in Scotland on recent shipments of Canadian eggs to that country. "The consignees state that the Canadian egg this fall turned out very well indeed, and are pleased to Canadian shippers. They hope that the shippers will keep up this high standard of quality and thus help to encourage the trade."

Airplanes cannot fly in an inverted position for any great distance.

More than 667,000 tons of water pass over Niagara Falls every minute.

THE TENDERFOOT

By GEORGE B. ROBEY

Author of "The Canadian Trail", "The Canyon Trail", Etc.

SYNOPSIS

"You've fallen now to a half-dozen in plenty of trouble" the lawyer told Carol Kinner. "Your father's debts have automatically lasting the ranch, and old Joe Carr pocketed the drinking hand it into ruin."

But Kinny decided to go see what was happening for himself—and on Carol's range half owner of the Bonanza Brand, but as Dave Strang interfered in a Montgomery Ward purchased cattle.

Dad Kane, desert rat and herdsman previously left range to take place left by Dan'ls and Artie Caldwell owners of the Broken Bow ranch who had prohibited him, at his discovery of a rich gold mine, and always secretly of 19 - are He sent Bowles, Kane men rustling Bone-Straw cattle and pocketed their stray brand.

Broke Caldwell and Sam Dantz fearing the old prospector may tell others the things he has seen as to Caldwell's Cross cattle, plot to get him to show them the location of the mine and there he kills him.

Gerald Keene, dressed in ridiculous cowboy costume, arrives at the Kinner ranch and starts work as a cowboy by Joe Carr. The impersonation of a tenderfoot is successful, and he is accepted as such by the other occupants of the bunkhouse.

(Now Go On With The Story)

CHAPTER V. Continued

"Dankin! That damned crook? I wouldn't let him take care of a three-legged burro that I liked. He's been at the bottom of all our troubles."

"Yeah I know that but we can't prove it. And that's what counts. What's this new hand you took on, Joe?"

His hand swept toward the bunkhouse, where Shorty stood talking to Lee and Worth, both of whom were laughing.

"Just a new man I picked up today. He came in and asked for a job. We got to have a new man and he's got to be cheap, so I hired him. He can ride fence. He's just a cheap fool who says he wants to learn the cattle business. He told me so when I hired him. He said he wanted to learn it from the ground up. We've got right down to the ground now on the Bone-straw," he said grimly. "He's startin' good. Set him to work in the mornin' ridin' fence on the west line. Did you see his outfit?"

"Did I? I wish I'd looked like that when I was his age. I'd sure have filled the eye of some good-lookin' girl. Don't borrow troubles, Joe. It'll come fast enough. Give me a share of that drink."

Carr poured him a generous half portion and shuffled the papers on his desk.

"If I had no more cares than that new hand," he groveled, "I'd get drunk for a week. He ain't a bad lookin' kid. Pity he's such a damned fool. Anybody's a damned fool who tries to make money off cattle unless he's crooked at the start. Dave Strang! That's sure one hell of a name."

Dave Strang seemed stiff and sore when Lee pulled him from his bunkbirth at daylight.

"Get that job for you," he growled. "Drove wagon, eh?"

Crowe, meeting him at the kitchen, gave him his orders briefly.

"You'll ride fence on the West line. If any posts are down, put 'em up an' restring the wire. Know how to do it?"

"Sure. Like fencin' a hog-pasture. I suppose the line is marked."

"Till you come to the Bone Star brand. Crowe led the way to the office but was stopped by Edith who was in riding dress and she was eating a hasty sandwich.

"If you're sending him," she nodded at Keene, "out to ride fence, I think you'd better send a couple of hands along with him. I'm going out for a ride and I may as well ride that way I've to."

Edith followed her out to the corral where his pony stood saddled and Lee brought Edith's horse from resting Bone-straw cattle and pocketed their stray brand.

Broke Caldwell and Sam Dantz fearing the old prospector may tell others the things he has seen as to Caldwell's Cross cattle, plot to get him to show them the location of the mine and there he kills him.

Gerald Keene, dressed in ridiculous cowboy costume, arrives at the Kinner ranch and starts work as a cowboy by Joe Carr. The impersonation of a tenderfoot is successful, and he is accepted as such by the other occupants of the bunkhouse.

oooooo

Another take which reaches us about one of our local big-game hunting celebrities. Sighting a moose he fired some twelve rounds of ammunition at it without bringing it down, he was then forced to trail it all day until darkness set in. Resuming the trail the next morning and after walking some ten miles he finally came up to it and killed it with a club.

Probably the poor moose, tired from packing so much lead, finally had to lie down to rest and die.

Fort School Board Holds Monthly Meeting

A regular meeting of the Fort Saskatchewan School Board was held on Monday the 3rd. Instant at 7:30 p.m. in the Council Chambers. Present Mr F. Atkinson, Chairman, and Trustees Mr. Grenart, Dr. Turner and Mr. R. M. Ray.

The minutes of the last meeting held were read and adopted.

Representations for Seal-O-San, a scientifically prepared floor treatment, appeared before the Board and gave particulars of the preparation etc. The Board adjourned to the School with the agents, and after deliberation decided to have one room (Mr. Hambly's) treated, during the winter vacation, as an experiment.

The winter vacation shall extend from the 22nd day of December (inclusive to the 2nd day of January inclusive).

The next regular meeting of the Board will be held on the 7th, of January, 1925.

The Inspector's report of the High School inspection on Oct. 1st was submitted to the Board, and filed.

Mr. Anderson, the Principal, was present and submitted attendance and other reports to the Trustees.

The following accounts were passed for payment:: J. Campo $1.50; Mrs. Robinson $1.50; Mrs. Brown $1.50; Calgary Power Co., $2.50; Stamps $3.50; Jones, Graham & O'Brien 50c.

The following letter received from the Deputy Minister of Health will be found on page 3.

The Observer

The strike against deliveries of grain in the District between Lloydminster and Lamont appears to be practically at an end. At only three or four points now is there any real effort to maintain it. On the whole the effort must be said to have been unsuccessful, largely because the bulk of the people were very critical of the good faith of those who promoted the strike. Many of the leaders were known to have disposed of their own grain before they started the movement, and their public utterances on the subject were so unrestrained as to lose them the public sympathy which was necessary for success. There probably were some grievances and no doubt any such demonstration as this often will have some good results if only in making grain companies and their agents more cautious in avoiding causes of offence in cases where violence was used those who were responsible will have to pay the penalty. Probably some of the leaders will be among the number; such men usually find willing tools among their weaker minded followers. There seems to be curiously little discussion about the moral aspect of the business, as for instance, how for those who find a grievance are entitled to put constraint upon others, even to the point of using violence in order to carry out and make effective what is at best merely an argument. We seem to be very ready in these days to resort to strong arm methods. Just about exactly one hundred years ago the idea of the strike had its origin, about the time, that is, when the age of industrialism was ushered in by the action of labor-seeking machines. There is a wide difference, of course between both the principle underlying and the condition of the two strikers, and such a "strike" as we have just had, but it is surely curious that in a century we have not made more progress in the manner of settling grievances.

After Society Ladies Hold Successful Affair

The Catholic Ladies Altar Society fun, Cards and Concert last Thursday in the Memorial Hall was well patronized.

A large number attended the tea in the afternoon and in the evening thirty-one tables of cards were play.

The following are the winners of Bridge Ladies first, Miss Pic. Fleming; Second, Mrs. Herter Lamoureux. Men's first, Mr. J. L. Pine; Second, Father Allet.

Whist: Ladies first, Miss Ella Larose; Second, Mrs. Paradis; Men's first, Mr. B. Pollard; Second, Mr. H. Gaumond.

The door prize, (a box of apples) was won by Germaine Rocque. Miss Florence Belland held the lucky raffle ticket on the cushion.

After cards, a tasty luncheon was served by the ladies.

Short sketches given by the following brought the successful day to a conclusion: Misses J. Jacobs, E. Lamoureux, L. Riverion, and E. Larose; Messrs. Herb Roberts, W. Lamoureux, Peter Jacobs, Paul Jacobs, and Andrew Jacobs.

Mrs. J. Latour and Mrs. Fontaine delighted the audience with several popular selections.

FESTIVAL ENTRANTS TO BENEFIT FROM RADIO BROADCASTS

The Department of Extension, of the University of Alberta, will arrange broadcast singing and verse speaking lessons over the University station, CKUA, starting Saturday, November 17th. The hour of the broadcast will be at 10:30 a.m. and will continue every Saturday morning at this hour throughout the season.

Mr. Vernon Barfoot will be the teacher and will use Murdoch's Kozy Song Book, Murdoch's Songs, Series A, and Pictures in Song, Book 1. Mr. Barfoot will be issued by the Festival next year and and can be obtained from the School Book Branch of the Department of Education, $500,000 in payrolls.

Curling got under way on Tuesday evening with eight rinks drawn. There is a very good possibility of several more rinks after the festive season.

MAIL YOUR CHRISTMAS PARCELS EARLY

"Mail your Christmas Parcels Early!" From now until Christmas post office staffs all over the country are working overtime in an endeavor to maintain the usual efficient service they render you. Why not cooperate with them by getting your Christmas mail away early, and so ease up the congestion of mail they have to contend with the few days preceding Christmas day.

Here and There

A further commission to the travelling public is announced by C. P. Liddell, Chairman, Canadian Passenger Association, in the statement that in future one-month round trip railway tickets previously good for continuous passage only between departure point and destination, will be valid for stop-over at intermediate points going and returning. By many railroads in this country have been selling one-month round trip tickets at twice the one way fare, less ten per cent., good for continuous passage only. Now, the stop-over privilege is granted without any increase in fare and passengers deciding on a route to stop over may do so on application to the conductor. This concession, it is felt by railway officials, will be much to further promote travel by rail in Canada.

W. E. Allison, manager of mail and baggage traffic, Canadian Pacific Railway, has been elected vice-president of the American Association of General Baggage Agents, comprising representatives of all the railways on this continent.

H. C. Cross, general superintendent, Ontario district, of the Canadian Pacific Railway, has been promoted to the post of assistant to the vice-president with headquarters in Montreal. Mr. Cross is a well-known and popular official of the railway in Ontario, where he has been employed for a number of years.

Figures issued by the Dominion Bureau of Statistics dealing with the operations in August of all steam railways in Canada having annual gross revenue of at least $400,000, reveal that higher gross earnings were effect by increased expenses, including an expansion of over

Mrs. A. A. Adams, of Oak Bay Motto, Que., has been awarded first prize in the most beautiful Maple Leaf contest conducted this year by the Canadian Pacific and Canadian National Railways. More than 10,000 specimens were submitted. The largest leaf piece of the contest was won by Richard Chambers of Vancouver, who submitted a specimen with an area of 224 ½ sq. ins.

Five hundred school-age boys and girls of Montreal recently took advantage of the unique all-expense trip operated by the Canadian Pacific Railway from that city to Ottawa and were addressed in the Parliament Buildings by Rt. Hon. R. B. Bennett, Prime Minister of Canada. Sight-seeing auto-bus trips across Ottawa included inspection of the Houses of Parliament, the Memorial Tower and Hall of Fame, and a special recital on the 53 bells of the famous Carillon Tower.

Bill Murray, Quebec's No. 1 tennis player, and Laird Watt, second ranking provincial player, were singled out for praise by Big Bill" Tilden, who paid recently by the Empress of Britain for England. They are characterizing players in the making," said the one-time world's champion.

Five orphans in one day he made this winner on the Empress of Australia sailing from New York January 15. They are: the motherless Cruse, the fleet African, South African, South American and West Indian. Some day a full week in Egypt, numerous stops on the east coast of Africa, 12 full days ashore in the Union of South Africa. Four stops in South America and stops via Trinidad, Jamaica and Panama.

Leaving a baseball tour of the Orient and International Goodwill Empress of Japan en route to Tokyo, Connie Mack, manager of the Philadelphia Athletics, said it was his ambition to continue as manager until "I have passed my eightieth birthday." He is now in his 71st year.

Girl Guide Notes

The weekly meeting of the Girl Guides was held on Tuesday, Dec. 2nd, in conjunction with the Boy Scouts.

The meeting opened with inspection and saluting of the flag.

Going to their corners, the Guides reviewed their work with Scoutmaster Lamoureux showing them how to tie several hangups required to be known for the second class test. Games were played and the flag furled.

The meeting was then closed with a prayer.

GOOD HOPE NEWS

Mr. and Mrs. Charlie Thomas celebrated their wedding anniversary last week.

oooooo

Miss Janet Webber was on Edmonton visitor over the week-end.

oooooo

Miss Mable Gray of Edmonton, is visiting at the Magor home this week.

oooooo

The Good Hope Christmas Concert will be held in the School house on Thursday, December 25th.

oooooo

Messrs Albert, Harold and Norman Crippen were visitors in Edmonton last Thursday and Friday.

Large Crowd Patronize Skating Rink Monday

The Fort Skating rink officially opened last Monday evening, when a large crowd donned their skates, and started this winter sport off with a bang.

The ice was in very good condition, showing the results of many hours of labor on the part of Art Simmons.

Housed in the girls' waiting room, The Fort Band played for the occasion, delighting the skaters with their peppy marches. The music would be greatly improved if in future when the band played, were they situated near the centre of the rink.

The opening was a success and season skating tickets found a ready sale.

GIANT BROADCAST FOR CHRISTMAS DAY

A giant radio hook-up embracing the whole of the empire is planned for Christmas day by the British Broadcasting Co. in collaboration with colonial stations.

The King, who will address his subjects on that day will probably reach an audience of 200,000,000 people in parts of the Empire.

All the broadcasting organizations of the empire are co-operating to make the Christmas day transmission not only the vastest the world has ever heard but also the most technically efficient.

STOP and SHOP

As newspaper advertisements are an indication of the prosperity of a town, so are advertisers an indication of the up-to-dateness of the merchants who use the columns of a newspaper for publicity.

To our readers we wish to say the merchants who advertise with us are trustworthy and reliable, and now that the Christmas season is coming on we say STOP and SHOP. We have said the merchants are up-to-date and reliable, put them to test to see if they cannot be of service to you. The stores are filled with good things showing character and quality.

Work on the hot-sleigh hill has being started this week by a number of spirited citizens.

Winter Sports

Recently a group of ten young men, after a day's tours, succeeded in erecting a twenty foot ski jump at the hill near the bridge. This is a good demonstration that the Fort is winter sports minded.

This jump, although not very impressing, to one on which the young people may have a great deal of enjoyment, both of womanly strong timber and constructed equally as strong it will stand the rig-or of our winters very well. Fortunately, we were able to enthuse, Albert Jacobs who superintended its construction.

At the same time a dug-out in the side of the bank is being built. In this retreat is being placed a stove, where after getting wet, one may dry himself and where, if necessary, one may warm himself.

It will be possible, likely, to make a jump of twenty or thirty and may be forty feet. At present the hill is being levelled off, brush cut and a path cleared which will enable one, if fortunate to ski down on to the river, a distance of about four hundred yards.

On Thursday evening at 8:00 p.m. a meeting of all lovers of winter sports will be held in the Town Hall. It is the purpose, at this meeting, to form a Winter Sports Club. The intention of this club is to provide enthusiastic sport for outdoor people. For example, it is the intention of making up skiing parties that will journey up the river and afterwards partake of a winner roast or maybe after a journey home, to spend the evening eating roast potatoes by some cheery fireside.

It is also the intention of the sport club to recondition the hill and to make arrangements for "bobbing" nights and coasting parties.

The thought has also been suggested that a ski meet be put during the winter when skiing competition, be-h-sleigh races, ski-joring, dog sleigh races and other sport activities be presented, during the day. Then the day can be ended by a grand banquet at night.

These are merely thoughts that occur to us. Maybe you have some yourself. At any rate we would be glad to hear from you.

LOCAL NEWS

Confidence Is Returning

The year of 1934 is rapidly drawing to a close and people are already forming their thoughts to the coming new year and giving consideration to matters which will command their attention and activities in the next twelve-month period. Already throughout the western provinces municipal councils and school boards have been chosen to which will be entrusted the administration of local community business throughout the new year. And the thoughts of all people are increasingly occupied with what betterment of existing conditions may be looked for in the months that lie ahead.

Unquestionably, people are entertaining a greater degree of confidence that the general economic situation is improving than has been in evidence for some time,—the most encouraging feature being the continued political unrest in Europe and the effect which any outbreak there would inevitably have upon the whole world. However, confidence grows that even this factor will control the worst of the great depression is over and we are on at least and definitely on the upgrade.

Restoration of confidence is one of the essential requirements to carry the world along the road to betterment, because until that confidence is restored everyone is afraid to venture in any direction, all continuing to live from hand to mouth, thinking only of the necessities of the immediate present and instead of in terms of a larger and better future. While an undue and unjustified optimism at this time would be just as fatal in the long run as a continuance of an unjustified pessimism, it is perhaps well that attention should be directed to facts, figures and conditions which provide a sound basis for hopefulness and a greater confidence.

In recent years of financial difficulty and consequent depression, many people have come to look with suspicion upon bankers and banking, but the fact remains that our Canadian banking institutions are about the best-informed of all organizations as to the exact state of affairs in the Dominion. They have to be. Furthermore, they are always conservative in their outlook up of the general financial, economic and business situation. Banks, as a rule, are not overly enthusiastic or optimistic.

Because of this above is true, there is real encouragement to be found in the monthly business statements and news letters recently issued by the banks of Canada. One of the latest to come to hand is that of the Bank of Montreal, Canada's most conservative banking institution, dated November 1st. For the benefit of readers who may not have the opportunity of reading these monthly business reviews, a few facts from this most recent publication may well be quoted.

Regarding the Canadian situation, the Bank of Montreal says: "Trade has continued its upward trend during the past month, and the winter season opens with conditions generally distinctly better than they were a year ago. A review of the first ten months of the present year shows that of some fifty business indices available forty-two show gains, the majority of a pronounced character. The Dominion Bureau of Statistics index of the physical volume of business, which well sums up the whole, has advanced 21.4 per cent."

It is pointed out, too, that industrial activity is more apparent in a wide variety of trades than at this period in 1933, and that a better distribution of goods is being made. Bank import and export trade is increasing, bank clearings, railway car loadings, mineral production, forests and fisheries all reveal substantial betterment, even in agriculture, and taking the Dominion as a whole, crops have been more abundant than at one time seemed probable and prices are higher.

Railway car loadings are greater than for several years and at the end of August were 34% higher than in the preceding year; employment in October, which usually shows a downward tendency, actually increased, the official index reaching 100 (which was the index in 1926) compared with 99.4 in 1933, 84.7 in October, 1932 and 83.2 in October, 1931; bank clearings were 20% fewer in 1934 than in any of the preceding three years.

Dominion Government revenues reflect this general improvement, with Customs duties collected in the first ten months of this year 39% greater than in the corresponding ten months of 1933.

Referring to the situation in the United States, the bank summary says: "The past month recorded a partial return to the business activity that has characterized the earlier months of the year."

Steady improvement in Great Britain is recorded. For the ten-month period trade increased by £25,500,000 over the corresponding period last year; railway traffic increased 4.1% since January 1; the number of persons in employment shows further improvement; British Government securities have reached the highest prices on record for nearly thirty years.

That the situation in Canada, United States and Great Britain, in which countries trade is most vitally concerned, is found to be of an encouraging character, making for a greater degree of confidence in the future, which, if it be respected, is an essential condition to continued and greater business improvement.

TO END PAIN

W. N. U. 1935

Oldest Farm Workers

The combined ages of the three men who won the prizes offered by William and Grace Agricultural Association, England, for the oldest farm workers still in active employment totalled 251 years. First prize went to John Chilcott (83 years), second to John Reed (84), and third to Thomas Cook (83).

Investments

If you want to make money, just propagate a desert lawn grass which will grow only two inches high and still stay green.

Sent Rod Wonderful Trip

Special Passenger In Northern Boss On Hazardous Journeys

Thirteen thousand miles had been covered by Canadian MacMillan, Winnipeg King's scout, when he arrived in Winnipeg after having traveled with the mounted police on its annual trip through northern wilds to the Arctic posts of the Hudson's Bay Company and the Royal Canadian Mounted Police.

It was an adventure-ous and wonderful journey with him rose the map of the Canada and the Winnipeg scout, who received it from the Hudson's Bay Company as the award given annually to Canada's outstanding boy scout, related that when he arrived at the C.N.R. station and was greeted by his mother, Mrs. A. R. MacCarl, his friends and officials of the Manitoba council of the boy scout association.

He left Winnipeg on June 30, going first by train to Toronto and Ottawa and then to Montreal from where the Nascopie sailed July 7. In Ottawa he received the flag of the Boy Scout Association, which flew at the top of one of the steamer's masts during the whole journey.

As the steamer sailed northward its new the barren, rocky coast of Labrador, Curtright discovered Lake Harbor, of Baffin Land Wakeham Bay, Wakeham-bay, Cape Smith, Port Harrison and Chesterfield were ports on the northern coast where the steamer called as she proceeded to Hudson Bay and James Bay.

His company on the ship was as interesting as the journey itself. There was Ashley Cooper, governor of the company, and his party. Dominion government scientists, R.C.-M.P. officials on their way to duty posts and Hudson's Bay officials who would work at Hudson's Bay Company trading posts.

Several times the steamer was locked in ice floes and fogs, on one occasion for seven days, and three days at another time.

When the most northerly point reached by the ship was Craig Harbor, on Ellesmere island, were R.C.M.P. officers are stationed. En route to the island the ship stopped at North Devon island to establish a new R.C.M.P. post at Dundas Harbor. Two company men were left at the new post with several Eskimo families and their dogs, taken up from Churchill.

The return was started from Ellesmere island about the middle of September, after several storms, which could remain until next summer had fallen and ice had begun to form.

The steamer arrived at Montreal on the evening of Sept. 30, and Curtright visited several cousins living before coming west.

The long trip is now over, and his second year in pre-medicine at the University of Manitoba has begun. Curtright is a member of the Knox Presbyterian group, St. Margaret's church.

The Hens Of Tordyke

Reborn Was Considered Weak Youth When He Started Career

The striking set of pictures illustrating Vice-Admiral Viscount Mitsumasa Nomura's career, recently held at the Parker Gallery, is full of interest. When Nelson joined the ship of his uncle, Maurice Suckling, the latter's cousin Captain Locker who had had done, that can't wrote should to sent to rough it at sea.

That was in 1778. Twenty-seven years later, at Santa Cruz, the "delicate youth" swarmed up a rope on board his ship, the Theseus, calling for the boarders to follow him, and the shattered right arm. Sixty hours later, after an operation unless any kind of an anesthetic, Nelson was writing a despatch to Lord St. Vincent which he left hand. He assured the Duke of Clarence "not a scrap of that order with which I served our King has been shot away."

Off Cape Trafalgar, on the historic two of our most glorious naval action, he said, "I'll new comme the fleet with a signal," and gave his famous order the immortal "England expects" optic. A few hours later came the tragic. "They have got me at last, Hardy!"—London Letter.

The ancient Romans buried the unbaked wife to the water to damp earth.

A single flash of smile provides the material for 700 different grimaces.

YOUR HANDWRITING REVEALS YOUR CHARACTER

By LAWRENCE HERBERT
(Graphe-Analyst)

(All Rights Reserved)

(Editor's Note: It is very evident that interest in these articles, and in the subject of Character Reading from Handwriting, is increasing. Many readers are sending in their own handwriting for a personal reading by this well-known handwriting expert. Have you sent yours? See the author's invitation following the article.)

* * *

In the course of a huge mail that comes in to me every week, I am impressed by the number of young people, of both sexes, who are very vitally interested in finding what their friend's character is really like.

Some of these are frankly curious, and inform me that they will rely entirely on my verdict. I am gratified by this confidence and always do my best to guide my correspondents aright.

I often hesitate to inform any young person that their sweetheart is totally unsuited to them, because, so often, people can rectify weaknesses or negative traits by a little self-culture. The great point is that a lot of people are mumbled to others, unless they get down to brass tacks and improve themselves.

A young lady wrote to me recently, and sent me a specimen of her boy friend's writing. Incidentally, she told me that he was very fond of gambling, and did not seem able to give it up. A cursory inspection of his writing revealed that his vanity was his inability to say "no". He was vacillating and prone to procrastinate. He was indecisive, unable to make up his own mind.

It does not take much thought to realize that this young man is guided too much by others, and, in his particular case, he finds it impossible to refuse whenever his chums suggest some form of gambling. He hasn't the backbone to say "no".

There is a chance for him, and for my correspondent's hope of making a successful union with him—but it depends on himself. He must exert more backbone. He must learn to decide things; to make up his mind.

If he doesn't, or will not, then my young lady friend may as well write him off as a bad loss, and turn her attentions in another direction.

One of the worst failings to which anyone can be subject, is a chronic indecision and procrastination. Any one who has this disease—for it is a mental ailment—is an unlucky person to become fond of. Unless the failing is overcome, trouble and unhappiness are almost certain to follow.

There are cases where I have no hesitation in warning people to have nothing to do with certain others. Their deceit and dishonesty stand out in the writing like flag-poles. I will deal with this subject further in a later article.

* * *

"Rebel," Saskatchewan—The writing of your friend shows that she is flighty and cautious. You will be unable and to entrust her with the matter you speak of, because you can be sure that she will look after it. It is her instinct to do so. And, being honest and straightforward as she is, you can depend upon her.

* * *

Would you like to know what your character chiefly consists? Have you any friends or acquaintances whose true character you would much like to know? A character reading will reveal your traits to the limelight, and may open the doors of opportunity to you. Send specimens of the writing to you want analysed, and state birthdate in each case. Enclose 10c coin for each specimen, and send with 3c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermot Avenue, Winnipeg, Man. Letters will be answered as soon as possible, but please allow at least two weeks for your reply. All letter are confidential.

Aid Found Successful

Removal Of Thyroid Gland Helps Sufferer From Heart Disease

Surgical relief of "heart disease," suggested by United States medical authorities, has been found successful in England.

Drs. O. Brenner and Hugh Donovan of Queens hospital, Birmingham, treated six sufferers of congestive heart-failure and angina pectoris by surgical removal of the thyroid gland in the neck, known as the "pace-maker of the body," because it is this gland which governs the speed at which the body processes work.

It has been known for years that in certain diseases of the thyroid gland the heart races, the lungs work more rapidly and other body functions are accelerated. Americans medical authorities suggested that if the "pace-making thyroid" were removed the body processes would subside and the heart slow down.

Drs. Brenner and Donovan are the first users of the method, the surgical part of the body-machine, the flagging heart. This theory was followed. The two Birmingham doctors and the results have so far been successful, they stated.

The six patients treated by the new surgical method are now capable of more exertion than has been possible previously, the doctors report.

Make Valuable Discovery

Carthage, Buried For Centuries, Has Been Brought To Light

A whole section of the ancient city of Carthage, buried for centuries beneath the sands of Northern Africa, has been brought to light, archaeological workers announced.

The excavations have revealed villas, paved streets, houses and buildings almost intact from the second and third centuries, and the discoveries are proving enthusiastic any one who has this disease—for it is a mental ailment—is an unlucky person to become fond of. Unless the failing is overcome, trouble and unhappiness are almost certain to follow.

There are cases where I have no hesitation in warning people to have nothing to do with certain others. Their deceit and dishonesty stand out in the writing like flag-poles. I will deal with this subject further in a later article.

The largest known pearl in the world measures four and one-half inches in circumference

FORT SCHOOL BOARD REPORT

(Continued from page 1)

' to this we have been practically free from smallpox in the Province during recent years, within the last fortnight three sporadic cases have been reported, to that Department from widely separated points. One of the most virulent type of smallpox reported in years was among this number. In this case death followed within six days from the development of the first symptoms of the disease.

There is no reason why any individual should develop smallpox. This latter is to bring to your attention the vital importance of seeing that all children of school age, as well as all pre-school children in your district are vaccinated. The vaccine required for this purpose will be supplied free of charge by this Department, and arrangements can be made by your Board to have the vaccinations done by local physicians. Where numbers of children are assembled at one point, special rates are usually given to School Boards by the physicians for the vaccination of such groups. An outbreak of smallpox is as unnecessary as it is wasteful, both of human and material resources. The time to prevent this dangerous infection is before it developes in any community.

In many school districts steps have been taken to immunize the children against smallpox and diphtheria—two entirely preventable diseases. If you have not already taken steps to protect the pre-school and school children of your district, I would strongly advise that this be done now."

Local stores are being decorated in memorable colors this week and a array of Christmas articles are being attractively displayed.

PATRONIZE OUR ADVERTISERS

HOGS THRIVE ON PHOSPHATES AND LIME

We are able to give herewith the report on a very interesting test on feeding hogs. An Alberta farmer penned off 4 groups of hogs with 3 to each group Each group was fed on a different ration for the same period of time and all hogs were weighed in and out of the feeding pen.

The results were as follows:

GROUP 1.

Initial weight	122 lbs.
Gain 61 lbs on 150 lbs. grain	
78½ ground wheat, 10 shorts, 10 tankage	
2¾ salt, 410 lbs. buttermilk.	

GROUP 2.

Initial weight	126 lbs.
Gain 80 lbs. on 150 lbs. grain	
74½ ground wheat, 4 bone meal	
2 salt, 10 shorts, 10 tankage.	

GROUP 3.

Initial weight	124 lbs
Gain 96 lbs. on 150 lbs. grain	
2¾ mono-calcium phosphate, 78 ground wheat	
10% shorts, 10 tankage, 2 salt.	

GROUP 4.

Initial weight	96 lbs.
Gain 94 lbs. on 125 lbs. of grain	
2½ mono-calcium phosphate, ¾ cu	
Potassium Iodide	
2% salt, 10 tankage, 10 shorts, 76 ground wheat.	

It will be noted that group 4 made the largest gain—94 lbs.—on the smallest amount of feed—125 lbs., the difference in the ration of group 4 being the addition of 2% mono-calcium phosphate and a small amount of Potassium Iodide.

These results show a marked response to feeding a mineral supplement and most of the minor hogs being marketed have been fed minerals. Along with the practical results being obtained, scientific investigations not only indicate appreciable feeding per thereby phosphorus and lime, but suggest further that feeding these two minerals to livestock corrects many unhealthy conditions attributed to mineral deficiency. Phosphates are now considered to be a very important constituent of livestock rations and a sure method of overcoming mineral starvation.

Get your Mono-Calcium Phosphate at The Fort Hardware Co.

PLAN TO KILL 1,000 BUFFALO

With the annual round-up of buffalo almost completed in the park there, killing of 1,000 animals will commence Monday, it is announced The staff is on hand at the abbotsfer and killing will commence as soon as the large crew of riders have completed their task of cutting out the 1,000 head from the main herd.

Notice to Creditors and Claimants

IN THE ESTATE OF WILLIAM EDWARD JOHNSTONE, late of Wetaskiwin in the State of Minnesota, one of the United States of America, Deceased.

NOTICE is hereby given that all persons having claims upon the Estate of the above-named William Edward Johnstone who died on the 17th day of April, A.D. 1934 are required to file with National Trust Company Limited by the 15th day of January, A.D. 1935 a full statement duly verified of their claims and of any securities held by them and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

DATED this 6th day of December, A.D. 1934.

NATIONAL TRUST COMPANY, LIMITED
Administrator of the Estate of Wm. E. Johnstone, Deceased,
EDMONTON — ALBERTA
By their solicitors
Messrs. Corbett & Harper

"...So that Our Visitors will be Sorry to Leave"

"If we are going to invite people to this country, we must be honest with them . . . Courtesy costs nothing and is one of our greatest tourist assets . . . Let us no treat strangers within our gates that it will be easy for them to come, pleasant for them to stay, and difficult for them to leave."

Rt. Hon. R. B. BENNETT, *Prime Minister of Canada, to the Canadian Association of Tourist and Publicity Bureaus, November 6, 1934.*

Canada's tourist activities represent more than a great industry from which everybody benefits. They provide an opportunity to create what the Prime Minister has described as "that feeling of neighbourliness" which is such a vital factor in building up cordial relations within the family of nations.

For both these reasons, may I urge upon the people of Canada the importance of showing consideration, courtesy and honesty to guests of our country? Let us all do those little acts of kindness which count for so much when one travels in a strange land.

We have a beautiful country. We must keep it so. We want our visitors to travel highways free from disfigurement, walk the streets of cities that are orderly and clean, and find at the end of every day's travel an inviting spot to rest. Canadians should turn their attention now to the important work of preparing for next year's tourist season.

As a nation, we are advertising abroad the attractions of Canada as a holiday land. We must see to it that our guests return home with only the happiest recollections—and the determination to come back again and again.

Nor should we be careful, in planning our own vacations, that there are beauties to discover and friendships to be made in our own neighbouring provinces. We live in one of the world's most glorious playgrounds—let us learn to know better the rich variety of its travel attractions.

WORLD HAPPENINGS BRIEFLY TOLD

A multitude of 200,000 persons watched the Duke of Gloucester until the Anzac memorial in honor of Rose Monie Watts Instance who fell in the war

Cuba income of United States farmers during October from all sources was reported by the bureau of agricultural economics to have totaled $726,000,000, compared with $620,000,000 in October, 1928.

Dr Leo Dulieul, director of the Canadian travel bureau, is on a tour of western cities to get viewpoints on advertising Canadian attractions for tourists. Economic conditions were not interfering with tourist traffic, he said.

Prime Minister J. Ramsay MacDonald announced in the House of Commons that Great Britain will not oppose to the United States negotiations for a part of mutual assistance in the Pacific along the lines of the Locarno treaty.

The judicial committee of the privy council reserved judgment on the appeal of the province of Manitoba from a decision of the Canadian supreme court, in a dispute with the Dominion government over timber rights.

The Earl of Bessborough, Canada's governor-general, already known as an accomplished orator, revealed himself a horticulturist of note, winning the gold medal for the best variety of chrysanthemum shown at the Royal Winter Fair, Toronto.

A wedding gift from the mayors of the empire to the Duke of Kent and Princess Marina was exhibited at the admiralty in London. It consists of a rare antique silver tea-service fitted into an oak chest on which is inscribed the names of the Royal navy and of the Dominion and Indian navies.

Russian Crown Exhibited

Was Sold By Soviet Government To Private Collector

A crown worn at their marriage by the last three Russian czarinas was exhibited at the fine arts exposition at Rockefeller centre, in New York. The crown, which is a part of Czarina private collection, is the most important piece of Russian crown jewelry known to have been disposed of by the Soviet government since its accession to power.

It is made of smoked velvet ribbon, reinforced and shaped into a circlet with three cross pieces. On the ribbons are two rows of large diamonds and three of smaller stones, and a cross which tops the crown contains his huge brilliants. There are 2,500 of the big stones in all and 1,200 of the small, and the total weight of diamonds on the crown is about 280 carats.

The crown was made about 1840, during the reign of Nicholas I., for the marriage of the future Czarina Marie Alexandrovna to the Czarevitch Alexander, later Czar Alexander II. This minor czarina who wore it bore Feodorovna, wife of Alexander III., and the ill-fated Alexandra Feodorovna, wife of Nicholas II., the last autocrat of Russia.

Clusters of the Catherine the Great wore the diamonds in their present settings, and that they were later brought to the crown shape is probable. The diamonds are extraordinarily clear and brilliant stones, of South American or Indian origin.

Great Display Of Apples

Exhibit Fruit Company Paid Over $50,000 For Prize Winning Box

"The world's largest box of apples," a specially built mammoth replica of a standard apple box, was exhibited by the Winesburg co-op. the Dixie Grocer train in Chicago.

The box mounted on a 40 foot flat car, contained 750 bushels of goods with "extra fancy" winesaps from Yakima, Wash., weighing a total of 36,382 pounds, and consigned to the Detroit Fruit Auction Company of Detroit. The company is said to have paid $2,500 for the shipment. On either end was a huge replica of a shipping tag carrying names of contributing apple growers.

Bird That Steals Parrot

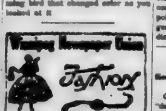
Bushgirder Can Speak Long Sentences And Any Not Rude

The parrot's reputation for being the best talking bird is in danger. He has a very serious rival in that little pointed-tipped fellow, the budgerigar. In the recent bird show at the Crystal Palace, London there were recently budgerigars that could talk the average parrot's head off. They recite poems and nursery rhymes. They have imagination as well as imitativeness and they are not rude, like parrots. It is even claimed for some of them that they speak long sentences in the best English. "Billy Martin," shown by Mrs. S. A. Martin, of Caldford, had a repertoire which included

Mary had a little lamb.

Its fleece was white as snow.

Then there is Joey who belongs to H. Lanin of Whalebarth. He knows several poems, and he will tell one if to "O.K. Baby," and lots of other things. One of the smallest birds in the show drew the biggest crowd. It was the £1 000 ruby and topaz budgerigar that changed color as you looked at it



By Ellen Worth

SPECIMEN CROSS-SECTION BROOCH

A PLEASING WEARABLE FOR ADORABLE APRON

You'll plan your kitchen chores with much enthusiasm with this pretty Winnipeg Industries Exhibition apron.

And it's the most simple thing to make it. Colorful bias binds finish all the edges. And by the way, these bias binds come folded, ready to stitch in place.

The apron with green dots and green bias is very effective to match flower bouquet.

Prints checked gingham, gay flowery prints, Indian patterns, plaids or striped linen, etc., are most suitable materials for this attractive apron that you can make in a variety of ways.

Style No. 835 is designed in sizes small, medium and large. Medium size requires 2½ yards of 35-inch material with 2½ yards of binding.

For this pattern, 20 cents (in stamps or coin (coin is preferred), should be sent carefully.

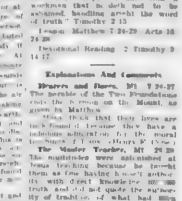
Thickening For Pastry



Port William Brenan R. Cornish-walls of the Canadian Pacific Railway, whose heroic action in jumping from a moving yard engine at Port Arthur to save a woman from an attempted suicide has received high commendation from Port Arthur's police magistrate and the district general superintendent of the Canadian Pacific.

New Men On Liner

Second Assistant Takes Care Of Engine Room

Ocean Rangers are getting very "choosy."

The ship's butcher, traditional keeper of passengers' dogs, was relieved of his duties when the Washington sailed for Hamburg. A new rating, that of "second" attendant, was given to a member of the crew.

The Washington's passengers no longer can question the identity of their steaks or profess to mourn the sad fate of Spot as they look on their chops.

The number of passengers traveling by liner accompanied by their dogs has increased so much as to insist that new kennel accommodations had to be built and a special attendant become necessary.

Ultra Journeys In Science

ATMOSPHERE

(By Gordon H. Guest M.A.)

Around the earth are sixteen and a half millions of pounds of air or atmosphere exerting a pressure of about fourteen tons on each person. Because this pressure is distributed evenly on all parts of the body it does not cause inconvenience. At sea level the air weighs one ounce in a little more than four-inch pounds per square inch, but the pressure is less on higher levels because the air above presses on that below making the lower pressure greater near the earth.

Turbulent air flows in vertical and swirl of rising winds. The first to cross the air was Blanchard in 1785. This is now a sport with a crew of 3 parts in 1000 of oxygen. If there were not the presence of a by sound and smells like ammonia. It is also found in the blood and tissues together with many minute particles of organic and inorganic matter. After an electrical storm nitric acid is also found.

Humans and animals breathe in the oxygen from the air, and give off carbon dioxide and gas. Green plants breathe in carbon dioxide and give off oxygen. Man depends on oxygen for life and so the proportion and ventilation should be over-estimated. Workers which are not well supplied with fresh air become a menace to those who live in them since the oxygen in the air is used up giving place to carbon dioxide, which is injurious when breathed in large quantities.

In addition to life and combustion other phenomena which depend on the air are: The propagation of sound, the disintegration of plant and animal matter, twilight polar lights, and the blue color of the sky.

Hydrogen peroxide, which is used to kills bacteria in milk, water, fruit juices and other liquids is a fraction of a second.

SUNDAY SCHOOL LESSON

(By D. A. Sinclair, B.A.)

THE CHRISTIAN AS TEACHER

Golden text: "Ye shall receive power, after that the Holy Ghost is come upon you: and ye shall be witnesses unto me both in Jerusalem, and in all Judea, and in Samaria, and unto the uttermost part of the earth." Timothy 2:15.

Lesson: Matthew 7:24-29. Acts 18: 24-28.

Devotional Reading: 2 Timothy 3: 14-17.

Explanations And Comments

Hearers and Doers. (Vs. 24-27. The parable of the Two Foundations. Read prior to giving on the Mount, as given by Matthew.

Wise—Greek idea that their lives are to be found it because they have a definite standard to go by; found in Judaism, Christianity, Islam, etc.

The Master Teacher. (Vs. 28-29) The multitudes were astonished at Jesus teaching because he taught them as one having authority, and not as the scribes with dead knowledge (vs. 29). The truth and not quality the authority of tradition, of what had been said before him by some one else as the final court of appeal. The scribes were the professional students and teachers of the Law. Jesus was the leader of many young pupils of the Law of rap-sodding it.

Learning to Teach Better. Acts 18: 24-28. There came to Ephesus about twenty years after the death of Christ a man named Apollos an Alexandrian Jew who had a great command of language, could speak with fervor and zeal, and was well versed in the Old Testament scriptures in the knowledge of which the all Jews, he had been thoroughly instructed some instruction in the way of the Lord. Some knowledge about Christ and the Christian life, and being of a zealous spirit he began to speak and teach boldly in the synagogue at Ephesus. His knowledge of Jesus had been gained from the disciples of John the Baptist, and was accurate as far as it went, but not full nor far enough, as Priscilla and Aquila perceived when they heard him.

It was with Priscilla and Aquila that Paul had made his home while in Corinth (Acts 18:1-3), and when Paul was forced to leave Corinth, these two went with him (18:18). When they came to Ephesus Priscilla and Aquila remained there while Paul went on to Syria.

Priscilla and Aquila saw how useful Apollos could be in the work in her years in Corinth, and they took him in hand and taught him more accurately the way of God. He had come to Ephesus seeking opportunity for doing good, and he not only found the opportunity but unexpectedly received great good himself.

Soon he wished to go over into Achaia to teach, and to this he was encouraged by "the brethren" who wrote to the disciples there to receive him There Apollos helped much through grace them that had believed: and he the marginal rendering of the Bible translates. He was able to confute the Jews at Corinth and show by the Scriptures that Jesus is the Christ. Paul speaks of Apollos as watering where he had planted (1 Cor. 3:6), and some of the people became so attached to Apollos and his teachings that they called themselves his, rather than Paul's, disciples (1 Cor 3:4).

They Had Three Flowers

Unwritten Rule Governs This Custom At Royal Wedding

Princess Marina's wedding brought forth so many pranks, comments the Glasgow Herald. The system which governed the travel de-cockers during the wedding of the Duke and Duchess of York was repeated, and the route followed by the three processions in London was kept a secret. Everything was carefully studied. Nearly everyone who possesses a window that might afford a royal view had to have it boarded up, and the commercially minded sealed appropriate charges to visitors. It is not generally known that there are unwritten rules against throwing flowers—a custom which persisted until the middle of last century. It was found that crushed petals made the roads unsafe for the horses in the procession and the practice was discouraged for this reason.

Get What He Wanted

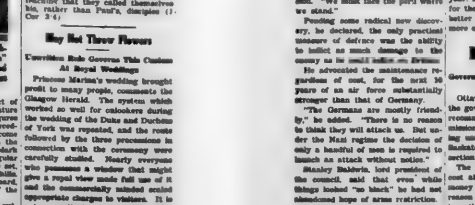
"Don't give me cash worry re payment yearly. Then I can't be bothered," said the railway inspector to the line overseer. "Just put down the thousandth of the track he you find it. Leave out everything that isn't to the point. I want a business letter, not a novel."

The overseer replied that he grasped the idea. A few days later the line was busily finished, and the overseer wrote his report to the inspector in the new style. It read:

"From the bridge was the river to"

SNAPSHOT GUILD

"TABLE-TOP" PICTURES



Two table-top pictures. At left, is a tiny cook-and-party doll given a "Flying Dutchman" appeal by the use of a paper doll and a shooting from underneath. Above, a circus scene made with familiar dolls and toys.

If you want to give an effect of deep distance, as in a miniature landscape, or in a miniature landscape, or in a miniature landscape, place various figures (trees, houses, fences, etc.) in receding planes. The focus will become less exact as the distance from the camera increases. A piece of dark cardboard, cut with an irregular edge, will screen the back of the picture and become a range of distant hills, and a big piece of light cardboard, set up well back of the scene, will become, when you a good "sky".

Remember that the camera's outlook is wedge-shaped—narrow close to the lens and widening out as it goes into the distance.

The greatest fun in this work is playing with light. Sometimes a single strong flood of light into one part of the picture is what you want. Or you want one figure to stand out sharply, with everything else subdued. To do this, you will have to shield all most of the light with sheets of cardboard, books, or whatever you need.

You'll get your best effects by working with the lens at its widest opening (smallest number). Otherwise, you'll have to use exposures from five seconds to a minute or two, depending on the amount of light.

Don't forget that most time exposure lens is stable, and not blurry or dark gray. A white object will appear as a blur, and will be lost in dark; similarly, a red spot will appear as a dark blur.

Try developing longer than the usual time and you will get a softer, more delicate negative.

JOSEPH VAN GUILDER.

URGES GERMANY TO ABANDON ISOLATION POLICY

London.—Sir John Simon, foreign secretary, wound up a "council of state" debate on home defences in the House of Commons by expounding the full contents of Stanley Baldwin's speech, urging Germany to abandon her policy of secrecy and isolation, had been delivered to Germany, France, Italy and the United States with a full explanation by the foreign office

Sir John's announcement climaxed an all-day debate on imperial defence. The house rejected an amendment to the address in reply to the throne speech from Winston Churchill declaring Britain's defences were entirely inadequate, and approved the government's address.

The foreign secretary emphasized there was no difference of opinion in Britain on the question of defence. There were no advocates of unilateral disarmament.

He said Mr Baldwin's plea that Germany ease the condition of nervous apprehension in Europe by tearing away the veil of secrecy helped open the way for mutual security. That speech had been delivered to world powers, he said, "because this is not an affair between two countries but an European and world proposition."

"We have thus helped to clear away a great deal of suspicion" The communications to other governments constituted a new development and might be received by them they found fear.

It was with Priscilla and Aquila that Paul had made his home while in Corinth (Acts 18:1-3), and when Paul was forced to leave Corinth, these two went with him (18:18). When they came to Ephesus Priscilla and Aquila remained there while Paul went on to Syria.

Priscilla and Aquila saw how useful Apollos could be in the work in her years in Corinth, and they took him in hand and taught him more accurately the way of God. He had come to Ephesus seeking opportunity for doing good, and he not only found the opportunity but unexpectedly received great good himself.

Soon he wished to go over into Achaia to teach, and to this he was encouraged by "the brethren" who wrote to the disciples there to receive him There Apollos helped much through grace them that had believed: and he the marginal rendering of the Bible translates. He was able to confute the Jews at Corinth and show by the Scriptures that Jesus is the Christ. Paul speaks of Apollos as watering where he had planted (1 Cor. 3:6), and some of the people became so attached to Apollos and his teachings that they called themselves his, rather than Paul's, disciples (1 Cor 3:4).

Big Business Rules

Manufacturers Enrol Influence To Support Government Control, Says Stevens

Toronto.—The manufacturers of big business are the real government of Canada," declared Hon H H Stevens before University of Toronto students at Hart House.

The former minister of trade and commerce was guest speaker of the university debate on the resolution That in the opinion of the house big business is a curse when directed solely by the profit motive.

"Now don't get me wrong" he continued. "I do not say, nor would I admit, that the leaders of big business personally interfere with the operation of the government but the very nature of the laws of the country and the character of this big business, as defined in the resolution, exerts an economic influence which supplants government control."

Mr Stevens was the first speaker for the affirmative and at the conclusion of his address the house voted that big business was the curse.

Mr Stevens said he turned to the financial page of his newspaper and read the statement of a large and powerful bank The statement showed deposits by the people of $630,000,000, government and other public debentures, $317,000,000, and commercial loans, $343,000,000.

"Now far be it from me to criticize any bank whose power and strength is denoted by such figures," said Mr Stevens, "but it is my contention that banks are not meant to be a safety deposit place for government bonds They are the custodians of the money of the people to be loaned out for development in Canada. Government Loans to business men of Canada are about one-half of what they should be.

And here is a fact of which I am ashamed, and I am sure you will be also. During the last 10 years by the Windsor districts there are 100.00 workers living under conditions that would be a disgrace to mid-central rental areas, have since Canada."

The great crime of the age, said Mr. Stevens, was the refusal of big business men to assume responsibilities, "Mr. Churchill asserted He declared the great new fact which rivaled the attention of every country in Europe and as the world, is that "Germany is re-arming on land, to some extent at sea and, which concerns us particularly, in the air"

Stressing the need of strengthening the air force particularly, Mr Churchill said almost every part of the United Kingdom was within range of air attacks from the continent.

"It is useless to move arsenals and factories to the west coast," he said. "We must face the peril where we stand."

Pending some radical new discovery, he declared, the only practical measure of defence was the ability to inflict as much damage to the enemy as he could inflict on Britain.

He advocated the maintenance regardless of cost, for the next 10 years of an air force substantially stronger than that of Germany.

"The Locarno treaty is mostly friendly," he added. "There is no reason to think they will attack us. But under the Nazi regime the decision of only a handful of men is required to launch an attack without notice."

Stanley Baldwin, lord president of the council, had said that even when things looked "as black" he had not abandoned hope of arms restriction.

"There has grown a condition of nervous apprehension which bodes ill for peace," Mr. Baldwin admitted. He suggested the Germans ask themselves whether the price Germany was paying in the mental condition of Europe was worth her secrecy and her breaking the Geneva ties with her sister nations."

Money Not Available

Government Cannot Authorize Outlay For Radio Station

Ottawa.—Owing to lack of funds, the government has not seen fit to act on recommendation of the radio commission that a high power broadcasting station be constructed in eastern Saskatchewan to serve the middle section of the prairie provinces.

The proposed station would have cost about $250,000 and this sum of money available to meet it. For this reason the government has declined to accept the outlay this year but will reconsider the position next spring when the new fiscal year begins.

Bread Cards Abolished

Moscow.—Bread cards will be abolished in Soviet Russia on January 1 and bread flour will be sold generally in open shops, it was announced at a meeting of the central committee of the party. The committee also announced this will necessarily increase bread prices, but gave instructions that wages, workers' pensions and money given to students will be increased to meet the advance.

Poultry For England

Halifax.— Part of John Bull's Christmas dinner at least is assured by shipment from this port during the first week of December of 1,500,000 pounds of choice poultry valued at $300,000.

Will Try To Help

Montreal.—Improvement in the financial situation for war veterans enabled the Canadian Legion to consider questions with which it could not deal previously, Colonel W. W. Foster, Vancouver, acting president of the Legion, stated here. As result of this improvement, he said, the Legion has now offered the services of its members to the Dominion government to help if possible in relieving the unemployment crisis.

NO COMPROMISE

While conceding Great Britain the right to possess the largest navy in the world irrespective of her far-flung Dominions and Colonies, Tauno Mannekaira, above, declared Japan would not be satisfied with anything less than full naval equality with the United States

U.S. Team Wins

Decisive Victory Obtained In Jumping Event At Winter Fair

Toronto. — Classified riding by United States army team gave them a decisive victory in the international officers' team challenge trophy, outstanding event at the Royal Winter Fair horse show. The trophy, presented by Hon. G. Howard Ferguson, Canadian high commissioner at London, is open to all nations for teams of three jumpers.

The Irish Free State army team, last year's winner, put up a strong show, but had to fault twice, and by the first rider lost their chance of victory.

The United States, which won it in 1932, had only six faults scored against it, three by each rider.

The Chilean team with 15 faults, were shunted into third place. Twenty-one faults gave the French squad into fourth place ahead of the Canadian team which scored 26 faults.

Bank Of Canada

Montreal Shareholders Suggest Nominee For Board

Montreal. — Montreal stockholders of the Bank of Canada suggested nominees to the board of the Bank of Canada as follows: Sir Herbert Marler, president of the Dominion Steel and Coal Corporation; Victor M. Drury, president of the E. B. Eddy Company, Limited; Robert J. Magor, presidents of the Montreal Board of Trade and president of the National Steel Car Corporation; W. C. Finley, director of the Montreal Tramways Company, and Lt.-Col. F. H. Phillips, president Financial Service, Limited.

The local group of stockholders who agreed on the nominations met at the board of trade at the suggestion of the Canadian Chamber of Commerce.

Japan's Wheat Crop Up

Tokyo.—Japan's 1934 wheat crop shows a substantial increase compared with 1933 according to an estimate of cereal crops issued by the ministry of agriculture and forestry The wheat yield this year is estimated by the ministry at 9,681,000 koku (47,255,000 bushels), an increase of 27,300,000 bushels over the preceding year's harvest

Ended For December

Paris.—Canadian salmon exporters will be excluded from the French market completely during December The 1933 accord expires Dec. 1, and the new accord, reached last September, does not become effective until Jan. 1

Canada's New Bank Bills

Details Were Made Public By Finance Minister

Ottawa.—Members of the royal family and two famous Canadian prime ministers are portrayed on the new paper currency to be issued by the Bank of Canada. Details of the new money were made public Hon. Edgar Rhodes, Minister H. H. Rhodes The denominations so far contracted for are 1's, 2's, 5's, 10's, 20's, 50's, 100's, 500's and 1000's.

Sir John A Macdonald Confederation prime minister, and Sir Wilfrid Laurier, the great Liberal, who was prime minister from 1896 to 1911, are the two Canadians whose likenesses will be perpetuated in the new money. Sir John A. Macdonald's likeness will be engraved on the $500 bills and that of Sir Wilfrid on the $1,000 notes. The new notes also bear engravings representative of agriculture and "protection" and "transportation."

The new bills will be six inches long by 2½ inches wide, fractionally smaller and wider than the United States bills and small smaller than the existing Canadian notes.

The 1's will be green, 2's blue, 5's orange and 10's purple Colors for the other denominations have not been definitely decided

What Quota For France

This Means That Argentina And Canada Must Take Less

Budapest.—Representatives of six wheat exporting countries meeting here decided to grant France an export quota for 1934-35, provided their respective governments approve

The decision came after three days of discussion, following the adjournment of the full wheat conference

Draft of the agreement, which United States delegates described as "very complicated," was sent to the seven governments, including France for approval. Meanwhile delegates refused to reveal the size of the quota offered France

This was the first time an export quota had been offered France and it meant that other exporters, particularly Argentina and Canada which between them exported to get two-thirds of the total quota of 600,000,000 bushels, must take less.

It was believed the figure proposed for France was between 12,000,000 and 20,000,000 bushels.

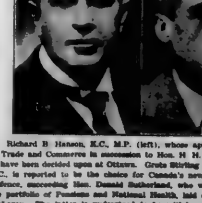
Japan's Wheat Crop Up

Tokyo.—Japan's 1934 wheat crop shows a substantial increase compared with 1933 according to an estimate of cereal crops issued by the ministry of agriculture and forestry The wheat yield this year is estimated by the ministry at 9,681,000 koku (47,255,000 bushels), an increase of 27,300,000 bushels over the preceding year's harvest

Ended For December

Paris.—Canadian salmon exporters will be excluded from the French market completely during December The 1933 accord expires Dec. 1, and the new accord, reached last September, does not become effective until Jan. 1

NEW DOMINION CABINET MINISTERS



Richard B Hanson, K.C., M.P. (left), whose appointment as Minister of Trade and Commerce in succession to Hon. H. H. Stevens is understood to have been decided upon at Ottawa. Grote Stirling (right), M.P. for Yale, B.C., is reported to be the choice for Canada's new Minister of National Defence, succeeding Hon. Daniel Ballantyne, who will, it is said, assume the portfolio of Pensions and National Health, held down by Hon. Murray MacLaren. The latter is understood to be withdrawing from the cabinet. Mr. Stirling will, it is said, also be Acting Minister of Fisheries.

CHOICE OF WEST FOR DIRECTOR OF CENTRAL BANK

Saskatoon.—E. A. Wright, prominent farmer and cattle breeder of Drinkwater Saskatchewan, received the unanimous support of western boards of trade in their nominee as director of the Bank of Canada representing the three prairie provinces. His name was forwarded to the Canadian Chamber of Commerce, and will be included, it is expected, in the list of officers for which the chamber will solicit the support of the shareholders

Several other persons were under consideration at the meeting but were unsupported on the grounds that their chief occupation was not that of primary production as set out in the act and recommended to the western boards by the chamber of commerce Mr Wright is actively engaged in farming and livestock raising

Representatives at the meeting were: Mr McCurdy, president of the Winnipeg Board of Trade and business manager of the Winnipeg Tribune, and R. C Gifford, secretary; J. H Hassel, commissioner of the Calgary Board of Trade; L. A. Thaxton, representing Regina Board of Trade and Mr. Wright and J. D Ouns representing Saskatoon. J. W Glowerspit, of Edmonton, was unable to be present at the Winnipeg Board of Trade telephoned concurrence in the selection of Mr Wright.

Mr Wright's name was placed before the meeting by the representative from Regina In supporting his selection, it was pointed out that he was vice-president of the Canadian Chamber of Commerce for Saskatchewan, and a director of the Saskatchewan Co-operative Wheat Pool. He has a long experience in practical farming and now operates a large farm in the southern part of the province Mr Wright is president of the Western Canada Livestock Union Several years ago he took a prominent part in organizing opposition to the suggested compulsory livestock pool

Action to agree upon a single nominee was begun by the Canadian Chamber of Commerce about 10 days ago and was taken to make certain that the prairie provinces would get representation on the board of directors Extensive stock holdings in central Canada suggested the possibility that no western would be selected by the shareholders.

Left To Sub-Committee

Livestock Marketing Plan To Be Discussed With Prairie Provinces

Winnipeg Efforts to formulate a livestock marketing plan for the three prairie provinces was shunted onto the shoulders of a sub-committee instructed to negotiate with Alberta and Saskatchewan breeders.

Winding up a two-day conference, representatives of Manitoba fark organizations named a sub-committee of five to seek discussions with Saskatchewan and Alberta organizations as early as possible.

Seek Wheat Agreement

Budapest The international wheat advisory committee has closed its formal meetings but has delegates of the big four exporting countries, Australia, the Argentine and the United States remained over in an endeavor to settle amicably somehow the differences over new export quotas.

Win In Debate

Edmonton —University of Alberta debaters here defeated the touring British team of Leslie Jackson and Robertson Crichton by upholding successfully the resolution that "Liberalism, though it put sputnicks, is dead." The Alberta victors were Ralph Chilton and William Epstein.

Money For Aviators

Johannesburg, Union of South Africa.—Charles W. Scott and T. Campbell Black, London - to - Melbourne air derby winners, will make £13,000 (about $70,000) from advertising fees and film rights, A. O. Hewson, who financed the flight, announced here

Speaker Says Canada Lags Far Behind Other Dominions In Caring For The Blind

The blind man's heritage—sightless eyes—said it in Braille, the world over, was the same the world, the earth, Vague understandings of the stars, the many colorings of the flowers, all these a mirage to him. He gave through life using only their names, his imagination must respond for him, the moment of sight. Yet, with this affliction the blind occupy a position in Canada that is several inches below that of the criminal.

This was the startling contrast made by Philip E. Layton in his address at the 25th annual meeting of the National Canadian Institute for the Blind, of which he is the president and founder.

In comparing the work that other countries in the British Empire and the world are doing for their blind, Mr. Layton said Canada stands last. It is the leading Dominion in the empire. I am sorry to say that it is far from the leading Dominion in the care of its blind. Canada takes the hotter care of its criminals than it does of the poor blind. The criminal is given board and lodging and clothing but the blind are left to starve or beg. The way of the blind is particularly hard. Prejudice and ignorance stare them in the face at every turn. When they have received degrees of universities, graduated for teaching music or leading pianos, they find it very difficult to get a position. It is bad enough to be deprived of seeing the material world, but the condition of the blind man is much worse," he said.

"The average man or woman treads into the earning power of the blind," the speaker continued, "who their friends have had been able to help them as they have done in the past. A few years ago hundreds of blind people put their living tomfoolery, playing at parties, or teaching pianos, but the radio has taken the occupations largely away.

Mr. Layton said the work that is being carried on towards having the old age pension apply to the blind by Dr. Cohoon, M.P., for Hamilton, Ont., who will present that bill at the next session of parliament. He suggested that a letter from the Dominion secretary would greatly encourage the member of parliament.

Continuing Mr. Layton said: "In listening to the reports brought of the work of this organization I thought how fortunate blind people are in the employment in workshops. There are only 250 blind people employed in six or seven workshops for the blind in Canada. Probably twice as many are earning their living nothing newspapers in operating canteen stands, etc. there are probably from eight to ten thousand blind people in Canada and not more than five per cent. of this number are able to earn their own living. There are at least 1,500 blind in Montreal.

"When I hear from the eyesight be lower his job after 40 years in his home. His children are scattered hopelessly from him. His income every effort. He is afflicted, but at least like a man with a income wing to give up. His spirit is broken, he loses his health physically and mentally and then mentally sets in, fettered by solicits.

"People often ask: 'Where are so many blind people? We don't see them on the streets. We don't see them about! There are many good reasons for this. They are kept shut in homes. They have no clothes to go out with. Their sisters and brothers and friends would be ashamed to be seen with them on the streets. Some of the blind have never known what it is to have a new suit of clothes or a new dress. Again, the blind are afraid now to go on our streets, with few exceptions. Afraid they might be knocked down by a motor car. Quite a number of blind people have been killed or injured on our streets. There are four blind people belonging to the Montreal Association for the Blind have been killed.—Montreal Star.

The test in the room is one upon down to the numberless hemispheres.

W. N. U. 2878

Habits Of Certain Ants Subjected To Careful Study Over Long Period

Naturalists in Europe have been studying the habits of certain ants they discovered that the insects go through most careful operations in preparing for the winter and that they perform this operation, not for herself, but for another. She eats for the benefit of the other ants. She is busy washing the face of her companion and then goes over the whole body. The actions of the ant who is being washed show the utmost satisfaction. She lies down with all her limbs stretched out ready and she rolls over on her side, turns on her back, a perfect picture of ease. The pleasure the little insect shows in being thus cared for is unmistakable. Even the ant licks the face of her companion and then goes over the whole body.

Supplementary Feeds In Farming

Possibility Of Using Blended Feeds In Low Temperatures

In view of the growing practice of using supplementary mother feeds in connection with practice for farm and other machinery, the feasibility of using blended feeds in connection with Canada, in which low temperatures are the rule during the winter, has been carried out at the National Research Laboratories in Ottawa. The particular focus of research is of special practical importance to the dairy industry, and consequently the laboratories have determined the relation between water content and solution temperature of the starting gasoline and kerosene now in use or being tried out.

Owing to their availability, kerosene and ethanol (ethyl alcohol) are in extensive use in the preparation of mixed motor fuels to which gasolene is the main constituent. Recent developments make it appear that improved (isopropyl alcohol) can be manufactured cheaply from wood gases which are by-products of the petroleum industry, and it is not unlikely that the Canadian Journal of Research that in the near future the motor fuel will be known as a critical water content, and, conversely, any mixture containing dissolved water has a certain critical or "cloud" temperature below which separation into two phases will occur.

Hot Coal For Hogs

Mature Hay Bean Seeds Lower Quality Of Pork

The mature hay bean seed, either whole or ground, provides an unsatisfactory feed for hogs, both soft and hairy for all kinds of livestock, except market hogs. Hay beans contain a large amount of fat and when fed to hogs in even small quantities the quality of pork is lowered. It is, therefore, recommended that farmers refrain from using the hay bean for feedings to growing hogs. Breed sows can be wintered nicely and will produce healthy litters when fed on a ration containing a proportion of hay beans. As a source of protein for dairy cattle and to keep the cows in excellent condition the hay bean is excellent when fed in conjunction with other grains.

Approximately 30 varieties of hay beans are grown on farms in this country. It is estimated that there are more than 2,000 varieties of this bean, a native of China, in the world.

Control Of Arms Traffic Only Means Of Averting Malpractices, Says Hon. Stanley Baldwin

A New Map

Department Of National Defence Issues Map Showing Airports

A new map of Canada showing the airports, intermediate aerodromes, seaplane ports and anchorages, has just been issued by the Department of National Defence, in co-operation with the Department of the Interior as an aid to aviators and all interested in flying activities. The various types of landing stations are designated by separate symbols. Thus, there are shown forty-eight public airports, twelve private airports, thirty-one intermediate aerodromes, eighteen public seaplane ports, nine private seaplane ports, twenty seaplane anchorages, three Royal Canadian Air Force landplane stations and five seaplane stations. These are usually confined to southern Canada, but there are others such as Fort Smith, Cameron Bay and Aklavik in the Northwest Territories. Aklavik, which is the farthest north airport, is situated immediately to the west of the delta of the Mackenzie River. Most of the prominent mining fields are equipped for aerodrome transportation and stations are shown at Kenora, Red Lake, Flin Flon, and Cameron Bay on Great Bear Lake.

There is a chain of airports and intermediate aerodromes from Winnipeg to Lethbridge and thence northerly to Edmonton. A similar chain is being constructed at the present time between Montreal and Winnipeg but as they are not yet completed their locations are not shown on the present map.

The map is distributed to aviation officials and flying clubs by the Department of National Defence, but the general distribution to the public is made through the Topographical and Air Survey Bureau, Department of the Interior, Ottawa, at ten cents per copy.

Do Away With Slums

Prince Of Wales Makes Plea For Mass Production Of Houses

A strong plea for mass production of homes and complete sweeping away of the slums was uttered by the Prince of Wales, speaking at the luncheon dinner of the Royal Institute of British Architects.

Two thousand assembled architects and their wives heard the prince, who has made this problem also his special care in late years, making many visits to slum districts throughout the country. The government is now engaged on extension of its rehousing program.

CROWN PRINCE VISITS LONDON

When the United Services Ball was held in London recently in aid of the ex-Services Welfare Society, many foreign celebrities attended. Here we see the Crown Prince of Sweden chatting with Lady Dalrymple-Champneys. The Ball was held in Grosvenor House, and, incidentally, when the guest was drunk to the King's health, it was the first time this had been done in this famous old mansion since the eve of the Battle of Waterloo.

Industrial Fuels

Possibilities Of Using Wood Gases As Motor Fuel

Experiments have been carried out in Canada and the United States with a view to the use of wood gases as motor fuels. The process is known as the gasification of wood, and the gases produced by the heating of wood in a closed retort. Wood gas is a mixture of carbon monoxide, hydrogen, methane and nitrogen, and is produced by heating wood in a closed retort. Wood gas is a mixture of carbon monoxide, hydrogen, methane and nitrogen, and is produced by heating wood in a closed retort.

Studying New Sun Spots

Effect On Earth Not Fully Understood By Scientists

Astronomers all over the world are observing with intense interest the appearance of new sun-spots, regarded as the forerunners of the next cycle, which for the next 11 years will may affect weather, increase magnetic disturbances, occasionally interrupt telegraph and telephone services, and bring more ultra-violet light for sun-bathers, and possibly poorer reception for radio Between. Popular beliefs connect sun-spots with hot summers, long cycles, severe weather fluctuations and such phenomena as the number of rabbits and rhubarbs at Ottawa. Noticeable evidence is proposed such bleak, lowpoint, has been Sunspots do not, yet fully answer how on the earth and for Scientists. Last August astronomers found that the number of sun-spots was lowest since 1923, and the few that they did see were the lingering remnants of the sun-spot cycle which ended last summer.

Bill Using Wooden Ploughs

Found Most Efficient In England On Clay Land

Wooden ploughs are not only still necessary in England but efficient for their task. On some clay lands they are preferred to iron. They are most common in East Anglia. At Maldon, Essex, there is a firm that has been making wooden ploughs for 120 years. To this day they exhibit and sell them at shows such as the "Royal," where they take their pla ing the most up-to-date electrical and petrol appliances.

Western Sheep Ranges

Canadian western sheep ranges produce from 150,000 to 200,000 lambs each year suitable for fattening purposes. In addition, there are at least 160,000 to 180,000 unfinished lambs that would benefit by fattening.

NER ARMS AND LEGS IMMOVABLE

Ten Years With Rheumatism

To this woman it must have been like commencing to live a new life, when she began to use her arms and legs again, after they had been helpless for ten years.

"I suffered with rheumatism," she writes, "and had been bedridden since 1926. I could not move arms or legs and had to be fed like a child. Everybody thought I should be an invalid all my life. I forced myself to fight against it, and tried a number of different things. It was Kruschen that eventually saved me, and to-day I consider it is saving my life. My condition has greatly improved, and my limbs are gradually becoming more supple. Already I can rat without assistance, and dress myself which I had not done for ten years." M. H.

Two of the ingredients of Kruschen Salts are the most effectual solvents of uric acid known to medical science. They quickly dull the sharp edges of the painful crystals, then convert them into a harmless solution. Other ingredients of these Salts have a stimulating effect upon the kidneys, and assist them to expel the dissolved uratic needles through the natural channel.

THE TENDERFOOT

By GEORGE B. BOSSERT

Author of "The Coronado Trail", "The Canyon Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been symatically losing the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening to his property—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Dunstan Stone, tenderfoot in a Montgomery Ward whitewood outfit.

Dad Kane, desert rat and luckless prospector till now is returning to tell Dustin and Sipho Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Sipho Goddard and Sam Dustin, fearing the old prospector may tell others the things he has seen as to the branding of Carr's cattle, plot to get him to show them the location of the mine and then to kill him.

Gerald Keene, dressed in ridiculous cowboy costume, arrived at the Hour-glass ranch and is hired as a cowboy by Joe Carr. The impersonation of a tenderfoot is successful, and he is accepted as such by the other occupants of the bunkhouse.

Proof of Dustin's cattle stealing activities was accidentally discovered by Stone, accompanied by Bluff. Carr was riding fence a long way from the Hour-glass ranch house.

(How Go On With The Story)

CHAPTER V.—Continued

At the sound of hoof-beats on the trail, men and dogs looked up.

"Hallo," he said. "Three comes some one. . . ."

She gave a quick glance at the oncoming horse, a hovering black, and turned a pretty shoulder.

"It's no one I want to see," she said coolly. It's the man I was thinking about in connection with that stolen cow. It's Mr. Dustin of the Broken Spur."

The black shouldered through the tangle by the pool and rushed the water, and the rider caught sight of the two above him. The next moment he jerked his horse back on his haunches, kneed him out of the pool and forced him through the brush to Keith's side.

"I'm glad to see you, Edith. . . ." He grinned at her . . . "You've got early, aren't you? . . ." His quizzical glance took in Stone, sitting awkwardly in his saddle, looking straight ahead of him into space. "I gun-muzzle dropped into line with his hip. Even a "clean gun" can hit at seven feet.

"If you try that," said Stone grimly "I'll save plug you dead center see your father's headed posts and wire down here to from Soda Springs ferry, but I can't allow that till the courts have decided . . ."

"If they have decided, the Springs are not," she said briefly "I fear I've seen too much . . ." She nodded at the dun cow and the calf. "It just happens that I can swear to that cow in any court of law."

"Yes? Well? Courts are pretty expensive amusements for the Hour-glass. It'll only need a little sense to straighten this mess out. It needs a judge and twelve jurors to take the Soda Springs ferry away from your father. A justice of the peace or a priest can give them back. . . . In five minutes, if you say the word. . ."

For fully a minute she did not understand what he meant. Then her face flamed under its tan and she bent her head flung high. Her red lips had paled and her eyes seemed to emit blue flames as she turned to Stone.

"Did you hear that, Mr. Stone?" she called. There was a fighting edge to her voice that thrilled Duro to his fastest. "I think I'll ask you to be not misunderstood him, has offered to withdraw his suit to take from us what we own. Then Spring . . . He will do this if I go before a justice of the peace or a priest and become one of his women. A legal one, I understand. I'll need some men's advice. You are disinterested. What shall I tell him?"

Stone, puzzled, uttered a hot oath. He had thought she would at least take the matter under consideration. He regarded none so much than one of the ponies but he felt ashamed. Edith's words, her manner, her whole demeanor cut him like a knife.

Stone's face was impassive. No one would ever have guessed that the cold, calculating mind was keeping like molten lava. God, how this girl could fight. What a wife she would some day make!

"You see," she said, "he would only offer that to get what he can never get but by purchase . . . A wife. No real person would lie their life to a man except for gain. He has one establishment in Sepulvida. He . . ."

"Yes, I've been there," said Duro Stone. "That's not my business, Miss Edith . . ."

"By God! You and she have made it yours," exclaimed Dustin. The last vestige of self-control gave way and the dam burst "Marry you? Yes, I will do it. I'm a fool. I don't blame you for not wanting to marry me, you red-headed fire-brand. You'll be glad enough some day to have any man give you his name. Don't forget that when you put your foot of a father in the County Poorhouse. . . . You didn't like to have me in my home in the Hour-glass tie-tack but you can traipse over the hills with any bit of human tumble-weed that turns up dressed from a catalogue. No wonder people talk about you. . . ."

He got no further. Stone flung out of saddle and in one movement the iron grip closed on Dustin's off-foot. The Household Cavalry in London always knew that grip. Cleverly used, it can dismount any horseman who ever sat in saddle, provided only that he is unprepared.

Dustin was totally unprepared. There is but one guard for that clutch. The rider must let his gripped leg go loose. He must let it swing up and over the horse's back. He must pivot on his other foot. There is no real guard. There is a counter-attack . . . The rider swings himself into saddle and his free foot drives down like a pile-driver on the defenseless head of his attacker. But Dustin did not know this. He struggled and his own weight added to his catastrophe. Stone heaved at his ankle, raised it chin-high, and the next moment Dustin, with a queer yell that almost strangled him, was hurtling to the deepest part of the pool with his horse atop, while Stone, his eyes alight, watched him from the bank.

"Sorry I had to do it," he said. "You just asked for it when you spoke to Miss Edith like that. . . . No, you don't!"

Dustin's hand stopped midway to his holster as Stone's ominous gloved thumb up.

Dustin's hands went high in air and the dripping pony struggled to the bank, where Edith sat holding her head in both hands. It had all happened so quickly that she had not comprehended.

"Come on out o' your sea-foam, you . . . you blooomin' Venus," said Stone. "You ain't much to look at, right now."

As Dustin struggled up the slippery bank, Stone snatched the gun from the wet holster and flung it far into the pool. Then he struck the black on the haunch with his hat and sent him at a gallop into the rush

"You can walk home and cool your caloric reborn (hot head)," he said "Come on, Miss Edith Let's head for home."

She drove her spurs in to the rowels-rents and sent her astonished pony at a gallop into the brush and waited for him at the entrance to the open trail.

"You've made a deadly enemy," she said breathlessly. "You must never forget that man. He is more deadly than a rattlesnake."

"Uh hur . . . He was obviously inattentive and it angered her.

"What what I've said?" she snapped. "That man will kill you if he gets a chance."

"He won't have a chance," he said "I will see just to that."

Again she drove in her spurs and took the gallop and the two swept in to the ranch house. To the home corrals of the Hour-glass.

Once inside the smash-house Edith must have told a rather complete story, for Crews tackled Stone when they were alone by the water-trough in the corral that evening

"Boss," said Crews, "you're sure as green as hell, but the Hour-glass owes you a debt for what you did for Miss Edith. I'm your partner, Dustin. Edith told her father an' me . . ."

"Did she say anything about that now and call that started the mess?"

"Sure she did. How did they start it?"

"That man Dustin had just done brandin' 'em," said the amateur puncher. "When his horse come out o' the pool I just naturally thought that the calf-roping was all newly blacksmed by fire. He'd been doin' that to change the brands."

"Huh. That's queer You . . . a amateur at that . . . All right. . . . But you take it from me. . . . Look out for Sam Dustin. He'll get you if he kin."

"Sure," said Duro Stone. "That's fair. If he can. Let it go at that."

CHAPTER VI.

Frank Crews, coming out of his room, stood looking over the wide range behind the ranch-house of the Hour-glass. He was disturbed over what Stone had told him the night before and he had thought much about this new employee. Stone was apparently honest. He was a good ton for work and there was something likable about him. But Crews was suspicious at heart in all matters affecting the Hour-glass. He sighted Lee heading for the kitchen and hailed him.

"Send that new man Stone to me," he said.

The bunk-house took the word and presently Duro shot out of the open door like a pra from its pod. Crews grinned amiably at him.

"Look a-here, Stone," he said. "I've forgot all that you told me last night. I ain't too dorned good to remember much sometimes. I'm goin' to forget it till we can find some proof. Mind you, I don't expect you to find any proof but I just dassent start in a civil war on the range unless and until I got my gun loaded. Old man Carr is too old to pick a row with this man Dustin even over Edith. You see that? We're tryin' to locate this man Keene, who owns the other half of the Hour-glass. Till we find him, we can't do much but watch and wait. I'm tellin' you this so you'll see right where we stand. If you feel like keepin' on here at the Hour-glass, we want you. We want all men who'll be loyal to their salt. That's about all. I reckon."

He strode away to his breakfast and Duro wandered back to the bunk-house.

"Loyal to his salt." . . . That was the word. He reflected that he had come here to the Hour-glass to find out what was wrong and he was finding out with a vengeance. It was real. If you take time to gentle him, he'll make you a good mount."

Stone knew and had coveted that horse, a half-bred, bigger than most and made of steel and whalebone. Crewe watched his new hand catch his newer horse and laughed a little at his awkwardness.

It took him days to master that horse, for muskin of idleness had filled him with an equine devil and he knew no master. When Duro Stone shot out of saddle to land twenty feet away on feet and hands, the bunk-house laughed. . . . All but Red Thom, who screwed an inquiring eye as the long figure that rolled away like a clout rabbit at the horse fell

(To Be Continued)

According To Sight

According to experiments conducted by Prof. Francis R. Sumner, color-changing fish depend on their sight to change their colors. When the upper portion of the fish eye was shaded, they assumed a darker shade, while they turned lighter when the lower part of the eye was darkened.

Lions

If a car stalls on a moonlight night and the man starts looking in the girl's eyes he's single. If he looks in the gas tank—he's married

SKIN BLEMISHES

Vanish Before Physician's Scientific Discovery

Those spots or pimples on your face —why let them go on tormenting you? Like millions of others have done, you can get rid of your skin trouble through the work of a great, pla yician's . Dr. D.D. Dennis. Dr. Dennis' prescription—known in many countries as D.D.D. and now manufactured by Campana's Italian Balm chemists—will bring you relief at once, and quickly restore your skin to health. All druggists sell D.D.D. Trial size, 35c. Guaranteed to give instant relief or money refunded.

CONTROL OF COLDS

For FEWER Colds
VICKS VA-TRO-NOL

At the first warning sneeze, sniffle, or nasal irritation, quick! . . . apply Vicks Va-tro-nol—just a few drops up each nostril. When used in time, Va-tro-nol helps to prevent many colds, and to throw off colds in their early stages.

For SHORTER Colds
VICKS VAPORUB

It's a cold has already developed, apply Vicks VapoRub over throat and chest at bedtime. Mothers of two generations have learned to depend on its poultice-vapor action to help shorten a cold—and without the risks of "dosing."

Build RESISTANCE to Colds—by following the simple health rules that are also a part of Vicks Plan for Better Control of Colds It has been clinically tested by physicians —and proved in everyday home use by millions.

(Full details of this unique Plan in each Vicks Package)

Fort Hockey Team Defeats Civil Service 5-3

The Fort Senior Hockey team took the first game in the Intermediate league Tuesday evening, when they defeated Civil Service by a score of 5-3.

Both team in the first period were slow in getting started until H. Bayliss, Civil Service defence, drove a dandy at Ralph to count, then the teams opened up and the large crowd of fans were treated to some excellent hockey.

Soon after this the locals received their first tally, when in a rush Kelterborn assisted by Jim Taylor drove a beautiful shot. The locals had the edge on the visitors as was demonstrated by the following players getting counters, H. Lamoureux, E. Plisteff, Archie Plisteff and Jim Taylor each was credited with a counter bringing the score up to 5-3. Shaver and Waters assisted by Garside for Civil Service were the rivals to bring their total up to three.

A sparkling performance that should be noted, was when two Fort players were serving time in the penalty box and all Edmonton players were left up. Jim Taylor breaking away for it is a mad dash bent goalie Thompson with a great drive to score.

The game was ably handled by Mr J. Dewar, and very few penalties were handed out, both teams playing good clean hockey.

Future games will be advertised and as soon as the schedule is complete this also will be published. Watch for it and come out and support the team.

Civil Service line-up: Thompson, Biddell, Davies, Cundale, Shaver, Dalphonse, Garside, Waters, Phillips.

Fort. Perch, E Plisteff, H. Lamoureux, R. Kelterborn, Sherman, J. Taylor, J. Lamoureux, J. Plisteff, E. Kazran, O. Kelterborn.

Mrs. Alec Ragsdale, the original of "Alice in Wonderland", whom Lewis Carroll's imaginative and adventuring after the white rabbit of a fantastic world of nonsense, died at Westerham, England, on November 6, at the age of 82 years.

Manitoba's two per cent wage tax brought in $750,000 in the first six months of this year.

Induction Service Held For Rev. R. Simons

The regular induction service which accepted Rev R Simons into the Fort Saskatchewan and Pattison Presbytery was held Friday evening December 7th, at 8 o'clock.

The Rev. Dr Tuttle presided as chairman presenting Rev E. Hodgson who had in charge the charge to the new minister and was followed by Rev Farrell Wards, Chairman, Edmonton, who delivered the charge to the people. Very suitable songs and solos were presented for the occasion Mrs Baker, Mrs Glover, Mrs Gilmore and Miss M. Glover rendering a very enjoyable quartette, after which Rev. Glover sang a beautiful solo.

Immediately following the induction service Rev R Simons and family were welcomed into the parishioners by being introduced to the congregation.

A lovely buffet luncheon was served by the ladies in the classroom behind the church where several more pleasant hours were followed.

The people of Fort United extend Rev and Mrs Simons their welcome and family a hearty welcome to the district. It is their hope and desire that the Rev Simons will be to this district a friend and pastor, and that the Simons family will prove to their utmost the time following which they will spend here.

RHODES SCHOLARSHIP

Donald Wilson son of Dr. W. A. Wilson and Mrs. Wilson of Edmonton has been selected University of Alberta Rhodes Scholar for 1934-35. A fourth year student in Medicine Mr. Wilson has been prominent in athletic and executive circles on the campus since entering the University in 1931. He is president of the University of Alberta men's athletic association and has seen active service on football and swimming teams.

The Rhodes Scholar is the first U. of A. medical man to receive the award.

St. George's W. A. Elects Officers

The annual meeting of St George's W.A. was held at the home of Mrs. Mallon on Thursday afternoon Dec. 6th, when Mrs. W. A. Graham, the retiring secretary, Mrs. Abel read the report of the year's doings, which showed excellent work had been accomplished in spite of depressing times. The Treasurer, Mrs. A. B. Carscadden stated that all obligations had been met with a balance on hand.

Mr. Rudd then took the chair for the election of officers which were as follows—

Hon. President, Mrs. Bullock
Hon. Vice-Presidents, Mrs. Wallis, Mrs. Gilmore, Mrs. W. A. Graham (re-elected)
Vice-Presidents, Mrs. O. McLellan and Mrs. T. Moore
Secretary, Mrs. Abel, R. Smith (re-elected)
Treasurer, Mrs. A. M. Carscadden (re-elected)
Literature Supt. Mrs. E. Graham
Literature Sec. Mrs. Stillard
Living Message Sec. Mrs. Hagar

Hockey Dance A Success

The Fort Hockey Club dance on Friday last was a huge success. The club realized sufficient funds to purchase new uniforms for the coming season.

The hall was nicely decorated with Red and White streamers—the colors of the club this season. Between the outstanding Canadian and American professional hockey and scene of Canada's outstanding sport were posted along the walls beneath arches composed of hockey sticks, all in all creating a sporty effect.

The old and new dance numbers played by the "Rainbow" orchestra brought many sneezes from the large crowd.

The club wish to extend their thanks to all persons who contributed to making their dance such a huge success.

A little lad at the local school said the plural of "white" was "white men".

GOOD HOPE NEWS

Johnston—Cracwell

The Standard Church at Newbrook was the scene of a very quiet but pretty wedding on Wednesday afternoon, December 5th, at half past two, when Matilda Martha, second youngest daughter of Mr. Geo. Cracwell and the late Mrs Cracwell of Newbrook, was united in marriage to Mr. Ernest Robert Johnston, eldest son of Mr. and Mrs. Robert Johnston of Good Hope.

The church was very prettily decorated for the occasion. The Rev. D. B. Parks of Newbrook, performed the ceremony.

The bride entering the church on the arm of her father, was beautifully gowned in blue silk, trimmed with lace. The bridesmaid, Miss Clare Cracwell, cousin of the bride, looked lovely in blue brocaded silk.

Mr. Wesley Johnston brother of the groom acted as best man.

After the ceremony, Miss Clare Cracwell played the guitar and sang "Joy Bells".

After spending a couple of weeks at Newbrook, Mr. and Mrs. Johnston will make their home in the Good Hope district. The happy couple were the recipients of many lovely presents.

Mr William Dodd returned to the district last week, after spending several days in the city.

Mrs Raymond Millar was a visitor in Good Hope last week.

Mr. T. Jolliffe of Newbrook was a visitor in Good Hope last Thursday and Friday.

Mr. C. Simmons, Mr. Robert Johnston and Mrs. D. R. Watson motored to Newbrook, attending the wedding last Wednesday.

William J. Bryant, of Boyle, Alberta, won second prize in the hard red spring wheat class at the Chicago International Show, being second to J. B. Allen.

Mr. Bryant is a former railroader who has made a spectacular success of growing high quality grains on his northern farm. He won the provincial championship with his wheat at the annual show held in Calgary last winter.

Girl Guide Notes

The weekly Girl Guide meeting was held in the town hall Monday, Dec. 10th. The meeting opened with inspection and saluting of the flag.

Work was done on the Merry Code and the Legions of the Patron Saints. Other business was discussed then the meeting was brought to a close by furling the flag and prayers.

At the Court of Honor held afterwards plans were made for the next meeting which will be held Monday, Dec. 17th.

The Observer

It may probably be taken as agreed upon by wise men that the only hope for the preservation of democracy lies in the education of the masses. It is of course a slow process but the conviction is that eventually there will develop that great body of reasoned popular opinion which can be relied upon to support the counsel of wisdom.

That may be regarded as a mark to shoot at. It will not be realized in our time nor for long generations after, but each passing year will see some slight advance towards that end. Have we not, however, gone somewhat astray, temporarily, in our notions of what education consists in. Maybe Plato thought some nineteen centuries ago that he had conclusively exploded the notion that it consists in learning many things, but that notion is still very much alive in our present system it needs to be said again and again that, in the first place, education cannot produce wits nor mental headlights, but can only train and develop what is there. It is not the least use that you may have a well educated man who remains essentially a stupid man. And in the second place, that there is a real and danger in all learning which is not directed towards the harmonizing and mellowing of the faculties. The thing to be stressed, in other words, is not learning in itself but reflection, to the end that there may develop humility and a love of virtue. How long is it since it was said that "the fear of the Lord is the beginning of wisdom, and to depart from evil is understanding."

Only 10 More Shopping Days Before Xmas

You will require a lot of things to fill out your list. Come in and make your selections while the assortment is good. We have have been stocking a nice range of suitable Xmas Gifts for every member of the family.

Men's and Boys' Belts, Shirts, Caps, Gloves, Spats, Etc., Any of Which Would Make a Nice Christmas Present

HEAVY SOCKS

Why not buy him Socks for Christmas? He always likes a new pair of fancy dress socks or perhaps a warm woolen pair for general wear. We have just received a shipment of some nice silk and wool socks in the latest colors. Priced at ..... 25c, 35c, 50c and 75c

BUY TIES FOR MEN

They never have too many ties. Our line of Ties in fancy bows are on display at ..... 50c, 75c, and $1.00

We are showing a line of Silk Ties in a variety of colors, not boxed. Selling at 25c

MEN'S AND BOYS' HANDKERCHIEFS

Plain White Hemstitched Handkerchiefs. Each 10c
Fancy Bordered, good colors ..... 3 for 25c
Men's Linen Initial Handkerchiefs. Each 25c

The Heart Of Man

The season is at hand when once again the age-old song recorded in Holy Writ—"Peace on earth, goodwill toward men" will be sung by millions of voices and the sentiment expressed in the words will be made the theme of countless sermons, addresses, and written articles, of which this is one. And the question will be asked by a puzzled people, naked in their fear, wilderment and sorrow, why is it that after the passage of nearly 2,000 years, instead of peace on earth and goodwill among and toward men, the world is filled with rumors of and preparation for war, and suspicions and hatreds are rife among people everywhere?

In seeking an answer to this question innumerable replies and reasons will be given. Many will lay the chief responsibility upon politicians who will blame the inhumanity and nefariousness of the makers of armaments; a goodly number will declare it to the existing economic system that is the root of the trouble; in a word, the tendency will be, as it has been throughout the years of the past, to apportion the blame to others and to humble-Items of our own making, but never to accept any share of it as our own responsibility. Yet, in the final analysis, the responsibility lies at our own door and rests with us as individuals.

A nation is but an organization of individuals, and the national viewpoint is but the aggregate of the viewpoint of the people who constitute the nation; the national spirit is the spirit of the people themselves. Politicians do what the people want them to do, and statesmen are forced to act, frequently against their own better judgment, because their people insist upon certain action and will accept and support nothing else.

Nations to-day remain in a warlike mood because the individuals who constitute the nations are themselves lacking in goodwill the one toward the other, and lacking goodwill,—which is the only source of peace,—there can be no peace.

Individuals clamor for security in their homes and occupations; nations as organizations of individuals demand security; but there can be no security either for the nation or the individual unless there be peace at home and abroad. Nevertheless, as individuals, in our own homes, in our business, and in our relationships to each other, mankind is unmindful of these great truths, and to a great extent maintains attitudes of suspicion and hostility instead of seeking for understanding and goodwill.

The world, and each and every community throughout the world, consists of men and women who, in the current language of the day, are choosers, seeking to better themselves at the expense of others, trying to pull others down in order that they may rise, desirous of taking that which others have in order that they may possess it. Many creditors are harsh, unsympathetic and unyielding in their attitude towards debtors in great difficulty through no fault of their own and insist on their pound of flesh even though it mean the ruin and destruction of the debtor; on the other hand, many debtors dishonestly seek to take full advantage of a difficult situation to cheat and defraud those whom they had asked to assist them in their past and who did assist them. And demagogues, both of the Right and the Left, of both high and low degree, take full advantage of such difficulty to fan the flames of discord and arouse and intensify feelings of enmity and resentment to further their own ends and the development of goodwill leading to peace and mutually beneficial compromise agreements.

The result is that all parties are invoking the power of the law to enforce their demands. As individuals they demand that force be applied as they deem it supplied. The next step is that as individual groups they demand that the same law or force be applied against other individual groups. And that means preparation for applying such force, and war as the only alternative.

The answer to the question propounded above is that the heart of man is wrong. Mankind has not yet risen high enough, nor sunk low enough to the point where peace on earth and goodwill among men is really and truly desired. Mankind still gropes to live and rule by force, still prefers to act on the theory,—it is not a principle,—that Might is Right. Once man as an individual changes his viewpoint he will find politicians both ready and anxious to accept and act upon it; the armament makers will find themselves without an occupation; freed of all the restrictions and obstructions imposed by individual and corporation selfishness and the evils of narrow nationalism, the economic system will operate successfully.

The bringing of peace on earth and goodwill toward men is not a matter of law; it cannot be brought about by force; it must come, because it is the only way it can come, through change in the hearts of men. It will be a slow growth, a development to which every true lover of peace and every believer in the power of goodwill is called upon to lend his or her earnest and influence. Nothing of others will achieve little; peace must be lived and goodwill practised.

Combine From Lignite

University Of Minnesota Scientists Are Carrying On Experiments

Two University of Minnesota scientists, successful already in development of a practical ingredient for cement from the waste lyes, speculated on the possibility of making gasoline from lignite.

The two, Professor Lloyd H Riverson and Ralph E Brower, hunting new materials and new uses for old ones with the co-operation of the Northwest Research foundation, were heartened by the success of German scientists in making gasoline from brown coal. Lignite, they pointed out, is similar in composition to Germany's brown coal.

Success of experiments in making gasoline from lignite would create an outlet for vast deposits of the low grade coal underlying practically all of North and South Dakota and eastern Montana. Geologists have estimated their total at 1,800,000,000,000 tons.

Seeking Mystery Tribe

Danish Couple Start On Romantic Quest In India

A British couple, Mr. and Mrs D L. R. Lorimer, have arrived at Bhilwara, capital of Udaipur, in Northern India, on one of the most romantic quests in the world. They hope, in the course of a year's stay in the district to solve the mystery of the Burushaski language, which is spoken by a mysterious race believed to be descended from Alexander the Great. The Burushos, who number about 30,000, are a clan of apparently Persian or Afghan origin. They live on both sides of the Hunza River, which divides the State of Hunza from Nagir, and in a region of wild and almost inaccessible mountains. For generations they were the terror of the trading caravans between Chinese Turkestan and Kashmir.

SCORED ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many medical books the subjects of liver disorders and state that 95% of all sickness starts with the liver. Nature's liver should make two pints of bile each day and when bile does not flow freely the food you eat just decays in the bowels, you get constipated, you feel sour, sick and the world looks punk. Dr. Chase's Little Liver Pills will get your bile flowing freely and make you feel like new. Ask for Dr. Chase's Little Liver Pills. 25c a vial.

May Test Rail Rocket

German Engineer Receives Permission From French Ministry

The French Air Ministry has authorized Gerhard Zucker, German engineer, to test a device for shooting mail by rocket across the English Channel. A mailbag is to be attached to the rocket, containing 12,000 letters. It will be shot from Dover over the Channel to Calais, on the French coast, twenty-five miles distant. The rocket contains an explosive ignited electrically. After a fixed number of minutes a parachute opens, allowing the mailbag to float to earth.

Prince Has Seven Names

The Prince of Wales bears seven baptismal names: Edward Albert Christian, after his grandfather, King Edward VII., and two great-grandfathers, the Prince Consort and King Christian of Denmark; George Andrew Patrick David, in honor of the patron saints of England, Scotland, Ireland and Wales.

Have Greater Resistance

Greater physical endurance and greater resistance to fatigue, exposure, nervousness and mental disorders are attained by overweight young men as compared with underweight youths, according to Bellevue Hospital.

At October 31, 1934, forty-three per cent. of the land in Canada included for the 1935 crop was estimated to have been ploughed, as compared with forty-one per cent. in 1933.

The hottest mountain in North America is one called Mt. McKinley, which was seen on the Indians as Denali, "Home of the Sun."

New Kind Of Concrete

Discovered When Workman Fried Meal On Waste Slabs

A workman on a slate quarry in North Wales found himself without a frying pan when he wanted to cook his bean-and-egg dinner.

So he used a piece of waste slate instead. Then he left it on the fire and forgot about it.

As a result, a new kind of concrete lightweight concrete has been discovered.

The piece of slate expanded in the heat. When it is broken up it can be used with cement to make a light form of concrete, such as is used in partitions and house walls.

"The moisture expansion is much lower than that of the usual materials," an official of the department of building research said.

"It is early-naked, and is an excellent buy for plaster work."

Chances Appear Slim

Hardly Possible Franklin's Log Books Will Be Found

Any log books Sir John Franklin may have left before he perished almost a century ago in the Arctic would most likely have been found by now, Captain Peter Freuchen, arctic author and explorer, observed when questioned as to the chances of F. K. Penae, an adventurous young Briton, finding any records of Franklin's epic voyage.

Penae passed through Montreal two months ago with a dog and 30 tons of equipment bound for the Arctic where he hoped to search for documents dealing with Franklin's northern saga he thought he might discover.

Cash For Beet Growers

Harvest This Year Totals Close To Million Dollars

Another quarter of a million dollars in cheques has been received by beet growers of Southern Alberta.

The new payment will make a total of $610,000 paid out on the initial base rate of $5 per ton, with a final payment to be made at the completion of the delivery season

With a record crop of 170,040 tons, the beet growers will receive close to $1,020,000 for their harvest this year.

The winter mortality of the rather threatening number of chinch bugs in south-western Ontario this past season is under observation of officers of the Entomological Branch of the Dominion Department of Agriculture against a possible serious outbreak in 1935.

Granulated sugar sifted over the top of a sponge cake before putting it into the oven gives it a rich brown crust when baked.

250 LB. MAN LOSES 20 LBS.

And Looks 10 Years Younger

"About three months ago," writes a correspondent, I weighed 250 lbs. I started taking Kruschen Salts, and I lost 20 lbs. in a little over two months. I am feeling better than I have in years. My friends tell me I look ten years younger and my wife has no cause to which is amazing, I still have my appetite." Mrs. Nature, Mich.

Kruschen contains just the six salts blended in just the right proportion that are essential to keep you in vigorous good health. Kruschen Salts keeps the system free from overburdening waste matter. You feel better in every way. Especially it will give rise to illuminate and other bad results. Ask Nature in Table form—the delicate means of clearing that poison-breeding material out of the way in the form of fatty tissue.

Strait Does Not Exist

Admiral Byrd Says Land All Way To Pole

A newly discovered section of land in Antarctica has been claimed for the United States by Rear-Admiral Richard E. Byrd.

A huge stretch of ice-covered Antarctic wastes, which previously had been considered to be over water was said by Byrd to be land. He made the announcement in a radio message to President Roosevelt following a flight east into Marie Byrd Land.

He brought back with him conclusive evidence that Marie Byrd Land runs in an unbroken line from the Antarctic coast to the South Pole and that a large Antarctic strait does not exist. Byrd declared it is all land "overwhelmed by ice to be sure, but land, anyway.

SIXTY-SIX ARE EXECUTED BY FIRING SQUAD

Moscow —Sixty-six persons were executed by firing squad after conviction on charges of "preparing terrorist plots against high Soviet officials."

The executions, after summary trials at Leningrad and Moscow, followed the assassination of Sergei Mironovich Kiroff one of the highest-placed Soviet officials, by 30-year-old Leonid Vassilievich Nikolaiev.

Thirty-seven were executed at Leningrad and 29 at Moscow

In all, 39 persons were tried at Leningrad and 32 at Moscow Two were remanded for further inquiry in Leningrad and three remanded in the capital.

The brief, almost inconic official communique described the accused as being chosen for the most part who had entered the Soviet Union via Poland, Latvia and Finland

In conformity with the decree issued just after Kiroff's death, the men were denied the right of appeal and pardon hearings.

The supreme court military division, heard the cases. Executions were carried out almost immediately after sentence was passed

The sentence included confiscation of all possessions of the condemned men by the state

The executions coincided with the cremation of Kiroff's body in preparation for the state funeral. The ashes of the revered Communist leader will be borne to famed Red Square by Joseph Stalin, Klement Voroshilof and other Soviet commissars and Communist chieftains

The ashes will be placed in the Communist Valhalla beside the Kremlin wall where the remains of Nicolai Lenin, John Reed and other heroes of the Red revolution rest.

Valera Gains Six Seats

But Still Lacks Clear Majority In Upper House

Dublin.—Expert Eamon De Valera's Fianna Fail party gained six seats in the Irish Free State senatorial elections, but failed to gain a majority in the upper house which has continued under sway of the opposition since the Republicans came to power in the Free State.

The results made the standing in the new senate as follows: United Ireland party (pro-Cosgrave) 30; Fianna Fail (government) 30; Labor, seven, and Independent, four. In the last chamber the U.I.P. had 36 members, the Fianna Fail 18, others 11.

The senate consists of 60 members, one-third of whom retire every three years. Elections are not on the ballot basis, the seats being filled by elections at which electors are the members of both houses voting on a purportional representation basis.

New Serum Discovered

Kills Cancer Cells But Is Only In Experimental Stage

London.—Discovery of a serum which kills cancer cells after they have been removed from the human body, and does no injury to healthy human tissue so removed, was announced by Dr. Thomas Lumsden, director of the London cancer research laboratories.

The scientists, emphasizing strongly that the serum "is only in the experimental stage and has not reached the point where it can be tried on human beings, nevertheless said a trial had been reached in which the serum will kill cancer cells removed from the human body without danger to normal cells similarly treated.

Fatalities Decline

Ottawa.—Hon. Robert Weir, minister of agriculture, celebrated his 72nd birthday, December 5. Born at Wingham, Ont., in 1863, he served for several years as public school inspector in Saskatchewan, was first elected to parliament in the general election of 1930, in Melfort constituency, and was appointed to the cabinet the same year.

E.P. Ranch Wins Award

Herd Of Shorthorn Cattle Captures Seven Prizes At Chicago

Chicago.—A herd of five Scotch Shorthorn cattle entered in the International Livestock Exposition by the Royal Highness the Prince of Wales, won a total of seven awards it was announced here.

W. L. Carlisle, manager of the royal E.P. ranch at Dark River, Alberta, was presented with the ribbons which included one first three seconds, a third and two fifth prizes. Carlisle admitted that he had hoped for called more blue ribbons at the international

The failure of the prince's herd to repeat his success of 1929 when his group bull was named senior champion might be laid at the feet of Thomas E. Wilson veteran Chicago packer, whose entries in the prince's cattle out of first place in two divisions in which the E.P. entries finished second.

The Prince of Wales when the following awards First get of sire group for the most part who had entered the Soviet Union via Poland, Latvia and Finland

In conformity with the decree issued just after Kiroff's death, the men were denied the right of appeal and pardon hearings.

The supreme court military division, heard the cases. Executions were carried out almost immediately after sentence was passed

The ashes will be placed in the Communist Valhalla beside the Kremlin wall where the remains of Nicolai Lenin, John Reed and other heroes of the Red revolution rest.

Trade Treaty With U.S.

Premier Bennett Says He Is Willing To Negotiate Agreement

Brockville, Ont. — A declaration that he was willing to conclude a trade treaty with the United States on fair and just terms was made here by Prime Minister R. B. Bennett.

He asserted with emphasis the government would "take such action as it was competent to do" when and if required the assent of the commission on price spreads and mass buying.

He stated the "much despised legislation" conferring upon the government extraordinary powers for peace, order and good government had been "the salvation of the newsprint industry."

And he also insisted that if the establishment of a central bank had been left to the Liberals such an institution would never have been created.

The prime minister addressed a large meeting in the theatre at Brockville, Ont., following the annual meeting of the Eastern Ontario Liberal-Conservative Association, at which he was a guest speaker earlier in the day. His speech, brief but forcible, was suggestive of an election utterance. He defended the record of his administration with particular reference to its trade policy, and attacked the Liberals on a number of counts.

Estimate Of Wheat Crop

Place 1934 Wheat Crop At 350,685,000 Bushels

Winnipeg.—Basing its estimate on actual threshing returns the Northwest Grain Dealers' Association issued a statement estimating the Western Canada wheat crop for 1934 at 350,685,000 bushels.

Previously the Dominion bureau of statistics had placed the estimate at 362,000,000 bushels, made prior to collection of threshing returns.

Although only per cent. of the country points in Western Canada made reports for the estimate.

Aged Soldier Dies

Calgary.—Nearly 100 years old and still wearing the medal bracelets and rosettes placed on her arm and neck when she was a child, Spear Woman, of the Blood Reserve, is dead, victim of an accident near her Spring Coulee home.

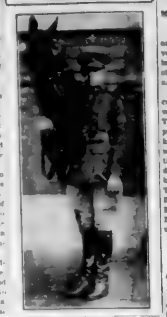
SCORES VICTORY



Captain F. A. Aherne, leader of the Irish Free State Army team, who won the military broad jump during competition at the Royal Winter Fair Horse Show. Captain Aherne is shown with "Ireland's Own," a 5-year-old brown gelding which he rode during the competition.

New Creditors' Act

Mom Being Used Throughout Canada Hinders Finance Minister

Ottawa.—Official receivers appointed under the Farmers' Creditors Arrangement Act are now functioning in every county of Canada, it was announced by Minister of Finance E. N Rhodes. The legislation which has now been effective in the prairie provinces since Sept. 1, in Ontario and Quebec since Oct 1, and the rest of Canada since Nov 1, is being utilized by applicants to an appreciable extent.

To date, 900 applications have been received at Ottawa, and it is estimated that throughout Canada, more than 2,000 applications have been filed.

Turkish Women Get Franchise

All Women Over 22 Can Vote In Elections

Ankara, Turkey — The national assembly decided enthusiastically and unanimously that from now on any Turkish woman more than 30 years old is eligible for election to the chamber of deputies. It also decided all women over 22 can vote in the national elections

The newly emancipated women will be given an early opportunity to test their franchise.

Farm Livestock In Canada

More Cattle And Sheep This Year But Fewer Horses

Ottawa.—Canada had fewer horses and more cattle on the farms this year than last, according to a report issued by the Dominion bureau of statistics. There were more sheep and fewer swine.

By provinces, horses show decreases in all except Nova Scotia where a slight increase is shown. Total cattle have declined in all the provinces, with the exception of Saskatchewan, Alberta and British Columbia. Sheep have increased in all the western provinces. Swine have decreased everywhere except in Quebec, where an increase is indicated. Total poultry show increases in Nova Scot a, Saskatchewan, Alberta and British Columbia, and decreases in Prince Edward Island, New Brunswick, Quebec, Ontario and Manitoba.

I.O.D.E. Scholarships

Alberta And Saskatchewan Women Named For Post Graduate Home Work

Toronto.—The national executive committee of the Imperial Order Daughters of the Empire, announced Miss Eleanors of the overseas post-graduate scholarships in the I.O.D.E. war memorial. There are nine winners, one in each province, who each get a scholarship valued at $1,600.

Among the winners are:

Alberta—Beth Carmellen, University of Alberta. Saskatchewan—Miss Barron Hutcheon, Regina, University of Saskatchewan.

School Reforms

Ontario Teacher Favors Intelligence Tests Instead Of Examinations

Toronto.—R. A. C. Ketchum, head master of Trinity College schools, proposed a university board to control matriculation examinations in all provinces and to reduce the examinations to four. Mr. Ketchum addressed the annual old boys' reunion dinner of the schools.

He declared he believed the end of examinations was near but the "funeral" a long way off He declared he favored intelligence tests instead of periodical examinations

Combat Drouth

Alberta Post Appoints A Soil Conservation Committee

Calgary. — Constructive action to halt the spread of waste lands from drouth areas is forecast for Alberta with a new standing committee this year.

Directors at their annual organization meeting here appointed a soil conservation committee, whose members will be Alberta delegates to an interprovincial post committee on drouth which is understood to be in process of formation.

GRANDSON PAYS TRIBUTE TO GREAT SOLDIER

Here we see four-year-old Master Douglas Scott, grandson of the late Field Marshal Earl Haig, putting a poppy cross on a portion of the field of Remembrance at Westminster, dedicated to his grandfather, on Armistice Day.

FRANCE WILL SEND NO TROOPS INTO SAAR AREA

Geneva.—France has said flatly she will send no troops into the Saar basin—and Great Britain promised to help police the territory during the forthcoming plebiscite if Germany is willing

Thus, with spectacular suddenness, the League of Nations council found no apparent solution of the problem that brought it into extraordinary session, the matter of keeping the peace in the Little European "Ulster-ben" that votes Jan. 13 to rejoin Germany, join France or remain under the league.

If Germany assents—and Geneva seemed cautiously to hope from Berlin —an international army will march into the Saar before the plebiscite to ensure "fair and free" balloting.

But the French troops, long held ready to move into the Saar, should Nazis attempt to seize it by force, will stay at home

Through Foreign Minister Pierre Laval, France made her astounding renunciation of the right to send troops into the Saar

"We cannot participate as an international force," Laval said, "because Germany cannot participate."

Anthony Eden, lord privy seal of Great Britain, in an address that set Geneva a-buzz with comment, proposed an international police force be clothed to the basin before the plebiscite

Nominations Closed

About Forty Names Submitted For Directors Of New Bank

Ottawa.—Nominations for the board of directors of the Bank of Canada are closed and the indications are that about 40 names will be submitted for the seven places on the board.

It was disclosed the submitted names were very satisfactory and a strong board could be selected which would effectively represent Canada both from a geographical and industrial standpoint.

Two of the directors will represent the primary industries, two the commercial and manufacturing industries and the remaining three the other occupations

West Federal Loan

Alberta Needs Money To Enable Province To Carry On

Ottawa.—Premier R. G Reid of Alberta, accompanied by Hon. George Hoadley, his minister of agriculture, promoted to Finance Minister E. N. Rhodes a request for a Dominion government loan to the province of a sum considerably in excess of $1,-000,000, to enable that province to satisfactorily settle its immediate monetary requirements.

While no official decision was possible pending a meeting of the cabinet, it was understood the provincial ministers were satisfied their wishes would be met in one form or another.

Aviators Have Narrow Escape

Edmonton.—When their aeroplane, fully loaded with mining supplies, including 500 pounds of dynamite, plunged through the ice at South Cooking lake air harbor and sank into six feet of water, Flight Lieut. William Jewett, Trail, B.C., and Air Engineer Dave Bishop narrowly escaped here.

Farmer Is Robbed

Montreal.—An iron safe belonging to a farmer on Cote De Liesse road on the outskirts of the city was carried away and $2,000 in cash and $70,000 worth of bonds removed from it.

$13M Finished South

Toronto. — Commissaire revealed that they had decided to connect every Toronto municipal pest at the forthcoming elections, including that of the mayor

Paul Pilloted The Elected

Calgary.—Henry Wise Wood, veteran chairman of the Alberta wheat pool, was re-elected to office at the annual meeting here. C. James of McGrath, was named vice-president.

Good Work Of Scientists On Behalf Of Our Agriculturists Will Save Millions Of Dollars

The immense amount in farming, the destruction of crops through insects and adverse weather, those natural forces that in the past have broken the hearts and bankrupted millions of individual farmers and caused untold misery, is to-day, we will be informed in the future and eventually largely controlled if the work of the scientists in this country is extended.

The pioneer was unaware in the December conference of scientists which was held in Ottawa.

The economic study of the roots of the insect pest, expressed in the expenditure of the dominion government in the investigation of insects and in the communication that $500,000.00 was saved in Canada last year, is but a beginning, to plant life, crops and other products.

Of the amount $5,000,000.00 was saved in the potato crop by the spraying campaign on the potatoes, although these pests took a terrible toll for the second farmer.

The grasshopper pest was prominently before the conference but it was stressed that this is only one of the insect pests taking interest in destroying crops. Cut worms, wire worms, and 1,000 other destructive insects were directly before the conference and were classed as constituting a distinct menace, with almost incredible destructive power. In Canada alone 10,000 insects have been classified by the entomologists.

Following the conference an announcement was made that a bulletin dealing with the grasshopper menace will be released by the department of agriculture.

Here the weather men and the agriculture experts, entomologists and others, are co-operating with the various governments to take the study of farming, was told the conference by J. Patterson, Toronto, director of the Dominion meteorological bureau.

Here the government heads pondered and reviewed them to control the constantly dangerous menace as described by A. E. Baird, Belleville, Ontario. Insects harvtoen in Canada are best in millions, taken to the areas infested and proceed to destroy their natural enemies.

Issued Pest Control

Insects Advocate Pro-Tem Government

War Measures Act Necessary

The enactment of Dominion emergency legislation—the government's exports as handled by the committee of the house completed, with recommendation for a five-year war on destructive insects pests being laid before the congress. It was the first nation-wide conference of the kind ever held in the land seven years. The extent of the laboratories and crop inspection plants throughout the Dominion were pressed.

Among the recommendations for the next five years of insect pest control, particular emphasis was laid upon a better citizenship field organization, and the control of forest pests and livestock insects.

Relief Supplies From East

Shipments Send 38 Cars Of Supplies To Stricken Districts

Shipments of relief supplies to the drought-stricken districts of the west continue to the extent of 60 cars of food and clothing.

Thirty-two cars have arrived from various points in the Maritime provinces to R. W. W. Change, chairman of the Canadian national committee, organized at Regina, Saskatchewan, to handle the relief work. Seven cars, he said, Ontario supported.

New Advertising Idea

The mystery of strange voices in the home on Christmas Eve, about which the Montreal Star, was related as an advertising broadcasting a ventriloquist. Prof Rhodes Dunn, ventriloquist and the ventriloquist has intercourse in his home, fooling the members of an assumed population. He said it is a clever idea for those to have had.

Sign Of Boss Age

Hat Ambassadors Say Indeed Not Inhibited In Its Age

Hat ambassadors say that Edward, have shattered a long-held assumption that the country was inhabited by men of fifty years.

There is plenty of evidence, however, that inhabitants of the sixty-old has many 5,000 years ago were tropical and subtropical of the climate.

Be that as it may, there are other signs in the world, in addition to the hat, to indicate the age of a man. Some of the most important of these are the following:

If he has a pocket watch, he is old.

If he has a pocket watch and wears an elastic band around his wrist, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears and a pair of spectacles on his nose, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears and a pair of spectacles on his nose and a cane in his hand, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears and a pair of spectacles on his nose and a cane in his hand and a limp, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears and a pair of spectacles on his nose and a cane in his hand and a limp and a cough, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears and a pair of spectacles on his nose and a cane in his hand and a limp and a cough and a wheeze, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears and a pair of spectacles on his nose and a cane in his hand and a limp and a cough and a wheeze and a pain in his back, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears and a pair of spectacles on his nose and a cane in his hand and a limp and a cough and a wheeze and a pain in his back and a pain in his leg, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears and a pair of spectacles on his nose and a cane in his hand and a limp and a cough and a wheeze and a pain in his back and a pain in his leg and a pain in his foot, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears and a pair of spectacles on his nose and a cane in his hand and a limp and a cough and a wheeze and a pain in his back and a pain in his leg and a pain in his foot and a pain in his head, he is old.

If he has a pocket watch and wears an elastic band around his wrist and a handkerchief in his breast pocket and a fountain pen in his vest pocket and a pencil in his vest pocket and a cigar in his mouth and a bald head and a fringe of hair around his ears and a pair of spectacles on his nose and a cane in his hand and a limp and a cough and a wheeze and a pain in his back and a pain in his leg and a pain in his foot and a pain in his head and a pain in his stomach, he is old.

West Canadian Turkeys

Have Been Imported

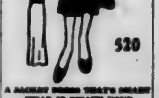
One thousand of the high quality of the large shipments of Canadian turkeys to the British Christmas market during the past two seasons is being shown by the outspoken anticipation of British turkey with reference to Canada's turkeys, official information received yesterday there was unquestionably that farmers in transporting chilled poultry to the British market had the total shipment of 50,000 turkeys in 1926 to the British Isles requirements of the British delicacy of Canadian poultry in good condition. In the following year, chilled turkeys and chickens were shipped with such success that British buyers are still talking about the high quality of Canadian birds and the correct manner in which they reach them.

If further evidence were required that the quality of poultry raised in Canada for supplies of Christmas turkey, the following extracts of one of the principal buyers may be quoted from the British Produce Trade Journal: "Receiving sources of supply from which we expect turkeys for the Christmas trade, and also as we are not forced Canada, which will, we think, be superior good supplies of this class of bird during December. The Canadian turkey is in our opinion, one of the best imported birds we have in this country. We are sure that best results can be obtained by not to over feed, and if they are up to last year's standard there should be no trouble in find disposing them."

A Costly Oyster Stew

Mrs. Ted Brooks of Medicine, Calif., cooked a $5,000 oyster stew recently and declares she has permanently lost her desire for making oysters, reports the Associated Press. In a can of the seafood that went into the stew was a perfect pearl—but the pearl had been swallowed and was declared worthless by the jeweler who examined it. Unstewed it would have been worth $5,000, he said.

By Ellen Worth



A Monkey Knows That's Again

—SPEAK IT THAT TOUCH WORTHY CHILD

Today's smart audience is just enough to be fooled. The real trick is to be fooled by the smart audience. Take the case of the monkey who was trained to do tricks. He could do anything he was told to do. He could do it so well that he was the talk of the town. He could do it so well that he was the talk of the whole country. He could do it so well that he was the talk of the whole world. He could do it so well that he was the talk of the whole universe. He could do it so well that he was the talk of the whole multiverse. He could do it so well that he was the talk of the whole omniverse. He could do it so well that he was the talk of the whole infinite. He could do it so well that he was the talk of the whole eternity. He could do it so well that he was the talk of the whole forever. He could do it so well that he was the talk of the whole never. He could do it so well that he was the talk of the whole nothing. He could do it so well that he was the talk of the whole void. He could do it so well that he was the talk of the whole emptiness. He could do it so well that he was the talk of the whole blankness. He could do it so well that he was the talk of the whole darkness. He could do it so well that he was the talk of the whole silence. He could do it so well that he was the talk of the whole stillness. He could do it so well that he was the talk of the whole motionlessness. He could do it so well that he was the talk of the whole lifelessness. He could do it so well that he was the talk of the whole deadness. He could do it so well that he was the talk of the whole graveyard. He could do it so well that he was the talk of the whole cemetery. He could do it so well that he was the talk of the whole mausoleum. He could do it so well that he was the talk of the whole tomb. He could do it so well that he was the talk of the whole crypt. He could do it so well that he was the talk of the whole sepulchre. He could do it so well that he was the talk of the whole vault. He could do it so well that he was the talk of the whole catacomb. He could do it so well that he was the talk of the whole ossuary. He could do it so well that he was the talk of the whole charnel house. He could do it so well that he was the talk of the whole boneyard

Taken from the Files

19 Years Ago Today

Thursday, December 10th, 1915

Mr. J. Fischer of Beaver Hill's was successful in securing a moose this year and is now busy for a jumping deer.

Mr. Emil Remshard lost a horse while moose hunting.

The local hockey team defeated the 49th Battalion to win the first game of the season. "Dude" Kimball made is first appearance with the local team.

Miss Coverman was visiting Fort friends Monday and is going on to her home at "Dude Ranch", Cappice Hill with her parents.

Gasoline is selling for 40c per gallon in the Fort.

At the annual institute meeting the following were elected: Pres., Hon. A. E. Wimsmith; Sec.-Treas., Mrs. A. H. Rogers.

Recently, the following incident was reported by a patient medicine concern: "For nine years I was totally deaf, and after using your ear salve for only ten days, I heard from my brother in Nebraska."

CUTTING OF CHRISTMAS TREES

The cutting of Christmas trees is prohibited on government lands, and on the provincial lands and mines department. This includes school lands controlled by the government and unpatented homestead entries.

The United Church Sunday School Christmas concert will be held on Friday, December 21st in the Theatre at 8 p.m. Silver collection.

******

A Benefit Dance will be held in the Memorial Hall on Friday, Dec. 21st. Good Music. Watch for further announcements.

Admission 50c each.

Proceeds goes towards Christmas Cheer for our unemployed. Everybody come out and support this worthy cause.

******

POOR PEH

Cut two or three pounds of the third end of a loin of pork into very thick slices, these inches long by two wide. Put a layer on the bottom of a pie dish, and sprinkle with chopped onion and parsley, a little nutmeg and salt and pepper. Repeat until dish is full, then pour over enough water to cover. (stock is better if you have it) and one teaspoon of catsup. Cover with crust and bake two hours.

LOCAL NEWS

Lawrence Hodgins of Olds, Alberta, spent a short visit at his home here last Sunday.

******

Mr. and Mrs. C. H. Flintoff will be at home on the occasion of their 29th wedding anniversary, to their friends, at the home of Mr. and Mrs. George Cobbledick, Partridge Hill, Dec. 22nd, 1934, from 7 to 10 p.m.

******

The Partridge Hill Christmas Tree concert will be held Friday, December 21st. A good program. Everyone welcome.

******

In several parts of Canada Boxing Day, December 26th will be Observed. The Edmonton City Council voted against the proposition last March.

******

Two Heavy, Unsversary of Alberta, was observed at his home here.

******

Having his school closed due to an outbreak of scarlet fever, Redi Beaborough, who has been teaching at Vilna, Alta., since September, is a visitor in the Fort this week.

******

Mr. and Mrs. Stan Smith, Miss Rose White and Mr. T. McNab, all of Edmonton spent Sunday at the home of Mr. and Mrs. Gordon Neale.

******

Mrs. Roy Walton of Stony Plain spent the week-end and Dr. Walton spent Sunday at the home of Mr. and Mrs. F. H. Walton.

******

The Pleasant View School District are holding their Christmas School concert on Thursday, Dec. 20th at 8:15 p.m.

******

The Women's Institute will meet in the Union Hall on Thursday, Dec. 13th, at 3 p.m. sharp. Bridge will be played at 2 to 4 p.m., followed by the annual Christmas tree and tea.

There are still a few members who have forgotten to pay the extra five cents charge, on glove material, will they kindly accept this reminder and to pay the treasurer before the meeting.

Six People Injured When Car Strikes Horse

What might have been a serious accident occurred on the highway a few miles East of the Fort last Thursday night, when in the darkness a horse stepped out of the ditch and got tangled up in front of a Chevrolet car proceeding from Bruderheim to Edmonton. There were six passengers in the car at the time and was driven by Mr. Mayan. They were all injured more or less by the shock, and broken glass, and were brought to the Fort by a passing car, and attended to by Dr. Mason.

The animal eventually died from its injuries and the car was badly damaged.

The party had perform to cancel its engagement and return to Bruderheim, being driven there by Dr. Mason.

C.G.I.T. News

On Tuesday afternoon, December 11th the "Northern Lights" of the C.G.I.T. held an Affiliation Ceremony at the home of Mrs. W. G. Foster. This affiliation taking part with the W.M.S. of the United Church.

After the meeting, the hostess served dainty refreshments. Mrs. L. O'Brien, and Mrs. R. Dennis, Leader, and Group with to thank Mrs. Foster for her kindness.

The "Happy Hour" and "Northern Lights" Groups of the C.G.I.T. will not meet until January 7th, disbanding for Christmas holidays.

Human beings give attention for attention—indifference for indifference. They pay attention to the story that pays attention to them— that advertises to them persistently and interestingly!

OUR CHALLENGE

At the present time one of our leading daily papers is again canvassing for its annual charity fund, which is to help make a happy Christmas for the less fortunate ones. This is what they write: "Christmas will be a mockery for tragic children here unless you help."

I can certainly sympathize with the poor family living in a little hovel not fit for a stable, without sufficient food or clothing to keep warm. Their problem is a serious one that cannot be solved by little donations at the festival season. The little these families get at Christmas is only so a drop in the bucket, that helps out for a while; but in the end leaves the recipient worse off than before.

A Hollow Mockery

It is a mockery to give these needy people only the odds and ends, while a small group wastes money everywhere for pleasure and self gratification. They could be self-sustaining and requiring charity of any sort, if it were not for a system that puts profits above real human needs and the welfare of human life.

It might be a different story if the storm in town were out of stocks and the factories could not supply the demand readily, but the land has produced over-abundantly to satisfy all. Then why must people beg while fruits and vegetables are rotting in the sheds and lands are eating the garments which are waiting for consumers, who can't consume, and yet are dying to consume?

We read that the world is making great gains in knowledge yearly. New inventions are being brought in continually, to serve man more and more but what are these to our workless population? Nothing less than a curse; for if you have watched some of the unemployed men sitting around town you will have noticed that their entire ambition in life is gone. It is no wonder when they live in a world where they are not needed and no one cares.

Cause for Shame

We more fortunate ones should be ashamed of ourselves singing "O Canada! Our true north strong and free. We stand on guard for thee," while our countrymen are in despair and misery.

School Children Hold Annual Elocution Concert

Grades VII and VIII entertained the school last Friday afternoon with the following program.

Oh! Canada.

A Visitor from Nowhere—Play.

Piano Solo, Hugh Watt,

Room I Paper, Freda Lawrence,

Room II Paper, Glenroce Device

Memory and the Woodman Play

Room III Paper, Henry Brewster.

Piano Duet, Marlin & Dick Grunert

Room IV Paper, Hope Smith.

Recitation, Jean Buchanan.

Room V Paper, Eda Sherman.

School—Play,

Room VI Paper, Bruce Graham

Recitation, Elsa Pinnell

Christmas Spirit—Play

Selections by School Orchestra

God save the King.

An admission charge of any coin was collected by the doorkeepers. The sum of $0.31 was taken in. These proceeds are to be spent in the purchasing of Christmas hampers, and are to be distributed, upon recommendation, to various needy families in this town. Omer Williston, class president was in charge of the meeting and was ably assisted by the secretary, Wanda Kolterborn.

A committee composed of Omer Williston, Hope Smith, and Jean Shaver, will make investigations, reports and distribute the hampers.

Former Resident of District Dies at Camrose

H. Simmons, Camrose district farmer, died Wednesday evening at his home in his 69th year.

Mr. Simmons came to Alberta in 1891 from Parry Sound district of Ontario and settled at Fort Saskatchewan, where he farmed for many years. Besides his widow, he leaves a daughter, Mrs. H. B. Ashby of San Francisco, and two sons, Maurice of Vancouver, and Lester of Rochester, Alta. Mr. Simmons was a member of the Edmonton Old Timers' association, and a life-long Liberal.

Funeral service was held in the United church, Camrose, Saturday at 10:30 a.m. and the burial was held a Fort Saskatchewan at 2:00 p.m.

The pallbearers were:

William Fisher, Neil McEachern, W. J. Foster, William Black, Robert Johnston and Harry Carscadden.

COMING EVENTS

The Rainbow Toddlers Orchestra are graciously supplying the music for the Benefit Dance to be held in Memorial Hall on Friday, Dec. 21st. Dancing from 9 p.m. sharp till 1 a.m.

Tickets 25 cents each

Entire proceeds to be donated towards spreading Christmas cheer for our unemployed. Everybody turn out and help this worthy cause.

******

Mr. Dewar handled the ball satisfactory to both teams and kept the game well in command.

The local team was composed of R. Pocock, goal; Taylor and Lamoureux, defence; E. Sherman, Whitson, Kolterborn, F. Flintoff, Karran, Berg and A. Flintoff, forwards.

Mrs. Robert Warring entertained the Junior U.F.A. at a merry party on the occasion of their annual meeting Saturday evening

******

Mrs. C. H. Flintoff and Mrs. H. Rye were hostesses to the U.F.A. and U.F.W.A at their annual meeting Tuesday evening, where the Xmas Tree, and Christmas carols were a pleasing feature. Amos Cobbledenton, was elected president of the U.F.A. succeeding Wm. Gillison, in the U.F.W.A. Mrs. A. B. Whitson was re-elected president. Mr. and Mrs. Arthur Krebs were appointed delegates to the annual convention in Calgary.

******

Mr. Hector Whitson, Manville, Alberta, has been visiting friends in the district the past few days.

******

At the fourth bridge in the U.F.A. series held at the home of Mr. and Mrs. Wilmot Allen last Thursday evening, Mr. and Mrs. Geo. Cobbledenton were prize winners. Consolations going to Mr. Frank Rukh and Mrs. Wesley Attewell.

******

The W.M.S. and Ladies Aid held their December meeting at the home of Mrs. Violet Lawrence on Friday afternoon. Mrs. Wesley Attewell was elected president, succeeding Mrs. Wilmot Allen.

******

Mrs. Harry Rye was an Edmonton visitor over the week-end.

******

Mr. and Mrs. Robert Allen and son Arnold, of Macwayne, Alberta, were visitors at the home of Mrs. Allen's parents, Mr. and Mrs. Wm. Cobbledenton the past week

HOCKEY

The Fort Hockey team met defeat in their league game on local ice Tuesday evening, to the tune of 7 to 1 to the St. Albert team.

The Fort team composed of players from last years senior and junior teams were not clicking on the opponents net, but put up a stubborn fight to the last minute.

Jim Taylor husky defence man of the locals played wonderful hockey throughout the game, blocking well and making many dangerous rushes into the St. Albert zone. He was awarded for his prominent energy by scoring a beautiful solo goal.

St. Albert team are players of vast hockey experience, having played as a team for the past few years and with this experience easily out generalled the youngsters. With further coaching by Mr Dewar it is only a matter of time until the Fort boys will be a strong opposition to any team in the league.

The local team was composed of R. Pocock, goal; Taylor and Lamoureux, defence; E. Sherman, Whitson, Kolterborn, F. Flintoff, Karran, Berg and A. Flintoff, forwards.

The Observer

The revived of interest in home industries and the "arts and handicrafts" of the people, particularly in the three provinces of Ontario, Quebec and the Maritimes, is steadily growing and is assuming such proportions in some places as to merit the serious attention of large scale industry There is no doubt that a great impetus has been given to the movement by the depression for one thing, and also by such legislation as minimum wage acts for another. It is said that large businesses in Montreal and Toronto have taken steps to organize it for profit both to themselves and the workers by subsidizing home efforts, arranging definite supplies of material and finding a market for the product. From the point of view of the student of social movements it does seem a very remarkable thing that the age of industrialism should have brought about conditions which promote such a movement. It is a definite return to the very condition of affairs which the industrial age seemed to supplant. There is no doubt at all, either, that it is making headway in the West and that we will regain by it in many ways something which we were in danger of losing, namely, the training which was afforded for the young children and adolescents in taking part in the productive effort of the household.

Any middle aged person can recall how in his youth every member of the family took some part in a great deal of the work carried on in and about the home. For a time that seemed to disappear The children's dresses were no longer made at home, they were bought ready-made, stockings, mittens, underwear and dresses are again being made in the home, while the male members of the family are taking up work on lines more appropriate to them. It is the natural defensive reaction of people against an industrialism which threatened to overwhelm them.

Girl Guide Notes

The meeting of the Girl Guides was held on Monday, December 17th, in the Town Hall.

The meeting was brought to order with inspection and the practice. Several chapters of "Three Little Savages" were read and Edna Sherman gave a talk on the Harvest Out. Work was done on the Morse Code and games were played.

The meeting closed with prayer and forling of the flag.

At the Court of Honor held afterwards, plans were discussed for the next meeting which will be held in the form of a skating party on Wednesday, December 26th.

The Guides in Fort Saskatchewan will remain open Friday, Saturday and Monday evenings. Buy now.

Compensations

All people have experienced the effects of the depression to greater or less degree. All have taken their losses, some great, some small, but loss of one kind or another has been sustained by all. What should the attitude be? Has there been gained, too, although it may be difficult for many people to appreciate the truth of that statement.

Emerson in his "Essay on Compensation" held the comforting view that action and reaction always are equal, that for every loss there is a gain, for every hardship a recompense. We may be true if all eternity is taken into the balance, but the facts of this life hardly support Emerson's idea. That for many, perhaps most, losses there are compensating, or partially compensating gains is no doubt true; that hardships have their recompense is not to be denied in the majority of cases; that for every action there is bound to be some reaction is admitted, but it does not follow that every good action will call forth an evil one, or every evil action will ultimately result in good. Indeed, the reverse is all too frequently true.

But the past five depression years, with all their accumulated losses, and sufferings and sorrows, with all their hard experiences and bitter lessons, have also brought good into the world; there are gains to be recorded on the credit side of the ledger.

A fact pretty well established during the war years was the ability of men and women of the twentieth century to stand hardships and face suffering and death without shrinking, even with a smile. Before the war it had almost come to be accepted as a fact that mankind had grown soft with the higher standard of life enjoyed, and with smokeless doing much of the hard labor of by-gone years. The war dissipated all such ideas.

The depression years have given further evidence of this same fact. Men and women in countless millions have demonstrated the greatness of the race: they have revealed traits of endurance, of bravery, of heroism, unparalleled in war, and all called forth without the excitement of war but in the prosaic and homely routine of commonplace affairs. Mankind has shown it can "take it", that it has the capacity and the spirit to hang on and carry on, that it can bend far and yet snap back without being broken.

Twelve well known citizens of the United States have given their views of depression's effects in a symposium in a magazine recently issued. Changes have come, and come to stay, they admit, but the lasting effect of these will be to restore appreciation for those old-fashioned principles and pioneer virtues which mankind was in danger of forgetting and losing in the years of abounding prosperity.

Henry Ford, for example, thinks the last five years have brought us all nearer to a society based on justice, opportunity and security. "We spent the first two years wondering when 1929 was 'coming back'," he says. "We spent the next two years hoping for something that would be just 'around the corner'. We have spent the past year believing in Santa Claus. But there are signs at last that people are beginning to take the blue, and are ready to enter a positive state of mind regarding this experience."

Rev. Harry Emerson Fosdick says: "Thousands of young men and women and all dressed up with no education and have nowhere to go. They are having driven home on them the fact that our social order needs reformation; that profound changes must come, and that it never can be altogether well with anybody until it is well with everybody."

Frank Vanderlip, the financier, declares: "The depression has saved many of our young from frustrated lives. They know it and are happier They are broader sympathies, they have less arrogance, and they are in-day finding with clear eyes the necessity of giving if they are to have.

Evangeline Booth, Salvation Army leader, says: "The depression has taught us that a city is not to be judged by its big buildings and its spectacular enterprise and amusements. The homes in the back streets are what constitutes the city as a place to live. The impoverishment of the nation during these lean years has tended to lower all classes."

Thousands of young people who had been brought up to believe they could live a life of ease, idleness and pleasure, have learned that they, like the great majority, must work, men and women who had looked forward to certain careers have been forced into entirely different channels, and many of these have found the new channels more congenial and better fitted to their abilities and ambitions; initiative instead of being destroyed has been stimulated.

People have learned that, as Evangeline Booth says of a city, so with their individual lives. It is not the money or other possessions they may have, or may have had, that really constitutes life; rather it is something less material but much finer that makes for true happiness, contentment and real living.

In the world we are now about to re-create anew, there will be fewer immediately rich men and fewer absolutely impoverished people; rather there will be a more equal distribution. There will be more rather than less individual liberty because, regardless of present day tendencies, man cherishes and will demand liberty as the most precious of all his possessions. Nazi and other autocracies may flourish for a time, but they cannot last, because they constitute a denial of all that is best in life This, too, is one of the gainful lessons being learned from the depression.

The Bones Building Value of Cod Liver Oil

PLUS ADDITIONAL BONE BUILDING MINERALS

Strong Bones and Sound Teeth are built of mineral salts in our food. Cod Liver Oil helps our bodies absorb these minerals.

A Treasured Keepsake

Beloved Family Bible Sugar Bowl Used By Louis Riel

Among the treasured keepsakes in possession of J. E. Lafrenze, Lobret, Sask., is an old-fashioned glass sugar bowl, that in all probability did duty for Louis Riel and Gabriel Dumont prior to the defeat of the rebels in 1885. This glass sugar bowl was an importation from England by the Hudson's Bay Company for their Canadian stores and was taken in a raid by the Metis and Indians prior to the rebellion at Duck Lake.

The half-breed and Indian rebels during their period of service in the rebellion, were forced to eat together, both privates along with the commanders, in the dugouts in the sides of the hills and ravines.

The sugar bowl, in possession of Mr Lafrenze, was among those used in the camp of Dumont and Riel, and after the defeat at Batoche, Dumont with some of his followers travelled by night, and hid by day in their trek toward the United States boundary.

They travelled along the Prince Albert, Duck Lake and Touchwood trail that took them to the Qu'Appelle valley.

Late one night Dumont and his followers separated at the Lafrenze home and offered Mrs. Lafrenze the sugar bowl among other things for supplies such as butter. The exchange was made and the defeated rebels went on their way, eventually reaching the United States in safety

This table piece has been kept in the Lafrenze family ever since. It was cracked once, but has been repaired.

Fast Schedule For Giant Liner

"Queen Mary", White Star Liner, Will Break All Records In Service

Ninety-six hours from Southampton to New York will be the schedule for the new great Cunard White Star liner "Queen Mary," according to the Shipping Correspondent of the London Daily Telegraph The "Queen Mary" time table will break all records as the giant vessel will speed four miles an hour faster than any ship afloat.

Lunch in Cherbourg on Saturday, ten, the New York on Tuesday afternoon 3,180 miles in 96 hours—is the schedule which the Cunard White Star Limited are said to be working out for the new liner. To maintain this time table, the "Queen Mary" will have to sustain at sea a average of 33½ knots, which is four miles an hour faster than the average for the fastest Atlantic crossing ever made.

Actually the reserve of power from the propelling machinery will be great enough to drive the ship at 34 to 35 knots. Thanks to her enormous size and the peculiar lines of her hull she will be able to carry on at very great speed in weather that would drive even a smaller and less powerful vessel.

The schedule time table of the ship's movements is already being worked out. It is based on a two round of only twelve hours which means that she will arrive in port, disembark her passengers, re-stock, refuel, embark new passengers, milling again within the twelve hours, an available fuel oil bunks with a capacity of 8,300 tons, can be re-filled in eight hours.

For the third time in the history of North Atlantic travel, the exact hour of the vessel's arrival will be announced at New York before she has left Cherbourg.

Special shore staffs at each of the ports concerned will undergo a course of training to qualify them for the necessary quick work and faultless co-ordination which will make this amazing programme feasible

Speed Of The Wind

New Speed Car Being Constructed In England

A new British car is under construction for an attempt to capture the 24-hour speed record in the United States, it was disclosed. It is being built by George Eyston, British race driver, who calls his car "Speed of the Wind". He believes he can break the record of an average speed of slightly over 137 miles per hour, and he will attempt it on the dry bed of a lake near Salt Lake City, Utah, next spring.

Just State Of Mind

Mind has mathematics to do with how old a man is? If man is an old as his state of mind. Methinks ought to be against the law. Age should be reckoned by a mental test which investigates the condition of the memory. For youthfulness is measured by the subject's ability to forget how old he is.

Blue Bird is Rebuilt

Sir Malcolm Campbell To Make Another Attempt At Speed Record

Eighteen months of elaborate research and hard work had gone into the rebuilding of his veteran car the Bluebird, for his attempt in February on his own world auto speed record of 272.108 miles an hour, Sir Malcolm Campbell said in London recently

Work on the car has been proceeding steadily almost since the day he returned from his last trip to Daytona Beach, Fla., in 1935, Sir Malcolm said. Several months were spent in wind tunnel tests before actual reconstruction began

"We have every reason to believe she will be quite a bit faster," he continued. "After all we'll need to clip only one second off the present time of 13.023 seconds for the mile in order to attain 300 miles an hour

"It's a tremendous gamble There's no possibility of testing the car's actual speed until it is set down at Daytona, but my engineers and I are more than hopeful. Bluebird will have the same engines, otherwise it will practically be a new car

"We're devoted ourselves to streamlining, revising better adhesion Now it's a question of knocking a single second off the record We've realized that one bump which would cause the car to leave the road for a fraction of a second might mean the difference between success and failure."

Sir Malcom expects to make his record run sometime between [illegible] and 24, depending on beach and [illegible] conditions.

Bank Of Montreal

General Meeting

An interesting review of what the chartered banks of Canada are doing for the depositors was given by Sir Charles Gordon in addressing the shareholders of the Bank of Montreal. In the banks of Canada, he said, there are some 4,700,000 depositors, the Bank of Montreal having one million. Depositors received during the last year some $37,000,000 in interest and the interest paid to the shareholders amounted to $12,000,000.

Touching on the services to the general public which the banks are performing, Sir Charles referred to the branches established in the territory, in towns and villages in remote districts, facilitating the handling of business.

Mr. W. A. Bog, Joint General Manager, in presenting the balance sheet of the bank, noted that the strong position of the bank had been fully maintained.

WORLD HAPPENINGS BRIEFLY TOLD

The United States war department awarded a contract for 110 attack planes to the Northrop Corporation, Inglewood, Cal., for $1,804,445.

Arthur Henderson, president of the League of Nations disarmament conference, has been awarded the Nobel peace prize.

The government decree banning circulation in Austria of all German newspapers was extended for another three months after the date of expiration December 12.

The radio station of the General Electric Company stated that a radiogram from Little America and the Byrd Antarctic exp dition intends to leave for New Zealand and New York the last week in January, 1930.

The postal department of the Palestine government announced that telegraphic written in Hebrew will be accepted for transmission and that it is no longer necessary to translate into Latin letters.

Bursts on the world's largest airliner, the 12,046 miles from Brisbane to London, was inaugurated Dec. 10, when John of Gloucester, with a crew of his band, despatched the first two northbound planes.

Approximately 4,000 men will be sent to members of the international police force in the Saar to maintain order during the forthcoming plebiscite, during which furnish the largest number and will have charge of the command.

The Earl of Willingdon, viceroy of India, initiated a fund to commemorate the 50th anniversary of the King's accession to the throne next year, the proceeds of which will be devoted to the Indian Red Cross Society and kindred organizations.

Salt Mines Of Poland

Men Who Toiled In Shafts Were Deeply Religious

Visitors to Poland return greatly impressed with the salt mines. For more than ten centuries miners toiled in the salt shafts near Cracow, Poland, and being deeply religious, they spent their spare time in carving marvellous figures in salt. A complete cathedral, containing giant chandeliers, beautiful statues of the saints, altars and other Biblical figures and objects, is one example of the workers' skill. On feast days of modern times, Mass is held in the underground cathedral. Among the statues is that of the Virgin. In one part of the mine a giant statue and a beautiful hall appear, monuments to the devotion of the miners.

Rebels Make Fur Edition

Pelts From Wainwright Are Going To Arctic Brothers

Rations along the bleak coast of Hudson's Bay will shortly thaw out in bullets made smaller in these the Mounted Police war. Metals from the mess Mounteds of the Plains will be fed to workers in Federal relief camps.

The department of the interior will rush 500 "green" bullets into the hands of the slaughter at the National Park, Wainwright, to Fort Churchill for distribution. This information for the Arctic developed reports of suffering among Canada's wards due to a scarcity of rations.

The bullets taken will be cured and dressed by the Indians for clothing and bedding.

Justice For Indian

B.C. Government Awards $900 For Prisoner Wrongly Held

An Indian from Kyuquot, B.C., unjustly fined in 1921 for possession of a one-otter pelt, has been awarded $900 compensation by the British Columbia government for the confirmed skin, injury to his reputation and reimbursement of the fine.

The Indian, Dominic Peter, who received $50, fine and costs, and the pelt was condemned when he was arrested by a game warden three years ago. It developed, however, the prosecution was wrongly laid as the game act does not apply to Indians hunting on their reserve.

Tsar "Czar" Of Bank

Item The Terrible Ivan Greatly Feared By People

The British Museum has a rare portrait of Ivan the Terrible. He lived in the time of Elizabeth and was the first ruler of Russia to take the title of czar, a corruption of Caesar. His deeds were so infamous that for centuries after his death Russian criminal themselves at mention of his name He proposed by letter to Queen Elizabeth for the hand of an English woman, but at the last moment the woman was afraid to go into exile in Russia. Ivan then married a Russian princess, who eventually came back on his cruelty. But after her death he gave full rein to his unbridled passion. He passed his last days surrounded by magicians, who could not, however, exorcise the ghost of his son, whom Ivan had slain.

Eyestrain Is Destructive

Overwork "Burns Out" Optical Nerves And Saps Energy

The destructive result of eyestrain is explained on the grounds that six of the fourteen nerves of nerves in the head lead to the eyes. Overwork of these delicate nerves not only saps the energy available for other nerves, but "burns out" the optical nerves and renders ineffective the eyes, one of the principal channels of knowledge. Scientists, hikers and motorists who face the daunting sunlight without the protection of colored glasses often experience eyestrain and place themselves "on the spot" without realizing they are doing so.

Little Journeys In Science

HOLES

(By Gordon H. Ould, M.A.)

All soil comes originally from decomposed rock, and a geologist can, by examining a soil from whole rock it is derived Clay sand, and loam are the three chief kinds of soil. It is naturally light in color, but dead and animal or vegetable matter makes it dark with the presence of compounds of iron will give it a red or yellow tinge.

Feldspar is the commonest of all rocks, and we are told that it is fortunate for man that this is so, for if it contains certain chemicals upon which life depends. In addition feldspar are found the oxides of phosphorus, silica and potash, all of which are important to animal and vegetable life.

The sand is not comes from decomposed quartz which is derived from granite Contrary to popular belief, granite is not insane to the presence of nature and in time it breaks down into quartz and feldspar, while in forms sand and the clay. Loam is a mixture of sand and clay.

Holes are made into soil by the action of the earthworm in the air, and by the chemicals carried by water which transforms the solid materials in the rocks into a form in which they can be used by the plants

The presence of soil worms can be seen in the case of a hill which has been excavated On the lowest land there is a hard rock in which where air and water have penetrated, while on higher ground and the clay. Loam is a mixture of sand and clay.

Holes are made into soil by the action of the earthworm in the air, and by the chemicals carried by water which transforms the solid materials in the rocks into a form in which they can be used by the plants

Chinese Quarrel With Gods

Ordered One Which Has Failed To Supply Rain

The Chinese people are quarreling with their gods and one of the chief of them, the Dragon god Shan-Tung, it is to punish rain has been beheaded At Jenchin in Honan province the villagers carried from the temple the image of the Dragon god and force of the magistrate against his will to conduct prayers for rain in front of it. The magistrate did so on condition that the god should remain there for seven days and if even then no rain fell he would behead the head-ding of the image No rain fell in the succeeding week and the magistrate allowed three days' reprieve But to no avail. He then ordered out a firing squad and they shot off the head of the grossly painted deity. Since this brought no rain, the farmers decided to deal all paupers to their gods And they are now being threatened by a famine.

Colored Films

Latest Developments In Color Photography Shown In London

Britain is likely to go in for movies in natural colors, a demonstration was instituted in London following the showing of latest developments in color photography

The newest process is known as duffaycolor and the first film of three reels showed indoor scenes of the most delicate tones and shades, subtle shading such as has not hitherto been attained on the British screen.

Duffaycolor is said to be the first step from the experimental stage towards the permanent, production of color films in quantity. A factory is to be erected shortly at Wembley Middlesex, it was reported for the manufacture each month of 2,500,000 feet of color film per week

Poker parties for charity are popular in London this winter.

SUNDAY SCHOOL LESSON

DECEMBER 29

THE CHRISTIAN HOME

(Christmas Lesson)

Golden text: Unto us a child is born, unto us a son is given: and the government shall be upon his shoulder: and his name shall be called Wonderful, Counsellor, The mighty God, The everlasting Father, The Prince of Peace. Isa. 9:6.

Lesson: Luke 2:8-18

Devotional Reading: Deut. 6:20-25

Supplementary Reading: Luke 2:1-7

Introductory Notes and Comments.

The blessed Tidings, Luke 2:8-14. Luke's beautiful story of the Nativity says that the shepherds he keep watch by night over their flocks in the field an angel appeared, and the glory of the Lord shone around them and they were sore afraid. The angel said unto them, "Be not afraid; for, behold, I bring you good tidings of great joy which shall be to all people." In the city of David a Saviour, which is Christ the Lord. From the Lole of this message event to the end of the last immortal line this evangelist tells us. For us we find ourselves surprising the full triumphant refrain, And the glory the glory of the Lord shone around (Arthur Brown).

Be not afraid for behold, I bring you good tidings of great joy which shall be to all people." to the angels message And what was the good tidings which sings its way into the heart of every Christmas season?

This is born to you this day in the city of David a Saviour, who is Christ the Lord.

A Glorious Lowly Birth and sacred Family. Luke, Luke 2 15-18. The simple folked the shepherds received to go to Bethlehem and see this Babe. They went in haste and found Mary and Joseph and the Babe lying in the manger. Before the manger that holds the Babe artists' poets and musicians have had their imaginations fired their thoughts ennobled, their genius inspired Here we too, may pause in reverent awe and glad rejoicing.

The shepherds told what they had heard to the wonderment of all Mary heard and pondered their words in her heart

Fruitless of the Christian Home. Ephesians 6:1-4 "Children," wrote Paul, "obey your parents in the Lord, in the spirit of Christ, for this is right And then he repeats the fifth commandment, Honor thy father and mother, commenting that it is the first and only commandment which carries with it a suggestion of reward in that it adds, "that it may be well with thee, and thou mayest live long on the earth."

Parents must be worthy of the obedience required of children, hence Paul turned in thought to the fathers and wrote: "And ye fathers, provoke not your children to wrath." As for you fathers, do not exasperate your children." (Moffatt's translation). By your harshness or conduct do not tempt them to rebel.

Had Unusual Vocation

Auchegyth King Poisoned Himself Before Thirty Years

Adam Adamson, known as the Amsbergris King and believed to have one of the most unusual vocations in the world, has died on Stewart Island, the loneliest spot in New Zealand. He was born in the Shetland Islands, became a sailor, but finally settled on the spot of land in Mason's Bay to hunt for the treasure which comes from whales of the Polar Seas and eventually is washed ashore On the desolate beach which Adamson patrolled for more than 30 years the Antarctic currents would sometimes sweep lumps of this odorous treasure. He waited for them and at times made rich finds. He never became rich but he found enough to make a living and he asked no more

Anti-Aircraft Weapon

Swedish factories have perfected a new high-powered anti-aircraft gun which has been demonstrated successfully to the general staff of the army. The gun is of 40-millimeter (about 1½ inches) calibre, fires 125 shots per minute, has a range of 26,000 feet and can be placed in position within three seconds.

Radio telephone service has been established between all parts of Palestine and the outside world.

A petrie recently dug at Motte, England, had 188 tubers.

PARLIAMENT TO ASSEMBLE ON JANUARY 17

Ottawa.—January 17 was confirmed as the date for assembling parliament, following a cabinet council presided over by Prime Minister R. B. Bennett

Other matters dealt with included further appointments to the Dominion-wide force required for the suppression of the Farmers' Creditors' Arrangement Act. No information was made public, beyond the announcement of parliament's opening

January's opening will start the ninth session of the 17th parliament since confederation and also the last session, as the statute requires the calling of a general election at least every five years. The present government took office in August 1930.

Whether it will be a long session or a short one rests with the opposition. While the government may summon parliament for prorogation rests in a huge measure upon the attitude of the official opposition.

A prevailing belief in political circles here is parliament will dissolve in April and a date will then be fixed for the general election

Traffickers In Armaments

Empire-Wide Investigations Into Operations Is Advocated

Ottawa.—Empire-wide investigations into the operations of armament farmers and traffickers in armaments should be urged to the limit by Canadian Liberals, Rt Hon. W. L. Mackenzie King, Dominion leader, told the National Liberal Federation

This investigation, he said, include the one by Canada and other parts of the British Empire of essential war materials, "with a view to the ultimate abolition of the supply and sale of munitions of war by the League of Nations or some other effective international agency."

Coupled with this Mr. King suggested that Canada take the lead in declaring definitely "not only that it will give no succor to any nation which wantonly disturbs the world's peace but that it will provide neither arms nor foodstuffs nor credits to such a nation.

"I believe," asserted Mr. King, "that a declaration of policy of the kind by the government of Canada would not only be right in itself, but would rob of this country friends among all the peace-loving nations of the world and would serve to open the door to broad general negotiations which would harmonize and protect their mutual interests."

He was not one of those who believed that early war in Europe was inevitable, nor did he believe responsible rulers in Europe wished for war, but it was now generally recognized that some set of violence might precipitate the most serious of crises.

Research Work

Co-operation Between National Research Council And Department Of Agriculture

Ottawa.—Arrangements for close co-operation between the national research council and the department of agricultural were approved at a meeting of the council. Associate committees of the council will be recognized as committees of both the department and the council in so far and the wood committees of the two bodies are to be amalgamated in a joint committee. The object is to bring about duplication of effort and speed up research work on agricultural matters.

British Troops In France

Calais, France.—The first British troops to set foot on French soil since the conclusion of the Great War have landed here The contingent, part of Great Britain's contribution to the international force for patrol of the Saar territory, was billeted in the ancient citadel awaiting the arrival of the rest of the British regiments.

W. N. U. 2077

Central Bank Directors

Selection To Be Made At Annual Meeting On Jan. 23

Ottawa A slate of 60 names from which shareholders of the Bank of Canada are to select seven directors at the first annual meeting on Jan 23 will be circulated among all holders of central bank stock as soon as possible Following a meeting of the provisional directors the list of those whose nominations proved satisfactory was made public here

Representative of all provinces except Prince Edward Island the list contains the name of only one woman the wife of Senator James Murdock of Ottawa Nominations closed Dec 5

Ontario and Quebec head the list with 23 and 19 nominees respectively Manitoba and British Columbia each nominated five candidates and there were three each from Alberta Saskatchewan, Nova Scotia and New Brunswick

Nominations require the selection of two directors representative of primary producers, three A.1. representative of commerce and manufacturing (class B), and three from any class of industry (class C)

Will Try British System

Principles Of Scotland Yard Studied By Ontario Police Officers

Toronto.—A system based upon principles of Scotland Yard, England Yard Great Britain's famous crime detection agency will be put into effect for the purpose of increasing the efficiency of the provincial police force

Major-General V. A. S. Williams, commissioner for 14 years, and who recently passed three months in England studying the methods of Scotland Yard, is working out details of the plan with Attorney-General Arthur Roebuck

Under new system, officers from various parts of the province will be offered opportunity of taking a course in the supply and sale of munitions of war by the League of Nations or some other effective international agency."

Coupled with this Mr. King suggested that Canada take the lead in declaring definitely "not only that it will give no succor to any nation which wantonly disturbs the world's peace but that it will provide neither arms nor foodstuffs nor credits to such a nation.

"I believe," asserted Mr. King, "that a declaration of policy of the kind by the government of Canada would not only be right in itself, but would rob of this country friends among all the peace-loving nations of the world and would serve to open the door to broad general negotiations which would harmonize and protect their mutual interests."

He was not one of those who believed that early war in Europe was inevitable, nor did he believe responsible rulers in Europe wished for war, but it was now generally recognized that some set of violence might precipitate the most serious of crises.

Stock Show At London

King George's Entries Took Good Prizes At Smithfield

London.—Farmers and their wives from all parts of the country were prominent visitors to London on Dec. 11, drawn by the great Smithfield fat-stock show, perhaps the most famous of the major hearingsyes of Christmas here.

His Majesty with 21 entries from Windsor and Sandringham took a goodly share of the awards, although he was fervently said that rival restrictions following a new outbreak of foot and mouth disease would not be lifted in time to enable exhibits from the royal estates.

The Prince of Wales, with seven Devon cattle from his farm at the Duchy of Cornwall, secured one first and several minor awards.

Has Home Building Plan

Winnipeg Will Ask Loan To Overcome Crowded Conditions

Winnipeg.—A self - liquidating scheme of home reconstruction, supported by the federal government, has been proposed here by the special civic committee on housing as He more to rehabilitate houses and eliminate over-crowding conditions.

The committee will ask the Manitoba government for assistance in obtaining a loan of $500,000 from the Dominion at not more than four per cent. interest, repayable in 10 years. The committee also will ask for a direct federal contribution of one-quarter of the amount.

Shamrock Want Their Ring

London.—A fervent wish that the King and Queen of Siam would return to their people and retain the crowns they threaten to discard was expressed by Chao Phy Bri Dharmadhiben, speaker of the house of representatives. He made the statement shortly before leaving for an audience with the tiny monarch

REVIEW BOARD HEAD

Mr Justice J A Hope who has been selected as head of the provincial board of review for Ontario under the Farmers-Creditors Arrangement Act This is a Dominion Government appointment.

Self-Rule For India

Government's Plan Is For A New Constitution Is Approved

London.—The House of Commons adopted a motion approving the government a plans for a new constitution for India, investing self-government with safeguards. The motion for approval carried by an overwhelming majority, 416 to 127.

The motion approved the report of the joint select committee which investigated the Indian situation.

The commons first rejected a Labor amendment by a vote of 491 to 43 This amendment urged that the India act should be based on the report of the Labor members of the joint select committee, in order to provide for eventual dominion status for India.

Quality Should Be Maintained

Advice Given To Egg Producers By Hon. F. S. Grisdale

Edmonton.—Egg producers should strive to maintain quality, especially since the margin of profit in production is small, just as in the past two or three years it meant less here, said Hon. F. S. Grisdale, minister of agriculture, in making his first address as minister to the Alberta Provincial Bovine Breeders' Association in their annual meeting R. D. Baker, North Edmonton, was re-elected president for a second term.

Prudent Bank Tellers

Saskatoon.—A bullet-proof cage hidden beneath the counter but raised by springs which can be released by the foot, is the invention of a Saskatoon man for the protection of bank tellers during holdups The device, made by Bert Grummett, a piano mover, will be drawn to the attention of the Canadian Bankers' Association by the Saskatoon board of Trade.

Farming In China

Nanking, China The average income of the Chinese farmer, the figures over, is only $36 a year Chinese money, a sum equivalent to only $6.60 in Canadian money This shocking revelation of the poverty of peasants is made in a statistical report just issued by the Nanking University's agricultural college

New Stamp Issue

London.—Sir Kingsley Wood, postmaster-general announced in the House of Commons a special series of postage stamps will be issued to commemorate the silver jubilee of the King's accession next year

Poultry Marketing

Plan Of Western Co-Operative Organization For Producers Only

Ottawa The plan of the Western co-operative organizations to regulate the marketing of eggs and poultry contemplated by the local boards in each of the prairie provinces should consist of producers entirely, the Dominion marketing board was assured.

Supporting the scheme, Alfred Speakman, U.F.A. member for Red Deer, W. A. Landreth president and general manager of the Canadian Poultry Pool, Limited, and C. H. Barr, K.C., Regina, gave this assurance in emphatic terms Mr Speakman appeared on behalf of producers of Alberta, Saskatchewan and Manitoba who favor the plan.

The local boards, the adventists of the scheme stated, would consist in Manitoba of directors of the Manitoba Co-operative Poultry Marketing Association, Limited, in Saskatchewan of directors of the Saskatchewan Poultry Pool, Limited, and in Alberta of directors of the Alberta Poultry Federation and the Alberta Poultry Pool, Limited In the association of these directors, all registered producers of the associations would have the right to vote

Would Adjourn Law Courts

British Chief Justice Issues Threat In House Of Lords

London.—An incident unique in English history occurred in the house of lords when Lord Chief Justice Hewart, first magistrate of the United Kingdom, threatened to suspend the courts of law

Lord Hewart rose to oppose a motion on the bill modifying superior court procedure which, he declared, was deliberate effort to Rt Hon Henry Slesser former solicitor-general

Lord Hewart announced he would "fight the bill line for line and, if necessary, word for word." He stated since he could not sit in the house of lords and as chief justice simultaneously he would not hesitate, if the bill is not modified, to adjourn the law courts of England as long as the bill was under discussion, at risk of disrupting public justice rather to do what he considered his duty

Farming In China

Nanking, China The average income of the Chinese farmer, the figures over, is only $36 a year Chinese money, a sum equivalent to only $6.60 in Canadian money This shocking revelation of the poverty of peasants is made in a statistical report just issued by the Nanking University's agricultural college

New Stamp Issue

London.—Sir Kingsley Wood, postmaster-general announced in the House of Commons a special series of postage stamps will be issued to commemorate the silver jubilee of the King's accession next year

FORMER U.S. PRESIDENT POSES ON PUBLIC APPEARANCE

Making one of his rare public appearances since he stepped out of the office of President of the United States, Herbert Hoover is pictured receiving a parade during a patriotic demonstration in San Juan, California.

ALBERTA CLAIMS CASE HEARING IS CONCLUDED

Ottawa. — The question of who owns the water rights in the province of Alberta still remains a knotty problem, with the Dominion and the province at variance, at the conclusion of public hearings in Alberta's natural resources claims case

The problem arose during the hearings before the Dysart commission, and counsel for both sides reported to their respective governments, with the result negotiations were opened directly between the Dominion and the province

The Dominion's contention is that water rights passed to the province in the agreement of 1930, under which the natural resources—administered for 25 years by the federal government — passed back to the province

The province contends the problem is outside of the commission's sphere of action, and if negotiations failed the matter was one for a court to decide The question could be carried to the privy council in London

At the close of the public hearings before the commission both the Dominion and the province had filed all exhibits and counsel had concluded their oral arguments.

Alberta did not present a total of effects for the year, the Dominion did not total its counter-claims against Alberta.

Counsel for Albert announced a brief would be filed within 10 days which would summarize Alberta's total claims This would be forwarded to the commission

J. MacGregor Stewart, Dominion counsel, stated the Dominion's final brief was without pending the province's final brief

Mr Justice A K Dysart Winnipeg, chairman, stated no definite date for completion of the commission's report could be fixed. This depended on the commission's progress after final briefs from opposing counsel were received. A report on Saskatchewan's claims will be presented at the same time

The commissions would file their reports with the federal government and the provincial governments concerned, and public announcement would be made from these sources

Has Faith In Stevens

Miss Agnes Macphail Says Former Minister Has Won Hearts Of People

Toronto.—Miss Agnes Macphail, Canada s only woman member of parliament told the United Farmers of Ontario that if Hon H H Stevens or Hon W D Herridge were to take an independent position on some progressive measure "there would be nothing to prevent her if elected from working with them."

Miss Macphail, substituting for Mr Stevens, who was scheduled to speak at the U.F.O convention, said there was nothing to prevent her from working with them "if they were open to new ideas or even if they were going only part way."

She believed Mr Euler former Liberal minister of national revenue was the most courageous member of the opposition, but her address was concerned more with the position of Mr Stevens

"The Hon H H Stevens has won the hearts of the people in Canada, and certainly the hearts of the farmers." Miss Macphail said "He has won their hearts I cause of his willingness to work for the unemployed masses, to use his own phrase, and because of his willingness to make a real personal sacrifice to do those things. Such willingness in high places is so rare in Canada it leaves us gasping."

Wheat Marketing Difficulty

Chicago - Removal of wheat from the luxury class and relief from insurance that constrict its world demand would provide a far easier solution of present marketing difficulties than can be found in the policy of production and export quotas, W. Sanford Evans, M.L.A., prominent Winnipeg statistician, told members of the grain market analysis club here.

FASHION FANCIES

THE HOOD NECKS HAVE IT: A PRETTY MODEL AND SO EASY TO FASHION!

You'll like this pictorial model so much as you see it with its softly draped hood collar, so flattering! The front bodice in princess styling is another interesting new feature. You need the wrapped effect of the slender skirt.

Ruby-red rayon silk made this attractive dress with white bengaline bib collar and cuffs.

Bottle green wool crepe with the bib collar and cuffs in brown and rust novelty crepe is very effective with a brown wooden button at the centre-front closing.

Velvet with silver lame trim is also suitable for this design.

Style No. 913 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust measure. It requires 3¾ yards 39-inch material with ¼ yard of 35-inch contrasting.

Pattern Dept., Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 176 McDermot Ave. E., Winnipeg.

Enclose 20c extra if you wish a copy of our Fall and Winter Fashion Magazine. Fifteen cents additional are mailed post paid.

Style No. 913

Name .....

Address .....

Bonnet, a helpful guide to sewing to obtainable for 20c. Whether you are a beginner or quite adept at the needle, we think it would pay you to obtain a copy.

Little Snapshot Guild

More About Photo-Greetings

(Left)—"The family is on the march to greet you." That, or something of the sort, serves to complete a greeting like this, made in the easy silhouette manner. (Right)—A little "Whoso cast clare" reindeer made of glue, a toy Christmas card tree topper—that's all this table-top Christmas scene required.

A week or so ago we talked about snapshot Christmas cards, but we must admit that we've been so busy ever since the subject adequately. A book could be written about it, and then any of them is capable of fresh, new interpretation—an individual as your own personality.

And, as you become more familiar with your camera and its possibilities, you'll discover many different uses for your snapshots.

You can use, for example, story-telling silhouettes to give novel twists to otherwise "ordinary" picture ideas. A good silhouette can be made of a baby's bathing suit, a bit of mistletoe, or of a little boy reaching for a Christmas tree ornament. Silhouettes, as per recall, are made with the help of a sheet, a doorway and a strong light.

Table-top photography (discussed recently) has endless Christmas possibilities. A little figure of Santa Claus, or white cotton sprinkled over the foreground of your picture, the resolution for a variety of good pictures.

You'll find plenty of Christmas materials—little reindeer, gnomes, sleighs, bells and a hundred other reasonable "props" in any "five, ten and fifteen cent" store. But guard against over-elaborate set-ups. They simplify the better.

Whatever you do, be careful to keep it in key with your own personality if you are musical, a silhouette of your hands on the piano keyboard puts the score for a Christmas carol on the card, would be much more appropriate than, say, a bit of your mom-covered home. Or a pose with your head lifted, singing. If you find you look well that way.

A baby is the family, of course, offers plenty of opportunity for greeting snapshots. If this is the baby's first Christmas, so much the better. A semi-close-up of mother and child, indoors or out, with the baby perched on dad's shoulder and all three waving cheerfully at the camera, should make a greeting of more than ordinary charm.

Christmas isn't far away now You'll be wanting to send out your greetings soon. So don't delay!

By the way, don't let good opportunities slip by for taking unusual snow scenes. Maybe you won't use them this year, but there will be other Christmases when they'll come in handy.

For snow scenes in bright sunlight, remember to use a very small lens aperture. Otherwise, the intense brilliance of the snow will give you an over-exposed negative.

JOHN VAN GUILDER.

Exploitation of Mineral Resources Through The Ages Has Enabled Civilization To Surge Forward

When the history of the present age is recorded this Dominion of Canada, famous in its wealth, a large share of the credit for helping the population to live through well established by given to the mining industry that has kept the cabinets of industry turning during the past year, provided a market for the farmers, kept the railway corporations export trade and produced this national treasury.

And few people, probably realize that mining had actually attained to its present position of importance in Canada's wide domain. Many who are now in possession receive plenty of the period of hard times that has served to emphasize the rapid strides this industry has made since the discovery of Cobalt thirty years ago. Then it meant little to us by comparison.

An interesting study of this rather surprising feature of contemporary Canadian history is contained in a paper by R. C. Brown, of "The Canadian Mining Journal," presented to the annual western meeting of the Canadian Institute of Mining and Metallurgy in Vancouver. Mr. Brown shows how the exploitation of mineral resources has kept pace with industry throughout the ages but received additional impetus to surge forward. This the gold and silver filched from the Incas by the Spanish conquerors to finance their crusades in Europe its substantial character. The iron and coal of Great Britain laid the foundation for the Industrial Revolution. The iron and the base metals of the United States made her, in turn, the wealthiest nation in the world.

Canada is now counting on her mineral wealth in a similar way, he points out, and the rapid progression of this wealth has stimulated settlement, industry and commerce to a remarkable degree. Thirty years ago the total of the mineral wealth, produced through two and a half centuries of settlement stood slightly more than four dollars. The total is now six thousand million dollars—an increase of eight times in a little more than one-third of this total, namely two thousand millions, has been produced in the past five years; and this assures the prudent note of optimism.

This tremendous outpouring of wealth, Mr. Brown said, is appreciated and can be drawn upon only once, most obviously in coal to the best possible advantage.

Lives in Seclusion

Few World Cars To Trade Lives With Sir Basil Zaharoff

Sir Basil Zaharoff, the mystery munition vender of the world, has created a fortune estimated at from one hundred millions of dollars to one billion—how much it is even he does not know. A tidy little nest-egg indeed.

But with it go a lot of things that most people do not want at all, and these things are in addition to the disapproval of the way in which the cash was obtained.

Here they are:

1. He has so much money that he does not know what to do with it.

2. His business is so precarious that even in retirement he has to keep on a heavy overcoat and wrap a great shawl around his head to keep warm.

3. He is with two dentists and a watchdog him all the night—one on either side of the bed—and with a light burning by he does not like the possibilities of death in the dark.

Well, on the whole, the ordinary fifty don't so bad after all—if riches mean a lot of fuss. A little extra bending may not be disturbing to most till so; but, really, few will want to trade lives with the multimillionaire—if they must live like Sir Basil does.

Autoplasty is any surgical operation for repairing one portion of the body with tissues taken from another part of the same individual.

Alas! One thing notoriets can't be vaccinated against is the itch to pass the other on.

Birth Of The Earth

Those Who Pay Have Simply Money Away

The credit manager of an important Vancouver store writes:

"Those who pay their bills promptly are the salt of the earth. They help us keep our business on an even keel—help us pay our bills and meet our payroll.

"I think it most important that we express our appreciation of those who pay promptly. Those who are slow in payment receive plenty of letters, but those who pay—never a word.

"So this is just to let you that we appreciate and thank you for the promptness with which you meet your obligations to us."

It is true.

Nothing is so attracting to business as the prompt payment of accounts.

Nothing can ruin business so quickly as accounts that hang fire for weeks and months through the years' overdue, and negligence of the purchaser.

The prompt payment of bills puts money into circulation.

And after all it is the velocity of the gold and silver filched from the Incas by the Spanish conquerors to finance their crusades in Europe its substantial character. The iron and coal of Great Britain laid the foundation for the Industrial Revolution. The iron and the base metals of the United States made her, in turn, the wealthiest nation in the world.

Canada is now counting on her mineral wealth in a similar way, he points out, and the rapid progression of this wealth has stimulated settlement, industry and commerce to a remarkable degree. Thirty years ago the total of the mineral wealth, produced through two and a half centuries of settlement stood slightly more than four dollars. The total is now six thousand millions dollars—an increase of eight times in a little more than one-third of this total, namely two thousand millions, has been produced in the past five years; and this assures the prudent note of optimism.

This tremendous outpouring of wealth, Mr. Brown said, is appreciated and can be drawn upon only once, most obviously in coal to the best possible advantage.

The Perfect Detective

Montreal Police Officer Notices Penguin Flew Or Cabaret

Here is the perfect detective—a man who can see on the sight of a person, without delay when and on what occasion he or she last appeared in the scene.

He is Capt. Edmond Leboeuf, head of the Montreal detectives' department. Leboeuf very seldom forgets a face and it is useless to try to fool the captain. Every year there appear before him hundreds of people for pardons. Some are up on their first charge, others have appeared before. Unhesitatingly Captain Leboeuf is able to single out those belonging to the latter group and confront them with their past record.

Leboeuf has been on the Montreal police force for 37 years, for the past six as captain. Free from the first his uncanny memory for faces attracted the attention of the officials and won him early promotion.

Lapidolite Widen Bank

Value Of Barring Liquor Are True To Life

What is believed to by the first published book of a Legaster has been issued from the press of Upsala, Upsala, Sweden. It has been on well received that it will be translated into many languages and have a wide circulation. The author is Anin Fresh, who was born in a Lapp tent in a winter of bitter cold 60 years ago, and all the years of his childhood lived in the reindeer paths of the freezing North. He was educated to be a teacher, then left home in early life, finding for reindeer herding. He became, for a Lapp, well-to-do as a reindeer owner. He set down tales of the roving Lapps, and he wrote them so well, and so true to the life that Upsala University offered to publish them.

Popular trees, although producing a forest cover and useful timber in 25 to 30 years, do not reach maturity until nearly 100 or even 150 years old.

Telegraphers have combined operations in England to send 100 telegrams an hour.

Women In Majority

Exceed Men In Sydney By Over Seven Thousand

Women form the majority of Toronto's population, they exceed men by more than 7.5 per cent., according to official census.

In rural districts the percentage of women is even much higher as in most of the larger cities with death statistics.

The population of Ireland with 1911 has increased against 1,300,000 under the Gladstone regime, bachelors 120,000 married couples, while 333,000 persons are unmarried. There are 13,000 more females than males.

The number of marriages has increased steadily from 1867, when 41,000 were registered, to 1907 with 4,253 marriages. The majority of the brides were between 15 and 24, while some mostly married between 20 and 24.

Over 13 million Turkish citizens speak the Mohammedan faith; 189,000 are Greek Orthodox; 61,272 Israelites; 77,232 Armenian-Gregorians; 39,511 Roman Catholics, and 24,000 Protestants.

At the end of each year, the population of 17,500,000 souls is found either to be religious community or their religion could not be established.

To Speed Up Service

Britain Seeks Improvement Of Postal And Other Railroad Business

Fired by the U.S. aluminum aforesaid plans, which crossed the continent in 96 hours 55 minutes and set world record of 120 miles an hour, Britain is planning streamlined trains to speed up service in the Isles.

Government officials and railroad executives, it is revealed, are working on a scheme to build a $1,000,000 rail research station, to develop faster and better railroad locomotives, capable of revolutionary design.

The British have been impressed by Americans, German and French developments of trains far faster than ever-living running on rails in England. The fastest speed ever attained by a British steam train was 102 miles an hour.

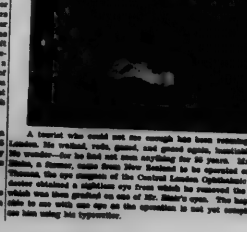
Medals Are Exhibited

The Lindbergh trophy collection at Jefferson Memorial, St. Louis, now includes three medals awarded to Mrs. Anne Lindbergh, the flier's wife. They were presented by the National Geographic Society, the Women's Roosevelt Memorial Association and the Veteran Wireless Operators' Association for their achievements as co-pilot, navigator and radio operator on her numerous flights.

New Season In Britain

The progress made in the United Kingdom's great re-housing schemes was shown in a report from the ministry of health, which stated that between the Armistice and September, 1927, there were 1,000,000 new houses built been provided in England and Wales.

BLIND FOR 30 YEARS—NOW ABLE TO SEE



A tourist who could not see enough has been roaming the streets of London. He walked, rode, gazed, and gazed again. Thousands and untiring. He wonder—for he had not seen anything for 30 years. Mr. William Gray Thomson, a Canadian, came from New Zealand to be operated on by Sir Tudor Duncan, the eye surgeon on the staff of the Central London Ophthalmic Hospital. The doctor obtained a sightless eye from which he removed the healthy cornea. This was then grafted on one of Mr. Hare's eyes. The happy man is now able to see with one eye as the operation is not yet completed. Here we see him using his typewriter.

Scientists Claim Little Danger Of Niagara Falls Disappearing As Result Of Recent Rock Slides

Prescriptions In Latin

Language Must Exist Then Perish And Even Not Change

"By dang a doctor write his prescriptions in Latin instead of English?" There are several reasons. One is that Latin is a more secure language than English, and, being a dead language, it does not change as the case with living languages. Then again, a large part of the drugs in use are botanical, and they have in medicine the same scientific names that they have in botany. Two-thirds of such drugs have an English name, and so could not be written in English. Then, a prescription in Latin can be sent from the patient's pocket all over. Suppose a doctor writes a prescription in English for an unobtainable poison. The person reads it and might try to get it in memory the second time. This might, of course, easily lead to disastrous results. If instead of potassium every mentioned, the person might carelessly ask for cyanide of potassium. The man would safely take ten grains of the latter, but one grain of the latter would be fatal. Finally, Latin is used all over the world by scientific men, and no change in name ever occurred. Where there is a chemist's shop you can get a Latin prescription made up in any part of the earth.

Urges British Investigation

Simon Sedney, Of Alberta, Favors Movement From Britain

Simon Sedney, whose home address is Cottonwood, Farm, Fort Saskatchewan, Alta., urged on arrival in London from Montreal large-scale British immigration, to Western Canada. Nearly half the population of the Canadian west was non-British in origin, he said. The "obvious reason" was considerable immigration from Britain in the near future.

During his stay in England, Baron Sedney, whose full name is Sir George Bridges Harley Quest Sedney, said he proposed getting in touch with leading country and town voluntary migrating committees and organizing other such committees.

New Heroes In Britain

The progress made in the United Kingdom's great re-housing schemes was shown in a report from the ministry of health, which stated that between the Armistice and September, 1927, there were 1,000,000 new houses built been provided in England and Wales.

Preparing For War

"I am prepared to back my car against a car of any other manufacture," says a correspondent. "But I only hope that he never parks just in front of us.

When Hamdrum Niagara, even its thrill as a spectacle dashed through its familiarity from pictures, looks unwanting, making the front page with a great rock fall every few months. Mr. General Public begins to ask what it's all about.

Are the falls going to be ruined in a few years? Are those brooks making new? Mr. General Public is firmly aware the falls must have existed a very long time. Are they now suddenly being overtaken by some dire fate?

No—the falls are in no immediate danger of extinction, but they are moving along upstream, and are declining in height steadily as they recline.

Those three brooks, each brooking many feet of the crest line, and those made of tons of rock, the first on Jan. 1, 1881, on the American side, then one on Aug. 13, 1894, and another Dec. 9, 1894, both in the Horseshoe Fall, occurred at surprisingly short time intervals, and in a shockingly big way in each instance, but they are nevertheless only representative of the kind of thing that is going on for approximately 30,000 years.

Probably the big breaks are uncommon. Indeed they may be a sort of shaking itself down to a more stable condition on part of the big catapult. Between times, another fretting away, the dropping of unnoticed lesser fragments from the crest is constantly going on. Against the line of the falls is retreating at a rate calculated to average four feet annually along the Canadian side, and only two inches a year on the American side.

Although the recession from year to year varies, depending on the incident of such larger breaks as those now in the news, in the 85 years between Hennepin and Lenard and Lenard the recession of the apex of the Horseshoe Fall is definitely established to have been 320 feet.

If it can so certainly be known that in approximately 100 years of historical time there has been a recession of 300 feet it is an easy inference that the same process very surely was in progress 100 years, 1,000 years, before then, and equally easy to make the deduction that the whole never-mile length of Niagara Gorge is the product of the long-continued retreat of the cataract stream from its original site at Lewiston, N.Y.

Then comes the temptation to figure just how many years were required for the job and how much longer will Niagara last. At that inception the falls were for a time about 200 feet high, now the height is only 160 feet.

The surface of the cap rock declines in height upstream from the present crest line.

In time the crest of the Horseshoe fall will have crept back around the head of Goat Island, and, in about 5,000 years, will cut off the water supply of the American fall, leaving it a dry cliff. Such is the indicated future of the 600 years is a long time. Before then Niagara Falls may be taken in charge by mankind and its recessive proclivities much curbed if not completely stopped.

China Reports Copper "Boils"

A curious tale of a copper "rain" that fell in the district of Ching Yuan, in Chengtung province, and that caused a wave of consternation and awe in the surrounding village, was brought to Canton by travellers who declare that they witnessed this peculiar weather phenomenon. The roofs and the streets in the villages were covered with a thin layer of small globules of copper.

More than 90,000 dozen pairs of Canadian-made socks and stockings were exported to British South Africa in 1922.

Spring wheat crop this year was 200,000 tons above local requirements.

Sound waves produce heat, tests show.

How To Keep Colds UNDER Better CONTROL

At the first sneeze or nasal irritation, quickly put a few drops of Vicks Va-tro-nol in each nostril to prevent many colds and to throw off colds in their early stages.

At bedtime, massage throat and chest with Vicks Vaporub. Rub the mother's standby on relieving colds. All night long its stimulating and exhalation. Vaporub brings direct relief.

To Build Sunbeauce to Colds: Follow the rules of health that are part of the clinically tested Vicks Plan for Better *Control of Colds (The Plan is fully explained in each Vicks package.)*

VICKS PLAN — CONTROL OF COLDS

THE TENDERFOOT

By GEORGE B. BOSNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

CHAPTER VI. Continued

It happened quickly!

One of the men flung his rope and missed. The calf doubled back, dashed under the horse's head and was promptly jerked to earth on the other side of the horse's head and then under his belly. In less than a minute that calf, struggling and bawling, lay inert while both men bent over him.

Stone quietly backed his horse down the slope and stood watching the two men. Suddenly he raised his head and listened. Clear and distinct, a sound that he knew well came to his ears, the sardonic lowing of a cow for her calf. Next to the night howl of a lobo that is the most desolate sound in Nature and sends a thrill to the heart of him who hears it. The next moment a half-crazed cow broke from the scrub and, head down and tail switching, dashed at the two dismounted men.

What followed just missed pure comedy. Those men dodged sideways, one fell in his tracks and the other tumbled over him. The next moment one was sitting astride the calf's head with his own head bent low across the calf whose bawling rose to heaven.

Stone dodged behind a line of boulders that gave cover to the very foot of the hill. The next minute he pulled his holster forward and ran forward into the open. The first warning they had of his approach came in his sharp-voiced summons:

"Hands up, you damned Abyssinians . . .!" He dropped his gun in line with the man sitting on the calf's neck. "Come out o' that . . . both of you. . . ."

There was no resisting his request.

A BARBER WHO HAD RHEUMATISM

Tells How He Carried On

A barber who had been "a martyr to rheumatism" writes:

"I have been a martyr to rheumatism for some ten years. For five years I was so affected that it was with the greatest difficulty I was able to carry on my business. I may say I am a barber by trade. After having tried numerous remedies, I was finally advised to try Kruschen. I am pleased to say that after having used Kruschen for some twelve months, I am now free from aches and pains than I have been for some ten years. In fact, I consider I am rid of rheumatism, thanks to Kruschen Salts."—W.M.

Two of the ingredients of Kruschen Salts are the most effectual solvents of uric acid known to medical science. They swiftly dull the sharp edges of the painful crystals, then convert them into a harmless solution. Other ingredients of these Salts have a stimulating effect upon the kidneys, and assist them to expel the dissolved waste needles through the natural channel.

Both men climbed to their feet, both were breathless and disheveled and one had a bloody mouth. Stone gave a casual glance at the calf. Its left ear was nearly chewed off and a great chunk had been bitten from the upper edge.

"Roeder" . . . Gnawer. . . .

That is a term of reproach among Spanish-speaking people where poverty-stricken cattle thieves, including other means of branding calves, bite the ear-mark on the calves it is rare to find a calf properly spayed. Stone spat out the word. His new friends on the Hour-glass would not have known it. A man might bite an ear-mark on a stolen calf was low for human use.

"You damned thieves! You're British subjects, of course. . . . What's your name?"

The man's hand came halfway down. They went promptly up again at a swift movement of Stone's six-gun.

"Name of Gray," he growled. "What's it to you?"

"Maybe nothin'. It depends on who pays me. . . .

Gray's quiet lit nosherty but he kept his hands up.

". . . What's the color-mark of the Broken Spur?" asked Stone.

"Can't you see?" demanded Gray sourly. "It's one ear cropped, the other under-bit . . . like I just done."

He waved a dirty paw at the calf's bleeding ear, but promptly raised it again at a motion from Stone's gun.

"Then many've you marked today?"

"None o' your damned business. What you aimin' to do about it?"

"I'll try to show you. I wonder what Sam Dustin'll have to say about this . . . Usin' his outfit to rustle cattle. . . .

"Huh. Dustin's the man what give the orders. D'you reckon we'd gift a wagon and supplies an' a nigger driver from the Broken Spur if we wasn't workin' under orders? Look a-here, stranger. You're just a drifter workin' for the Flour-glass. It's worth two hundred cash to you to pull yore freight into Mexico."

"I'm on the pay-roll of the Hour-glass till some one makes it worth my while to change," said Stone quietly.

The two men stared wordlessly at each other and a red light showed in Corse's eyes.

"You want to see Dustin," he said shrewdly. "Dustin don't like his dirty work. Him an' Spike Goddard've just took another man on. They've got a prospectin' to ranchin' . . . ."

Gray tried to shut him up, but Corse went on:

"I was to God I was a ol' damn rat what him git men to buy guns an' fixin's for 'em without workin' to pay for 'em . . . . What you aimin' to do now?" he demanded as Stone whipped a knife from his pocket, opened it with a quick flirt of his hand and flung it at Gray's feet.

"Cut two good-sized mesquite branches," he said. "An' see to it they're big ones. This gun's set on a hair trigger . . . Better be quick."

Wonderingly, with one eye on the gun, Corse cut two thick branches from a neighboring clump. Sung them at Stone's feet and stood breathing heavily.

"That's the stuff. Now cut off the bone branches but leave all the horns on."

When the trimming was done to his entire satisfaction, Stone straightened up; his gun, that seemed to hang lightonly in his hand, stiffened and the muzzle seemed to cover both men.

"How each of you take one of those branches . . ."

They gaped at him uncomprehendingly but at a suggestive raising of the pistol hand they hastily snatched at the mesquite arch. Stone seated himself on a boulder and his eyes narrowed into points of gray light that seemed to pierce each man.

"We all've had one hell of a time lately on the Hour-glass of late," he said reflectively. "It seems like it's only fair to make a man clean up his own mess. I just caught you two sure red-handed makin' cattle that don't belong to the Broken Spur. You say your name's Corse?"

The man nodded surly acquiescence.

"Well, Corse, I'm goin' to give you a mixed reckon' you'll think it's a heap better use old man Corse when of his . . . . Or Dustin."

CHAPTER VII.

Dare Stone knew well the character of the enemy he had made. He felt reasonably sure that neither Gray nor Corse would fall truthfully what took place that day on the range, but he also remembered that the negro driver of the wagon was still. Lest he should forget the kind of man Dustin was, Frank Crews reminded him cryptically. He had been thinking of that last encounter but he remembered the incident at Soda Springs.

"He'll shoot you in the back if he gets a chance," he said. "A man don't overlook the man who shows him up before women. You look out."

Crowe, sitting in the sun on the porch of the ranch-house, watched Stone mounting a bay mare which the hands had pulled loose. He saw the lean fingers feel the soft "whang" about the metal bends; he saw Stone's lower wrinkle a moment in perplexity; then the sandy knife came out, the worn piece of whang was cut from one another. Crowe was even aware of the low-voiced oath that sprang to his lips. Stone had spliced the lariat and the rope was ready for use. Crews stepped over to him and laid a hand on his shoulder.

"You listen to me, Stone," he said. "I don't care a tinker's dam if you're the man who shot Lincoln. As long as you play the game with us I'm willin' to see that you git a square deal. I don't know who you are but I know damned well who you ain't. You ain't any amateur cow-puncher like you want us to believe. What's the game? Le' me tell you somethin'. If you aim to keep your past record and now it was too late. He threw them far into the bush.

"You can go now . . . Tell Dustin just what happened. Tell him, too, that he's got the same 'reckonin' for him the first chance I get. He's bad it comin' for a long time and he'll get his yet. Get on with you. . . ."

They slunk off to their horses, caught them up and mounted and joined the wagon at a gallop. Stone saw them talking volubly to the driver; then the wagon whirled about and jogged off down the valley.

"It's a cinch that somebody'll talk," he muttered. "That driver saw it all . . . . Now, what the devil is that?

He bent over the trampled spot where Gray and Corse had flogged each other and swiftly retrieved a little red notebook that had been trampled underfoot by the rolling men. It was just a cheap little note book backed with imitation leather and he flipped its pages open idly enough.

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason. Dr. Wernet's Powder is the world's largest seller and prescribed by leading dentists: it holds teeth as firmly—they fit so comfortably—that all day long you forget you ever had false plates. Leaves no colored, gummy paste—keeps mouth sanitary, gums healthy. Get Dr. Wernet's Powder you can buy for 60c.; 75 cents; and $1.00.

"Looks like the plot thickens," he muttered. "I wonder what this is?"

He had expected to find the book filled with usual addresses of girls in the neighboring towns or with accounts of debts. To his surprise the first page bore the legend in purple pencil:

D. Kane his hist"

That same page bore a list of camp supplies with weights and measures to facilitate quick packing on an emergency. The second page was a price list of beans and bacon. Coffee and sugar and powder, the entry read; every item that a prospector could use was listed there. Then came an item that made Stone stare at it with puzzled eyes. It read:

"Mem. One half to Dustin if he pisses fare but don't show him where it is till he comes across."

Then followed a list of notes, mainly illegible but that he finally deciphered:

"Red Water cannon seven one to white birch. . . . Up Stinking Water three two to mark sun. . . .

Stone thought he puzzle a mind reader, quick those. "I reckon it's better see old man Crews about this . . . . Or Dustin."

CHAPTER VII.

Canada's Problems Reviewed By Bank

Bank Of Montreal Annual Meeting

In the outlook for the future there are many reasons that justify the hope for a continuation of the betterment experienced in Canada during the past year, declared Sir Charles Gordon, President, in his address delivered at the Annual Meeting of Bank of Montreal. "There is comforting statistical evidence that our resources are so large and so varied that when one door of opportunity closes another always opens. It has truly been said that Canada's salvation is that she is still a land without a frontier."

In the fields of government and finance Sir Charles stressed the necessity of dealing with the whole subject of unemployment, which he characterized as "the greatest problem since the war"; recommended that all forms of transportation be regulated by a Dominion board, in order to effect railway co-ordination and cut down the losses of the Canadian National Railways; "the greatest deterrent to Canada's financial recovery"; and surprised that in the present strong market for government bonds "a comparatively small block of long-term bonds" has been offered for sale by the Province of Alberta.

Banking legislation of the past year would in the main have the effect of curtailing bank circulation, Mr. Charles stated. He pointed out there are in Canada some 4,700,000 depositors, receiving by way of interest $37,000,000 last year as compared with $12,000,000 received by shareholders. It was to the depositors' interest, he said, that bank earnings should not be further reduced.

General Managers Address

W. A. Bog, Joint General Manager, in addressing the meeting, dealt emphasis on his statement that lending money for commercial purposes is the backbone of the bank's earning power. Much of that is true, and always has been ready, to consider applications for loans that fall within the category of sound banking risks.

"Canadian business is vitally dependent upon external trade," Mr. Bog said, "and is therefore particularly interested in stirring and the United States being established. It does not appear probable that satisfactory stabilization of the world's moneys can be achieved upon any other basis than a gold standard."

In conclusion, Mr. Bog said: "In Canada the depression did not reach the low levels experienced in many other countries. The intrinsic wealth of the country is undoubtedly a protective factor; the stability of the people unshaken. That would to be found in the banking system in this connection an evidence of the confidence in the Bank held abroad the number of shareholders of the Bank having existed Canada has increased during the past year by over three hundred; since 1920 by more than eight hundred. This confidence is justified as I can assure our shareholders and depositors that the Bank is in a strong and secure position."

Only Five Centuries Old

First Books Costly And Few Could Afford Them

Books came into being less than five centuries ago and they were accessible only to the few the rich, dont you ever spiler me more whang with the Apache twist. Anybody who's ever seen that 'twist' has marked cattle in the White Mountain country."

Stone laughed and looked silly; then he laughed amiably.

"I've got nothin' to hide that I'm ashamed of," he said. "I never shot a man nor robbed a bank. But for reasons that I'm not ready to give just yet, I'm tradin' on a new future As long as I do my work am I a fixture on the Hour-glass?"

Crews made him a blow on the shoulder that hurt.

"As long as I'm boss you're fixed," he said. "What you did for Edith at Soda Springs has fixed you for keeps with us, Stone. But . . . well . . . when you get ready to talk, talk to me."

"All right. I'll start right now. . . ." Stone took him at his word. "You know that man Dustin?"

"Like a prairie dog knows a rattler. Why?"

"Remember the last time I rode the line of the West fence?"

"Uh-huh. Go on. . . ."

"I found two of the Broken Spur men, Gray and Corse, with a wagon up there. They were writin' on a skin book with a hot pen. . . . I caught 'em ear-markin' a calf that belonged to the Hour-glass."

Early Morning Fire Destroys Small Building

The gaol fire Siren and the Fire Bell sounded at 3:00 this morning, and the fire brigade responded promptly although it was nearly 40 below zero. The fire was a small outbuilding used as a play house at the rear of the Jacobs house, and was quickly extinguished by the fire brigade.

The first report was telephoned in from William Cummings at the Gaol, who telephoned Constable Dennis and the latter rang the Town fire bell, and Mr. Cummings attended to the water supply, and gave the order for the Gaol fire siren.

The damage was slight.

By the quick and splendid work of our fire brigade no great damage was done to surrounding buildings.

Mrs. Ed. Kelly is a patient of the Lamont hospital and we all wish her a speedy recovery.

******

Mr. Andy Underschultz returned home Tuesday morning from Winnipeg after attending the funeral of his sister, Mrs. Mechling. On his return trip he spent several days in Kipling Saskatchewan visiting relatives and friends.

REDUCTION IN MOTOR LICENSES

Reduction of approximately $5 in the license fee for the lower-priced passenger autos, up to 115 inches, to take effect at the first of the year when all motor licenses are due, is announced by Premier Reid, following a survey of the motor license situation by the cabinet. There will be no change in the license year.

Subsequently it is the intention of the government, states Mr. Reid, to raise the tax on gasoline by one cent, bringing the tax to seven cents per gallon. This will be a feature of the budget to be presented at the forthcoming session of the legislature.

The usual reductions granted in license fees at April 1, July 1, and November 1, will be carried through, applying to the reduced fees as announced, as well as to other fees.

The reduction in fees will make the license on all cars not exceeding 100-inch wheelbase $10 instead of the present $15, on cars not over 105-inch wheelbase $12.50 instead of $17.50, on cars not over 110 inches $15 instead of $20, and on cars not over 115 inches $20 instead of $22.50. Cars over the 115-inch wheelbase will be licensed at the same rates as at present.

There will be a reduction of $1 also in the license fees for all motor vehicles manufactured eight years previous to January 1 of the current license year, the fee for such cars with 100-inch wheelbase being $8 instead of $9, and so on up to cars not exceeding 120 inches in wheelbase.

The proposed increase in gasoline tax, stated Mr. Reid, will put the province on the same basis as British Columbia and Manitoba, whose tax has been seven cents for some years. The three Maritime provinces have a tax of eight cents, while Ontario and Quebec are six cents.

With respect to car licenses, Mr. Reid pointed out, Alberta will now be lower than either Saskatchewan or B.C., the latter having a fee of $20 for the 100-inch car, with an initial fee of $10 for all car ownership additions, while Saskatchewan's fee for the 100-inch car is $12.50.

SUPPORT THE ADVERTISERS

Town Council Hold Regular Regular Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Secretary's Office on Wednesday the 19th. Instant at 7:30 p.m.

Present Mayor Montgomery, Councillors Magee, Watt, Graham, Pettet and Gantf.

The minutes of the last meeting were read and adopted.

An application to purchase lots 17, 18, and 19 in Block 9 was approved by the Council.

Three applications for relief were considered and recommended to the Department. In this connection the Council decided that all recipients of relief would be required to work their relief out at whatever work the Council decided upon.

An application for Old Age Pension was approved.

The question of re-surveying the cemetery was discussed at length, and a tentative plan prepared by Mr. J. W. Dean was explained by the Mayor. This matter will be taken up later, also the matter of a By-law to be amended requiring garbage cans to be placed at each house, same to be emptied at regular periods by the scavenger.

Silver Wedding Is Event At Fort

Mr. and Mrs. C. H. Flintoff Are Celebrants on 25th Anniversary

On the occasion of the 25th wedding anniversary of Mr. and Mrs. C. H. Flintoff, a number of friends gathered at the home of Mr. and Mrs. George Oshaldeston at Partridge Hill, bringing good wishes and gifts.

Mrs. Otto McLellan and Mr. Ernest Flintoff, who had attended Mr. and Mrs. Flintoff at their wedding, were among the guests.

During the evening, the guests of honor were presented with a silver tea service on behalf of the community by Mr. William Gillison, who gave the address.

Rev. E. J. Hodgins presided at the toasts, which were proposed by Mr. George Oshaldeston and Mr. William Oshaldeston, to which Mr. C. H. Flintoff and Mr. E. Flintoff responded.Mrs. Frank Smith, Mrs. Frank Kolak and Mrs. E. J. Hodgins contributed to a musical program.

Among those making short speeches during the evening were Mr. N. Lumby, Mr. W. Pearce, Dr. J. Alton, Mr. T. Whitson, Mr. W. Alton, Mrs H. Rye and Mr. R. Stewart.

Benefit Dance Brings In $14.30 for Good Cheer

The sum of $14.30 was realized at the Benefit dance held in the Memorial Hall last Friday evening in aid of the unemployed in Fort Saskatchewan. Due to extreme cold weather and many other social functions being held on this night, only a small crowd was in attendance.

Mr. W. A. Graham, Mr. Arnold Mann, Mr. R. Magee, Mr. P. Smith, and Mr. S. Hambly were the committee in charge of the dance given for the benefit of the unemployed.

49th BATTALION TO HOLD ANNUAL DINNER JANUARY 5th

The annual dinner of the 49th Battalion (Edmonton Regiment) Association will be held at the MacDonald Hotel in Edmonton on Saturday the 5th of January next at 7:30 p.m. All men who at any time served during the Great War in the battalion are urged to attend this annual function.

Employer: "While I'm away you will take your orders from the mistress, Giles." Gardener: "Yes, sir—same as if you was at home."—Tit-Bits.

Window of Fort Hardware Broken In; Saturday

A plate glass window in front of the Fort Hardware was broken late last Saturday night, caused by Charlie Fisher slipping on the sidewalk, and falling through it. Fisher was badly cut and had to receive attention from Dr. Mason.

Mrs. L. Majarka of Ardrossan was a patient in the Conamore Nursing Home last week.

Production of petroleum in Alberta oil fields for November was 90,008 barrels, bringing the total production for the year up to the end of November to 1,160,135 barrels compared with 900,000 barrels for the 11-month period of last year.

A Word To Youth

Many young people enter the new year with feelings of discouragement and in a state of bewilderment. The future presents itself to them in the form of a very large question mark. The future always presents itself in this form, but, generally speaking, the answer, or at least some of the answers or a partial answer, was in a sense been possible. But in these times the riddle of the future seems exceedingly hard to decipher.

Nonetheless it is well within the realm of truth to say that, in large measure, the final answer is much the same as it has always been, and it is that, apart from changed conditions, it rests with the youth of to-day to work out their own destinies just as the youth in the ages of the past have always been called upon to do.

This is not the only era in the world's history when youth has had to face and contend with changed conditions. This is, and always has been, and always will be, a world of change,—changing from day to day and from hour to hour. New times bring new conditions and new conditions bring new tasks and new problems demanding solution. This is life. Without such change there would be no life.

So there is, after all, nothing to affright the youth of to-day; rather because of the greater changes which recent years have brought and the greater complexity of the problems calling for solution, there is also a great challenge to youth and more and greater, rather than fewer and lesser, opportunities awaiting youth's grasp.

What then youth need to-day as an essential item of equipment to face the future, surmount the difficulties which lie in the path of the years, and achieve success? Sir Herbert Barker, the celebrated English surgeon, submits an answer. He says:

What we need to-day among the young men is the spirit of initiative, the enterprise that takes chances and starts something new.

It is true that economic conditions are bad, but it is in times like these that men of character rise to meet and challenge life.

To those dispirited young men who have been looking for jobs without any set plan, I would say: Determine first upon an objective. Know what you want. Then go out after it.

It sounds easy? But I do not speak without knowing what it means to struggle against obstacles. I have fought hard from the days when I sometimes wondered where my next meal was to come.

The tragedy of such men is that as the months of unemployment drift into years, brains grow dull and character rots.

At the beginning, it is a problem of unemployment; in the end it is the tragedy of unemployability.

To any such young man, looking at life to-day with jaundiced eyes, maybe, living at home, or drawing upon kindly relatives for the wherewithal, I would say: "Get busy! Find some work to do."

If there is no paid job in the offing, sit down and initiate something—anything. Do any work rather than no work, and, for preference, work as your own master.

There are as many opportunities to-day as ever there were. But they are hard to find. There are rewards for enterprise and resource as dazzling as ever there were; but the road to them is steeper.

Will youth soft sons of sturdy sires become effeminate, fight up out of the morass of apathy and lethargic inertia? Or are they, indeed, too soft in heart and head? I don't like to believe that the thing that pulled us through the War—in a word, "grit"—is a thing of the past.

Lebensos Of Weather

Record Breaking Warmth And Rain Reported From Alaska

A torrential storm early in December brought damage estimated at $100,000 to Cordova, Alaska, as the vagaries of the weather grew more common and interior Alaska more record-breaking warm weather, as well as gales and heavy rains.

Sweeping in from the Gulf of Alaska a 55-mile gale raged for several hours and at Seward, in 12 hours a total of 13.38 inches of rain fell.

Meanwhile, inland at Fairbanks, the spring-like temperature of 24 degrees, the warmest winter days for the months of November, December, January, February and March in the 30 years' history of the weather bureau, was recorded.

The snow was entirely gone at Fairbanks, as well as at numerous other points. The gale lashed hourly at Cordova.

An unprecedented thunder and lightning storm also swept over Cook Inlet.

A Valuable Plaything

Ambergris Found By Boy Worth Thousands Dollars

A seventy-pound lump of wax-like substance picked up by a Brockland boy, Roderick Crandall, and used as a plaything, has been appraised as ambergris, valued at $15,000. Ambergris is a fatty substance from sperm whales and is used as the basis in manufacture of perfumes. Young Crandall found the lump on the beach at Ideaboro, Mass. His father, a carpenter, sent a specimen to a chemist who said it was pure ambergris. M. L. Decker, a Watertown fisherman, is awaiting a chemist's report on another lump weighing 50 pounds.

Price No Object

The Hollywood magnate told an assistant that in his opinion a certain writer was the only man for a film they had under consideration. The assistant was instantly doubtful. "Don't you think, perhaps he's a little too costly?" he suggested.

"No. I care how much he costs!" thundered the producer. "Get him!"

How Use For Potatoes

Surplus Crop Can Be Converted Into Many Manufactured Articles

Millions of pounds of imported corn now used in the manufacture of a wide variety of food products could be replaced by Canadian potatoes, thereby using up the entire potato surplus of 7,000,000 bushels, a conference of experts called to devise new uses and new markets for potatoes was told by Dr. W. Gaby of the National Research Council.

The conference was called and presided over by Ex. H. M. Tory, chairman of the National Research Council.

Now uses for Canadian potatoes included the making of such products as confectioner's glucose, grape sugar, syrup, starch, potato flour and potato chips and such other products as laundry starch, dextrine, glue, gum, alcohol and foundry moulds, the preservation and canning of potatoes, the use of potatoes as food for livestock.

An Imperial Lover

Love Letters Of Napoleon Sold At Auction For $78,000

The granddaughter executors of an imperial lover—the letters of Napoleon to the Empress Marie-Louise—were sold at auction recently in London for $78,000.

The letters, 310 in all, and dealing with every phase of Napoleon's love affair, were bought in block by the French government. They covered the whole heroic scene, the courtship, marriage and the Elba exile of Napoleon.

Four of the letters which changed hands had been published. The last letter was that of a tired warrior, who said: "I long to see you and my son."

The letters were made available by the action of a nobleman, who received documents, and who inherited them. The bids rose rapidly after an initial offer of $2,000.

There were no problematic gems in the collection, such as Napoleon's pearl, according to the Smithsonian Institution.

Silk From Pine Trees

Parents Of South Boy Be Able To Help Clothe World

Synthetic silken yarn from South-ern pine trees—the first ever made—was shown at New York with assurances that it could be made by a process through which the pine forests of the South can be made to clothe the world. Cellulose extracted from the pines has been a goal of chemists for years. The inexpensive supply in Southern forests is literally huge enough to meet all the needs of the human race for clothing. A spinning white skein of artificial silk, made from pine trees was handed to Dr. Charles H. Herty, of Savannah, Georgia, discoverer of the process.

Pensions For Thieves

Well Organized Band Discovered In Yugoslavia By Police

Receiving regular daily pay and a comfortable house and piece of land to retire on when each had stolen his quota, a band of thieves has been discovered by the police of Yugoslavia. According to a dispatch from Belgrade the gang had a banker-employer and specialized in robbing co-operative societies. All booty, money and goods were taken by the gang leader. Members were paid $1.25 per day for their work, two or three times the pay of a skilled worker in the district. They often stole goods worth $500 in one night. All their burglaries were carried out on the same plan. A hole was made in the wall of the store, one man went in and handed out the stuff to another who handed it on to a cart. A third man kept guard. The leader stayed at home and waited for the booty.

LORNE ARDIEL

Nominated by shareholders of the new Bank of Canada from coast to coast and then practically every section of the Dominion, Lorne Ardiel has agreed to stand for election to the Board of Directors in Class "C". Mr. Ardiel is known throughout the length and breadth of Canada and particular to the war served many years with the Dominion Bank, at the early age of 32 carrying managerial duties.

He was born in London, Ontario, in 1890, and from 1915 to 1919 served overseas with the Canadian Corps. On returning to Canada he immediately entered the automobile industry holding such national positions throughout the Dominion as Chevrolet, Oldsmobile and Cadillac.

In 1930 he established The Lorne Ardiel Company, Business Counsellors, and acquired control of the Press Agency Bureau Limited, one of Canada's leading national advertising agencies, established 1902. In addition, in 1932 he founded the Institute of National Advertising for holding each national convention of 20 members throughout the world, for the purpose of the interchange of all valuable and useful information regarding each country, its products, economic trends and merchandising. Through this affiliation a common bin of the untruth of all statements? Or what do you advise?

Here again we have this question of a marked difference in the ages of the two associates. The man is 14 years older than the girl. This is not so bad, however, because the relative ages are still young. So that this age difference in the present case is not an insuperable obstacle. However, the matter of jealousy is a vital one.

This is one of the most insidious of characteristics. It grows on like. The young man has lost his self-control entirely, and has shown grieving little regard for the girl he wants to marry, in continually harping her of the things he has.

The question arises—if he is so continually jealous of her now when he is not even engaged to her, what would he be like when they were married?

Jealousy is one of those vices that is usually the result of habit. The more ceremony of getting married does not destroy it; rather does it stimulate it. And a jealous husband is far worse than a jealous suitor, for a single girl can still give up the man, whereas once married, a separation is difficult—and only after a great deal of unhappiness and tribulation.

It seems to me that the man in question is likely to continue to be jealous, and I advise my correspondent to give him up, at any rate until he is assured that this jealousy is cured. Better to cut the knot now than live to rue it later.

Jealousy, unfortunately, is one of those vices that is really hard to cure. And it is far too great a risk for any correspondent to take, especially having regard to the difference in age. She is still young, and it will not be very difficult for her to get new friendships.

A Queer Problem

Relief Investigator Perry Mitchell of Stratford, Ont., Is Puzzled

Relief investigator Perry Mitchell of Stratford, Ont., has had some queer problems to solve in the years before did they involve a race horse.

During his inquiries he uncovered a relief recipient who owned a race horse. The man is grooming the horse for next year's races and in the meantime the relief committee is wondering what is to be done with the unemployed racehorse owner.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT
(Graphe-Analyst)
(All Rights Reserved)

Editor's note: Here is another interesting problem, with which the author has had to deal. Have you any problem upon which you would welcome some advice and guidance? This well-known handwriting expert repeats his invitation to readers following this week's article below).

* * *

A young lady of 19 writes me in part as follows: "For a few years although I am still only 19 years of age. I have been going with a man of 33 years. We seem to be admirably suited to each other in spite of this difference in our ages, having much in common. Together. My friend is inclined to be somewhat moody, but I am the first girl to come into his life, and he got to be very fond of me.

"Over two years ago he asked me several times to marry him, but I was not ready for marriage, because I do not believe in early marriages, and I was ambitious to become a teacher. My parents also objected on account of the difference in our ages. I may say here that he is earning a good living, and money would be no trouble to us. I wanted to wait for a few years before marrying him, but I couldn't bear to love him.

"Since then he has been a different man, very despondent at times, and intensely jealous at others. We are both of jealous temperament, but he has acted very bitterly. His despondency changed, and he was more one of going out with other men, and I thought that by showing that a young man would even pass our house, he would become me of being more kind. At first I benefited by this away, but it got so bad that I thought that he meant what he was saying.

"Over a year ago he turned to another girl because he was convinced that I was deceiving him, but after a few months that was over. Is there any way in which I can convince him of the untruth of his statements? Or what do you advise?

Here again we have this question of a marked difference in the ages of the two associates. The man is 14 years older than the girl. This is not so bad, however, because the relative ages are still young. So that this age difference in the present case is not an insuperable obstacle. However, the matter of jealousy is a vital one.

This is one of the most insidious of characteristics. It grows on like. The young man has lost his self-control entirely, and has shown grieving little regard for the girl he wants to marry, in continually harping her of the things he has.

Fought Death Nine Days

Three Men And A Woman Finally Rescued In Alaska

Three men and a woman, their aeroplane broken down from the skies by a blizzard, fought death and hunger for nine days in a tumble-down cabin near Anchorage, Alaska, before a rescue plane dropped supplies with skis brought them to safety.

"Hungry, cold, tired and sick."

That message, spelled out on the snow by the green branches of trees they had chopped, brought Pilots Roy Dickens and Chuck McLean down from the clouds to save them. Three planes previously had roared over the two mountain tops. Because they flew too high to read the distress signal.

Pilots Hazel McClung, wife of a Takotna mining man, Pilot Oscar Winchell and two mine operators, David Standberg and Weins Pentenburg, had taken off from Takotna on their way to Anchorage. Mrs. McClung intended to go to Juneau.

Their monoplane chewed by a blizzard of sleet and snow, which coated the wings until the ship sagged wearily and then came the gale. Winchell attempted to regain altitude—and only after a great deal of unhappiness and tribulation.

Taking a take and light emergency rations from the plane the four beat a path through the snow to an old cabin. Fortune favored them, for they found the tattered fragments of some blankets and a few dried beans and some rice abandoned by a prospector.

Doling out those provisions, and melting snow for water, they existed nine days, each of the party losing 10 to 15 pounds.

AFTER OPERATION SHE GREW FAT

And Became Short-Winded

A letter just received from a woman states that she is writing in thanks for the benefit she has received. Her letter goes on:—

"About 13 months ago everybody remarked how fat I was getting. I turned the scale at 196 lbs. I was fed up at getting so fat and it made me short-winded. Why they noticed it more was because I was getting fat slowly since I had had an operation for anaemia. I went back to the hospital, and the doctor and most women get fat after that operation. I had tried everything I knew of to try and get slim, so I thought I would give Kruchen Salts a trial. I started at first to take half the dose prescribed in my first cup of tea. Nine months ago, I turned the scale at 196 lbs., and at the time of writing I am 175 lbs. I feel better than I have felt for a long time."—(Mrs. H.)

The formula of Kruchen consists the ingredient salts of the mineral waters of those European spas which have been used by generations of overated people to reduce weight. Gently but surely, Kruchen rids the system of all fat-forming food refuse, all poisons and harmful acids which give rise to rheumatism, neuritis, and many other ills.

Fought Death Nine Days

Three Men And A Woman Finally Rescued In Alaska

Three men and a woman, their aeroplane broken down from the skies by a blizzard, fought death and hunger for nine days in a tumble-down cabin near Anchorage, Alaska, before a rescue plane dropped supplies with skis brought them to safety.

"Hungry, cold, tired and sick."

FOLLY OF WAR TO BE SHOWN IN A NEW FILM

Ottawa.—The folly and futility of war, its sacrifices, heroism and tragic aftermath, are portrayed in human and munitions company in South America, is pictured as he was sworn as a witness before the Senate War Committee investigating armament transactions in Washington. Testimony that United States companies sold arms both to Paraguay and Bolivia in the Gran Chaco war was presented to the committee.

Ernste B. Jones, agent for a United States munitions company in South

Court House Burned

Tennessee Mob Cause Disorders In Attempting To Seize Negro

Shelbyville, Tenn.—A mob of several hundred persons, two of their number already slain and others wounded, milled about the scene of the county court house here as an army of national guardsmen hurried to the city of disorders growing out of a futile attempt to seize a negro.

Fed by gasoline poured on by the mob, flames destroyed the $150,000 brick building which a few hours earlier had held the object of the mob's fury—a negro charged with assaulting a 15-year-old white girl.

The negro was whisked away, disguised in a soldier's uniform, and taken to Nashville.

From over the state, 800 guardsmen were mobilized and rushed into Shelbyville under orders from Gov. Bill McAlister.

Angered by the runs and apparently indecent upon showering their wrath upon the courthouse and the county officers, the mob allegedly sprinkled the 75-year-old Bedford county court house with gasoline and set fire to it.

Firemen who would have hindered them in fighting the flames. Dynamite, which had been tossed into the fire, was exploded, causing the height of its disturbance in the day, exploded, but no one was injured.

Herds Of Caribou

Thousands Of These Animals Roaming Northern Ontario

Edmonton.—Great herds of caribou are roaming about Old Fort, 30 miles distant from Fort Chipewyan, N.W.T., and are gradually coming closer to Chipewyan than for many years, says a wireless dispatch to the Edmonton Journal.

As a result, there is scarcely a male inhabitant of Chipewyan who has not participated in the big caribou hunt. The meat supply is proving a great help to the trappers of the district who have had to date no commercial fur for their catch.

Hunters, as well as airmen flying to and from Beaver Lodge lake, report that there are thousands of caribou and that many of the small lakes appear to be literally packed with the caribou herds. Trappers who had 75 pelts at the end of season last year now have only seven or eight furs to barter for supplies. Open water in west and swamps preventing animals coming in from the bush where they are plentiful and also handicaps the trappers in making their catch.

Colder weather will help as the quality of the furs is good.

Irish Citizenship Bill

To Remove Any Suggestion That Irish People Are British Subjects

Dublin.—The Irish Free State's citizenship bill passed through final stages in the dail recently. It was approved by a vote of 51 to 36.

Explaining the intention of the bill, Executive Minister De Valera said it aimed at removing from Irish law any suggestion that the Irish were British subjects. The Free State now is not alter a British act, he said, but if the British would remove from their statute the suggest on that persons in the Free State were subject as British subjects the Free State would welcome the step.

This apparently was a conciliatory effort taken by De Valera to avoid arousing undue antagonism in Britain over passage of the bill. Dominions Secretary J. H. Thomas told the House of Commons some days ago he had been advised on the highest legal authority the Irish bill could not deprive Irish persons of their status as a citizen of the British commonwealth.

Ask Removal Of Duty

Calgary.—Seeking assistance for the beef cattle industry, Alberta cattlemen will petition the federal government urging it to negotiate with the United States for the removal of duty on cattle entering that country. At a meeting here attended by 120 growers representatives of the Western Stock Growers' Association a resolution urging the duty removal was adopted.

BOLD BOTH SIDES ARMS

Price For Beef Cattle

Western Stock Growers Want Price Fixed For Certain Grades

Calgary.—Appointment of a committee of three experts to fix a minimum price for certain marketable grades of beef cattle will be urged upon the federal government by the Western Stock Growers' Association.

The minimum price would be on certain grades of cattle standardized on the Winnipeg market and the committee would have power to fix a grade below which no cattle could be marketed for human consumption in Canada.

A resolution urging the minimum price scheme will be forwarded to Ottawa shortly.

New Observatory For Toronto

Toronto.—Official opening of the new Dunlap observatory of the University of Toronto will be held May 31 when D. C. A. Chant, professor of astrophysics, who had long sought this addition, will celebrate his 70th birthday. But it will take two years before the craft are commercially proved.

A Christmas Truce

Tranquility To Be Preserved In Saar Territory Over The Holiday

Saarbrucken, Saar Basin Territory.—A Christmas truce to preserve tranquility in the Saar Territory over the holiday was declared by the League of Nations plebiscite commission.

Both Nazis and anti-Nazis were pledged to keep the peace from December 23 to December 27, hold no meetings and forget the imminence of the January 13 plebiscite to determine the future sovereignty of the Saar.

The truce was declared as 200 British Tommies, advance contingent of the international patrol force, occupied their billets.

Nazis regarding the troops' arrival without demonstration, warned the young women of the Saar against forming any romantic attachment for the foreign soldiers.

More Naval Conversations

Britain's Foreign Secretary Hoping Talks May Be Resumed

London.—"I may express the firm hope the efforts we have all been making to prepare the ground will enable further conversations to take place in say two or three months' time," said Sir John Simon, foreign secretary, in an address on the trip over naval talks which were formally adjourned.

Emphasizing the British view that the talks, designed to pave the way for negotiation of a substitute for the Washington naval treaty, have not come to an end but are merely adjourned, Sir John said that France and Italy were being kept in touch with all that had been going on between Britain, the United States and Japan.

Trans-Atlantic Air Route

Only Way To Bridge Atlantic Is By Non-Stop Flight

London.—The Daily Herald says that aviation experts have decided the only way to bridge the North Atlantic by air is by a non-stop flight.

Reports made following surveys for possible air routes linking Canada and the United Kingdom show that "impossible" to "good." The Herald says.

Three large aeroplane building concerns, it continues, have started building trans-Atlantic flying boats for an air route linking Canada to Britain but it will take two years before the craft are commercially proved.

THE ROYAL COUPLE HONEYMOONING AT HIMLEY

Our photograph, taken at Himley Hall in Staffordshire, shows the happy royal couple, the Duke and Duchess of Kent, sitting on a stone wall while enjoying a quiet honeymoon. Note the attitude of the faithful police dog, who apparently intends to keep away all intruders.

SAY HOLDING POLICY WAS BAD FOR EXPORTERS

Winnipeg. — John I. McFarland, head of the Canadian government wheat agency and general manager of the Canadian wheat pools, charged terminal elevator interests at Fort William and Port Arthur with charging excessive premiums and establishing a holding policy against exporters.

Rumors of the situation and rumblings in the grain trade were brought into the open by Mr. McFarland in an interview when he declared exporters had bitterly resented the difficulties they experienced since early in November because of the attitude of terminal elevator interests. Unwarranted premiums were exacted from exporters in order to secure cargo for their lake steamer charters.

"Such premiums demanded were not in harmony with the large supplies of high grade wheat in store not only at lakehead terminals but also in country elevators throughout the west," said Mr. McFarland. "Wheat was not procurable by exporters at the official closing prices as quoted for cariot purchases on the open market. The premiums complained of were in addition to such prices and wheat was not readily available on any consideration. Difficulty was experienced in loading boats.

"Navigation did not close until Dec. 13, and had wheat been shipped on a basis of December option values, many more steamers would have been chartered and further large quantities would have been moved to eastern ports, where it would have been available for export this winter," Mr. McFarland said.

"I am forced to the conclusion that December as a contract month should be abolished. November should be substituted in place of December. Thus, with October and November futures operating for hedging purposes, it would give the liquid delivery months in the navigation season of the year when the large fall movement is under way in place of only October, as now operated."

New Wage Agreement

Railway Workers Get Three Per Cent. Of Pay Cut Restored

Montreal.—Canada's 100,000 railway workers and their families will spend a merry Christmas as a restoration of the fact that from the first day of the new year they will have restored to them three per cent. of the 15 per cent. pay cut previously made, and from May 1, 1935, they will have two per cent. more restored to them, bringing the deduction to 10 per cent.

An agreement to this effect was reached some weeks ago between the management of Canada's railways and the officers of the running trades' brotherhoods. An announcement was made by J. McGuire, general chairman of the Canadian Brotherhood of Railroad employees, whose 12,000 members include many miscellaneous classifications and whose total in similar agreement to that of the running trades has been signed.

It is understood at the same time the executives of the Canadian Pacific and Canadian National Railways have decided to extend the provisions of these agreements to steward, mess and office workers and other unorganized employees.

Suggest Names For Directors

Seven Suggested For New Bank By Chamber Of Commerce

Montreal.—The Canadian Chamber of Commerce published a slate of seven from among the 40 nominees for directors of the Bank of Canada which it recommends to shareholders of the bank.

Following is the slate: William K. McKeen, Halifax; Robert A. Wright, Drinkwater, Sask.; William D. Black, Hamilton, Ont.; Robert J. Magor, Montreal; Joseph Beaubien, Montreal; Thomas Bradshaw, Toronto, and William C. Woodward, Vancouver.

Large Area In Manitoba To Be Set Aside For Use As A Federal Forest Experimental Station

The government of the province of Manitoba has transferred to the Dominion government an area of approximately thirty-seven square miles on Duck Mountain, for use as a federal forest experiment station by the Forest Service of the Department of the Interior. Honorable Thomas G. Murphy, minister of the interior, states that the area is a valuable addition to the chain of stations devoted to forest research and the demonstration of practical silviculture.

Certain preliminary steps are necessary before the investigative work can be completely mapped out. An accurate knowledge of the area, particularly with regard to the commercial age of the timber, is required. Aerial photographs have been furnished regarding the stands of spruce, and the logging of each individual bird with its close and grade. Areas containing unusual quality for export are kept for which inquiries is requested must be legibly stencilled on one end in black letters not less than three quarters of an inch in height, to show in the upper left corner the number of birds in the box; in the lower left corner the word "tagged," if all the birds in the box are tagged, also the gross weight; in the lower right corner the net weight; and in the upper right the kind and number of the first line and the class and grade on the second line. Another stencilled claim is that amended regulations provide that upon the head of the box bearing the shandrill direction no mark or other than designation is allowed.

Unless shippers follow the regulations in all particulars the privilege of export will be withheld. Although it may be a very long time before banana flour could have any appreciable effect on Canadian flour—if, indeed, at least the Dominion on the trend of the manufacture of banana flour should be noted.

Just An Advertisement

Spurious Legend To Be Valuable Was Flypaper Ad.

Some years ago somebody at the Santa Ines Mission at Santa Maria, California, picked up from a rubbish heap what appeared to be a portion of sheepskin binding from a book of the mass. It resembled handwork executed by Indian neophytes renowned a century ago for the excellence of their leather work. The fragment was preserved in a locked cabinet by the Capuchin Fathers, guardians of the mission. Recently, word came to Washington of the discovery at the Los Angeles Museum, created the "parchment." His delighting gives description of the fine decorative arches, flailed by years of exposure to sun and rain, to be the oft-repeated name of a brand of flypaper popular a decade ago.

Grading Is Compulsory

Act Now In Force Governing Export Of Poultry

Important amendments to the live-stock and livestock products act affecting the grading and marketing of dressed poultry have been approved by the governor-in-council, and become effective as soon as they have been published twice in the Canada Gazette. The original regulations under the act passed in 1929 have been changed to make compulsory the grading and inspection of dressed poultry for export.

In addition to being inspected at point of shipment as to grading and packing, very definite regulations have been formulated regarding the marking of containers, and the tagging of each individual bird with its class and grade. Boxes containing dressed poultry for export must be of such construction as to be readily identified on one end in black letters not less than three quarters of an inch in height, to show in the upper left corner the number of birds in the box; in the lower left corner the word "tagged," if all the birds in the box are tagged, also the gross weight; in the lower right corner the net weight; and in the upper the kind and number of the first line and the class and grade on the second line. Another stencilled claim is that amended regulations provide that upon the head of the box bearing the shandrill direction no mark or other than designation is allowed.

Unless shippers follow the regulations in all particulars the privilege of export will be withheld. Although it may be a very long time before banana flour could have any appreciable effect on Canadian flour—if, indeed, at least the Dominion on the trend of the manufacture of banana flour should be noted.

Banana Flour Popular

Several Countries Are Producing It For Export Trade

Flour has been produced from bananas in various countries for many years and although it has not attained any importance as an article of international commerce, nevertheless attention is being directed to its possibilities. In addition to Montevideo India, nearly every banana-producing region in Central and South America, the West Indies, and certain districts of Africa produce this banana flour, some of them for export trade.

Certain types of bananas, writes the Canadian Trade Commissioner in Netherlands India, are better suited to the manufacture of flour than others. In Netherlands India, the two varieties with the best yield are plang saoken and pirang radja. The fruit is taken when it is about three-quarters ripe, and before the starch has been transformed into sugar. The bananas are chipped and shredded, and then dried in the sun, the drying being greatly into flour. Care must be taken that the fruit does not come into contact with any iron, as the tannin in the iron will discolor the flour.

Even under the best of conditions, the color is not particularly favorable, being somewhat gray, sometimes with a slightly pink sheen. The flour has no distinctive odor and very little taste, with a negligible sugar content, since the conversion process has not begun when the fruit is picked. Because it has been found easier to import the banana as chipped form than as flour, the practice in certain countries is to import the fruit in this form and mill locally.

In Germany fairly large quantities are used, principally in Hamburg, and in France the product is used for the manufacture of baby foods and advantageously employed as a breakfast food. On account of its digestibility, it would appear to be a market for the preparation of certain products, and efforts towards that end are being made. Although it may be a very long time before banana flour could have any appreciable effect on Canadian flour—if, indeed, at least the Dominion on the trend of the manufacture of banana flour should be noted.

Ways and Means Must Be Found To Rehabilitate Farming In The West, Making It More Profitable

Hon. John Bracken takes a broader grasp of the problem of restorative conservation in Western Canada. Speaking before the Canadian Club in Toronto, the Manitoba premier reviews the "fourfold plan" to which he has given so much attention, and presents the whole question as a challenge to the nation.

Mr. Bracken is a pioneer among the advocates of conservation measures of a type necessary to improve conditions in the prairie section. He emphasizes in his program the need for reclamation of drought-stricken lands; rehabilitation of distressed farmers in suitable areas; broad conservation proposals; and methods of handling of resources. He sees, as well, a need for insurance that will provide against lack of feed seed and credit in drought periods.

Premier Bracken is right in saying that the question is "a challenge to the practical wisdom of this generation." But there will probably be dissent from the view that "the problem is no longer one for individual enterprise" to be met by "collective action." Just what part should be federal intervention in such matters, save in an advisory sense, is not clear. Dependable research and the help of skilled technicians should be available, of course. But in the correcting of economic maladjustments arising from land tenure, it is difficult to see why each local government should not undertake to deal with its own problems—a practice which it has special knowledge. Manifestly, the expenditure of federal funds on the "conservation" projects in the west could be no more justified than a similar Ottawa outlay in Ontario. It won't do to regard "transplanting" of families as part of a forestry policy in Canada. Some provinces has its own taxing and borrowing powers, which will yield ample ratio to the wisdom of their administration. Here is one route to the dividend-paying basis. The plan foresees as a consequence of an intelligent reshaping of policies having to do with land economics.

Proposals looking to re-establishment of farmers in suitable districts are common to the heart of the whole drouth-area problem. Large-scale enterprises, it is true, have been undertaken. Federally, across the line by Secretary of Agriculture Wallace. He has sent a send for the withdrawal of some 25,000,000 acres of submarginal land from cultivation. But Canada has not so far been impressed with the necessity of planning into unprecedented federal spending in the realm of private enterprise, either of field or factory.

President Roosevelt's pet project for the planting of a shelter belt through the Great Plains from the Dakotas to the gulf has not commended itself to Controller-General McCarl as a bona fide relief measure. Something illusory about it. Even for its moisture-inducing agency. In the Canadian west the local shelter belts have brought many benefits, and there is every reason why planting should go on vigorously under direction of provincial departments, with, of course, the counsel and cooperation of the federal department's technicians.

The dry-farming problem was accustomed but manner by the great dust storms, in which top soil was borne in some cases in great clouds from the western States out over the Atlantic. Close students of the situation reviews the line have been advocating widely the return of dry-farming areas to grass and ranching, same where irrigation is possible.

"Where you begin to have shelter belts, terraced fields, artificial waterholes," remarks one commentator, "you are approaching an agriculture that is fundamentally conservative, where pleasantness of life and a traditional decent use of the land are beginning to be more important than snatching a quick fortune and moving to southern California."

Premier Bracken envisages clearly these ideals. With such dynamic leadership as his, the governments of the prairie provinces have all the ways and means to introduce for themselves economic measures under which life on the prairie farm will become more comfortable and more profitable.

Vagaries Of The Weather

Many Factors Seem To Enter Into Climatic Conditions

Everyone who remembers his geography lessons will know that the arm hemisphere it gets colder as you go northward and warmer as you go southward must be frequently puzzled by the weather reports from the different parts of this continent. For example, on December 11th temperatures in Southern degrees below zero were reported from New York State, seventeen below from Iowa and sixteen from Maryland. On the same day temperatures at Dawson, Yukon, reached thirty degrees above; Simpson, in the Northwest Territories, was down to the heart of the whole Arctic area, Edmonton, Alberta, forty above; Calgary, fifty above; Lethbridge, fifty-six above; Medicine Hat, forty-six above; at Swift Current, the temperature was thirty above zero, and the lowest point during the night was twenty degrees with a shower of hail and words. Lee, who had been sent to straighten up the stables, came back thoughtful.

"Your darned saddle was all over the place, Dure," he said. "I shifted it to another peg." He whispered something to Baines that made him look askance at Stone and presently a roar from the ranch-house brought him to the door. It was Crewe shouting for him.

"You, Stone," he shouted. "Mr. Carr wants to see you right away."

Stone stood up the slope. Crewe met him with a grave face and motioned to a chair while old Carr fretted and fumed across the desk.

"Sit down, Stone. . . ." Carr eyed him balefully for a moment. "Then if you can pay my pal roll on trust," he said. "I didn't know a damned thing about you. I didn't ask for reference. Look at this. . . ."

He flung on the table the little red notebook that Stone had picked up after Crewe and Gray had their setto. Stone took it and examined it carefully. He knew it had been in his saddle-bags two hours before. It ought to be there now. But what did this cut about a notebook that didn't even belong to him? Carr went on and talked himself into wrath as soon do.

"Lee shifted your saddle-bags tonight and that book fell out," he said. "Where'd you get it?"

"It belongs to old man Kane . . ." began Stone.

"I know that. I know, too, that Kane is being financed by Dustin of the Broken Spur. You can't carry water on both shoulders, Stone. If you run with Kane, you can't trail with us. What have you got to do with Dustin of the Broken Spur? Have you lied to me?"

"You see, Stone," said Crewe amicably, "we know old Kane. He's a harmless old geezer cut adrift here tryin' to make a livin' in the hills for twenty years. The only thing against him is that he's been mixed up with Dustin. If you're mixed up with Kane . . ."

"Wait a minute. I'll show you just how much I'm mixed up with Kane and Dustin." Stone thrust a hand into his left pocket, pulled out an envelope and flung it before Carr. The old rancher opened it and read and his eyes bulged.

"By God," he said sharply. "This letter is to me from my partner, Gene's Keene. . . . Where'd you get this?" he demanded sharply. "If you had this letter of introduction from my partner, why didn't you give it to us instead of lying?"

"It's a letter recommending me for a job," said Stone coolly. "I got the job so I didn't need the letter. If you don't want me the job, I'd have given you the letter."

"We've been tryin' for a long time to find young Keene," said Crewe, "but we've been able to get his address. Can you give it to us?"

"I've. I can tell you where to reach him. If you'll send them this and I'll send him a wire that'll bring him here sure. In fact . . ."

Premier Bracken envisages clearly these ideals. With such dynamic leadership as his, the governments of the prairie provinces have all the ways and means to introduce for themselves economic measures under which life on the prairie farm will become more comfortable and more profitable.

"You'd have saved time an' trouble If you'd shot 'em right then," he said. "Of course you realize that it'll come out in that. They'll lay for you in such a way that you'll have to do your shootin' in self-defense. . . . Only they'll make it look like it ain't self-defense Why didn't you make just one fog the other? Then it'd have been a mutual killin'."

"I didn't think of it," said Stone frankly. "I was so damn eager to see the Dustin outfit get theirs. I couldn't wait."

"Well, you've done it now," said Crewe, "and you've got to stand by it. You're a man, and a man can't run from himself and hope to escape. Just why you should be federal intervention in such matters, save in an advisory sense, is not clear. Dependable research and the help of skilled technicians should be available, of course. But in the correcting of economic maladjustments arising from land tenure, it is difficult to see why each local government should not undertake to deal with its own problems—a practice which it has special knowledge. FORT SASKATCHEWAN RECORD
Published every Wednesday
Gordon Neale, Editor & Publisher.

WEDNESDAY, DEC. 20th, 1934

FOR SALE

—Pure-bred Yorshire Boar, two years old. Apply I. W. Frame, Gibbons.

For Sale—Attwater Kent 5 Tube Radio. Cheap. Ed. Barnett.

—Missing—Police pup 8 months old. If whereabouts known kindly phone 711.

WANTED

—3 Barreled Shotgun and rifle combination hammerless. Will pay cash or trade Winchester pump gun.
Apply Box 34, Fort Sask.

The United Church W. A. will hold their monthly meeting at the home of Mrs. Carl McKenzie on Wednesday afternoon, January 2nd at 2 p.m.

MOTOR VEHICLE LICENSES

Announcing reduction in fees effective January 1, 1935. Reduced fees for lower priced passenger cars will be charged as follows:

Not exceeding 100 inch Wheelbase	$10.00
Exceeding 100 inch up to 105 inch Wheelbase	$12.50
Exceeding 105 inch up to 110 inch Wheelbase	$15.00
Exceeding 110 inch up to 115 inch Wheelbase	$20.00

The fee on all cars exceeding 115 inch Wheelbase will be the same as in former years.

A reduction of $1.50 will also be made in the fees for models made eight years previous to January 1 of the current license year, on those cars with Wheelbase of 120 inches or less.

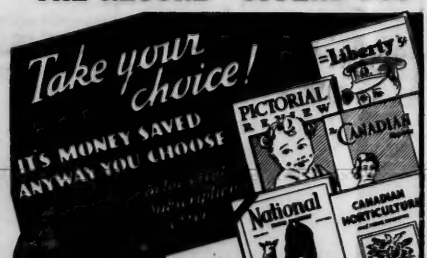
All Fees Due and Payable January 1, 1935

THOSE OPERATING CARS AFTER JANUARY 15, 1935 WITHOUT LICENSES WILL BE LIABLE FOR PROSECUTION.

GOVERNMENT OF ALBERTA

HON. R. G. REID, Provincial Secretary
E. TROWBRIDGE, Deputy Prov. Secretary.

"THE RECORD" OFFERS YOU



Think what this wonderful offer will mean in enjoyment throughout the whole year for yourself and your family. Magazines of your own choice and this newspaper, packed with stories, timely articles, helpful departments and colorful illustrations. Now is your chance.

Our Guarantee to You!
This wonderful offer is available to old and new subscribers to this newspaper. We guarantee the fulfillment of all magazine subscriptions and you have positive assurance that this generous offer is exactly as represented. If you are at present a subscriber to any of these magazines your time will be extended.

MAIL THIS COUPON TODAY

- ☐ Liberty Magazine (52 issues) $2.00
- ☐ Pictorial Review ... 1.50
- ☐ Canadian Magazine 1.50
- ☐ National Home Monthly 1.50
- ☐ Canadian Horticulture & Home Magazine 1.50

THIS NEWSPAPER **$2.50**

Please clip list of Magazines after checking Publications desired. Fill out coupon carefully.

Gentlemen: I enclose $..... Please send me the magazines checked with a year's subscription to your newspaper.

NAME .....
STREET OR R.R. .....
TOWN AND PROVINCE .....

Choose any Two or Three of the above National Magazines and send coupon with $2.50 to "The Record" office. Each of your choice and "The Record" will come to you regularly for one year. Subscribers who are pair in advance will have their labels advanced 1 year. A chance of a life time.

HERE IT IS! SOMETHING FOR NOTHING
